The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

VOL. IV.

April 1, 1830.

No. XL.—*New Series.*

Price 3s. 6d. Coloured and 3s. Plain,

(To be continued Monthly)

**CURTIS'S
BOTANICAL MAGAZINE;**

OR

Flower Garden Displayed :

In which the most Ornamental FOREIGN PLANTS cultivated in the Open Ground,
the Green House, and the Stove, are accurately represented and coloured.

To which are added,

THEIR NAMES, CLASS, ORDER, GENERIC AND SPECIFIC CHARACTERS,
ACCORDING TO THE SYSTEM OF LINNÆUS;

*Their Places of Growth, Times of Flowering, and most approved
Methods of Culture.*

CONDUCTED

By SAMUEL CURTIS, F. L. S.

THE DESCRIPTIONS

By WILLIAM JACKSON HOOKER, L. L. D.

F. R. A. and L. S. and Regius Professor of Botany in the University
of Glasgow.

Mr. Gt. ELDERING, Florist, at Haarlem:

And to be had of all Booksellers in Town and Country.

This Day is published, Price Fifteen Shillings, boards,

GENERAL INDEXES

TO THE

Botanical Magazine.

Mr. CURTIS begs to inform the Subscribers to this Work, that the GENERAL INDEXES are now printed, and are ready for delivery: he trusts they will be found to be as simple, and extensively useful, as any form they could be arranged under; they consist of

- 1st,—A GENERAL ALPHABETICAL ENGLISH INDEX, with the Volume and Number of the Plate prefixed to each Plant; to which the Latin Name is added.
- 2d,—A GENERAL ALPHABETICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.
- 3d,—A GENERAL SYSTEMATICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.

Whatever arrangement the Subscribers have adopted in binding their volumes, the above three forms must be eligible for reference, the Work being mostly bound in the order of publication, the present Index forms a convenient sized volume to bind with it.

This Index, to many who do not possess the Work will be very desirable, for ascertaining what plants are figured in it for occasional reference. As an additional interest to this appendage to the Botanical Magazine, a portrait, with a sketch of the Life and Writings of Mr. WILLIAM CURTIS, the original author of it, is added; and at the end of the Index, blank leaves are inserted, for the continuation of the Index in Manuscript, as many years may perhaps elapse before another General Index will be necessary.

The sale of the former General Index was very limited in proportion to the number of sets of the Work then out; Mr. CURTIS has, therefore, only printed of the present Index equal to about two-thirds of the number of copies extant, and hopes no time will be lost by the regular Subscribers to the Work in applying for it; because, whenever it may be out of print, it can never repay the expence of reprinting.

*Apply for the above to Mr. CURTIS, Prospect Row, Walworth;
or at the Publishers of the Botanical Magazine.*

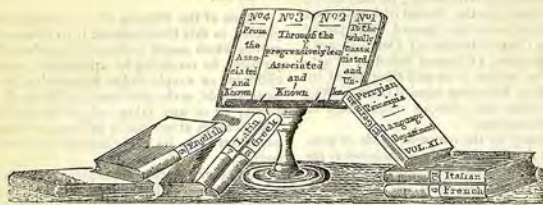

THE PERRYIAN DEVELOPMENTS,

Published up to April, 1830,

SOLD AT

THE PERRYIAN WAREHOUSE, 37, RED LION SQUARE, LONDON,

AND TO BE HAD OF ALL BOOKSELLERS.

THE THREE FOLLOWING DEVELOPMENTS,

By JAMES PERRY, Esq.,

(Author of the "Perryian Principia;" of the "Principle of Proceeding, in the Attainment of all Languages, from the Associated and Known, through the Progressively Less Associated and Known, to the Wholly Unassociated and Unknown;" of the Volumes of the Classics, in the Latin, Greek, French, Italian, and other Languages, accommodated to that Principle; of the "Counter-partitive and other Perryian Principles of teaching Composition: of the Volumes in accordance with those Principles: of numerous other Works in various Departments of Education; of the "Perryian System of Education;" and, till lately, Principal of the "Perryian Schools," London.)

CONSTITUTE INTEGRAL PARTS OF A SERIES OF DEVELOPMENTS NOW IN THE COURSE OF PUBLICATION.

(1.) The PERRYIAN DEVELOPMENT OF MEANS for the Further Advancement of Education among the Higher and Middle Classes, [being a Transcript of the Introductory Development to the Perryian Principia;] pointing out Seven Means which ensure—First, that the Rising Generation shall be Better Taught;—Secondly, that it shall be taught with more Economy of Time;—and, Thirdly, with a considerable Reduction of Expense; addressed to Every Parent of the Higher and Middle Classes who has a child to educate;—to Every Person employed in Private Education;—and to every Individual of the Scholastic Community. *Second Edition. Price 1s. 6d.*

"The method of Teaching any Specific Department of Education should be, either that which is most in accordance with reason; that is, a method in which between the means employed and the end sought, there is a ratio approaching as nearly as possible to EQUALITY; or it should be that which is FULLY in accordance with Reason. The latter is obviously the most desirable; since, instead of approximating to Equality we arrive at it. Such Method indeed as is characterised by this FULL accordance with Reason, and such only, may be affirmed to be the True Method.—Our Plan ensures that each Department of Education shall receive its due Degree of Attention; that the commencement of each Department shall take place at the proper time; that the study of each shall be concluded in a definite period; and that no useful

branch shall be excluded.—The advance of Pupils during any given period of their Course, should be, not *uniform*, but *accelerated* in the ratio of the addition constantly being made to their former acquisitions.—What comes within the Province of Scholastic Economy."

EXTRACTS FROM THE "ANALYSIS" FOUND AT THE COMMENCEMENT OF THE DEVELOPMENT.

(2.) A DEVELOPMENT of the "PRINCIPLE OF PROCEEDING, in the Attainment of All Languages, from the Associated and Known, through the Progressively Less Associated and Known, to the Wholly Unassociated and Unknown;" and of other Perryian Principles of Teaching the Dead and Living Languages, in Fifteen Articles. *Price 2s. 6d.*

"Amongst those who have qualified themselves, with the help of a dictionary, to translate Latin and Greek into English, how few are there, who can either write or speak those languages fluently and elegantly! So very rare indeed is this accomplishment, that we think ourselves perfectly safe when we affirm, that it is not possessed by one in fifty of those who "learn Latin," nor by one in a hundred of those who "learn Greek." But he, who has not acquired this species of "vernacular intimacy" with the languages of the ancients, has no perception of their more delicate beauties, and has, therefore, but little advantage over him, who is

The Perryian Developments.

able to contemplate the more striking features of their genius, only through the medium of translations. A person may have gone through several volumes of Greek and Latin by the process to which we refer;—a process from the Unassociated and Unknown to the Associated and Known;—a process therefore equally laborious and ineffective;—he may take occasion, amongst his acquaintances, to talk of the poets and orators of antiquity, as superior to those of modern times; he may refer, with affected ecstasy, to the *Æneid* of Virgil, and the *Iliad* of Homer,—to the Second Philippic of Cicero, and the Crown Oration of Demosthenes; but he is not, therefore, a Classical Scholar. Whatever he speaks or writes is as undistinguished by their spirit, as if he had never opened their works; and this for the plain and obvious reason, that he never *knows* their language."

"The inefficiency of the converse mode of proceeding,---from the *Unassociated and Unknown* to the *Associated and Known*,---has been yet more indubitably established with respect to the MODERN LANGUAGES. The occasions for speaking and writing these are of frequent occurrence; and they who have flattered themselves that they were qualified for conversing or corresponding in them, by learning grammatical rules, and applying these to the translation of a few authors into English, uniformly find, on such occasions, how egregiously they have miscalculated. Satisfied, not only that these facts are incontrovertible in themselves, but that they can be attested by thousands, we are no way apprehensive of censure for having, in conformity with that principle, by which alone any useful knowledge is to be attained, adopted a contrary process,---a process by which the pupil is brought, at the very commencement, to *speak* the language, on the study of which he has entered."

"*When would the Roman youth have possessed any facility in the use of their mother-tongue, if they had had to arrange their periods in one order, and to consider their signification in another?*"

"The principle of proceeding "*from the Associated and Known, through the Progressively Less Associated and Known, to the Wholly Unassociated and Unknown,*" so peculiarly characterises all our arrangements for teaching languages, that it chiefly distinguishes our method from all others hitherto employed.—To proceed according to this principle implies, that learning is a progression of facilities."

"We might further enlarge on this interesting invention;---interesting in an infinite variety of views---because it extends to the pupil the most efficient means, of any yet discovered, for the speedy and thorough attainment of languages;---because, by reducing the time before necessary for their attainment, it enables him to acquire Knowledge of a comparatively infinite extent;---and because it affords the means of pursuing that wide range of education, which preceding plans have limited to a few individuals,---but we shall rather leave it to the judgment of the reader, convinced as we are, that even the least reflecting must appreciate the results, which it is so obviously calculated to produce."

EXTRACTS FROM THE "PERRYIAN DEVELOPMENT OF LANGUAGES."

Before obtaining this or the following Development, it is especially important, that the

Reader should obtain "The Perryian Development of Means for the Further Advancement of Education among the Higher and Middle Classes," and carefully peruse it.

(3.) A DEVELOPMENT OF the COUNTERPARTIVE and other Perryian Principles of Teaching English Composition. Price 2s.

"One of the Objects of the Arrangements explained in this Development is to remove the difficulties which pupils uniformly experience in Composition, by rendering its attainment, even to mere children, as simple and as progressive, as easy and as agreeable, as the attainment of Writing, of Geography, or of any other subject taught in Schools. The methods at present in use render Composition, particularly in its early stages, an herculean labour."

"Another object of these arrangements is to improve the pupil in his *spoken* language; first, by enabling him to express himself on all occasions with grammatical correctness;---secondly, by giving him an aptitude to *select* expression;---thirdly, by communicating to him the ability of expressing himself *unhesitatingly*, and with a *copious flow* of appropriate language;---and, fourthly, by endowing him with these qualifications before he has attained an age, at which he can have become materially tainted with incorrect expression."

"A Third Object of those Arrangements is to discipline the mind, to strengthen its powers, and to convince it of the immensity of its own internal resources;---first, by causing pupils to think;---secondly, by giving them the facility of thinking closely, clearly, and methodically;---thirdly, by habituating them to reason justly;---fourthly, by necessitating them to patient investigation;---fifthly, by cultivating their judgment;---sixthly, by refining their taste;---and, seventhly, by generating and confirming in them habits of accuracy, precision, method, system, &c."

"A Fourth Object of those Arrangements is to enable teachers to instruct in Composition the pupils of the most numerous school, with a facility nearly as great as that with which they now teach them to write, or to read, or to parse."

"A Fifth Object of those arrangements is to enable teachers to secure, that pupils shall, as respects the hand-writing, execute their compositions with as much elegance and accuracy as their copy-book writing."

EXTRACTS FROM THE DEVELOPMENT.

The preceding are five of the thirteen objects, the attainment of which is ensured by the employment of the arrangements explained in the Development.

Before obtaining this Development, or any of the Perryian School-books for English Composition, it is especially important, that the reader should obtain "The Perryian Development of Means for the Further Advancement of Education among the Higher and Middle Classes," and carefully peruse it.

The preceding Developments will be followed by a series of others, on all the Departments of Education.

W. Pople, Printer, 67, Chancery Lane.

**GREVILLE'S
ALGÆ BRITANNICÆ;**

In One Vol. 8vo. with Nineteen coloured Plates, price 42s. in
extra boards,

ALGÆ BRITANNICÆ; or Descriptions of the Marine
and other inarticulated Plants of the British Islands, be-
longing to the order Alææ, with Plates illustrative of the
Genera. By ROBERT KAYE GREVILLE, LL. D., F. L. S.,
F. R. S., and F. A. S. E.

Printed for Maclachlan and Stewart, Edinburgh; and Baldwin and
Cradock, London.

Of whom may be had, by the same Author,

The SCOTTISH CRYPTOGAMIC FLORA, in 6 vols. royal 8vo. half-
bound in morocco, price £15 15s.—Separate Numbers at 4s.
each.

MR. SAMUEL CURTIS,

(PROPRIETOR OF THE BOTANICAL MAGAZINE,)

Of *Glazenwood*, near *Coggeshall*, *Essex*, begs to recommend the following Articles from his Nursery.

APPLES.—A very fine collection of Dwarf and Standard Trees of excellent kinds, 1s. to 1s. 6d. each.

PEARS.—A fine collection of the best old, as well as the new kinds introduced by the late JOHN BRADDOCK, Esq. 1s. to 1s. 6d. each.

CHERRIES and PLUMS, in fine collections, 1s. to 1s. 6d. each.

PEACHES, NECTARINES, and APRICOTS, fine sorts trained, 3s. 6d. to 5s.

Fine **GOOSEBERRIES and CURRANTS**, 4s. per dozen.

Finest **WHITE FILBERTS**, good Plants, 25s. per hundred.

ROSES.—A superb collection of Six Hundred fine varieties, with their Names, from 6d. to 1s. each.

CHINA ROSES.—*Sanguinea*, *Mandarin*, *Wood's Crimson*, *Bengalensis rubra* and *alba*, *Noisette*, *Noisette-grandiflora*, *Bischoxia*, *Odorata*, *Knight's Animating*, *New White*, *Indica minor*, &c. at 1s. each.

CLIMBING ROSES, or such as require support, *White Banksia*, *Grevillea*, *Multi flora alba* and *rubra*, *Red Boursalt*, *White Boursalt*, *Macartney*, &c. 1s. 6d., *Yellow Banksia*, 2s. 6d., *Common Ayrshire*, 6d., *Double Ayrshire*, 2s., *Double Macartney*, 2s.

DOUBLE DAHLIAS, a fine Collection of the old sorts, with their Names, 1s. each. The new *Anemone-flowered*, in collections of Twenty sorts, at 3s. each.

A beautiful Collection of *seedlings*, raised at *Glazenwood*, principally Dwarf kinds, consisting of Twenty varieties, which have never been sold out until this season, at 3s. each.

TREE PEONIA, 3s. 6d. to 5s. each; **PEONIA** *Papaveracea*, 15s. to 21s. each.

ECOREMOCARPUS scaber, a beautiful hardy climber, 2s. 6d.

VERBENA melindres, 3s. 6d., other kinds 1s. 6d. to 2s. 6d. each.

CACTUS, *speciosa*, 1s., *speciosissimus*, 1s. 6d. to 5s., *truncatus*, 1s. 6d. to 3s. 6d., some curious Seedling hybrid varieties, very beautiful, 2s. 6d. to 10s. 6d. each.

AMARYLLIS, Seedling varieties of *Johnsonia*, 2s. Several Seedlings of *Vittata* and other kinds, 2s.

YUCCA aloifolia, beautifully variegated foliage, 15s. to 21s.

RHODODENDRONS, curious hybrid varieties from *Arboreum* and *Ponticum*, fine Plants in Pots, 5s. Seedlings from *Catawbiensis*, Eighteen inches to Two Feet, 1s. 6d. Seedlings in great variety of *ponticum*, Eighteen Inches, 1s. each; *hirsutum* in varieties, and *ferrugineum*, 1s. 6d. each.

AZALIAS in great variety, fine Plants with Flower Buds, 1s. 6d. each; *Scarlet*, 2s. 6d.; *pontica*, Eighteen Inches, 1s. each; Seedling *AZALIA Indica*, from Twenty to Thirty Inches, 3s. each.

STUARTIA Marylandica and *Malachodendron*, beautiful flowering American Shrubs, 1s. 6d. each.

ANDROMEDAS, KALMIAS, MAGNOLIAS, &c. in great variety.

A fine collection of Geraniums and other Greenhouse Plants.

N. B. The *Fruit Trees* are grown on a poor Loam, and will remove to the advantage to the Purchaser, than from the rich soil of the London Nurse.
