The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

VOL. I.

December 1, 1827.

No. XII.—*New Series.*

Price 3s. 6d. Coloured and 3s. Plain,

(To be continued Monthly)

THE DESCRIPTIONS

By WILLIAM JACKSON HOOKER, L. L. D.

F. R. A. and L. S. and Regius Professor of Botany in the University
of Glasgow.

London :

Printed by Edward Couchman, 10, Throgmorton Street,

FOR THE PROPRIETOR SAMUEL CURTIS,

BOTANICAL MAGAZINE WAREHOUSE, PROSPECT ROW, WALWORTH,
AND AT CLAZENWOOD, NEAR COGESHALL, ESSEX;

Also by SHERWOOD & Co. Paternoster Row; J. & A. ARCH, Cornhill; TRÜBTTEL & WURZ,
Soho Square; BLACKWOOD, Edinburgh; and in Holland, of Mr. G. ELDERING,
Florist, at Haarlem :

And to be had of all Booksellers in Town and Country.

MR. SAMUEL CURTIS,

THE PROPRIETOR OF THE BOTANICAL MAGAZINE,

Respectfully informs those LADIES and GENTLEMEN who are fond of Horticultural pursuits, that, in addition to the usual Nursery Stock at *Glazenwood, near Coggeshall, Essex*, he has particularly to recommend the following Articles:—

APPLES.—The *Glazenwood Gloria Mundi*, the fruit frequently weighing from Twenty to Twenty-six Ounces; a long keeper, and excellent flavor. Dwarf Trees for training, or as Dwarf Standards, 2s. 6d. each.

A fine collection of excellent and curious sorts, selected from Fruiting Trees in his Orchard of Fifty Acres (Two Hundred sorts), at 1s. each.

PEARS.—A fine collection of Dwarf Trees; in addition to the most esteemed Old sorts, are the excellent New kinds introduced by Mr. BRADDICK, at 1s. 6d. each.

CHERRIES.—A curious new Cherry, the fruit of which was sent to the Horticultural Society by W. HONEYWOOD, Esq. M. P., the colour of mahogany; and the flesh remarkably firm; at 5s.

The true Florence, from — VACHEL, Esq. at 2s. 6d.

CHESNUT.—The *Dwarf Prolific*, the most ornamental leaf of any, and bearing fine-flavoured Fruit, on Trees not larger than the largest Gooseberry Trees, 1s. 6d. each.

FILBERTS.—The best *White Kernalled* from 15s. to 30s. per Hundred.

GOOSEBERRIES and CURRANTS.—The most useful sorts known, at 25s. per Hundred.

ROSES.—Selections from a collection of Six Hundred of the finest kinds, in any quantity, from Fifty to Two Hundred sorts, from 9d. to 1s. each. *Damask or Red Rose* for Apothecaries' use, 10s. 6d. per Hundred. Climbing kinds for Walls, consisting of *Banksia, Grevillia, Multiflora, Mucartney, Bourzault, &c.* 1s. 6d. each. China Roses, as *Sanguinea, Bengalensis alba and rubra, Noisette, Odonata, &c.* 1s. 6d. each.

Yellow China and Yellow Banksia, at 7s. each.

New White China, large flower, and very beautiful, 2s. 6d. each.

Common China, for making Ornamental Hedges, from 20s. to 30s. per Hundred.

DAHLIAS.—Selections from a collection of One Hundred and Fifty finest sorts of Double and Semidouble varieties, with their Names and Colours, 2s. each.

PÆONIAS in collection from the older varieties, 1s. 6d. each.

Ditto, consisting of the Chinese herbaceous, at 3s. 6d. each.

Moutan, or Tree, from 7s. to 10s. 6d. each. *Papavaracea* 42s. each.

RHODODENDRON.—Curious and beautiful varieties of seedling hybrid sorts, from seed of *Catawbiense*, at 2s. 6d. each.

— *hiratum*, several varieties, 1s. 6d. each.

— *ferrugineum*, at 2s. each.

— *maximum*, and seedling varieties of it, 1s. 6d.

AZALIAS in great variety, many well set with bloom, 1s. 6d. *Scarlet*, 2s. 6d. *Orange*, 3s. 6d. each.

ANDROMEDAS, KALMIAS, MAGNOLIAS, from 1s. 6d. to 2s. 6d.

STUARTIA malachodendron and Marylandica, 2s. 6d. each.

A great variety of American plants, from 1s. to 1s. 6d. each.

LAVENDER, for Plantations and drawing the Oil, the true English, 25s. per Thousand.

GREENHOUSE PLANTS.

GERANIUMS.—A very large collection of modern sorts, most of which are figured in SWEET'S *Geraneacea*, and Seedling varieties of them, 1s. to 1s. 6d. each.

The finest New sorts of latest introduction, such as *Moor's Victory, Latilobium, Translucens, Mrs. Bishop, Youngii, Feronia*, curious varieties of *Ignescens, &c.* from 2s. 6d. to 5s. each.

CAMELIAS, in great variety, from 5s. to 7s. each.

ORANGES, LEMONS, SHADDOCK, and the true WEST INDIA LIMES (abundant bearers, and excellent for Punch) Dwarf Trees, from 3s. 6d. to 7s. each.

CACTUS, Speciosa and Speciosissima, 1s. 6d. to 2s. 6d. each.

YUCCA aloefolia, beautifully variegated, 21s. to 42s. each.

AGAPANTHUS umbellatus, ditto, ditto, 2s. 6d. each.

To those who have incomplete Sets

OF THE

BOTANICAL MAGAZINE.

In consequence of the heavy expences attending the keeping up so lengthened a series of this Work (containing 479 monthly numbers) the proprietor is under the necessity of advancing the price of those numbers of the OLD SERIES, containing eight plates, from 3s. 6d. to 4s. each number, making them equal with the first 186 numbers of the Work, which have long been at Sixpence each plate; but, in order to give those Subscribers who have long patronised the Work time to complete their sets, the advanced price will not take place until the 1st of January, 1825.

Having no intention of advancing the price of the NEW SERIES, although conducted at a considerably increased expence, and being the cheapest coloured Botanical Work extant, the proprietor hopes, that the confidence of his numerous Friends and Subscribers will not be disturbed, as he would be sorry to give them the least cause for dissatisfaction.

Those who are conversant with the nature of an expensive periodical publication of this sort, must be aware of the heavy back Stock it requires; and that constant reprinting of individual numbers must be resorted to. From the present state of the back Stock of this Work, the reprints are now become so numerous, that, the only choice the proprietor has, is, either to continue reprinting at a great expence, or, to declare to persons having imperfect sets, that he can no longer furnish imperfections. Under these circumstances, he has determined to reprint; and, he hopes, the *additional sixpence* on the 293 eight-plate numbers of the OLD SERIES, will, at least, insure him from any loss on the Work.

The term loss, will, by many, be thought a mere figurative expression of a tradesman, for not obtaining what, in his own ideas, he ought to get for his trouble; but, he wishes it to be distinctly understood, that although the Botanical Magazine is a well patronized Work, and, from its long continuance, an important Work to Botanists, the profits being calculated on its former much greater sale, the present diminished circulation of the Work does not pay its own expences; nevertheless, as its sale is increasing, he hopes it will soon reach to that extent which will become even profitable again; although to uphold a Work, the parent of all Works of a like nature, and originating in his family, he would even conduct it without profit; yet, he cannot but hope, that in the end, he shall find verified, that "reward sweetens labour."

Many unforeseen causes have occurred to retard the publication of the General Index to the Old Series, which would be uninteresting to detail here; the Proprietor now informs the Subscribers he hopes soon to announce its publication.
