The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

*Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Catalog of Plants  
growing in the Lan-  
cetella Experimental  
garden at Tola, Hon-  
duras. Compiled by  
J. H. Permar and  
published at La Lima  
Honduras 1945

The principal contributions of Zanetti in its first 35 yrs are:

Development of the African oil palm industry in Trop. Am.

(Introduction and establishment of the best Asiatic bamboos.

Asiatic fruits for wet climates - the mango, durian, rambutan, Ambacca lychee

Introduction and dissemination of

fine mango varieties

The Brazilian fruits

The Pili nut

The Lychee

Several Ornamental  
Trees and shrubs

Hevea rubber

Abaca

Citronella

Orchard of Palis  
planted in 1944  
78 arbores

Lychee Ambona in  
69 arbores 1949

1000 spp and vars  
of plants, with em-  
phasis on economic  
Best collection of  
these in tropical  
world.

The size of many  
trees is estupendo:  
Pterocarpus at  
17 yrs ~~3~~ 30' DBH  
Guarea 3½ ft

Chopatra for

Geo Cellon also  
was a pioneer

Mulgoba grower -  
same years.

Cellon's Catalog  
1912

Will March planted  
the Mulgoba orchard  
about 1904<sup>3</sup> It was  
10 or 20 acres.

Mr Krome came  
here in 1904 and  
it was there at  
the time. (March  
later shot himself  
under one of the  
trees.
