The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Number 184.

(PRICE 1s. 6d.)

To be continued MONTHLY,

OF THE

BOTANICAL MAGAZINE;

OR,

St. George's-Fields.

And Sold by all Bookfellers, Stationers, and News-Carriers,
in Town and Country.

THE
BOTANICAL MAGAZINE,

THOUGH so cheap, was conducted with such Care and Judgment by the late Mr. WILLIAM CURTIS, as to give it an eminent Station amongst Works of Science. The Expence attending its Publication allowed, from the first, but a very small Profit, which has been progressively diminishing; insomuch, that Mr. CURTIS had in his Life-time found it necessary to form a Plan for advancing the Price. Since this, all the incidental Expences have greatly increased; the Price of Paper, in particular, has been more than doubled. It is now, therefore, become impracticable to carry on the Work upon the same Terms, and the present Publisher is under the disagreeable Necessity of raising the Price. — To do this, with as little Disadvantage as possible to the Purchasers, it has been determined to add another Plate to each Number.

The Public are therefore requested to take Notice, that the future Numbers of the BOTANICAL MAGAZINE will contain Four Plates, and that the Price will be One Shilling and Sixpence. The Numbers already published, containing Three Plates each, will hereafter be sold for One Shilling and Threepence.

MAY 1, 1801.

Printed by S. Couchman, Throgmorton-Street.
