The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

- 112 *Gaura coccinea*, Nutt.  
 113 *Mentzelia ornata*, Torr. & Gray.  
 114 *M. laevicaulis*, Torr. & Gray.  
 115 *Cuscuta perennis*, Gray.  
 116 *Echinocystis lobata*, Torr. & Gray.  
 117 *Mamillaria vivipara*, Hook.  
 118 *M. missouriensis*, Sweet.  
 119 *Echinocactus simpsonii*, Eng.  
 120 *E. simpsonii*, f. (Alpine, var.)  
 121 *Echinocereus viridiflorus*, Eng.  
 122 *Opuntia Rafinesquii*, Eng.  
 123 *O. missouriensis*, DC.  
 124 *O. fragilis*, Hook.  
 125 *Caonm (?) Hallii*, Watson.

The foregoing list embraces the majority of the flowering plants and Ferns, so far identified, and found growing by the subscriber in the vicinity of Boulder, Colorado.

Herbarium specimens can be furnished of quite a number of the above and all may be ordered, subject to collection another season at 10¢ each or \$7.00 per hundred, or will exchange for desiderata.

All who will collect, bulbs, seeds, or living plants are invited to correspond, with a view to exchanging or otherwise.

Wanted, - Books on botanical subjects, names of collectors of plants & seeds, and of all who are interested in the horticulture of North American Hardy

Perennials

Send list of wants of living plants for special prices.

Boulder, Colorado Dec. 1, 1896.

D. M. Anderson
