About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

A

BOTANICAL DICTIONARY;

OR,

Elements of Systematic and Philosophical Botany.

BY COLIN MILNE, LL.D.

Author of the INSTITUTES of BOTANY, and HABITATIONS of ENGLISH PLANTS. Third Edition, revised, corrected, and very considerably enlarged.

The Whole of this Work being printed off, forming one handsome Volume in Octavo, may be had by one or more Numbers at a Time, as may suit the Convenience of the Purchasers; or the Whole complete, in Boards, Price £1 1s. plain, or with Coloured Plates, £1 15s.

“ Dr. MILNE'S Botanical Dictionary has been long known to the Public.— The present Edition is the Third; and it will be allowed that the Demand which rendered it necessary, is at the same Time a Proof of the Merits of the Work. The Plates, with which this Edition is accompanied, are executed in the highest Style of Accuracy and of Elegance, and are well calculated to convey correct Ideas of the Objects they represent: they will certainly be considered as a valuable Addition to the Work.”—*Vide Literary Journal, April 1805.*

“ This Dictionary has long been the Admiration of Europe, and is quoted, as of the first Authority, by all the most eminent Writers both in this Country and Abroad, and is recommended by the most eminent Professors and Teachers of Botany, as containing an excellent Fund of Botanical Instruction, necessary to be known by every Person, who is cultivating that useful and agreeable Science.”—*Dr. Thornion.*
