The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

*Usage guidelines*

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

VOL. VIII.

June 1, 1834.

No. XC.—*New Series.*

Price 3s. 6d. Coloured and 3s. Plain.

*(To be continued Monthly)*

**CURTIS'S  
BOTANICAL MAGAZINE;**

OR

**Flower Garden Displayed :**

In which the most Ornamental FOREIGN PLANTS cultivated in the Open Ground,  
the Green House, and the Stove, are accurately represented and coloured.

To which are added,

THEIR NAMES, CLASS, ORDER, GENERIC AND SPECIFIC CHARACTERS,  
ACCORDING TO THE SYSTEM OF LINNÆUS;

*Their Places of Growth, Times of Flowering, and most approved  
Methods of Culture.*

CONDUCTED

By SAMUEL CURTIS, F. L. S.

THE DESCRIPTIONS

By WILLIAM JACKSON HOOKER, L. L. D.

F. R. A. and L. S. and Regius Professor of Botany in the University  
of Glasgow.

London :

Printed by Edward Couchman, 10, Throgmorton Street,

**FOR THE PROPRIETOR SAMUEL CURTIS,**  
AT THE BOTANICAL MAGAZINE WAREHOUSE, GLAZENWOOD,  
NEAR COGGESHALL, ESSEX;

*And to be had of all Booksellers in Town and Country.*

**THE PRACTICAL GARDENER AND MODERN HORTICULTURIST**, in which the most approved Methods are laid down for the Management of the Kitchen, Fruit, and Flower Garden, the Green-house, Hot-house, Conservatory, &c. for every Month in the Year, including the new Method of Heating Forcing-houses with Hot Water only; forming a complete System of Modern Practice in the various Branches of Horticultural Science.

This popular and highly useful Work is just completed in 16 parts, price 2s. 6d. each, or in 2 vols. bds. 40s. illustrated by numerous coloured Plates of specimens of the most esteemed Fruits and Flowers, and the latest approved Designs for the Erection of Hot-houses, Green-houses, Conservatories, Hot-beds, &c. &c.

By **CHARLES M'INTOSH, C.M.C.H.S.**

Head Gardener to the King of the Belgians.

Also, by the same Author, and forming a suitable Companion to the above,  
A new and elegant Work, entitled

## **FLORA AND POMONA;**

OR,

**THE BRITISH FRUIT AND FLOWER GARDEN,**

Containing Descriptions of the most valuable and interesting Flowers and Fruits cultivated in the Gardens of Great Britain, the Period of their Introduction, Botanical Character, Mode of Culture, Time of Flowering, &c. with a definition of all the Botanical and Classical Terms which may occur in the description of the respective subjects. In Octavo, Plates Coloured from Nature, 2s. 6d.; and in Quarto at 8s. each Part.

London: Published by T. Kelly, 17, Paternoster Row, and Sold by all other Booksellers.

**R E M A R K S**  
**On the Manufacture of Patent and other Articles,**  
*Of General and Acknowledged Utility.*

**THE PATENT EVER-POINTED PENCIL**, an instrument universally allowed to be of the greatest utility, and particularly recommended to the public; but care must be taken in purchasing the Patent Pencil, (as well as the Leads for replenishing the same,) as the utility depends on the mathematical nicety with which they are made. Observe, the spurious Pencils generally have Steel Points, are never made to any exact size, and are useless; the spurious Leads are a mixture of common Lead Dust and Antimony, and of all manner of sizes, they choke up the Pencil Case, and create an unjust prejudice against the genuine article.

**TO DETECT FRAUD.**—The Patentees inform the public that all Pencils having Steel Points are frauds, and to avoid all inconvenience, the following remarks on purchasing will ensure them a genuine article:—see the Pencil has the name “S. MORDAN & Co. Makers and Patentees,” on the body of the case. The proper Leads for replenishing the case, have on each Box, a yellow belt, with the word “Warranted” on it, and a red sealing wax impression, bearing the initials “S. M. & Co.”

Shopkeepers in provincial Towns would do well to observe the above remarks, to prevent their being imposed upon, the public being much inconvenienced in not being supplied with the genuine article.

**CEDAR PENCILS.**—Artists and others are particularly requested to try their **BLACK LEAD PENCILS** in Cedar, made from the pure Cumberland Lead, selected with the greatest care: have been pronounced by the most competent judges of the day, the best extant. (See J. D. Harding's Work on Pencil Drawings.)—This article is patronized in all the Government Offices.

**THE PATENT OBLIQUE PEN**, the only straight Pen. This peculiarity is owing to the slit being parallel to the angular slope of the writing, which gives it that freedom in use, which is unequalled by any other Pen, by the direction in which both nibs are brought into use at the same time, the writer is not operating upon one edge of the nib, and the contrary edge of the other at the same instant; but upon the square surfaces or points of both together. Both nibs are thus brought into constantly equal wear, and a freedom is secured which no other metal Pen ever possessed. The Patent Oblique Pen is the most perfect hitherto offered.

**STEEL PENS OF THE ORDINARY SHAPE.**—To persons, who from long habit, prefer a Pen of the usual shape, S. M. & Co.'s New Straight Steel Pen will be found on trial the best and cheapest now in use.

The care taken in their manufacture, will enable us to warrant every Pen issued: not more than one in twenty are good of the common trash sold as Steel Pens, consequently only in appearance cheap.

**PORTABLE QUILL PENS.**—There are many persons who do not like Steel Pens, and prefer the Quill, to those the **PORTABLE QUILL PENS**, and Silver Pen Holder, are particularly recommended in Boxes containing Fifty and One Hundred.

“S. M. & Co. Makers,” are marked on each Box, and are warranted.

**SEVEN GUARDED LOCK.**—There are few persons, but have property of some kind to secure from prying curiosity or theft. No Lock can be secure that has Duplicate Keys in existence, or that will allow of an impression being taken of the Key to produce a facsimile, so easy in all warded and tumbler Locks. The most serious Robberies have taken place by means of Duplicate Keys, which allow the dishonest to re-lock without suspicion; this is fully borne out by the Police Reports. The only Lock that gives positive security is the **SEVEN-GUARDED LOCK**. The infinite variety of Changes of which the Key is susceptible, which causes every successive Key to differ from all which have preceded it, makes this Lock perfectly secure. An inspection of the machine will justify this assertion.

This Lock is patronized by the Government Offices, also at Newgate, Whitecross Street, and Warwick. There is scarcely a banking-house in London but have these Locks more or less on their establishment.

**THE POCKET WRITING INSTRUMENT.**—After devoting much time and attention in endeavouring to produce a perfect Self-supplying Pen, we can confidently recommend this article as being decidedly superior to all other inventions of the kind. All who write much will find the Writing Instrument of inestimable advantage, the **PATENT EVER-POINTED PENCIL** has been attached to it, so that it is, without exception, the most complete pocket appendage ever offered to the public.

**COOPER'S PATENT SCENT BOTTLES, INK STANDS, &c.**—These articles are confidently recommended from their superiority. The advantages derived from this invention are, that the Stopper, from its spherical form, CAN NEITHER STICK, OR BREAK IN THE NECK (so constant a complaint against those on the old plan);—the Stopper being made of glass never corrodes:—they are SO PERFECTLY AIR-TIGHT that they will preserve the most Volatile Spirits (even Ether or Ammonia) any length of time:—they cause much less trouble in use than any others, the act of removing the Cap and Stopper BEING ONLY ONE OPERATION:—they are MORE DURABLE than any others from their superiority, both in workmanship and material, the silver and gold used in them being very stout and WARRANTED STANDARD.

Manufactured for the Patentee, by S. Mordan & Co.

**J. D. HARDING'S CEDAR PENCIL OR CHALK HOLDER.**—In general when the Cedar Pencil is half used it becomes inconveniently short, whether for writing, or drawing, and for that reason it is often laid aside or wasted, but from this Holder it can be gradually projected as it wears away, and can be firmly fixed at any required length, a good pencil can be thus conveniently used to the last. With the economy and usefulness of the Holder, are united lightness, cleanliness, and elegance, for by its use the unsightly appearance of a Lead Pencil, dirtied by the fingers which have been unavoidably soiled by frequently cutting it. All who draw will find this instrument a desideratum.

Chalk Holder. This Holder will be found very favourable for holding Lithographic Chalk.

**COOPER AND ECSTEIN'S PATENT STYLOXONOR OR PENCIL POINTER.**—This useful instrument will quickly produce a most delicate point to any description of Pencil or Chalk.

*The whole of the above articles are manufactured by S. Mordan & Co.*

**CAUTION.**  
This description of  
Key gives no secur-  
ity as a Seal in Wax

"Observe," are your Keys  
on this principle?  
If so, do not depend upon  
their security.

Impression may be  
taken in one minute,  
and a facsimile pro-  
duced by a very in-  
ferior workman.
