The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

*Usage guidelines*

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

*This Day is published, Price Fifteen Shillings, boards,*

# **GENERAL INDEXES**

TO THE

## **Botanical Magazine.**

---

Mr. CURTIS begs to inform the Subscribers to this Work, that the **GENERAL INDEXES** are now printed, and are ready for delivery: he trusts they will be found to be as simple, and extensively useful, as any form they could be arranged under; they consist of

- 1st,—A **GENERAL ALPHABETICAL ENGLISH INDEX**, with the Volume and Number of the Plate prefixed to each Plant; to which the Latin Name is added.
- 2d,—A **GENERAL ALPHABETICAL LATIN INDEX**, with the same reference to Volume and Plate; to which the English Names are added.
- 3d,—A **GENERAL SYSTEMATICAL LATIN INDEX**, with the same reference to Volume and Plate; to which the English Names are added.

Whatever arrangement the Subscribers have adopted in binding their volumes, the above three forms must be eligible for reference, the Work being mostly bound in the order of publication, the present Index forms a convenient sized volume to bind with it.

This Index, to many who do not possess the Work will be very desirable, for ascertaining what plants are figured in it for occasional reference. As an additional interest to this appendage to the Botanical Magazine, a portrait, with a sketch of the Life and Writings of Mr. WILLIAM CURTIS, the original author of it, is added; and at the end of the Index, blank leaves are inserted, for the continuation of the Index in Manuscript, as many years may perhaps elapse before another General Index will be necessary.

The sale of the former General Index was very limited in proportion to the number of sets of the Work then out; Mr. CURTIS has, therefore, only printed of the present Index equal to about two-thirds of the number of copies extant, and hopes no time will be lost by the regular Subscribers to the Work in applying for it; because, whenever it may be out of print, it can never repay the expence of reprinting.

---

*Apply for the above to Mr. CURTIS, Glazenwood, near Coggeshall, Essex; or at the Publishers of the Botanical Magazine.*

# MR. SAMUEL CURTIS,

( PROPRIETOR OF THE BOTANICAL MAGAZINE, )
