The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines
We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute
The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library’s activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Hopkinsville - Crossville, Tennesse

Aug. 27

On the road with large trees on 41 W. of the road. Got a good understanding with the mail man, on the road. Took a right, 3 miles, about 10 miles. (8-27-39)

Just outside town, free pastures, very large trees. Goes down into ravine (also oak).

At Clarksville, on marl slope W of Red.

Large trees.

A of J. C. 76. Beach in the fence.

Red - oak - winter flowering plants - tulip

Quick in midst oat in places, as well as with 2, wo.

Below (2) of Red on limestone slope. About one or two small ledges, and rocks. No much bed (not a lot clay or stone).
Cascia (p. 1)
Red alders on Iliff's Creek 25
