*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

This Work consists of Plates and description of Species of the Genus intirely new, and the most magnificent hitherto discovered; which, as they will bear the climate of this country, they cannot fail to be an important acquisition to the Parks and Plantations, both in usefulness and ornament. Besides the Genus Pinus, it includes likewise descriptions of many other new Species of the Family of Conifera.

A Plate is given, with a History of the interesting tree which produces the tea of Paraguay; and in an Appendix, a full account of the Lambertian Herbarium, by Mr. Don.

\*\* The First Volume having become exceedingly scarce, it is in contemplation to reprint it. Noblemen and Gentlemen desirous of possessing copies, are requested to send their names to the Publishers, or to their respective Booksellers, as the delivery will be regulated according to the order of Subscription. Twelve Sets will be coloured in the most finished Style of the Art, by *Sowerby*, after the original Drawings.

Such Plants, whether tender or hardy, will be taken Care of, and returned to Order, as soon as drawn and described. And when the Plants or Specimens cannot be conveniently removed, Notice of the same is requested to be sent to Dr. SIMS, by Post.

BY HIS MAJESTY'S ROYAL LETTERS PATENT,

**MORDAN & Co.'s PATENT ever Pointed Pencils.**

For centuries past Black Lead has been enclosed in wood, forming the usual Pencil for Drawing, &c. but the wood has to be continually cut away, and the point sharpened for use. MORDAN and Co's invention obviates this entirely, the Lead being enclosed in a Silver Tube of small diameter, to which is attached a mechanical contrivance for propelling the Lead as it is worn. The diameter of the Black Lead is so nicely proportioned as NOT TO REQUIRE EVER TO BE CUT OR POINTED either for fine Writing, Outline, or Shading. The ingenuity and utility of the invention are so evident that it has secured universal approbation. It needs only to be seen to be instantly appreciated.

The cases for Drawing, &c. are of Ebony and Ivory, and the pocket sliding cases are of Silver or Gold, varying in taste and elegance. The Black Lead is of the finest quality, and prepared (by an entirely new chemical process) of five distinct degrees of hardness, and contained in boxes properly lettered for artists, and at the same time is perfectly suitable for all the purposes of business. Sold by most respectable Goldsmiths, Jewellers, Silversmiths, Stationers, &c. &c.

N. B. To prevent imposition S. MORDAN and CO.'s PATENT, is stamped on each of their Patent Pencils.

25, Paternoster Row.
