About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

TO
THE SUBSCRIBERS
TO THE
Botanical Magazine.

SAMUEL CURTIS takes this opportunity of informing the Subscribers to this extensive, useful, and beautiful Work, that the FIFTY-THIRD VOLUME of the Old Series being now completed, Systematic Indexes are preparing for the whole, which will form a thin Volume to accompany it, and prevent the repeated turnings over to find any particular plant figured therein. It is expected that, the GENERAL INDEXES for the Fifty-Three Volumes will be ready for delivery with the Third Number of the NEW SERIES on the 1st of March next, and every Subscriber wishing to have it had better order it to be sent with that Number.

S. CURTIS also begs to remind those who have incomplete sets, that they can still be made perfect, by applying at his Warehouse, at *Walworth*, or of the publishers of the NEW SERIES.

The Proprietor feels confident he is not promising too much in saying, that no pains will be spared by the present Editor, WM. JACKSON HOOKER, L. L. D. Regius Professor of Botany in the University of *Glasgow*, to make this Work the most interesting publication on Botany of the present day; especially as it is his intention shortly to figure and describe some most rare and curious Tropical Fruits, from highly finished and accurate Drawings made on the spot: indeed, this gentleman's acknowledged taste and zeal in literary and scientific pursuits, will insure to the Subscribers all the satisfaction such a Work is capable of affording. The Purchasers of Dr. HOOKER'S Exotic Flora, now about to be discontinued, it is hoped will transfer their patronage from that Work to this, as combining, under a cheaper form, the essential and scientific qualities of that Work.

The very flattering reception which the NEW SERIES of this Work has commenced with, will redouble the ardour of the Proprietor to merit the decided preference of a liberal and enlightened Public; and the improved style it now appears in is the fruits of the increased Patronage bestowed upon it. He feels the more grateful to the Subscribers for that patronage, when he reflects, how long their favors have been continued. No contemporary Work of the kind can boast of Forty Years duration, the present number being published on the FORTIETH Anniversary from its commencement; and as Dates show how coloured Botanical Works stood at that period, this Work may well challenge any comparison.

The Number will be delivered on the 1st day of every month (price 3s. 6d. coloured and 3s. plain) by SAMUEL CURTIS, the Proprietor, *Prospect Row, Walworth*, and at *Glazenwood, near Coggeshall, Essex*; also by SHERWOOD and Co. *Paternoster Row*; J. & A. ARON, *Cornhill*; and at TREUTTEL and WURTZ, *Soho Square*.
