The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines
We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute
The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library’s activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Aug. 12. Flambeau River--St. Croix Falls, Wis

Aug. 13. St. Croix Falls--Red Wing--Rumbold--
Rochester--Winona, Minn.

Aug. 14. Winona, Minn.--La Crosse (down Miss. R. to
1476) -- Madison, Wis.
Aug 12.

Leaving the Flambeau River.

High ridge west of the Flambeau are maple-birchwood, with lot of oak; some elm in trees, an oee. White ash & red oak. No hemlock in this community except as we approach a pine-tamarack flat. (A pinedon maple-birchwood area was crossed on Aug 10. on way to the Flambeau.)

About 12 m. along on E. came down Stillwater ridge, extensive loose sand to west!
The loaf included:
- 1 1/2 cups flour
- 2 1/2 cups milk
- 1 cup sugar
- 1/4 cup butter
- 1 egg
- 1 teaspoon baking powder
- 1/2 teaspoon salt

Instructions:
1. Preheat oven to 375°F.
2. In a large bowl, combine flour, milk, sugar, butter, egg, baking powder, and salt.
3. Mix well until a dough forms.
4. Shape into a loaf and place in a greased loaf pan.
5. Bake for 30-35 minutes or until a toothpick inserted in the center comes out clean.
6. Let cool in the pan for 5 minutes, then remove to a wire rack to cool completely.

Enjoy your delicious homemade bread!
Came over into some small & 1 red maple with the vines completed

* Spent time working with Mr. Frank in Jared's garden.

Sand Lake - good stand of red pine
Oak woods - red, white & bur. Aspect totally unlike anything found there. Some balsam fir with the oak.

* Eagles scaring

just W of Stone Lake (shetong)

E. G. Spooner 9-21-2

(note made: red balsam, bur, sugar maple, black cherry, aspen, & jack pine, entire deck, hell & hallways, paneled woodwork, gravel in the lofts, with some in the floor. Some sills wood with the bark. Aspens around)
Nearly big trees, ears of red oak, bare scattered elm.

Old white hills, 30 ft. times taller as the oaks in the oak woods.

White oak mixed with the others, 12 ft. few fir, firches on

red pine, white pine.

Jack pine.

Euc. nyssa, Chance log.

This could be called a maple-basswood community although not really
primary there are a few good-sized
trees in the large
populations of maple and
spruce. More
shade from these
Aspens, etc. not as
humid as some of the
south.
Oak woods come
much of the slopes of
the hills for 5 miles
as we go down toward
Virginia.

Looking across
valley (to northern slope)
unlike seems to be
mostly oak (lots of birch
old) mostly like for
maple in pines
on north slope.

Winona, Minn.
