About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dr. Paul H. Allen
Escuela Agrícola Panamericana
Tegucigalpa, Honduras

Dear Dr. Allen:

Thanks for keeping me on the list for Ceiba; I am pleased to know that it will be continued, for there have been many useful articles in it. The format used in the first number of vol. 6 is very attractive also.

Do you plan to issue a title-page for vol. 5? I should like to get my set bound, but if there is to be a title-page I want to wait for it.

I believe I have not congratulated you on the Rain-forests of Golfo Dulce, which I thought was very interesting and very well done. We surely need more such studies of tropical areas.

With best regards,

Sincerely,

Rogers McVaugh
