To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

THE DESCRIPTIONS

By WILLIAM JACKSON HOOKER, L. L. D.

F. R. A. and L. S. and Regius Professor of Botany in the University
of Glasgow.

London :

Printed by Edward Couchman, 10, Throgmorton Street,

FOR THE PROPRIETOR SAMUEL CURTIS,
BOTANICAL MAGAZINE WAREHOUSE, PROSPECT ROW, WALWORTH,
AND AT GLAZENWOOD, NEAR COGGERHALL, ESSEX;

Also by SHERWOOD & Co. Paternoster Row; J. & A. ARCH, Cornhill;
and TREUTTEL & WURTZ, Soho Square;

And to be had of all Booksellers in Town and Country.

MR. SAMUEL CURTIS,

THE PROPRIETOR OF THE BOTANICAL MAGAZINE,

Respectfully informs those LADIES and GENTLEMEN who are fond of Horticultural pursuits, that, in addition to the usual Nursery Stock at *Glazenwood, near Cugesthall, Essex*, he has particularly to recommend the following Articles:—

APPLES.—The *Glazenwood Gloria Mundi*, the fruit frequently weighing from Twenty to Twenty-six Ounces; a long keeper, and excellent flavor. Dwarf Trees for training, or as Dwarf Standards, 2s. 6d. each.

A fine collection of excellent and curious sorts, selected from Fruiting Trees in his Orchard of Fifty Acres (Two Hundred sorts), at 1s. each.

PEARS.—A fine collection of Dwarf Trees, in addition to the most esteemed Old Sorts, are the excellent new kinds, introduced by Mr. BRADDOCK, at 1s. 6d. each.

CHERRIES.—A curious new Cherry, the fruit of which was sent to the Horticultural Society, by W. HONEYWOOD, Esq. M. P. the colour of mahogany, and the flesh remarkably firm, at 5s.

The true Florence, from — VACHEL, Esq. at 2s. 6d.

CHESNUT.—The *Dwarf Prolific*, the most ornamental leaf of any, and bearing fine-flavoured Fruit, on Trees not larger than the largest Goosecherry Trees, 1s. 6d. each.

FILBERTS.—The best *White Kernelled*, from 15s. to 30s. per Hundred.

GOOSEBERRIES and CURRANTS.—The most useful sorts known, at 25s. per Hundred.

ROSES.—Selections from a collection of Six Hundred of the finest kinds, in any quantity, from Fifty to Two Hundred sorts, from 9d. to 1s. each. *Damask or Red Rose*, for Apothecaries' use, 10s. 6d. per Hundred. Climbing kinds for Walls, consisting of *Banksia, Grecilla, Multiflora, Macartney, Bourzall*, &c. 1s. 6d. each. China Roses, as *Sanguinea, Bengalen-sis alba and rubra, Noisette, Olayata*, &c. 1s. 6d. each. *Yellow China and Yellow Banksia*, 7s. each.

New *White China*, large flower, and very beautiful, 2s. 6d. each.

Common China, for making Ornamental Hedges, from 26s. to 30s. per Hundred.

DABIAS.—Selections from a collection of One Hundred and Fifty finest sorts of Double and Semidouble varieties, with their Names and Colours, 2s. each.

FRONIAS in collection from the older varieties, 1s. 6d. each.

ditto, consisting of the Chinese herbaceous, at 3s. 6d. each.

Almuta, or Tree, from 1s. to 10s. 6d. each. *Paputaracea* 12s. each.

RHOODENDRON.—Curious and beautiful varieties of seedling hybrid sorts, from seed of *Catawbiense*, at 2s. 6d. each.

— *hirsutum*, several varieties, 1s. 6d. each.

— *ferrugineum*, at 2s. each.

— *maximum*, and seedling varieties of it, 1s. 6d.

AZALIAS in great variety, many well set with bloom, 1s. 6d. *Scarlet*, 2s. 6d. *Orange*, 3s. 6d. each.

ANDROMEDAS, KALIHAS, MAGNOLIAS, from 1s. 6d. to 2s. 6d.

STUARTIA malacocaulon and *margylandica*, 2s. 6d. each.

A great variety of American plants, from 1s. to 1s. 6d. each.

LAVENDER, for Plantations and drawing the Oil, the true English, 25s. per Thousand.

GREENHOUSE PLANTS.

GERANIUMS.—A very large collection of modern sorts, most of which are figured in SYLVESTER'S *Geraneacea*, and Seedling varieties of them, 1s. to 1s. 6d. each.

• The finest new sorts of latest introduction, such as *Moor's Victory, Latioleatum, Trans-huani, Mrs. Bishop, Youngii, Feronia*, curious varieties of *Ignescens*, &c. from 2s. 6d. to 3s. each.

CAPSELLAS, in great variety, from 5s. to 7s. each.

ORANGES, LEMON, SHADDOCK, and the true WEST INDIA LIMES (abundant bearers, and excellent for Punch) Dwarf Trees, from 3s. 6d. to 7s. each.

CACTUS, Speciosa and Speciosissima, 1s. 6d. to 2s. 6d. each.

YUCCA aloefolia, beautifully variegated, 21s. to 42s. each.

AGAPANTHUS umbellatus, ditto, ditto, 2s. 6d. each.

FLORISTS' FLOWERS.

H. GROOM respectfully informs his Friends and the Horticultural world, that he continues to propagate and import every description of Florist's Flowers, including Hyacinths, Tulips, Ranunculus, Anemones, Carnations, Auriculas, &c. &c., and to sell them at the prices affixed to the names in his Catalogue. H. G. is also in correspondence with most of the provincial Florists in Lancashire, and other Counties, and will undertake to execute orders for any Flower in cultivation, either in Great Britain, or on the Continent.

Watworth, February, 1827.

To GARDENERS, BOTANISTS, and Others, engaged in Agricultural Pursuits.

T. WINTER, Working Optician, No. 9, New Bond Street, respectfully informs Cultivators and Botanists, that from the encouragement he has met with in the Sale of his Self-registering Thermometers, and his newly-invented Vertical Wheel Microscopes, he is now enabled to offer them, and other articles, on the following low terms:—

Improved Self-registering Night Thermometers.....	from 12s. to 22s.
Day and Night ditto.....	26 to 45
Com. Fahrenheit's Thermometers.....	7 to 18

The Fellows of the Society are requested to apply to Mr. DON, for their Copies, between the Hours of Twelve and Four o'Clock, on any Day excepting Saturday.

THE

BOTANICAL MAGAZINE.

SAMUEL CURTIS takes this opportunity of informing the Subscribers to the *New Series* of this Work, which commenced on the 1st of January, 1827, that he has got bound in very neat boards, with Roman backs and corners, and gilt lettered, complete sets of the *Old Series*, in Thirty-Two uniform Volumes, with their Indexes; and, that those who wish to take that Series gradually, so as to study them attentively, before they are placed away on the Book Shelves, may be supplied with a Volume monthly, or quarterly, at the same time with the *New Monthly Number*; by which means, the expence will be gradually felt, and each Volume will be regularly perused. The early Volumes being rather smaller than the latter will be £1 : 16s. each; the latter, £2 : 2s. each. Those who have incomplete sets may still have them made perfect at the Publishers of the *New Series*.

The Proprietor feels confident he is not promising too much in saying, that no pains will be spared by the present Editor, WM. JACKSON HOOKER, L. L. D. Regius Professor of Botany in the University of Glasgow, to make this Work the most interesting publication on Botany of the present day; especially as it is his intention shortly to figure and describe some most rare and curious Tropical Fruits, from highly finished and accurate Drawings made on the spot. In the next Number, the curious Caryocar, or Suwarrow Nut will appear; and in the following, an highly interesting set of Plates, and full descriptions of the Double Cocoa Nut; in June the Cochineal Cactus, with the Insects &c. Indeed, this gentleman's acknowledged taste and zeal in literary and scientific pursuits, will insure to the Subscribers all the satisfaction such a Work is capable of affording. The Purchasers of Dr. HOOKER'S *Exotic Flora*, now about to be discontinued, it is hoped will transfer their patronage from that Work to this, as combining, under a cheaper form, the essential and scientific qualities of that Work.

The very flattering reception which the *NEW SERIES* of this Work has commenced with, will redouble the ardour of the Proprietor to merit the decided preference of a liberal and enlightened Public; and the improved style it now appears in is the fruits of the increased Patronage bestowed upon it. He feels the more grateful to the Subscribers for that patronage; when he reflects, how long their favors have been continued. No contemporary Work of the kind can boast of Forty Years duration, and as Dates shew how coloured Botanical Works stood at that period, this Work may well challenge any comparison.
