The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines
We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute
The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library’s activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

See note book I
Dear Alice,

I hope this letter finds you well. I've been meaning to write for a while, but life has been keeping me busy.

The summer has been pleasant so far, with plenty of outdoor activities and good weather. I've been spending most of my time in the garden, tending to my plants and experimenting with different techniques.

I still have a few pages of notes from my botanical studies, which I'm trying to review. I think I might have missed something important, so I'm trying to focus on my work.

I'm planning to start a new project soon, which I'm really excited about. I think it will be challenging, but I'm looking forward to the experience.

How are you doing? I'm sure you have a lot of interesting things to tell me about your life.

Take care,

Best,

[Signature]

P.S. I've been thinking about you a lot lately. I hope you're doing well.
