The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Just Published,
In Royal Octavo, Price Four Guineas in extra Boards,
being Numbers 1 to 24,

Forming the First and Second Volumes of

British Ornithology,

By GEORGE GRAVES, F. L. S.

THESE Volumes contain Ninety-Six accurately-coloured Engravings of BRITISH BIRDS, with copious Descriptions relative to the peculiar Manners of each Species, the Modes of Nidification, Periods of Migration, Generic and Specific Characters, and various other interesting Particulars, illustrative of their Habits and Economy.

It is intended to give a correctly-coloured Figure of every Species of Bird, either constantly residing in, or occasionally resorting to this Country; and where the sexual Appearance is remarkably different, Figures of both will be given. Our NATIVE BIRDS, it is presumed, will be comprised in Six Volumes; and those Species, which by Domestication, are naturalized to Britain, will appear in a Supplementary Volume; forming together the most complete Work on the Subject ever submitted to the Public.

A Volume of the Size of the present will be published Annually till completed, and the Numbers as heretofore, which may be one or more at a Time; those containing Six Plates, at Five Shillings each Number, and with Three Plates, at Two Shillings and Sixpence each.

* * Published by the AUTHOR, Crown-Row, Walworth, Surrey.

TO BE PUBLISHED BY SUBSCRIPTION,

As a Companion to the above,

OVARIVM BRITANNICUM,

*Being a correct Delineation of every Species of Bird's Egg
found in Great-Britain.*

The Figures will be of the natural Size, and accurately coloured. As the Nature of the Subject requires the greatest Delicacy in the Engravings, they will of course admit of a very limited Number of Impressions.

It is presumed the Volume will contain about Sixty Plates, and the Price not exceed Three Guineas.

Persons wishing to be possessed of the above, will please to make early Application, addressed to the AUTHOR, Crown-Row, Walworth; or to SHERWOOD, NEELY, and JONES, Paternoster-Row; ARCH'S, Cornhill; WHITE and Co. Fleet-Street; HARDING, St. James's-Street; and CLARK, New Bond-Street.
