About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

ADDRESS.

FEW works, perhaps, connected with Botany, treated especially as an elegant amusement, have enjoyed a more extensive or a more deserved share of reputation and popularity than the **BOTANICAL MAGAZINE**, commenced, and for many years so ably conducted by the late Mr. Curtis.

It was the first work of the kind that had ever been attempted in any country; though it has now met with imitators in many parts of Europe, and even in North America. The great expense, however, of keeping up complete sets of the entire stock of Fifty-three Volumes, and the heavy cost attending the purchase of the whole work to individuals who have not taken it from the commencement, have induced the present proprietor and conductor of the *Botanical Magazine*, Mr. Samuel Curtis, to resolve upon meeting the wishes of many lovers of Horticulture and Botany, Gardeners, and such as have it not in their power to procure the original edition, and to publish an entirely **NEW EDITION** of the **OLD SERIES**, on a more economical, but scarcely less beautiful, and in some respects more useful form.

This new edition will be printed in royal octavo, on fine paper, and the plates will be *half* coloured. The descriptive part will be confined to what is necessary for the determination of the species, and the whole will be published in *systematic* order, commencing with the *Clematis* and *Ranunculus Tribe*, and following the arrangement of the celebrated DE CANDOLLE, as given in his "*Prodromus*." There will be given at the head of the species, the *characters* of the CLASSES, ORDERS, and GENERA. Such remarks will be made upon their uses and properties and cultivation, derivation of generic names, &c. &c. as the subject may require; and the whole will be written in English. Any figure that may be requisite for the illustration of such Orders as are not given in the Old Series, will be selected from the New: so that the work will be an epitome of all that has been made known to Science, both by figures and descriptions, through the medium of the Botanical Magazine, during a period of forty-five years.

A Number, price 1s. (or with the plates full coloured, price 2s.) will appear twice in every month, containing four Plates accompanied by four pages of closely-printed Letter Press, more or less as the subject may require. A volume of Ninety-six Plates will thus appear every year.

The Letter Press will be conducted by Dr. HOOKER, Regius Professor of Botany in the University of Glasgow; with the exception of what regards the cultivation of the species, which will invariably be supplied by Mr. CURTIS.

THE NEW SERIES

of the BOTANICAL MAGAZINE will continue to be published regularly on the first day of every month. Seventy-five Numbers of this very highly interesting and beautiful work are now before the Public, in which are displayed, most accurately coloured from nature, with full descriptions of their uses, and valuable information as to their products in economical and commercial points of view, the rare and curious DOUBLE COCOA NUT, the CLOVE, NUTMEG, BLACK PEPPER, SAGO, TAPIOCA, the BREAD FRUIT TREE, CUSTARD APPLE, BUTTER NUT, PAPAWE TREE, the COLUMBO ROOT, POISON TANGHIN, the COCHINEAL PLANT and INSECTS, &c. &c., with many interesting Plants never before figured in any European work.

This work is elegantly printed in royal 8vo. Each number, price 3s. 6d. contains eight highly finished coloured Plates, with accurate descriptions. Twelve numbers form a handsome volume, and may be had of the Proprietor at Glazenwood; or of Messrs. SHERWOOD, GILBERT, & PIPER, Paternoster Row, and Messrs. ARCH'S, Cornhill.

Lately published, price 15s. boards,

GENERAL INDEXES to the FIRST FIFTY-THREE VOLUMES of the BOTANICAL MAGAZINE; consisting of

- 1st.—A GENERAL ALPHABETICAL ENGLISH INDEX, with the Volume and Number of the Plate prefixed to each Plant; to which the Latin Name is added.
- 2nd.—A GENERAL ALPHABETICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.
- 3rd.—A GENERAL SYSTEMATICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.

As an additional interest to this appendage of the work, a Portrait, with a Sketch of the Life and Writings of Mr. WILLIAM CURTIS, the original Author of it, is added; and at the end of the Index, blank leaves are inserted, for the continuance of the Index in manuscript.

ESTABLISHED UPWARDS OF THIRTY YEARS.

At 4, Holborn-side of Bloomsbury-square, for the sale of Shirting, Sheeting, Household and Table Linen, manufactured without any admixture, from pure Flax, and sold in any Quantity. *Whole Pieces at the Factor's Prices.*

THE IRISH LINEN COMPANY beg leave to state, that the above House is their only establishment. Purchasers are requested to take notice, that since the Dissolution of the IRISH LINEN BOARD, vast quantities of Shirting, Bed and Table Linen, made from an admixture of Cotton and Flax, are constantly imported from Ireland into this country, and vended to the Public as genuine Linen Cloth. Such fabrications are not, and never will be sold at this Establishment; and the Public may rely on being supplied with real FLAXEN CLOTH, the same as that sold at this House for upwards of Thirty Years, at greatly reduced prices.

The Purchase-money returned should any fault appear. Good Bills and Bank of Ireland Notes taken in payment. Country and Town Orders punctually attended to, by

JOHN DONOVAN, AGENT,
No. 4, Bloomsbury Square.

Dr. Thornton's Botany for Youth.

A N EASY INTRODUCTION to the SCIENCE OF BOTANY, through the medium of Familiar Conversation between a Father and his Son. By ROBERT JOHN THORNTON, M.D. Lecturer on Botany at Guy's Hospital, and Author of several works on Botany. In 12mo. illustrated with plates, price 8s. or with the plates beautifully coloured after nature, 12s. in boards.

* * This Work is calculated to initiate the student by easy gradations into a systematic acquisition of the principles of this pleasing department of science. The terms of art are familiarly explained with reference to their etymology; and the work is enriched throughout with much useful and agreeable information, the subject being so treated as to induce a habit of arrangement, and a perception of order, distinction, and subordination, which is of the first importance, not only in this, but in every other department of knowledge.

London: printed for Sherwood, Gilbert, and Piper, Paternoster Row.

TERMS FOR ADVERTISING.

For a whole page royal octavo, £2. 2s.; half a page, £1. 1s.; one third of a page, 15s.; not exceeding ten lines, 10s. 6d. For Stitching-in Proposals, Prospectuses, &c. not exceeding four pages, £1. 11s. 6d.

GENERAL INDEXES

TO THE

Botanical Magazine.

Mr. CURTIS begs to inform the Subscribers to this Work, that the GENERAL INDEXES are now printed, and are ready for delivery: he trusts they will be found to be as simple, and extensively useful, as any form they could be arranged under; they consist of

- 1st.—A GENERAL ALPHABETICAL ENGLISH INDEX, with the Volume and Number of the Plate prefixed to each Plant; to which the Latin Name is added.
- 2d.—A GENERAL ALPHABETICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.
- 3d.—A GENERAL SYSTEMATICAL LATIN INDEX, with the same reference to Volume and Plate; to which the English Names are added.

Whatever arrangement the Subscribers have adopted in binding their volumes, the above three forms must be eligible for reference, the Work being mostly bound in the order of publication, the present Index forms a convenient sized volume to bind with it.

This Index, to many who do not possess the Work will be very desirable, for ascertaining what plants are figured in it for occasional reference. As an additional interest to this appendage to the Botanical Magazine, a portrait, with a sketch of the Life and Writings of Mr. WILLIAM CURTIS, the original author of it, is added; and at the end of the Index, blank leaves are inserted, for the continuation of the Index in Manuscript, as many years may perhaps elapse before another General Index will be necessary.

The sale of the former General Index was very limited in proportion to the number of sets of the Work then out; Mr. CURTIS has, therefore, only printed of the present Index equal to about two-thirds of the number of copies extant, and hopes no time will be lost by the regular Subscribers to the Work in applying for it; because, whenever it may be out of print, it can never repay the expence of reprinting.

Apply for the above to Mr. CURTIS, Glazenwood, near Coggeshall, Essex; or at the Publishers of the Botanical Magazine.

LINNEAN SOCIETY.
