Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

ESCUELA AGRICOLA PANAMERICANA

APAR' 93

TEGUCIGALPA, HONDURAS

Antigua, Guatemala, 9 Feb 196 0

Rtitor, Agricultura de las Americas, 1014 Wyandotte, Kansas City 5, Mo.

Sir:

Through your courtesy I am receiving and enjoying Agricultura de las Americas. Recently I made a horticultural tour of southern Florida, where I visited my old friend and colleague, Dr R V Allison at the Everglades Experiment Station. He is much interested in tropical America and collaborated my years ago with the Old Master, Hugh H. Bennett, in the preparation of the "Soils of Cuba".

Dr Allison would like very much to be put on your mailing list and I am sure it would be worth your while to send the magazine to him regularly. His address is: Dr R V Allison, Everglades Experiment Station, Belle Glade, Florida.

Sincerely,

Wilson Popence Director Emeritus Antigua, Guatemala, 23 August 1960

Agricultura de las Americas, 1014 Wyandotte St, Kansas City, Mo.

G ntlemen:

I can assure you that it will be worth while for you to put on your list of subscribers (without expense to him of course)

Ing. don Luis Sarasola, Administrador, Rancho California, Almuñecar (Granada) ESPAÑA

Sr Sarasola is one of the most active horticultusists in southern Spain. I spent most of the year 1958 at his place and know what he is doing.

Sincerely,

Wilson Popence Director Emeritus Editor, American Men of Science, Tempe, Arizona.

Sir:

The copy of proposed biography for American Men of Science is not adequate. I give below what I think should be used:

POPENOE, DR. WILSON. Antigua, Guatemala. BOTANY. Topeka, Kansas, March 9 1892. married 23, 39, children 5. Pomonal College 10-11. Hon D.Sc., Universidad de San Marcos, Peru, 25; Pomona College 47. University of Florida 50. Agricultural Explorer, U S Dept of Agriculture, 1913-1925. Director of Tropical Research, United Fruit Company , 3211. Director Pan American School of Agriculture, 1942-57. Retired; horticultural consultant for various tropical American countries.

Antigua, Guatemala July 23, 1961

American Security and Trust Company 15th and Pennsylvania Avenue N.W. Washington 13, D.C.

Gentlemen:

For some years my former wife and myself carried a joint account with you, number of which is shown on enclosed card. My wife, Helen B. Popenoe, died on 24th March last and I wish to replace her in the joint account by my son Hugh Popenoe, who already holds a checking account at your bank, hence you have his signature in your files.

I do not know just how this matter should be handled to avoid confusing his personal account with our joint account.

Perhaps the fact that you already have his signature on file is sufficient. If not, please advise me what should be done to have him replace Helen B. Popenoe in the joint account No. 600 53 766 R.

Sincerely,

Wilson Popenoe

Antigua, Guatemala July 29, 1961

Mr. Paul J. Bisset Assistant Treasurer American Security & Trust Company 15th Street and Pennsylvania Ave., N.W. Washington 13, D.C.

Dear Mr. Bisset:

Thanks for your letter of 26 July, in connection with removal of Helen B. Popenoe's name from our joint account, replacing it with that of my son Hugh Popenoe. In accordance with your instructions, Hugh has added the word "Special" following his signature, and will do this on all transactions pertaining to this account.

Enclosed you will find the cards covering the new account. Please send my new plastic deposit plate to: 1722-A NW 2nd Ave., Gainesville, Florida, where I shall be for the next few months, and do the same with our supply of imprinted checks which we would like to have in the flat, not folded, form. I am enclosing a sample check such as we have been using. With elimination of Helen B. Popenoe and substitution of Hugh Popenoe in the upper left-hand corner, this type of check should do nicely for our new account.

Sincerely yours,

Wilson Popence

Antigua, Guatemala, Central America 3 February 1967

American Security and Trust Co. We shington D C 20013. USA

Gentlemen:

Annually, at about this time, I have to make out a new power of attorney so you can deposit by Social Security checks. You have been sending the necessary form to my Florida address, which is 1722 NW 2nd Avenue, Gainesville. Will you kindly send me the necessary form to my Guatemalan address, which is simply Antigua, Guatemala, C.A., The American Consul in Guatemala City can, I am sure, do what is required in the States by a Notary Public.

Furthermore, will you please send my monthly statements - Wilson Popence or Huch PopencenSpecial - to Antigua, Guatemala, C.A. instead of Gainesville, Florida, until further notice? This should not apply to deposit slips - just monthly statements with cancelled checks. You will of course need to charge me for airmail, which is of course in order.

Sincerely,

Wilson Papence

KISSIMMEE, FLORIDA, 32741

American Security and Trust Company Washington D C

Gentlemen:

Some weeks ago I wrote you, asking that you send monthly statements of my checking account together with cancelled checks to me at Antigua, Guatemala, instead of the address at the head of this letter. Deposit slips could still be mailed to Gainesville.

In this same letter advised that the power of attorney in connection with my Social Security payments would be notaried by the American Consul in Guatemala City.

You have switched the monthly statements to Guatemala, but send them in care of the American Consul which is going to cause confusion as I do not receive mail at that address. Kindly correct this mistake, and send the statements to me as follows:

Wilson Popence or Hugh Popence Special or surv. Antigua, GUATEMALA, Central America.

Thank you.

Wilson Popence

Antigua, Guatemala, C.A. 27 November 1968

American Security and Trust Co. Washington, 7 C

Gen+lemen:

Kindly send me, by AIR MAIL, one hundred checks like the enclosed sample. Postage should be charged to my account. In possible, I would like to have these checks with stubs attached for recording amounts, balance etc; I do not like the Check Register system which been supplied with checks made formume the past year or two.

Tincerely,

WILCON POPETOE

Address simply: Wilson Popence Antigua, Guatemala, C.A. Antigua, Guatemala, 14 October 1971

American Security and Trust Co Washington D C.

Gentlemen:

I enclose request for a new supply of checks. I believe you usually send 200 which is the number I would like. I am adding this note to the usual order form to ask that you please make certain the checks are sent by ATR MAIL, cost of which you will please charge to my account as usual.

Sincerely,

Wilson Popence

Late Charge (After Jan. 15)7	\$ 2.00	

WILSON FOFENCE DIR. EMERITUS ESCUELA AGRIGOLA PANAMERICANA ANTIGUA, GUATEMALA CENTRAL AMERICA

DEFERRED PAYMENT COPY

IMPORTANT: For identification and proper credit, please return this statement with your remittance. Make checks, drafts, or money orders payable (in U.S. dollars) to the American Society for Horticultural Science.

NOTE: ASHS dues include allocations for subscriptions to the Journal of the ASHS at \$15.00 per year and HortScience at \$12.00 per year; except that the rates are 50% less for Student and Emeritus Members, and Associate Members receive only HortScience.

1 Sustaining Members of ASHS receive both the Journal and HortScience, and membership in the International Society for Horticultural Science (ISHS).

²Active Members receive both the Journal and Hort Science.

3Student Members receive both the Journal and HortScience. Graduate Student Members must be certified annually by their major professor as being enrolled for at least 50% of a full academic schedule, for the year of membership, in an accredited university or college. Undergraduate Student Members must be certified by their department head or chairman to be in junior or senior standing and majoring in a field of agricultural or other science consistent with the purposes of the Society.

Graduate Student Status Certified by	¥60°
Undergraduate Student Status Certified by	1 1

4Associate Members receive HortScience but not the Journal; can serve on committees, and are encouraged to participate in annual meetings of the Society. However, they cannot hold elective office, cannot vote in the election of officers, and are not eligible for election as Fellows of the Society.

5Emeritus Membership: Retirees who have been (or were) Active Members of the Society for 10 years or more can elect Active Emeritus Membership at 50% the rate for Active Members if they wish to receive both the Journal and HortScience; or Emeritus Membership at 25% the rate for Active Members if they wish to receive only HortScience; and continue to enjoy all the other privileges of Active Membership.

6 Members of ASHS who wish to do so may remit an additional \$5.00 (or \$1.75 for Students) for their membership in the International Society for Horticultural Science; for transfer to ISHS Headquarters, The Hague, The Netherlands. ISHS members receive Chronica Horticulturae (three issues per year) and other privileges such as a discount on Acta Horticulturae and other special publications of the ISHS.

Tate Charge: Addressograph plates for current (1972) members who have not paid their membership dues for 1973 by January 15, or indicated their intent to pay (see below), will be dropped and they will not receive any issues of the Journal and/or HortScience for the year until dues are paid. The "Late Charge" is an equitable way to cover the extra cost incurred in removing and reinstating addressograph plates and in mailing back issues of publications to members who remit dues payments after January 15.

PLEASE NOTE: If your payment for 1973 membership dues must be delayed, please complete the statement below and return the FIRST NOTICE copy of this invoice before January 15, 1973, and attach the DEFERRED PAYMENT COPY when making payment (in which case your addressograph plate will not be pulled and the "Late Charge" will not apply):

I plan to continue my membership for 1973 (in the category checked above), and will send my dues payment by the following

G. F. Sprague Room 126, South Building Plant Industry Station Beltsville, Maryland Antigua, Guatemala, 14 April 1959

Dr Bruce Wallace, Secretary American Society of Naturalists Cold Spring Harbor, L.I. New York.

Dear Doctor Wallace:

The time seems to have arrived for me to resign from the American Society of Naturalists, of which I have been a member for 35 years or so. I became a member when I was an Agricultural Explorer for the U.S.Department of Agriculture. I came to tropical America in 1925, and from 1941 to 1957 I was Director of the school, a little sketch of which aderns this letterhead. I was retired in 1957 and am now on pension; I am continuing in horticultural work in tropical America but really have no reason longer to maintain my connection with the American Society of Naturalists.

Midressing you at Cold Spring Harbor reminds me of the old days when I went there to visit J.Ardmr Harris - with whom I worked one winter at Miami, Florida - and A.F.Blakeslee, who used to call me "classmate" because we received honorary doctorates from the University Mayor de San Marcos in Lima, Peru, at the same time. Crand scientists, both of those men.

Sincerely,

Wilson Popence Director Emeritus

AIR MAIL

October 7, 1959

Dr. Wilson Popence Antigua, Guatemala

Dear Doctor Popence:

We certainly do remember you here at Armstrong's and in fact hold you in high esteem.

We are enclosing a copy of our 1959 fruit tree catalog and also sending one to Dr. Justino de Azcarate.

Most of the trees and plants listed in this catalog will be available during our next shipping season, which begins in January. The few kinds which we will not have are marked out with a pen.

We believe that the Fundacion Eugenio Mendoza will be able to obtain an import permit from the Department of Agriculture in Caracas for fruit varieties we grow aside from citrus. We are required to present a copy of the permit to the Consul for Venezuela in Los Angeles at time of shipment.

We shall be glad to prepare a quotation for the Fundacion as soon as we receive a list of desired material.

Yours sincerely,

Roy Elliott

Dr. Wilson Popenoe c/o Rancho California Almuñecar (Granada) Spain

Dear Dr. Popence,

I truly appreciate very much your long and most interesting letter and report dated 13th October and, since I notice that you are about to start off on a tour of Spain and then may head west, I thought I ought at least to get this letter off to you by way of acknowledgment and a few comments because I can't make up my mind whether you are going to be back in Almuñecar before you go west or not. Anyway, here goes:

First I want to thank you for all the care in reporting on your observations of species and varietal performance in Spain during the time you have been there. What you report is about what we would expect from a country where very little has been done to standardize vegetable seed and the food processors are not numerous enough as to have automatically caused any standardization on the part of the suppliers.

We are doing business in markets which are in a great deal more elementary state than Spain and we have the same problem, i.e., they don't understand our talk of varieties, they have very few varieties by name of their own (as you say, "lettuce is lettuce") and it gives us a sort of an empty feeling when we realize how much time must pass before there is any appreciation of varieties, consistency in quality from year to year, etc., etc.

You are just the type of person we would love to have for a representative in every country because you understand seeds and what to do with them. You have no idea how difficult it is to get qualified representatives. Sometimes we can get a person who really has the energy to go out and make representations. He is frequently a real salesman but he may be quite shy of knowledge of the vegetable seed industry. Sometimes we will get a good Ph.D. in some phase of agriculture but he either won't have enough energy or commercial savvy to get out and do much business. Rare is the combination!

Asgrow Export Corporation, NEW HAVEN 2, CONN, U.S. A.

TO Dr. Wilson Popence DATED 28 October, 1958 PAGE 2

Spanish economics I think we understand. They certainly are conserving such few dollars as reside in their treasury of foreign reserves and probably this is aided by the comparative lack of demand for anything much better in the way of vegetable seed than they already have there. They could, of course, probably get in seed from some of the European countries. That is to say, their importers could perhaps get foreign exchange in French francs or Belgian francs more easily than in U.S. dollars — perhaps even Sterling more easily than dollars.

I don't know about other U.S. producers but what Asgrow has to offer principally is a degree of quality and consistency pretty well the result of demand on the part of the leading U.S. food processors such as Heinz, Campbell, Del Monte, Seabrook, Birds Eye, Green Giant and so on. These people want what they want and they also want it consistently and that is what we are producing. This quality is undoubtedly far higher than would be necessary to compete in the Spanish market, say, or for that matter a number of other foreign markets. Our costs, on the other hand, are hooked up to this type of quality and I am quite sure that in some markets we are at a disadvantage on price because the buyer is no-where near up to that point in quality and unquestionably doesn't appreciate it. If, for example, a good deal of research has been put into the development of a bush bean suitable for mechanical harvesting (a plant with characteristics of holding its pods high above the ground and with a concentrated pod set and maturity, etc.) then the farmer in some country who doesn't even know what mechanical harvesting is thinks the item is awfully high priced. And for him probably it is. But not for people who are in a high-cost labor market where they simply have to use mechanical harvesting equipment.

The things you say about Spain could just as well apply to Greece, Turkey and many of the eastern markets with which I am familiar. Israel is another thing. I'm awfully interested to know that you have been there and I agree with you that the people there are accomplishing wonders. While their quality leaves a good deal to be desired in many species, still they have a plan and an objective which is more than can be said of most of the markets surrounding them. And they have experts at work there, too, in our line as they do in practically every line of endeavor. It is a most remarkable social experiment, don't you think so?

Well look! — I note you are going back to Central America for a while and then you will be returning to Spain to work on that manual which you spoke of. Can't you go via New York and stop in and say "Hello"? I'm sure the people in our parent company would be delighted to meet you (and in the winter is the time when most of the executives are in the home office) and I and my small staff here would certainly like to have a day to spend with you discussing all these matters which we are mutually so interested in.

Asgrow Export Corporation, NEW HAVEN 2, CONN, U.S.A.

TO Dr. Wilson Popence
DATED 28 October, 1958
PAGE 3

Try to do it:

Meantime, you will be interested to know that a lot of our American varieties are being introduced into Italy, especially, and along the north shore of the African continent through our wholly-owned Italian subsidiary, Asgrow Italia, S.p.A. located in Lódi, about 35 kilometers southeast of Milano. And you know how this comes about? Italian contractors to the U.S. Army Quartermaster Corps are growing fresh vegetables for our Armed Forces in various locations throughout Europe and it amounts to quite considerable tonnage including such stuff as modern watermelon varieties, sweet corn varieties, lettuce, celery, cukes and so on —— an increasingly long list. Most interesting.

Try to stop in and see us one of these days.

Meantime, it's hardly necessary to wish you good luck because you are such an adaptable fellow and you are so interested in everything! I would surely like to meet you before you get bogged down in that manual in a delightful Spanish valley and never get out to the outside World again!

All the best:

Let us hear from you at your convenience!

And sing out when you need some samples!

Sincerely yours,

Kendall Redfield, President Asgrow Export Corporation

This quality is undoubtedly far higher than would be necessary to compete in the Spanish market, say, or for that matter a number of other foreign markets. Our costs, on the other hand, are hooked up to this type of quality and I am quite sure that in some markets we are at a disadvantage on price because the buyer is no-where near up to that point in quality and unquestionably doesn't appreciate it. If, for example, a good deal of research has been put into the development of a bush bean suitable for mechanical harvesting (a plant with characteristics of holding its pods high above the ground and with a concentrated pod set and maturity, etc.) then the farmer in some country who doesn't even know what mechanical harvesting is thinks the item is awfully high priced. And for him probably it is. But not for people who are in a high-cost labor market where they simply have to use mechanical harvesting equipment.

The things you say about Spain could just as well apply to Greece, Turkey and many of the eastern markets with which I am familiar. Israel is another thing. I'm awfully interested to know that you have been there and I agree with you that the people there are accomplishing wonders. While their quality leaves a good deal to be desired in many species, still they have a plan and an objective which is more than can be said of most of the markets surrounding them. And they have experts at work there, too, in our line as they do in practically every line of endeavor. It is a most remarkable social experiment, don't you think so?

Well look! — I note you are going back to Central America for a while and then you will be returning to Spain to work on that manual which you spoke of. Can't you go via New York and stop in and say "Hello"? I'm sure the people in our parent company would be delighted to meet you (and in the winter is the time when most of the executives are in the home office) and I and my small staff here would certainly like to have a day to spend with you discussing all these matters which we are mutually so interested in.

Dr. Wilson Popence 28 October, 1958

Try to do it!

Meantime, you will be interested to know that a lot of our American varieties are being introduced into Italy, especially, and along the north shore of the African continent through our wholly-owned Italian subsidiary, Asgrow Italia, S.p.A. located in Lodi, about 35 kilometers southeast of Milano. And you know how this comes about? Italian contractors to the U.S. Army Quartermaster Corps are growing fresh vegetables for our Armed Forces in various locations throughout Europe and it amounts to quite considerable tonnage including such stuff as modern watermelon varieties, sweet corn varieties, lettuce, celery, cukes and so on — an increasingly long list. Most interesting.

Try to stop in and see us one of these days.

Meantime, it's hardly necessary to wish you good luck because you are such an adaptable fellow and you are so interested in everything! I would surely like to meet you before you get bogged down in that manual in a delightful Spanish valley and never get out to the outside World again!

All the best:

Let us hear from you at your convenience:

And sing out when you need some samples!

Sincerely yours,

Kendall Redfield, President Asgrow Export Corporation

Re: Recommendation for Honorable Discharge

This letter is to advise you that your name has been submitted to the Naval Reserve Officer Disposition Board for consideration as to your retention in or discharge from the Naval Reserve in view of your having been on the Inactive Status List for three or more years.

The Board, after careful consideration of your permanent records in terms of the mobilization requirements of the Navy, has recommended that you be honorably discharged from the Naval Reserve.

However, before the Board's recommendation is acted upon, you are requested to review the options afforded you by the enclosed reply form and, if you desire, return the form to the Chief of Naval Personnel (Attention: Pers-B131) in time for it to be received in the Bureau within sixty days from the date of this letter.

In the absence of receipt of the reply form from you, or such other representation as you may care to make, the recommendation of the Naval Reserve Officer Disposition Board that you be discharged will be transmitted to the Secretary of the Navy. You are urged to give this letter your immediate attention since it is not legally possible to revoke or cancel an honorable discharge which has been validly issued.

Your attention is invited to the fact that officers who have completed twenty years of satisfactory Federal Service, and served on active duty during time of war may be eligible for transfer to the Retired List with pay at age sixty, if they so request. See the reverse side of the reply form for further information concerning eligibility for retirement with pay.

Your past loyal and honorable service is sincerely appreciated and your future interest in and support of the Naval Reserve is solicited.

By direction of the Chief of Naval Fersonnel.

Sincerely,

Recorder, Naval Reserve Officer Disposition Board

Doctor Wilson Popence Calle de la Nobleza No.2 Antigua Republic of Guatemala

Dear Doctor Popence,

In my capacity of President of the "Sociedad Hondureña de Orquideología", it gives me great pleasure to inform you that at the last Director's Meeting it was decided to name you:

MIEMBRO BENEMERITO

of the Society in recognition of your valuable contribution to the study of botany in Honduras.

In due course the Society will send you an appropriate certificate. I cannot promise to do this myself as I am leaving on the 29th of March on the termination of my mission.

You might be interested to know that Profesor Inis Landa and

Doctor Louis O Williams have been named in a similar capacity.

In communicating the above to you I wish to take advantage of the opportunity to congratulate you and to express my sincere good wishes.

Yours sincerely

L P F L'Estrange H M Ambassador

Digitized by Hunt Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh, PA

[Jan 1972]

It has given me much pleasure to read, in the Society's Newsletter Vol. 2 No 1, January 1972 that it has been decided to place a plaque at the base of the original Hass avocado tree at La Habra Heights. This has set me to thinking about the origin of that tree, and in view of the increasing importance of Hass, year after year, I would like to start the ball rolling, and see if we can bring together historical data regarding its origin - as has been done so effectively in the case of Fuerte.

Here is the way I remember the matter. I have always understood that Hass is a seedling of Dickinson. Is this correct? If so, we want to know the history of Dickinson, and this is the way I remember it.

I am not certain as to the year, but it must have been about 1911 or early 1912, -I feft California in July of that year with my brother Paul to go to Mesopotamia and North Africa and bring back young date palms, for planting in California, mainly the Coachella Valley. My father was head of the nursery called the West India Gardens, located on Calaveras street in Altadena. We had for several years been hunting for seedling avocadus which we thought worthy of commercial propagation; I had personally spent a lot of time hunting for them, all the way from Santa Barbara on the north to Long Beach, and Hollywood, and Monrovia, and Riverside and Santa Ana and Orange, - all these and probably a few other places. I don't recall them all at the moment and I made no written record of them.

One day father and I went over to Los Angeles, where he had heard of a tree in the dooryard of a Mrs. Dickinson. I don't remember the street address. We liked the looks of the fruit, and got some budwood from Mrs Dickinson which I grafted on Mexican-race seedlings.

Carnegie Mellon University, Pittsburgh, PA

in our nursery at Altadena.

100

0

When I wrote my Manual of Tropical and Subtropical Fruits at the end of the year 1919, Dickinson karkattained looked so promising that I included a description of it, along with several others of the Guatemalan race -, Blakeman, Lyon, Sharpless, Solano, Spinks, Taft and Taylor. At the foot of the description of Dickinson I noted: "Originated at Los Angeles, California. First propagated in 1912. Vigorous in growth and precocious in fruiting." I did not add that Mrs Dickinson had told my father (if I recall correctly) that her tree had been grown from a seed brought to her from Guatemala by someone whose name I did not put into the record - we were not very thorough incomes, a thing I have regretted all my life.

I KENERIE Wonder if anyone can add to this story of the background of Hass? If so, I hope he will send in a memofandum which
will supplement what I have written above, and correct any errors
if I am guilty of having made them. Doctor Coit wrote me a few years
ago that Hass has been successful in more parts of the world than any
other commercial avocado. I believe he is correct, and I think it
eminently worth while for the history of the variety (or cultivar, as
we have to call it today) be put on record in one of the Yearbooks.
In the first place, I think it will eliminate any doubt - if any
should ever arise - as to the racial background of Hass. If Dickinson
came from the Guatemalan highlands, as we have every reason to believe
it did, it was pure Guatemalan; and I dont believe there is the
slightest possibility that Hass, as a seedling of Dickinson, had any
but Guatemalan blood. I feel fretty sure there was no
ather auccade tree or the neighborhead brown

Digitized by Hunt Institute for Botanica Botumentation, reached the Dickenson to Carnegie Mellon University, Pittsburgh, PA

A few notes about Hass, away from its native home, may be of interest. I have seen it in enough countries to do a good job on this, but I add these notes in the hope that makes growers around the world might give us more items. Here in Central America Hass not been planted very widely or very extensively as yet. I am afraid to push it too hard, because in Honduras, at 6000 fruits, the fruits are so "warty" they are not attractive. This I have observed at the only point in that country where I have seen Hass in fruit - ohr Escuela Agricola Panamericana. In Spain it is the avocado par excellence; a beautiful small fruit, not too rough on the surragex plosey dark purple surface, and of unsurpassed in quality.

ORGANIZED IN 1915

CALIFORNIA AVOCADO SOCIETY

P.O. Box 5062 • BROOKHURST CENTER STATION • ANAHEIM, CA. 92804 Telephone (714) 828-7580

NEWSLETTER VOL. 2 NO. 1 JANUARY 1972

DEAR SOCIETY MEMBER:

A NEW YEAR AND A NEW HOME!

The Society starts 1972 with a new pad....our new address is: P.O. Box 5062, Brookhurst Center Station, Anaheim, California, Zip 92804. We've been holding off sending this second Newsletter until we could get the new Postoffice Box Number. Incidentally, don't ever try to get that job done when the postoffice guys and gals are busy with the Christmas rush...impossible! It took us until the 3rd of January!

THE ANNUAL MEETING....HOW CAN WE TOP IT NEXT YEAR?

The capacity crowd that attended the 1971 Annual Meeting of the Society were treated to an outstanding event. Dr. Emil Mrak, Chancellor-Emeritus, University of California, Davis, accomplished speaker, with a thoughtful message on Environment and Ecology. Meeting was covered by KFI's Environmental Reporter, Ron McCoy. There were two Society Awards of Honor this year, both richly deserved: U.C.L.A.'s Ted Frolich, and Society Director Bill Catlin. Only criticism we heard was: "This Don The Beachcomber Restaurant is situated in a too beautiful spot....I had to tear my attention away from those gorgeous sailboats in the Marina Del Rey, and come back to the business at hand, that great talk by Dr. Mrak!"

PRODUCTION AMENDMENT TO THE MARKETING ORDER

The votes are in from the California Industry and the answer is "Yes". By a good majority, growers and handlers have voted to assess themselves for production research as part of the California Marketing order. This means a more intensive campaign against Root Rot with everyone contributing his fair share in the fight.

Your Society Board has been working on a project to insure that the first Hass Avocado Tree will be given suitable recognition as a California Historical Landmark. Plans are now complete to erect a Plaque at the tree in La Habra Heights, reading as follows:

"THE ORIGINAL HASS AVOCADO TREE"

"Through its progeny this tree, planted in 1926 by Rudolph G. Hass, has played an important role in the development of the California Avocado Industry.

In appreciation, this Plaque is placed here by the California Avocado Society, in cooperation with the California Historical Society."

1972

WE HAD A VISITOR FROM DOWN UNDER!

One of the many pleasant things connected with this job is being contacted by distinquished visitors from overseas, interested in the California avocado-growing areas. In December we had the pleasure of escorting Australian avocado grower Frank McKay on a one-day trip to Santa Barbara County. Frank is the Manager of "Wyndhaven" Avocado Ranch, Tamborine Mountain, in Queeensland, a farm own by Society member Mrs. Hugh Glynn-Connolly. Although we list her as "Mrs.", I learned from Frank that she is actually a medical doctor in the city of Melbourne, one of its outstanding anesthesiologists. Frank proved to be a most affable guest, and expressed much appreciation to our two Santa Barbara County Avocado Tour Guies...Bill Catlin and Stan Shepard, both of Carpinteria. I share that appreciation, gentlemen, and thank you both!

SPEAKING OF OVERSEAS VISITORS!

We're all eagerly anticipating the mid-February visit of Zwi Shachar, one of our Society Directors-At-Large, who will be coming in from Israel. It will not be his first trip to the States, but it has been some years since he was last here. We'll be working in cooperation with San Diego County Farm Advisor Don Gustafson to help make his trip pleasant and informative.

ALMOST TIME FOR THE 1971-72 SOCIETY YEARBOOK!

It'll be a good one, we think, with articles contributed from Israel and Australia, as well as outstanding reports from our experts here in California. Also one from Florida this year. We're hopeful it will be off the press and heading toward you before February 1st.

MEET OUR NEW DIRECTOR-AT-LARGE!

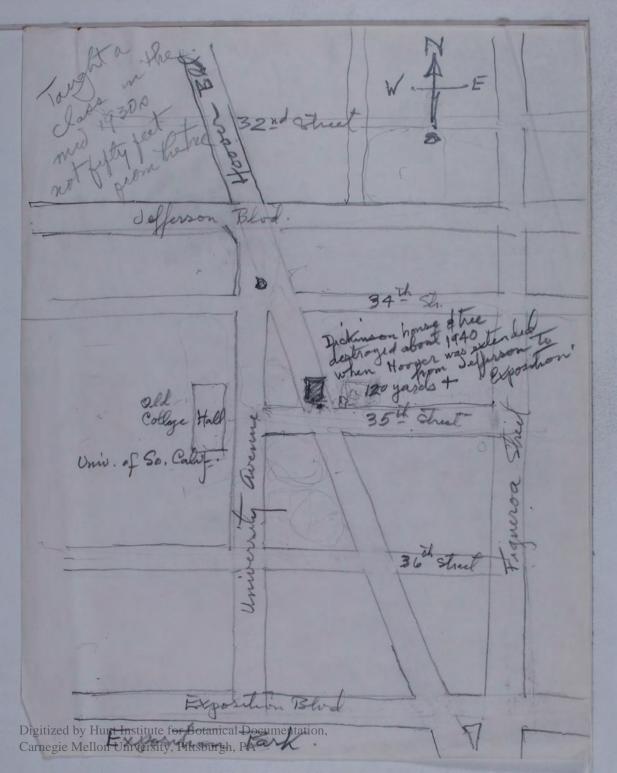

He's Ing. Salvador Sanchez Colin, Director of the Inst. Mexicano del Cafe, Mexico City. Senor Colin replaces Senor Enrique Costes, of Puebla, Mexico, who resigned his Directorship with the Society after several years of outstanding and valuable service. We feel most fortunate in getting Senor Colin's consent to accept the position with our Board. He is one of the top Agricultural leaders in Mexico, and carries one of the heaviest of research responsibilities in all of that great county!

PARDON ME....ABOUT MONEY

We hate to bring it up, but even a non-profit organization such as ours does need money to operate. A worrisome number of members have not yet paid their 1971 dues....with 1972's now dues. The Society's Board has instructed me to notify all members that no yearbooks will be mailed to dues-delinquent members of the Society. Also, the Board voted unanimously to charge \$12.00 for each current yearbook to all non-members (including dues-delinquent members.) This \$12.00 price for the yearbooks will be in effect until the following yearbook is released, at which time the charge will be \$6.00 for another year, and finally, the third year after publication, and henceforth, the book will be sold for \$2.50 per copy.

Exec. Sec. - Treasurer California Avocado Society P.O. Box 5062

Brookhurst Center Station Anaheim, California 92804

ORGANIZED IN 1915

CALIFORNIA AVOCADO SOCIETY

P.O. Box 5062 • BROOKHURST CENTER STATION • ANAHEIM, CA. 92804 Telephone (714) 828-7580

DEAR SOCIETY MEMBER:

NEWSLETTER VOL. 2 NO. 2 APRIL 1972

THE YEARBOOK (1971-72) FINALLY !

By now the new Society Yearbook has undoubtedly reached you and I hope you are finding it an informative publication. We have had some good comments on it and are only sorry that unavoidable delays in printing and binding made it so late in getting to you.

Then too, after mailing about one-third of the books, we discovered that there were a few copies that had been bound incorrectly, which necessitated checking every copy (about 700), before it was mailed. If you were one of those who received an incomplete, or incorrectly bound copy of the Society Yearbook, let us know at the above address and we'll send you another, and correct copy.

OOPS :

Speaking of errors, one in the Yearbook that IS our fault involves the financial statement on page 10. The last item under "Expenditures During Period," should read "U.C.R. Grant-in-Aid-root rot research..\$7000", instead of showing it as a Grant-in-Aid to U.C.L.A. The check was made out to "Regents, University of California," but of course it's important to be correct as to which campus agricultural activity was using the money. That 7000 dollar sum was the second one in the calendar year 1971, and it completed the \$14,000 pledged from the Industry Research Fund to Dr. Zentmyers' search for root rot resistant varieties of avocados in Mexico and Central America

DIRECTOR-AT-LARGE VISITS FROM ISRAEL

Our March Director's meeting was made memorable by the visit of Zwi Shachar from Israel. Zwi heads up the Fruit Marketing Board of Israel, and is a producer as well, so his trip of inquiry to Southern California was a busy one, observing not only our production methods and research, but marketing as well.

Shachar told the Directors that although Israel has about 3000 acres of producing avocados at this time, it will be doubled shortly, when young plantings come into production. He told us Israeli avocado standards are much higher than California's, and said much fruit he had observed in our supermarkets would be considered culls in Israel. Their goal is to increase per capita avocado consumption in Israel to between 2½ and 3 pounds, and they have ambitious plans for marketing in Europe with improved marketing techniques. It seems that holding neighboring hostile countries at bay is not the only thing the Israelis are good at!

THE ORIGINAL HASS TREE IN LA HABRA

We're getting closer to placing that important plaque at the site of the first Hass Avocado Tree in La Habra Heights! The California Historical Society has indicated a willingness to cooperate in the project, and of course recognition of the site's importance by that prestigious organization adds stature to the whole project. We'll keep you informed when the plaque has been placed.

THIS YEARS' ANNUAL MEETING

Holding to our policy of having the meeting in either the North or South, in alternate years, the Board this year has chosen as the site of the 1972 annual meeting the beautiful Pala Mesa Country Club, on Highway 395, near Fallbrook. This will be a repeat visit to that spot, which hosted the Society's Annual Meeting in 1970. The date this year is Saturday, October 14, 1972, and it's not too early to make at least some preliminary plans to attend. The committee in charge say it will be an outstanding affair:

Digitized by Hunt Institute for Botanical Documentation,

Carnegie Mellon University, Pittsburgh, PA

WE'RE STILL IN BUSINESS !

Although production research funds will henceforth be collected and allocated by the Production Research Committee of the California Avocado Advisory Board, don't think for a moment that the importance of your California Avocado Society has been negated. Not at all! Part of the Society's dues are still allocated to a research fund, and the Society will disburse these funds whenever it feels the entire California Avocado Industry can be benefitted thereby. We'll still continue to publish the yearbook, aid research on variety improvement, and in general cooperate in projects helpful to the industry whenever and wherever possible. The Society will continue to coordinate the Avocado Industry Research Committee meeting in February each year at the University of California, Riverside.

In addition, through the Nurserymen's Section of the Society, an all-important indexing program has been started that has as its aim, the eventual eradication of Sun-Blotch Disease.

TED FROLICH'S ETIOLATION WORK AT U.C.L.A.

For some months now Ted Frolich has been carrying on a very important research project at U.C.L.A. The Society's Board was concerned that this project would be dropped unless it was given financial aid. We therefore pledged \$300 per month, for a period of six months to help, and as a result, the whole project will be carried to completion at the University of California at Riverside. This money has been withdrawn from the Industry Research Fund, making a total of \$15,000 thus far allocated to the University of California from that fund...money very well spent, in our opinion.

LEN FRANCIS SPEAKING

Through his Citrus and Avocado Newsletter, Farm Advisor Leonard Francis is advising that for growers who have recently planted citrus or avocado trees, it is well to provide some sort of wrap to protect them from the sun and rodents. Some nurseries provide wrap with their trees. There are several commercial brands of tree wraps available if the grower must provide his own.

Rubber newspaper mats make excellent tree protectors when attached to a stake and driven into the ground alongside the tree.

It is important to leave 2 or 3 inches between the bottom edge of the mat and the soil to allow for air circulation. Temperatures of 120 degrees have been recorded inside cylinders with no ventilation, and that's enough to severely damage a young tree.

LET'S TAKE A TRIP!

For our Southern California members who are interested in the San Joaquin Valley and San Luis Obispo area avocado development, there will be a great opportunity to check on this shortly. The California Avocado Society, in conjunction with the Farm Bureau and the University's Agricultural Extension Service, has made preliminary plans for a tour of that area. It would be a two-day tour, in early October, just preceding the annual meeting of the Society, and timed to observe fruit on the trees in the San Joaquin Valley, and fruit set on the Hass trees in the San Luis Obispo area. Let us know if you're interested.

James L. Todd

SU ESCRITO DE

NUESTRA REFERENCIA 217-03 august 19th,1958

Dear Mister Popence:

Thank you for your kind letter of august 10 and for the enclosed form I asked you to sign.

Referring to your several questions we beg to tell you:

- 1. The car will be a 1959 model. The factory starts with the new models every year on august 1st. According to the last news we have here in Guatemala, there will be no special difference between the 1959 and 1958 models besides a few changes in colors.
- 2. The factory promised us delivery of a gray-blue or similar color.
- 3. The car will be the De Luxe export model with solid top and is not fitted with radio.
- 4. The extras really worth while are "high bumpers", "lock in the engine compartment" and "automatic directional lights". But all these extras are already included in the amount you paid us.

I wish you a further pleasant trip in Europe and remain

Sincerely Hubert Wiese

425 N. MICHIGAN AVENUE . CHICAGO 11, ILLINOIS

July 10 1958

Mr. Wilson Popenoe c/o Martha Sussmann Embassy of the United States of America Madrid, Spain

Dear Mr. Popence:

We have heard from our adviser about your comments (May 26) in regard to our coverage of tropical and subtropical fruits. She expresses gratitude for these, as do I, and we are happy to adopt your suggestions, as follows. The underscored titles are new entries or revisions of old articles, and we would be happy to have you revise or write all of them. If you are able to do so, please let me know and we will send you paste-ups of the old articles.

CASHEW -- This article has already been scheduled for revision, and a contributor has been asked to do it.

CHERIMOYA -- We are scheduling this for revision and expansion to 300 words.

DATE PALM -- This has already been scheduled for revision and a contributor asked.

 $\frac{\text{LOQUAT}}{250 \text{ words}}$. We are scheduling this for revision and expansion to

GUAVA -- We are scheduling this for revision at 300 words.

✓ LITCHEE -- We are scheduling this for revision at 300 words.

√ SAPODILLA -- We are scheduling this as a new entry at 250 words.

JAPANESE PERSIMMON -- The article PERSIMMON has just been revised and the contributor has covered the Japanese persimmon quite thoroughly.

 $\frac{\text{POMEGRANATE}}{\text{size, }550\text{ words.}}$ — We are scheduling this for revision at its present

Digitized by Hunt Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh, PA

ERFADFRUIT -- We have a recently revised article on this, 580 words.

DURIAN -- We have a recently revised entry, 260 words.

WHITE SAPOTE -- We are scheduling a new entry at 150 words.

QUEENSLAND NUT -- We are scheduling a new entry at 150 words.

TAMARIND -- We have an article on this, 150 words.

Again, my thanks for your interest and for your most valuable suggestions.

The standard Britannica rate of payment -- two cents per word for new copy and \$5 per type page read by not substantially revised-will apply. The deadline for this copy is November 1, 1958.

We shall look forward to hearing from you at your earliest convenience.

Sincerely yours,

Y V. Flody

Mr. Wilson Popenoe c/o Martha Sussman Embassy of the United States of America Madrid, Spain

Dear Mr. Popenoe:

Thank you for your letter of August 16 enclosing your revisions of the articles GUAVA and CHERIMOYA for the Encyclopaedia Britannica.

I am enclosing herewith a check in the amount of \$19.00 in payment for this material. Also enclosed are two copyright releases which we should appreciate your signing and returning at your earliest convenience.

We are glad to have the change in information of you personal data for our Contributors' List.

Mr. Dodge is sending you a separate letter concerning the additional articles you have agreed to prepare.

Thank you again for handling this assignment.

September 11 1958

Mr. Wilson Popenoe c/o Martha Sussman American Embassy Madrid, Spain

Dear Mr. Popenoe:

Thank you for your letter of September 6 regarding the various articles on which we have had correspondence with you lately. It appears that the problem is the delay in our mail in reaching you, and that most of the matters have been taken care of.

Under date of August 27 we sent you a letter of confirmation with paste-ups on the following articles which you have agreed to prepare or revise: LITCHI or LYCHEE; LOQUAT; POMEGRANATE; SAPODILLA; WHITE SAPOTE; and QUEENSIAND NUT.

We have received your articles GUAVA and CHERIMOYA, and payment for these went out under date of August 27 also.

Your original copyright releases for MANGOSTEEN, PAPAYA, AVOCADO and BANANA have been received, so it will be unnecessary for you to complete the duplicate forms.

Regarding our letter of August 13, the invitation to revise our article CASHEW was in error, as copy for this article has already been received from another contributor. Please accept our apologies for this mistake.

Your cooperation in all of these matters is deeply appreciated.

Sincerely yours,

John V. Dodge Managing Editor

July 17 1958

Mr. Wilson Popenoe c/o Martha Sussman Embassy of the United States of America Madrid, Spain

Dear Mr. Popence:

In our letter of July 10 we invited you to revise or prepare a number of articles as you had recommended earlier.

We now find that we would like to include the articles GUAVA and CHERIMOYA in an earlier printing and would therefore like to advance the deadline for these two to September 15, 1958. The deadline for the other articles will remain November 1, 1958.

We sincerely hope that you will be able to accept these assignments, and look forward to hearing from you.

Sincerely yours,

Q v. tevar

Antigua, Guatemala, 22 January 1959

Chicago Natural History Museum, Chicago, Ill. USA.

Gentlemen:

In 1952 we obtained from you permission to reproduce illustrations from Dr B E Dahlgrands"Tropical and Subtropical Fruits" the drawings by Albert Frey which appeared in that very nice little booklet. We used these in our journal "Ceiba", first in Vol. 1 No. 5, and later in a Spanish-language edition.

Imam now preparing a popular treatise on tropical fruits to be published by Salvat Editores of Barcelona, in the Spanish language. I would like to reproduce some of the illustrations in Dr Dahlgren's booklet, and assume there will be no difficultive stypulal ready have us permission to use these in "CEIBA". But I want to do the right thing, so I shall thank you to advise me on this point. It would be my idea to give credit, in the prefecse to my forthcoming work in Spanish, to the Chicago Natural History Museum, and more particularly to the work by Dr Dahlgren. I believe this will meet your requirements.

If Dr Dahlgren's "Tropical and Subtropical Fruits" is still in print, I would like to have another ten copies at least. If You will advise me, I will send a check to pay cost and postage to my address which is given below.

Sincerely,

Wilson Popence Director Emeritus

Dear Dr. Popence:

You may be eligible for social security benefits payable on the above account.

Please complete and sign the enclosed form(s) and mail it to us in the enclosed envelope. Be sure to answer each question carefully because incomplete or incorrect answers may delay your claim.

It is also necessary that you submit the following proofs: Itemized receipted bills covering burial expenses you paid. These receipted bills must meet the requirements of the enclosed Forms CDU-4 and CDU-4A.

All civil and church documents established outside the United States and relating to age, marriage, death, divorce, adoption, or annulment must be taken or mailed to the nearest U.S. Foreign Service Office. After that office has stamped the documents, send them to us.

BY A U.S. FOREIGN SERVICE OFFICE WILL BE ACCEPTED. This letter must be mailed or taken with the documents sent to the U.S. Foreign Service Office for verification.

If any of these proofs are not available, do not delay making your application as this may cause a loss of benefits. We suggest that you <u>Airmail</u> your reply.

Sincerely yours,

James W Stamblet

Chief, Adjudication & Accounts Section

IMPORTANT INSTRUCTIONS FOR COMPLETING ALL PAPERS

- 1. Answer EVERY question. Do not leave any blank.
- Be sure to sign your <u>OWN</u> name. <u>WRITE</u> your name. Do not print it. If you cannot sign your name, make an "X" and have two people sign their names as witnesses.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE SOCIAL SECURITY ADMINISTRATION BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

INSTRUCTION ON PROOF OF PAYMENT OF BURIAL EXPENSES

You must furnish an itemized receipted funeral bill or bills covering burial expenses. Do not include medical or hospital expenses. Every receipted bill must show all of the following:

- 1. Name of deceased.
- 2. Name of person (or persons) who paid the bill.
- 3. Items furnished.
- 4. Cost of each item (in your own currency).
- 5. That it has been "PAID" and the date of payment.
- 6. Signature and title of person who received this payment.

CDU-4 (6-61)

DEPARAMENT OF HEALTH, EDUCATION, AND WELFARE Social Security Administration Bureau of Old-Age and Survivors Insurance

The lump-sum death payment is made to the widow or widower who was living in the same household with the worker at the time of the worker's death. If there is no widow or widower, the lump-sum is paid in the following order of priority:

- 1. To the funeral home, for unpaid burial expenses incurred by or through such home. This will be paid on application, made with 2 years after the worker's death, by a person who assumed some responsibility for payment of the burial expenses or, if nobody assumes such responsibility within 90 days after the worker's death, on application of the funeral home.
- To persons equitably entitled, to the extent and in the proportion they paid burial expenses incurred by or through the funeral home.
- 3. To persons equitably entitled, to the extent and in the proportion they paid burial expenses (not incurred by or through the funeral home), in the following order of priority:
 - a. expenses of opening and closing the grave.
 - b. expenses of providing the burial plot.
 - any remaining expenses in connection with the burial.

Antigua, Guatemala, 9 October 1970

The Military Attache, Embassy of the United States of America Guatemala.

Sir:

The bearer of this note, Luis Felipe Val'ez Soto, is a neighbor of mine here in Antigua. He wishes to go to the United States to enlist in the Armed Forces and will show you the letter he has received from the Recruiting Station in New Orleans.

He will tell you that he has been teld by the Consul here in Guatemala City that he can not be admitted to the United States for permanent residence without a work contract which of course he cannot obtain because his only reason for wishing to enter the United States is to enlist in the United States Army.

He has asked for my advice, and all I can do is to suggest that he tell you his story. It seems possible to me that there may be some way to handle cases of this nature, without a work contract. As a former Lt. Commander in the United States Naval Reserve, I am interested in helping this young men in any way I can.

Sincerely yeurs,

Wilson Popence Director Emeritus

425 N. MICHIGAN AVENUE . CHICAGO 11, ILLINOIS

July 15 1960

Mr. Wilson Popence Antigua Guatemala

Dear Mr. Popence:

Thank you for your letter of July 2, with the returned proof of your article on LITCHI. I'm sorry that you were displeased with our handling of it, and I hasten to tell you that we are resetting the article, using your new manuscript.

As regards the title change, this will be done as soon as possible, but because of the alphabetical arrangement, we, regrettably, are not able to relocate articles at this time. The title will be changed the next time the volume is handled, which will be in about two years.

Revised proof will be sent to you shortly. We shall be grateful for any further comments you might have after examining proof.

Sincerely yours,

Richard C. York

Mf. F. William Popenoe Antigua Guatemala, Central America

Dear Mr. Popenoe:

We have received an inquiry concerning a paragraph which appeared in your article LITCHI prior to its revision in 1961. The statement is as follows:

While living in exile at Canton, the poet Su Tung-po declared litchis would reconcile one to eternal banishment; and Chang Chow-ling, a statesman of the 8th century A.D., composed a poem in which he praised the litchi as the most luscious of all fruits. The first published work devoted exclusively to fruit culture was one on litchi varieties, written by a Chinese scholar in A.D. 1056.

Our London office has written to us that one of our readers is interested in obtaining copies of the writings on litchi mentioned in the article and has requested we write to you in hope that you might know how to obtain further information on Chang Chow-ling and also on the "Chinese scholar" whose name is not mentioned. We have not been able to find any works or collections of writings by Chang Chow-ling in Books in Print or other bibliographical source books. Any information you might have would be greatly appreciated.

Sincerely yours,

Susan M. Schenk Editorial Assistant

TELEPHONE TRAFALGAR 7-0421 CABLE ADDRESS
"CLUBEXPLOR" NEW YORK

THE EXPLORERS CLUB 10 WEST 72ND STREET NEW YORK 23, N. Y.

February 10, 1958

Dr. Wilson Popence Antigua, Guatemala Central America

Dear Mr. Popenoe:

It gives me great pleasure to inform you that your request for Emeritus membership was approved at The Board of Directors Meeting held on February 4, 1958.

Very truly yours,

THE EXPLORERS CLUB

Melville P. Cummin, Secretary

r

Antigua, Guatemala, 30 January 1967

Secretary, whe American Club, Guatemala City.

My dear Sir:

I am really on the spot. As I think you know, the Popence family has welcomed visitors to what we call "La Casa del Oidor", and Louis Adamic called "The House in Antigua. We have done this because when Dorothy and I commenced the restoration of this house in 1929, and Helen and I continued it down to the time of her death in 1961, we have felt that we might in this way make a worth-while contribution to Guatemala. Visitors could see here an authentic restoration of one of the grand old houses of the XVII century - the period when Santiago de los Caballeros de Guatemala was in its glory.

The number of visitors to the house increases annually. We are happy that this is so.

In recent months a problem has arisen. The Direction General de Turismo, in its publications, states that visiting hours are 10 to 11 a.m. and 4 to 5 p.m. This is correct. This morning, for the first time, I saw a publication of the Club which says the hours are 11 to 12 and 4 to 5. Will you please correct this in future publications?

Sincerely,

Wilson Popence

Rancho California, Almuñecar (Granada) SPAIN 22 May 1958

Dear Mr Cummin:

Please accept my thanks for your note of 10 February, advising that I am now on an Emeritus basis. Prettypfine. Saves me fifteen bucks a yeaf, and at the same time gives me the impression that I am an Elder Statesman or something of that sort, quite the contrary to the psychological effect of that monthly check from the Social Security people marked "Old Age". But sooner or later, we all have tombe turned out to pasture, that is, if we live long enough to receive the "Old Age" pension. There seems to be no way of dodging this indignity.

It is pleasant to look back on my long years assan "AERR" member of the Explorers Club. I guess you can find out just when I joined, unless the records were lost along with that swell building we once had on Amsterdam Avenue. I owe my membership to to the late Sylvanus Griswold Morley, who, under the auspices of the Carnegie Institute of Washingtonn, did an outstanding job in Yucatan and Guatemala and Honduras. Incidentally, "Vay" Morley was something of a mathematical genius (any archeologist in the Maya field has to be!) and one of his favorite parlor tricks was to ask your birth date, sit down and figure it out in the Mayan calendar (his correlation of course, I suspect not two archeologists agree) and then draw you a nice little sketch of your tutelary diety and them Mayan hieroglyphic representing your birth date. You went right home and had a gold ring made, or a pair of gold cuff links. I am sure you will find them still adorning members of the Club.

One of my favorite recollections of Vay Morkey concerns a meeting of the short-lived Maya Society in Brooklyn. Vay was giving one of his usual brilliant lectures, when he said "Now the Maya, like other pagan peoples", and a heckler in the back of the hall jumped up and asked "Doctor Morley, may I ask just what you mean by pagan peoples?" Without batting an eye, Vay replied "I mean anybody who doesnt think like I do." And it was when we were attending one of these same meetings that Vay and Joe Spinden and myself went down into the subway to go to Brooklyn. We passed our station, got out, crossed over to the other side, and took a train

going back toward the city. Again we passe our station, whereupon Vay (who often in those days, when out of the jungle, affected spats and a walking stick) sprang to his feet and shouted in his shrill voice "Well I'll be damned, here are three explorers lost in the Brooklyn subway".

Even before I was invited to join the Club, I knew several members, primarily because of a artpitotBrazil on the SS Van Dyck in 1913 - the same steamer and the same voyage which carried exPresident Theodore Roosevelt and his party. I was then a young
Agricultural Explorer of the United States Department of Agriculture,
Offittuponasthdwith two older colleagues to investigate the history and culture of what we call the Washington Navel Grange. (Since it had its origin in Bahia, Brazil, I am sorry it has not become commercially known as the Bahia Navel).

On this trip I met George K. Cherrie who was a member of Colonel Roosevelt's party. I suspect the Club has had few members who did more real exploring in south America — as naturalists — than George Cherrie. I did not see him again, after they had been through the wilderness, until one evening when I was walking in the park at Guayaquil and found him sitting one one of the park benches. I believe he had just come up from sometimeeredown toward the Peruvian border, after having received a bad wound in one arm while he was collecting birds. We sat down and chatted, and he fell to recounting incidents of the Brazilian adventure. "Things were getting very bad", he said, "Colonel Roosevelt was avvery sick man, when he called me into his tent one evening and said, 'Cherrie, I dont believe I can go any farther. I want you and Kermit (was it not Kermit who was with him?) to leave me here. Forget about me. Get past these rapids andget home again if you can."

Cherried continued after a brief pause, "I begged the Colonel to give us just one more day. He agreed, and as all the world knows, we made it."

Sincerely,

WILSON POPENOE

January 25, 1959

Dear Member:

Over a year and a half ago, I circulated all members of the Explorers Club with a mimeographed form letter appealing to them to send us news of their activities for use in the Explorers Log. We are all so busy these days that I had no idea what type of a response would be forthcoming, especially as it was impossible for me to write personal letters to each of you and a mimeographed letter does not always get the best response.

I was deeply gratified to receive a very splendid response from this country and from many parts of the world. This response showed me that we all value our relationship in the Explorers Club and that many of you were willing to cooperate by sending us news of yourselves and helping make the Explorers Log an interesting and popular part of the Journal. May I take this opportunity to express my thanks to all of you who responded, and say how sorry I am that I could not write each of you personal letters.

In order that we may reach many of you who did not respond, I am enclosing a reply post card, feeling that perhaps many who do not have time to write a letter would perhaps be willing to write or type a few lines on the enclosed card, telling us something of their activities or thoughts.

May I also urge those who have time to drop us a letter to enclose a photo or two, for we would like to see as well as hear from you. I have agreed to continue editing the "Log" but I can do this only as long as each of you cooperate in getting us information on your activities. If you do as well as you have in the past, I am sure our Explorers Log will continue to be a credit to the magazine. The Explorers Log is a wonderful way for our much traveled membership to keep in touch, please do your part.

My sincerest appreciation to those who responded to my last letter and I do hope that most of you will forward the enclosed post card so we may have an even larger response this year.

Very sincerely yours,

JRF:ss

John Ripley Forbes, Editor

The Ripley Intes

Explorers Log

The Explorers Club

Annual Report of the Journal Committee for 1959 19 April 1960

THANK YOU

First, may I thank every member of the Journal Committee and Staff, for your devoted and unstinting work during all of 1959. Secondly, allow me to thank each of you members who did take time to write articles and to make photographs for the Journal, and to induce your friends to subscribe.

FINANCIAL

From 1921 through 1956, so far as I can learn, the Journal had never earned a penny. The Club supported it entirely. In 1957 the Journal had a budget of \$6,500, when I took over. Through advertising, sale of back-numbers, and cash subscriptions, it earned 6% of its cost that year. In 1958 its budget was \$6,000, and it earned 13% of its cost.

For the past calendar year of 1959, the Journal cost \$6,423. By prodigious effort, it earned 23% of its cost, or \$1,474, which put it in the black, \$51. under its budget of \$5,000. For 1960, its budget is \$4,700.

Advertising, for me, is extremely difficult to obtain, and entails very much time and effort to collect the bills for it. I've suggested to the Board that in 1960, I'm reducing efforts to obtain advertising, because of the time involved. John Kraemer, here on vaction from Venezuela, has been helping, and was unable to obtain any ads during the past two months.

Subscriptions, on the other hand, for 1960, are coming in 33% faster than during the first 3½ months a year ago. We now have about 80 cash subscribers.

FUTURE

The EXPLORERS JOURNAL will be exactly what YOU make it. The great mass of our more-than-a-thousand members want to read what you other members write. If you write nothing, the Journal will die a just death; and if you are not interested in it, then it ought to die.

Speaking of death, the Chief of Clannfhearghuis and I are running neck and neck in health. This means that you should be looking carefully for a new Editor. I may pop off any minute.

1959 Annual Report, Journal Committee, 19/4/60

On the other hand, if you members write a great deal for the Journal, it will grow, and flower, and bear fruit. Just think of The Club's position, if the Journal had two thousand cash subscribers, or an income of \$10,000, per year? Then it would be truly self-supporting, and The Club could cease contributing to it.

Consider an example. By dint of real work, our former President Ed Weyer took hold of the magazine NATURAL HISTORY as its Editor, when it had a circulation of about 20,000. In 22 years, he increased its circulation to about 70,000. With a circulation of 20,000, YOUR Journal could support the rest of The Club.

Think one step more. In 1888 was organized the National Geographic Society, by a group including some of the organizers of our own Explorers Club. In 1889, its little, irregular NATIONAL GEOGRAPHIC MAGAZINE was started. In 1899 this Society's membership was about one thousand, much like our own Club. And in that year Gilbert Grosvenor joined it as its Editor and only employee. Today, under his son Melville Grosvenor, this magazine's circulation is $2\frac{1}{2}$ million.

This circulation gives it sufficient surplus to enable it to maintain exploration parties in the field, a wonderful photographic laboratory in Washington to process their pictures, and a well-equipped map room for making their own maps.

Fellow-members, there is a future ahead of this Club, and of its organ, the Journal, if, IF, we put the right amount of work into it; if you put your shoulder to the wheel.

Think, ---- what will YOU do for your Journal?

DANIEL D. STREETER Chairman, Journal Committee

VALENCIA, 12th January, 1960 S/Ba

Dr. Wilson Popence Rancho California <u>ALMUNECAR</u> (Granada)

Dear Dr. Popence,

This firm is trying this year to get the best possible crop of tomatoes from the 5th June up to the 10th July in the Cullera area (Valencia) out of Statesside seed, variety Jefferson.

We asked the supplier of our seed, the ASGROW EXPORT CORPORATION, Milford (Conn.), to give us all information at their hand about the growing of tomatoes out of US-seed in our Mediterranean climate. By a very long letter Mr. Kendall Redfield, President of the above-mentioned Corporation, gives us all the information he can dispose of and, what is more, he gives us your address suggesting to cantact you, as by your rich experience in Central-America and Spain you may be the most indicated person to give us the instructions we want.

We know that without an exact analysis of the soil it will be very difficult for you to give us full advice. We will therefore bring down our general request for information to 2 questions we hope you can answer:

- a) What kind of fertilizers normally used in Spain have to be avoided growing tomatoes out of US-seed?
- b) What is the reason of the bursting of many American tomato varieties like PRITCHARD and MARGLOBE?
 They burst just before reaching their full size and the harvesting moment in the Mediterranean climate.

 We have seen fields of tomatoes in Italy with all Marglobe tomatoes crackled and burst, whilst in the neighbourfields tomatoes out of Dutch seeds grew up wonderfully, to full shipping ripeness. Is there a specific reason for the bursting of American tomatoes in our climate and how could it be avoided?

We hope, dear doctor, that our asking your information does not bother you excessively. We certainly will at all times be at your complete disposal for any service we could give you out of our experience as one of the biggest tomato growers in the Alicante area out of British and Dutch seed.

with our best thanks in advance, we are
Yours most sincerely

APARTADO 93

TEGUCIGALPA, HONDURAS CENTRO AMERICA

Antigua, Guatemala, 10 February 1960

Exportadores Agricolas S A Cirilo Amorós 54, Valencia, España.

Gentlemen:

Your interesting letter of 20th January arrived two weeks ago, just as I was leaving for a short trip through Florida. On this trip I had occasion to visit the Subtropical Experiment Station at Homestead and discuss your problems with the expert on truck crops, Dr John Noonan. I give below the results of my talk with this tecnico. (Incidentally, there are planted annually some 15,000 acres of tomatos in the Homestead area; this year they were badly hit by cold weather)

Dr Noonan suggests that you be careful not to use too much nitrogen in connection with your fertilizer program. This may help control the bursting or splitting, to a certain extent. Beyond this suggestion there is not much that can be said without experience on your soils; laboratory analyses might help but field trials with various fertilizers are necessary to get complete information.

As for varieties, Dr Noonan says he does not think much of Jefferson; in fact he cannot recommend it at all. He says they avoid splitting to a considerable degree by using the varieties Mamalucie and Homestead 24, both of which can be obtained from Asgrow. He also recommends Step 314 and Homestead FM 61, of which he gave me the enclosed packets of seed to send you. He cannot cite any specific reason for the greater splitting of American varieties as compared with the Dutch. I suppose you are familiar with the variety or varieties grown in the Canary Islands, which I visited in 1958. Ingeniefo Garcia Cabezon told me they use only English seed, because they export principally to England and a variety well known in that country is preferred.

If you have other questions I would suggest you write Dr John Noonan at the Subtropical Experiment Station, Homestead, Florida. I believe he is as well prepared as anyone in the United States to assist you, though it might also be worth your while to write Professor John H. MacGillivray, head of the D partment of Vegetable Crops at the College of Agriculture, University if California, Davis, California. In 1949 Professor MacGillivray spent six months with us in Honduras at Escuela Agricola Panamericana, of which I was Director until two years ago. He carried on a number of experiments with tomato and onion varieties under semi-arid conditions at 2500 feet - conditions not greatly different from those of Valencia I would think.

Sincerely,

Dear Mr Redfield:

January I received a letter from Exportaciones Agricolas of Valencia (Spain) saying that you had referred them to me, and hadegiven my address as Almuñecar, Province of Granada. It pleased me to see that you had not forgotten my interest in getting more American vegetable seeds in Spain; and you will probably remember that I tried to see what could be done about importing American seeds in commercial quantities and did not get to first base.

Wall, after a year in Spain and Israel and the Canary Islands I returned to Central America (where I have lived for nigh onto 40 years - and last year did some work in Venezuela and Mexico. And the May after I received the letter from Exportaciones Agricolas I had the good fortune to go over to southern Florida for a couple of weeks. I was in Homestead for three days and brought up the matter of tomato varieties for Spain with John Noonan of the Subtropical Experiment Station where my nephew John Popence is now Horticulturist. I asked John what he could recommend for the boys in Valencia. I told him that it seemed to me their princiaft problem is splitting (which they call 'burtsing'). He told me that they should try Mamalucie and Homsestead 24 which they can get from you, and he gave me some seeds of Homestead FM 61 and Step 314 which I have sent to these folks in Valancia, along with the recommendation that they buy seeds of Mamalicia and Homestead 24 from you, for an extensive trial. And I told them that John Noonan told them to go easy on the mitrixxx nitrogenous fertilizers. Probably I am wrong, but I have the feeling that they may be depending too Much on Cilian nitrate of soda. It

Digitized by Huntel Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh, PA

is advertised all over southern Spain, and I like it, if edonomically it is the right thing. I am afraid of those complete fertilizers, for examply 14-14-14, makes we really know what we need. Here in the tripies, we have never made much money out of anything except nitrogen, in the barana business, unless times above changed. And they may well have changed in some places; they turned me out to pasture two years ago, afterhaving switched from bananas to the development and operation of the Escuela Agricola Panamerica in Honduras, where I spent the last 16 years of what you folks like to call active professional life. Then I went to Spain and Israel and back again to Salvador and Venezuela and Mexico, ax I think I have mentioned.

Now you have the right to ask, why am I interested in vegetable crops and varieties? I should be sit ing here playing golf (I would not, even if we had a golf course in Antigua) or pruning my mose bushes (that just takes me 15 minutes every three months). The fact is I am exteremely interested in harticulture and shall continue to be until that old man with the sycthe walks down our street.

interest in Agraw. I have a very real and permanent interest in good vegetable varietis and good seeds. Then I was in Homestead a week ago I went to the local Bilgore office to get some Vinyl film which I need to send budwood and cuttings to my friends in Venezuela, Spain, Israel and elsewhere. When the salesman wasnt looking I swiped three copies of the Kilgore catalog, and and on looking them over this moring (two will go to friends here and in Salvador, so I dont feel too guilty I was glad to note the very excellent changes in this catalog, wince I saw the last one about four or five years ago. Of course I am glad to see Kilgore tied up with Asgrow. We used to busy our seeds for Escuela Agricola Panamerican from Kilgore in Miami until we switched to your home office e and I should add that

Digitized by Hunt Institute for Botanical Documentation,

Carnegie Mellon University, Pittsburgh, PA

we first switched to goodruff in Texas. We used Kilgore because to thought eny had more varieties for pur tropical climates. We switched from Woodfuff when they told us it was not Asgrow.

This 1959-1960 Catalog of Kilgore could hardly be better from my point of view, as a tropical American horticulturist. Lots of information and lots of varieties which I feel are the best presently available. For example, beans of the Kentucky Wonder type are mighty darn good down here. So are the Butter or Shell Green Beans. I have yet to see anything which can beat Golden Acre Cabbage for the home garden (and remember, I am not a trucker and I do not want my remarks misconstrued). Charakanaexxarexaxambhanxxixdantxwanxxmhatxx texadvixe. We should grow more Chinese Cabbage. Cantaloupes are a problem. I dont what to say. Carrots are good, all of them, and I would not worry too much about varieties. Celery at the higher levels here in Central America, 5000 feet or so, during the coal season; Sweet Corn, I would use our local field corns and harvest them when very tender. Northern corns are a mistake down here. Cucumbers! that Puerto Rico 39 has done well but the old Japanese Climbing which I dont see offered any more was very successful; what has happened to it? Lettuce, Mignonette is fine for the shome garden but commercially Great Lakes has taken over: I would like to see Bibb given more attention; I dont see it offered by the local seedsmen. Should we go in for it? The Chinese mustards deserve more attention down here; they will gow at any season of the year in almost any climate, and they would be popular if more Latin Americans liked greens, which they dont. The Onion business is highly important to us; Excel and Texas Grano have done well; the variety which is grown commercially here in Guatemala and carries by the Indians on their backs to Salvador and perhaps even farther south, seems to me

Digitized by Hunt Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh, PA

a primitive strain of Louisiana Red Creole. Wd might improve the yield, some way or toher - a better strain. It is the best keeper we have, and has enough onion aroma to bring tears to your eyes unless you stand well back in the kitchen. Peppers, why donesnt someone put the Jahapeño on the seed list. The very best hot pepper in Mexico. and hardly known elsewhere. I have a hard time getting a packet of seed anywherdin the States. Maybe not much seed could be sold down hers, south of Mexico. But it is the best of all hot peopers and those chaps wop in Mexico ship it to us in tin cans and we buy it. Aquashes and Pumpkins, those Rockefeller boys we in Mexico have produced the finest thing I have ever seen; I would advise that somebody in the States write Ralph W Richardson, Director of thex what is called Estudios Especiales, Londres 40, Mexico, D F, Mexico, and ask him for some seed for experimental planting in California or points south. They have really gone to town with this variety. As for tomatos, the boys in Florida -I have mentioned above - kniws his onions - and tomatos - and I cannot add anything, except to say that onions and tomatos have constituted our most difficult problems here in tripical America - as you probably know better than I do and I think it will be worth while for any big concern to make a special effort to develop the best varieties for the tropics. Onions which do not need long days, tomatos which will stand our wdt seasons - and the San Marzono group is taking over this field and right, so. More xxx and better San Marzanos, that's what we want.

You will agree that I have used up my time and morw. Much of what I have said is old news to you. But I write what I have written because I am so interested and because our hope, down here (and) in Spain) Documentation we down what he lies in the produceers of good seeds in the USA.

Dr.

Dear Dr. Popence,

Before answering to your kind letter of Febr. 10 we waited for the arrival of the seed samples you sent us to give you

We sincerely regret that we must tell you that up to now the samples did not arrive, quite surely withheld by our customs service because of some formal reason.

Nevertheless we feel quite grateful to you for your disposition to assist us at your best in our experiments.

The seeds for our early tomato-crop planned for the time from May 20 to July 10 are in the soil now since a fortnight - three weeks in the area of Cullera. We are growing there tomatoes from Asgrow, as Dr. Noonan's negative advice on this kind of On experimental scale we are trying in the same area Marglobe, Ace, Kokoma and Homestead 24, all Asgrow-seeds too.

We have been told by Mr. Sarasola that you plan to come to Spain this spring. We would surely enjoy it if you could arrange your voyage in a way to come through Valencia by this occasion to get a look at our fields as our guest.

Looking forward with pleasure to hear from you we are

Dear Dr. Popence,

We have the great pleasure to tell you that the seeds arrived on march 23rd. We thank you very much for it and will test it soonest.

On this occasion we ask you to tell us whether you make the journey to Spain Mr. Sarasola told us about and whether you can manage it to come to Valencia.

Hoping that you realize your plans we would be glad to hear the probable date of your arrival.

In the meantime we are, dear Sir,

Yours faithfully,

EXPORTACIONES AGRICOLAS, S.A. VALENCIA

Antigua, Guatemala, 15 May 1960

Exportaciones Agrícolas S A Valencia, España

Gentlemen:

Referring tomyour letter of 2 April pxmo ppdo, I am happy to learn that the tomato seeds reached you. You ask when I may be in Spain again; I dont like to say "cuando San Juan baje el dedo" but I fear it will not be until next year. When I do come, I shall most certainly call on you and see if I can be of any assistance, though you know I am not an expert on vegetable crops; my field is f ruit crops.

But knowing of your interest in tematos, I have asked my friend and colleague Dr Ernesto Casseres, Fundación Rockefeller, Londres 40, Mexico D F, to send you a copy of the recent issue of the Proceedings of the American Society for Horticultural Science (Caribbean Region) which contains a paper on tomato varieties and their behavior here in Central America. If you continue to have problems in connection with the "splitting" or "cracking" of tomatos, I would suggest that you corresponde with Dr Casseres and with Dr Ernest Mortensen, Centro Nacional de Agronomia, Santa Tecla, Rep. de El Salvador. I think these men and Dr John Noonan at the Subtropical Experiment Station in Homstead, Florida, can help you more than any other men in tropical America.

Sincerely,

Wilson Popenoe

A N T I G U A
Guatemala (Amer. Central)

Dear Dr. Popence,

We are really sorry to learn from your letter of May 15th that you have to postpone your voyage to Europe probably until 1961 and take you at your word about calling on us when you come to Spain next year. Your opinions as an expert on fruit crop may be of great importance for our planning and your advice regarding our tomato fields will certainly be of great interest.

Our growing tomatoes this year, for early-summer crop, out of Dutch seed, went very well, but the crop out of ASGROW-seed "Jefferson" comes late as the seed was delayed about 10 days by the Spanish customs service. Up to now we did not register any cracking, but the variety itself does not seem to be a beautiful tomato, it is rather heavily ribbed and not globe-shaped and shows a high percentage of deformed fruit. We hope that our experiments with Kokomo-, Ace-, Marglobe- and Homestead-seed will allow us to choose a better variety for our next year's large scale growing. The doubts of Dr. Noonan regarding this variety are fully justified.

We thank you for your arrangements to send us a publication of the American Society for Horticultural Science on tomatoes which we will study carefully.

We are looking forward with great pleasure to see you, dear Dr. Popence, and would appreciate a word in time.

In the meantime please dispose of our services for anything you should need from Spain.

Most sincerfly, yours exportacions faricold S.A. VALLECIA

Muy estimados señores:

Acabo de recibir su apreciable carta del 17 del mes en curso. Probablemente nuestro viaje a España será en Mayo del año entrante para estar en Andalucía y Levante durante la cosecha de verduras y de algunas frutas. Pierdan cuidado: Si Dios nos da vida para volver a España lo haremos y trataremos de llegar a Valencia para tener el gusto de saludar a Uds. y hablar de nuestros mutuos intereses.

Les escribo estas lineas para decirles que si por casualidad no ha llegado el boletin de la American Society for Horticultural Sciences, el cual tiene datos interesantes sobre un estudio hecho sobre tomates. Favor de avisarme si no llegó para volver a pedir una copia para Uds. a mi amigo el secretario del grupo sub-tropical, Dr. ErnestoCasseres cuya dirección es: Calle Londres 40, México, D. F. Mexico.

En la creencia que será de interés para Uds. les incluyo un artículo escrito por mi colega y amigo el Dr. Ernest Mortensen respecto a unas pruebas realizadas con tomate en el vecino país del Salvador.

Sin otra cosa por el momento, quedo de Uds. muy atento y seguro servidor,

Wilson Popence

FOUNDATION FOR INSTITUTES OF RESEARCH AND ADVANCED STUDIES, INC.

SUPPLEMENTARY INFORMATION FOR MANDATORILY RETIRED ABLE SCIENTISTS AND EDUCATORS

OFFICERS

A. PACKCHANIAN, Ph.D.
President
GEORGE R. HERRMANN, M.D., Ph.D.
Vice-President
HEINRICH W. NEIDHARDT, M.D.

GEORGE A. EMERSON, Ph.D. Secretary

C. ALLAN MAY, JR., B.A.

Circular No. 2, May, 1969

327 University Boulevard, Galveston, Texas 77550

The Foundation for Institutes of Research and Advanced Studies, Inc., is a nonprofit, philanthropic corporation organized under the laws of the State of Texas on June 19, 1967 (Number 236043). Its charter reads: "The corporation is organized exclusively for educational and scientific purposes, within the meaning of Section 501 (c) (3) of the Internal Revenue Code of 1954 (or corresponding provision of any future United States Internal Revenue Law), with special emphasis directed toward the utilization, in the fields of advanced study, research, and teaching, of the talents, abilities, and experience of scientists, regardless of race, sex, color, creed, or national origin, who are retired from colleges or universities, or from research or business institutions, and who are still capable and desirous of maintaining an active interest in the field or fields of service in which they have been trained."

The Foundation is dedicated to encourage opportunities for the large number of able senior scientists and educators who are, or soon will be, mandatorily retired and who seek opportunities for conducting research and teaching in their own institutions. If the universities cannot absorb their own retirees from year to year, then one of the alternatives would be to establish pilot Institutes of Research and Advanced Studies on appropriate strategically located university and college campuses.

The number of research institutes and their location would be dependent upon the number of available senior scholars, the donation of adequate space on the campuses of the host universities, and the availability of funds for constructing, operating, and maintaining such institutes.

Institutes for various disciplines in the biological, medical, and physical sciences could be established in appropriate areas of the United States on or near strategically located university or college campuses, so that their students and faculties could have contact with the distinguished senior scientists and educators who staff the institutes. Accesibility to university facilities and cultural activities would be helpful to the staff of the institutes and the senior scientists and educators would be working in a stimulating environment with students at various levels of development.

These institutes would provide the necessary laboratory and office facilities, technical and secretarial help, and adequate salaries for its staff members, so that each scientist and educator would have the opportunity to carry on uninterrupted research. In addition to conducting basic research, the members of each institute could organize seminars and symposiums at the institutes where they worked and occasionally lecture to various university and governmental groups.

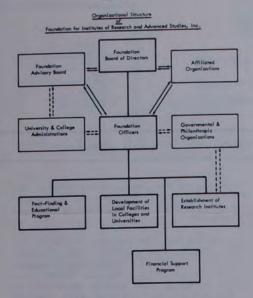

Members of the institutes might select and supervise the doctoral dissertations of a few graduate students from the host and nearby universities or colleges who wished to carry on a portion of their research at the institutes under the guidance of the eminent scientists.

(over)

Digitized by Hunt Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh, PA

Chart 2

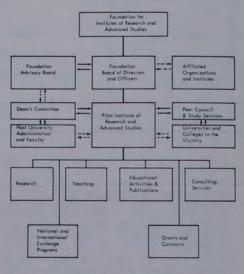

Establishment of Pilot Institutes of Research and Advanced Studies

The institutes will also serve as a scientific and educational exchange and manpower pool for universities, colleges, and other educational institutions. The members of the institutes will be available for consultation with the United Nations and with state and federal agencies, as well as national laboratories and private research organizations. Whenever these activities require more than a month's service, the senior scholars will be given leave of absence in order to assume such duties.

The senior scholars will have opportunities to conduct research, teach, and produce books and monographs on the "state of the art" and thus contribute to the broader generalizations which have always marked the great strides forward in science and education.

The membership of each institute will consist chiefly of mandatorily retired able senior scientists and educators from the United States. However, a few distinguished scientists over 60 from for eign countries could be chosen as members of the institute whenever space became

available. These scientists would bring new points of view and add international flavor to the institute, and would serve as a genuine example of cultural exchange between countries.

The institutes would also recruit a limited number of outstanding young and competent scientists who are interested in active, long-range research. They would serve as a bridge between outgoing and incoming senior members of the institutes, in order to ensure the continuation of important long-range research projects. Such an arrangement would also make the best use of the accumulated knowledge and equipment already on hand.

The Institutes of Research and Advanced Studies will be communities of scholars who will be provided with adequate facilities and equipment for research. Rich intellectual benefits will be derived from close association between the eminent scientists and educators of the institutes and the faculty and students of the host universities. Such activities will bring happiness to the savants and will be beneficial to mankind.

Dear Colleague:

The Foundation for Institutes of Research and Advanced Studies (FIRAS) is currently conducting a nationwide survey to determine the present status of senior scientists and educators in the United States who are over 60 years of age. In this connection, we need your help and cooperation.

As you know, compulsory retirement of scientists and educators from universities, colleges, governmental agencies, and research institutions presents one of the most challenging problems of the day. It is well known that every year men and women of science, education, and industry are compelled to retire from active duty because they have reached an arbitrary age limit. The retirement regulations of universities and other institutions have their merits. The problem is that some able scientists and educators are retired along with those who prefer retirement and those who are no longer competent. Mandatory retirement is an injustice to able and vigorous scholars who are still capable of maintaining an active interest in the fields of service in which they have been trained.

The purpose of FIRAS's current survey is threefold:

- 1) To determine the number of competent scientists and educators who have been, or soon will be, mandatorily retired because of age but who would like to carry on further productive research if given an opportunity.
- 2) To ascertain whether universities, colleges, and other institutions have facilities and support for their own able retired scientists and educators who prefer to continue to work in the same familiar surroundings.
- 3) To gather information concerning the need and feasibility of establishing special pilot *Institutes of Research and Advanced Studies* on strategically located university and college campuses for those able scholars who would like to work in such academic environments.

Enclosed you will find a questionnaire designed to obtain the above information. We are confident that you will recognize the significance of this survey and invest the necessary time NOW to complete the questionnaire and return it to the Foundation's headquarters in the enclosed self-addressed envelope.

You will find enclosed also a circular describing briefly the Foundation's objectives, activities, and the projected *Institutes of Research and Advanced Studies*. It is hoped that this information will be useful to you in completing the questionnaire.

The questionnaires received will be statistically analyzed. Publication of the comprehensive results of this survey is urgent in view of the need for utilizing fully the talents of mandatorily retired able scientists and educators who seek opportunities to continue working in their chosen fields. It is hoped that such opportunities can be developed in the very near future.

Thanking you for your cooperation in this matter, I am

Sincerely yours,

President

A. Packchanian

GERIATRIC RESEARCH

154 West 14th Street, New York 11, N.Y.

Room 307

HARRY BENJAMIN, M. D. LEMON CLARK, M. D. JOSEPH DALVEN, M. D. EDWIN W. HIRSCH, M. D. EUGENE B. MOZES, M. D.

Dear Sir:

We are hoping that, as a distinguished person listed in Who's Who you will lend your assistance to a research undertaking which we believe is of considerable significance to the increasingly large proportion of persons in our population over 65 and to all physicians in the field of geriatrics.

Although medical opinion more and more stresses the value of continuing sexual activity for older persons, there is unfortunately a great dearth of statistical data in this area. In the Kinsey volumes, for example, we find data on fewer than 80 individuals past 65, among the many thousands interviewed.

We are undertaking the present investigation in order to help fill this void. All of the undersigned are medical doctors now in practice in various fields. All of us have had for many years a special interest in the area of sex behavior and functioning. Our results will be made available to medical publications and the general public.

We hope that you will take the few minutes necessary to fill out the questionnaire and return it to us. It is of course completely anonymous and confidential. We shall greatly appreciate your cooperation.

Sincerely yours,

gene B. Mozes, M. D.

Greetenderst Nurseries Lansing, Michigan 49116 USA

Gentlemen:

The Ministry of Agriculture here in Guatemala has on foot a program which aims to develop the cultivation of Temperate Zone fruit in the highlands. I am technical advisor to the program and have been asked to find out where we can obtain Malling Mertan rootstocks, perhaps mainly 106, which seems to have done better than the others tested here to date - the I must say we have not conducted many careful trigls.

They have asked me get prices on 5000 and 10,000 reetstocks of MM 106 of appropriate size for shipping to Guatemala, and and at what time you could dispatch them. It doesn't matter at what season they arrive here - it is important only that they be shipped at the proper time in Michigan. You might also quote price on 2000 MM 109.

Please address your reply to me at Aantigua, Guatemala (no street address necessary) and send me a copy of your letter which I can give to the man who is in charge of this project.

Sincerely,

WILSON POPENOE

For the past ten years I have been buying fruit trees for experimental planting in Guatemala from Bountiful Ridge in Maryland. I am a member of the Pomological Society am for years have been in touch with Dr Kessler of the University of Michigan. We would expect to send you a check on a bank in the United States, or a draft, in advance of shipment.

Gentlemen:

KISSIMMEE, FLORIDA, 32741

In January I wroteyyou from my home in Antigua, Guatemala, Central America asking you if you could ship some peach trees to me at that address. I have received no reply to this letter, and in discussing the matter yesterday with Professor Ralph H. Sharpe of the University of Florida, well known to you, he suggested that probably you were sold out at the time you received this letter and therefore had not replied.

He believes that I should place another order with you this year, not later than September. If there is any problem regarding rhe matter of foreign shipment, I could the trees received by my nephew John Popenoe, Director of the Fairchild Tropical Garden at Miami Florida, who would take care of shipping them by air to me at Guatemala City. In my previous letter advised that I will be glad to send you a check on the Wasrican Security and Trust Co. of Washington DC, in advance, for all expenses incurred in connection with shipment by air from Miami to Guatemala.

Will you kindly advise me if you will handle as suggested, and if so, please send me a copy of this year's price list. We will want most of the peach varieties of low chilling requirement which you are growing, with exception of Flordawon and Flordahome.

Sincerely,

Wilson Popmoe

The Macmillan Co., Publishers, New York City, USA

Gentlemen:

In 1919 or 1926 you published my "Manual of Tropical and Subtropical Fruits", one of the Rural Manuals edited by L.H.Bailey. Some years ago you wrote me that no further printings would be made and you offered me the plates, which I did not accept because I felt the Manual was out of date and a complete revision would be required if it was to be republished.

The field is now cowered by other and better works in English, but as yet we have nothing comprehensive in Spanish. I have therefore offered Salvat Editores of Barcelona, Spain, a work on tropical fruit culture - by no means a translation of my Manual-whiich you published - but I would like to use a number of illustrations which appeared in the latter book. I have the original drawings here, which you were good enough to return to me, and some of the photographs. Will you kindly advise at the address below, if there is any objection to my using any or all of the illustrations which originally appeared in "Manual of Tropical and Subtropical Fruits."

Sincerely,

Director Emeritus

WILSON POPENOE Antigua, Guatemala, Central America.

WHO'S WHO IN AMERICA

EDITORIAL OFFICES

MARQUIS PUBLICATIONS BUILDING

CHICAGO-II ILLINOIS U.S.A.

1898 - Our Seventh Decade - 1960

Dear WHO'S WHO Biographee:

Your WHO'S WHO sketch as last prepared is enclosed

- to be up-dated and rechecked, and then returned, in the accompanying no-postage-required envelope, to the files of the compilers already working on the next - the 32nd Biennial Edition - WHO'S WHO.

Our Editors ask the favor - and with some degree of urgency - $\overline{\text{of}}$ as immediate as practicable cooperation to that end -

and they especially request your attention to such details as the occupational designation given in the first line and the dates of termination of positions no longer held, in the body of the sketch, as experience gained in the compilation of the vocational index for the current edition indicates that in the case of frequently revised WHO'S WHO sketches errors or incomplete information most often occur in those places.

The Editors hope, by using new compilative procedures and printing processes, to advance the publication date of the new Volume 32. But their production targets require speeding up markedly the thorough sketch-by-sketch up-dating which must be made before each printing.

This name-by-name checking, to make WHO'S WHO currently accurate for each edition, is possible only because of the cooperation of the outstanding men and women it lists - those whose noteworthy accomplishment is thereby always of record down to date in its pages ... pages in the constant reference usage typified by the few examples for which space could be taken in the enclosed announcement of the new edition.

Triffee Colonelly to the resident time the triffee or the colonelly.

Obviously the accuracy and the currency which this periodic checking at firsthand provides for personal and career data, given worldwide circulation in WHO'S WHO, is directly in the interest of those

selected for listing in it, and to whom its Editors must, of necessity, turn for the required cooperation.

We here recognize that this cooperation also vitally strengthens the reference serviceability of WHO'S WHO, and one tangible reciprocation we can for our part offer -

is to extend to its biographees advance-of-publication-bookings discounts (up to 25% - \$6.65 saving) exceeding even those for many years allowed libraries, schools and other institutional reference users.

It is in part possible to offer biographees who assist our Editors keep their sketches accurate, these preferences, because, by setting the initial press run to include their pre-publication bookings, important production economies become obtainable — and this is especially true in the case of an over 3,300 page volume which takes upwards of six months to print, let alone bind. We pass on to them not only these savings, but others which result in the unusually worthwhile dollars-and-cents preferences biographees alone receive.

These important discounts \dots available only to those listed in WHO'S WHO so assisting its Editors \dots are:

On their pre-publication subscriptions accompanied by remittance, \$6.65 - 25% - reducing the pre-publication list price of WHO'S WHO (\$26.50) to but \$19.85, with all delivery costs prepaid.

On their pre-publication subscriptions to be billed against open account on delivery, \$4.00 - 15% - making WHO'S WHO available to them for \$22.50.

A convenient form is enclosed which - on your sketch being returned now - provides these preferences. (WHO'S WHO is, for professional, vocational, or business reference use, a deductible expense taxwise.)

It is, in fact, economies resulting from biographees' pre-publication bookings, and new production and compilative methods, which have principally made possible reflecting in subscriptions to WHO'S WHO only a small portion of the drastic advances - of from 150% to $\overline{200\%}$ - in the cost of all items necessary to its publication.

Indeed, since we are continuing the preferentials the enclosed restricted form offers biographees, the prepaid advance subscription to them for the

new 32nd Biennial Edition is actually within 33% of the pre-World-War-II list figure.

It is with these practical factors of mutual interest in mind that we also bespeak your cooperation in now placing your subscription to the coming edition - the enclosed postpaid envelope may of course be used for your booking as well as for return of your sketch.

Please return the sketch proof even if no changes are to be made, for it must take its alphabetical place in the compilers' files for the new edition to avoid possible accidental omissions later in the compilative procedure.

Your cooperation on both these scores ... advance-of-publication booking that will reduce production costs, and up-dating your data ... will be appreciated - while early return of the enclosed proof will be helpful to our Editors in connection with their stepped-up production schedule.

Sincerely yours,

Jackson Martindel

The Announcement of the 32nd Biennial Edition
A Biographees' Privilege Form
Postpaid self-addressed return envelope

P.S. - I should like to call to your attention the lithographic reproduction on the last page of this letter of the special message from Carl Sandburg, given on publication of the 60th Anniversary Edition of WHO'S WHO. What "America's Poet Laureate" has to say about WHO'S WHO expresses, certainly better than any of us can here, what we feel about WHO'S WHO and the responsibility inherent in its compilation - a responsibility handed down by Albert Nelson Marquis and now in my trust - and that of our Editors. It is that responsibility which we have to ask you to share with us to the extent the Editors now request.

J. 41.

A Message From Carl Sandburg . . .

CONNEMARA FARMS

FLAT ROCK, N. C.

There are many big books trying to tell What's What or How Now or even Why Why but for Who's Who we go to Who's Who of long establishment and deep roots.

Carl San Houng

... for which the Editors are Most Appreciative

Thirty-Second Biennial Edition

Below is a proof of your sketch as published in the previous blennial Edition of "Who's Who." Both to bring new data to the editors' estantion and retaining the sketch is otherwise in order for inclution that the sketch is otherwise in order for inclution that the sketch is otherwise in order for inclution that the sketch is of the sketch of the the grocedure nated to the right below. Extending this cooperation in maintaining the reference serviceability of "Who's Who" which the editors must of necessity as of you, will be greatly appreciated by them-one reciprication for it which they can offer is tendered in the paragraph boxed in red in the lower left-hand in the paragraph boxed in red in the lower left-hand.

Should the biographee named below not be living, the editors will appreciate this sheet being returned to them by the person into whose hands it may fail, with a (signed or initialed) notation of the date of death. Such cooperation will assure transfer of the aketch to the next edition of "Who Was Who in America".

Proofs sent during compilation are usually for the purpose of bringing to attention the latest information suggested for consideration by the editors and are not intended to commit them to publishing any or all of the data in any service in the purpose of the purpose of the data in any service.

Deadline (see paragraph "1" below) for corrections:

Within USA-10 days from receipt hereof to assure recompilation.

Outside USA-as promptly after receipt as practicable-air mail suggested.

NOTE: 1: That personal biographical data made permanently of racord for public consultation at libraries and other reference centers throughout the world in "Whys." Who" be currently accurate, is obviewely of concern alike to the biographes and its editors. The deliters for their part understake a complete revision of "Whos", Who" biennially, and, as individual data can be most effectively checked only at firsthand, earnestly request the personal cooperation of biographeses to that end. As a complete revision of "Whos" Who" for the next printing is now actively in compilation, such a request is now made of you by the editors in respect to the proof attached to this sheet. Therefore please promptly note below—on the sheet itself any necessary atterations or additions valid as of the date it reaches you. To solviste the necessity of sending out another compilers' copy sheet, please return this one at once, regardless of whether or not changes are suggested.

 Whenever possible, future events now known—Including coming publications and changes in appointments or offices—should be anticipated and added to this compilers' copy sheet. Such information will remain entirely confidential.

3: DO NOT REWRITE the sketch, as it has already been set in type as shown. Since scattered minor alterations may involve complete resetting, the editors, because of the continuingly difficult production situation, will additionally appreciate cooperation in minimizing them.

PLEASE LIST NECESSARY CHANGES IN FOLLOWING ORDER:

- 1 TITLE OR POSITION:
- 2 MARITAL-CHILDREN
- 3 CURRENT CAREER DATA:
- 4 MEMBERSHIPS, AWARDS AND HONORS, WRITINGS, MISCELLANEOUS
- 5-6 ADDRESS CHANGES OR CORRECT ADDRESSES (IF NOT NOW SHOWN IN SKETCH)
 - 5 BUSINESS OR PROFESSIONAL
 - 6 HOME

Your signature (or an authorized one)—so that the editors may be assured personal data have been checked firsthand

IMPORTANT: If a sketch does not include an address, proofs can not be sent for revision necessary to current publication and avoidance of transfer to the non-current classification. Therefore, if not already correctly given in the attached proof, proposes note at numbers "3" and "6" above both home and business addresses (including one and to the addresses published, and to be available only to the delitors, check here "no "with the addresses published, and to be available only to the delitors, check here "no "the proposed of the propos
