*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

**ROYAL DISPENSARY FOR THE DISEASES OF THE EAR,**  
To a Course on the Anatomy, Physiology, and Diseases of that Organ.

By JOHN HARRISON CURTIS, Esq.

*Aurist to His Royal Highness the Prince Regent, Surgeon to the Royal  
Dispensary for the Diseases of the Ear, Fellow of the Medical  
Society of London, &c. &c.*

Printed for the Author, No. 2, Soho-Square; and sold by Callow, Crown-Court, Soho; Cox and Son, St. Thomas's-Street; Highly and Son, T. and G. Underwood, Fleet-Street; Souter, St. Paul's Church-Yard; and Anderson and Chasey, Medical Booksellers, West-Smithfield.

Of whom may be had, by the same Author, Price Seven Shillings, Boards,

A TREATISE ON THE PHYSIOLOGY AND DISEASES OF THE EAR,  
containing a comparative View of its Structure and Functions, and  
of its various Diseases.

"The Diseases of the Ear are more intricate than those of any other organ of sense; every thing, therefore, new on the subject has a claim to attention, particularly when it is written with a laudable view of imparting information to deaf persons. We agree with the Author, that an attention to one branch must acquire a facility of discrimination and a nicety of treatment. The Author of this work, besides his other useful information, has described various ingenious mechanical contrivances for assisting hearing, many of which are entirely new in this country."—*Antijacobin Review*, November 1817.

PART II. OF THE  
***Encyclopædia Metropolitana;***  
OR,  
UNIVERSAL DICTIONARY OF KNOWLEDGE,  
ON AN ORIGINAL PLAN:

This Part contains the conclusion of the Treatise on MECHANICS, thus completing, in two parts of the work, one of the most useful of the Applied Sciences; a complete view of the early POETRY of GREECE, in the Historical and Biographical Division; the usual Portion of the Pure Sciences, beginning with GRAMMAR; and of the Alphabetical Division, in which are the interesting articles, AERONAUTICS, ÆTNA, AFGHAUNISTAN, AFRICA, AGRICULTURAL IMPLEMENTS, and ALBANIA; and a newly-formed English Lexicon, with the authorities chronologically arranged.

London: Printed for REST FENNER.

## MILLARD'S PATENT IMPERIAL CLOTH.

*Ne contenant pas de lin mais en possédent les agrémens.*

**M**ANY persons having been induced to offer for sale a variety of cloth, closely to imitate the above, the Public are respectfully apprized by the Patentee, his Patent Twine Cloth is sold at his East-India, Hambro', Scotch, Manchester, and Family Linen Warehouse, No. 16, CHEAPSIDE, Wholesale for Exportation, in entire Cases of 60 and 30 Pieces each, and Retail by the Piece of 26 to 52 Yards each, in 4-4ths for Shirting, &c. at 2s. 2s. 6d. 3s. 3s. 6d. 4s. to 5s. 6d. per yard, *and no where else whatever*, where application is requested to be made, and all orders from abroad or the country are respectfully requested to be sent. It is most desirable to those who require a warmer article than linen, and essential to families, &c. going abroad to, or returning from, warm climates, from its conduciveness to health, and tending to prevent the effects of immediate transitions from heat to cold in those, as well as in the colder ones. It supersedes the use of the fine Madras Long Cloths of India, being applicable to all the purposes for which that has been held in universal estimation. The wide widths for Sheetings forms the most economical and desirable *winter wear for cold climates and for travelling.*
