The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Number 215, Dec. 1804

(Price THREE SHILLINGS)

To be continued MONTHLY, of

CURTIS'S

BOTANICAL MAGAZINE;

OR,

This Day is Published,

MEDICAL BOTANY; containing systematic and general Descriptions, with Plates of all the Medicinal Plants, indigenous and exotic, comprehended in the Catalogues of the Materia Medica of the Royal Colleges of Physicians of London and Edinburgh, accompanied with a circumstantial Account of their Medicinal Effects, and of the Diseases in which they have been most successfully employed.

By **WILLIAM WOODVILLE, M. D.**

Of the Royal College of Physicians of London.

In Four Volumes Quarto, containing Two Hundred and Seventy-Four Plates.—Price Two Pounds Nineteen Shillings plain in Boards, and Seven Pounds One Shilling and Sixpence correctly coloured from Nature.

Printed and Sold by **WILLIAM PHILLIPS, George-Yard, Lombard-Street, London;** and may be had of all other Bookfellers.

Characters of the Work.

“ As a distinct Knowledge of Plants is scarcely to be gained by a
“ mere verbal Description, Dr. WOODVILLE has added beautiful and
“ accurate Delineations from the masterly Hand of Mr. SOWERBY.

“ In collecting Materials for this Work, Dr. WOODVILLE ap-
“ pears to have taken great Pains, and his Labour is certainly suc-
“ cessful. His Botanical Descriptions are accurate; the Histories
“ which are subjoined are frequently very full and exact; and the
“ Account of the Virtues of each Plant is scientific and satif-
“ factory.”
