The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

TO BE CONTINUED MONTHLY, OF

CURTIS'S
Botanical Magazine;

OR,

FLOWER-GARDEN DISPLAYED:

IN WHICH

*The most Ornamental FOREIGN PLANTS, cultivated in the Open Ground, the Green-House, and the Stove, are accurately represented in their natural Colours.

TO WHICH ARE ADDED,

Their Names, Class, Order, Generic and Specific Characters, according to the celebrated LINNÆUS; their Places of Growth, and Times of Flowering;

Together with the most approved Methods of CULTURE.

A WORK

Intended for the Use of such LADIES, GENTLEMEN, and GARDENERS, as wish to become scientifically acquainted with the Plants they cultivate.

By *JOHN SIMS, M. D.*

FELLOW OF THE ROYAL AND LINNEAN SOCIETIES.

LONDON:

Printed by STEPHEN COUGHMAN, Throgmorton-Street,
For the PROPRIETORS, and Sold by SHERWOOD, JONES, and Co.
No. 20, Paternoster-Row.

Also by all Booksellers, Stationers, and News-Carriers,
in Town and Country.

**CHANDLER AND BUCKINGHAM,
NURSERYMEN,
VAUXHALL,**

Submit the following Collections of
**CAMELLIAS, PÆONIES, ROSES, GERANIUMS,
CHRYSANTHEMUMS, GREENHOUSE
PLANTS, AND HERBACEOUS PLANTS.**

Being some of the most ornamental now cultivated. The Camellias, a flowering plant of each of the following sorts for £3. The same collection consisting of larger Plants £5. packages included. To those who may only want individual Sorts, the Price for the first collection is 7s. 6d. per plant; of the second 14s. per Plant. The collection contains the Double Red Camellia, Double White, Double Striped, Double Buff, Double Rose coloured, Double Pomponé, Double Pæony flowered, and Double Waratah.

If desired a Detail of the Mode of Culture will be sent with the Plants.

Fifty handsome greenhouse plants of a flowering size excluding common kinds, carefully packed and labelled, for £5. Persons sending lists of what they may already have will avoid the chance of duplicate; and directions for culture, where any plant may require peculiar treatment, will be enclosed.

~~~~~

The PÆONIES contain the following, of which the Pæonia Officialis Sabini, Pæonia Albiflora Chinensis and Pæonia Fragrans, are of recent introduction, the two latter very handsome. The Pæonia Albiflora Chinensis being a flower of almost unrivalled beauty.

|                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                        |

The Price of the whole with package £2 10s.

Strong flowering Plants of the PÆONIA MOUTAN, or TREE PÆONY, 21s. each, or smaller Plants well established, 10s. 6d. each.

The collection of ROSES contains Fifty of the finest Sorts, with their Names, amongst others, Celestial, Tuscan, Swiss, Leyden, Rose de Quatre Saisons, Grand Purple, &c. Price £2 2s. Package included.

The Geraniums of Twenty-five handsome Varieties lately raised. Price with Package, £2.

~~~~~

Fifty of the better Kind of Herbaceous Plants, packed and labelled, for £2.

Twenty varieties of Chrysanthemum Indicum that will flower this season including those lately introduced through the medium of the Horticultural Society, for £2.

ALBION HALL,
(End of London Wall, near Moorgate)

Under the Patronage of the *REV. ALEXANDER FLETCHER,*

TWELVE LECTURES

LECTURE ON ASTRONOMY,

Monday Evening, December 1, 1823;

Begins at a Quarter after Eight;

LECTURE ON BOTANY,

Monday, December 8, 1823;

By **DOCTOR THORNTON.**

SINGLE TICKET..... Five Shillings.

For the COURSE (Twelve Tickets)..... Ten Shillings.

(Tickets Transferable)

To be had at the **ALBION HALL Lecture Room**; of **DR. THORNTON,**
13, *Union Court, Broad Street, City*; and of **S. COUCHMAN,**
Printer, 10, *Throgmorton Street.*

Scientific & Religious Instruction combined.

DOCTOR THORNTON'S
TWELVE LECTURES,

Will be Delivered in the

ALBION HALL,

LONDON WALL, near the ALBION CHAPEL, Moorfields;

On the Monday Evenings, commencing Monday Dec. 1,
1823, at a Quarter after Eight.

Address,

DOCTOR THORNTON, Member of the London College of Physicians, has been at a very considerable expense in forming a number of the most beautiful TRANSPARENT PAINTINGS, considering this as the best mode of conveying Science to a large assembly, which mode has been acknowledged "as admirably calculated for the purpose" by some of the first characters in this country; but as exciting *prejudice* in narrow minds, and the jealousy of some *erudite* Lecturers; this plan, first introduced by DOCTOR THORNTON, as regards *Botany* and the *Animal Economy*, has to fight its way in the world against the most powerful opposition, and hence he is obliged to solicit the favour and patronage of an enlightened and generous public; and, DOCTOR THORNTON hopes, that his very useful *invention* of teaching BOTANY, ANATOMY, and other SCIENCES, through the medium of TRANSPARENT PAINTINGS, will meet with the PUBLIC SUPPORT upon the present occasion.

Ticket for admission to the Twelve Lectures 10s.

Ticket for a single night 5s.

(Tickets Transferable)

These Lectures will commence at 15 minutes after Eight in the evening, precisely, and finish before Ten.

LECTURE I. *Monday, December 1.*—On the Creation of this, and other worlds, including ASTRONOMY.—*Proof of a God, and his Power.*

LECTURE II. *Monday, December 8.*—Recommendation of the Study of BOTANY.—*Love of God shewn.*

LECTURE III. *Monday, December 15.*—On the different CALYXES.—*Providence of God.*

LECTURE IV. *Monday, December 22.*—On the different COROLLAS.—*Wisdom of God.*

LECTURE V, & VI.—*January 4, & 11.*—On the LINNEAN SYSTEM.—*Order in Creation.*

LECTURE VII, VIII, & IX.—On the HUMAN FRAME.—*All the Attributes of God are shewn here.*

LECTURE X, XI, & XII.—On CHEMISTRY.—*Wisdom of God proved in inanimate Nature.*

N. B. These Lectures will be illustrated by upwards of 200
TRANSPARENT PAINTINGS.

Tickets may be had at the *Albion Hall*; of DOCTOR THORNTON, at his house, No. 13, *Union Court, Broad Street, City*; and of S. Couchman, Printer, 10, *Throgmorton Street.*

M. HODSON,
CHILD BED LINEN WAREHOUSE,

No. 1.

BISHOPSGATE STREET WITHIN;

Begs leave to acquaint Ladies and Families going to the East Indies, that they can be supplied with every article requisite for the Voyage, on the shortest notice, and at the lowest prices.

This day is published, in 8vo. by MACLACHLAN and STEWART, Edinburgh; and BALDWIN, CRADOCK, and JOY, London, No. 17, price 4s. of the

SCOTTISH CRYPTOGAMIC FLORA, or Coloured Figures and Descriptions of Cryptogamic Plants found in Scotland, belonging chiefly to the order Fungi, and intended to serve as a continuation of English Botany. By ROBERT KAYE GREVILLE, Esq. F.R.S.E. Member of the Wernerian Natural History Society, &c.

*** Nos. 1 to 16, price 4s. each, may still be had.

DR. HOOKER,

Professor of BOTANY in the University of Glasgow,

IS PREPARING FOR PUBLICATION

A WORK, ENTITLED

A SYSTEM OF PLANTS;

Which will contain descriptive characters of every species known to be cultivated, or in existence throughout the globe; together with some general remarks, notices of their uses, &c. arranged according to the Natural Orders, but accompanied with a Linnean Index of reference, and illustrated with numerous coloured figures. The figures to be devoted to the representation of a plant of each Natural Order, or to the dissections of the flowers and fruit, from drawings made by the author.

Every plant named in the valuable arrangements of WILDENOW, PERSOON, DE CANDOLLE, BROWN, &c. and those in the rare and costly publications of JACQUIN, CURTIS, SMITH, SOWERBY, HUMBOLDT, KOST, REDOUTÉ; in ROXBURGH'S Coromandel Plants, the Hortus Malabaricus, Flora Danica, &c. &c. will find a place in this work, with the addition of very many other species which the labours of men of science in all parts of the world have introduced to our gardens, and to our Herbaria, but which have never yet been recorded.

One object of the author is to divest the study of Botany of the repelling feature of a dead language in which it has hitherto been clothed, and by adopting our own, instead of the Latin, to promote the cultivation of the Science throughout all classes of the community, to many of whom the latter is an insuperable obstacle to its acquirement, and since there is no work in Latin of so complete a nature, it will likewise be of equal importance to the more scientific and classical Botanist.

The work will form Eight large Octavo Volumes closely printed in columns, and published periodically, a quarter volume every two months.

Printed for HARDING, MAVOR, AND LEPARD, *Finsbury Square,*
London, to whom Orders are to be addressed.
