About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

UNIVERSITY OF COLORADO
PRESIDENT'S OFFICE
BOULDER, COLORADO 80304
May 27, 1966

Professor Askeff Løve
Department of Biology
Denison 108
Campus

Dear Professor Løve:

It is with pleasure that I inform you of your promotion to the rank of Professor in the Department of Biology effective with the beginning of the academic year 1966-67.

In accordance with the policy of the Regents this appointment to the rank of Professor is now continuous.

Sincerely yours,

J. R. Smiley
President
