The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

W. Wilson

Number 337,
(PRICE 3s. 6d.)

To be continued MONTHLY, of
CURTIS'S

—*—

THIS Article, so desirable for its great Conduciveness to Health, as well as its pre-eminent Beauty in Appearance, its Durability and unequalled Economy, is manufactured on a Mathematical Principle, (*ayant toute l'Agreeable de la Toile du Lin*) and is most pleasant to wear, totally preventing the ill Effects of sudden Transitions from Heat to Cold, by imparting effectually, yet imperceptibly, *an equable Temperature*. It has no Flax nor any thing whatever mixed with it, and it is fully ascertained to surpass in Durability every other Kind of Cloth, and thus rendered most desirable to every Individual, in every Climate and in every Season. Each Piece contains from Twenty-Five Yards upwards, at Two Shillings, Two Shillings and Sixpence, Three Shillings, Three Shillings and Sixpence, Four Shillings and Sixpence, and Five Shillings and Sixpence per Yard, and made both in Seven-Eighths and Four-Fourths. The Pieces for Sheeting, affording peculiar Comfort in this and in Foreign Climates, are made in Five-Fourths and Six-Fourths wide, and contain from Twenty-Six to Fifty-Two Yards each, from Two Shillings and Sixpence to Five Shillings and Sixpence per Yard, and each Piece is warranted. It is Sold, stamped, Wholesale and by the Piece, by J. MILLARD, the Patentee, at the EAST-INDIA WAREHOUSES, No. 16, Cheapside, and at no other House; and where the White Chints for Ladies Dresses may be obtained from Three to Four Guineas, each Piece containing from Three to Four Dresses each. Many of the First Families have long experienced its Advantages.
