The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Library.

Usage guidelines

To the best of our knowledge, this item is in the public domain. We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

VOL. X.

May 1, 1836.

No. CXIII.—New Series.

Price, coloured, (as heretofore,) 3s. 6d. per Number.

The Elements of Drawing & Flower Painting,

BY MRS. E. E. PERKINS.

Honoured by the Especial Patronage of her Royal Highness the Duchess of Kent.

THOMAS HURST, 65, St. Paul's Church Yard.

PATENT PERRYIAN INDIA-RUBBER-SPRING PEN.

—The distinguishing feature in the India-Rubber-Spring, is to render the same Pen capable of accommodating itself to the various degrees of pressure used in different Hand-writings: so as to produce with perfect ease, any strength of character at the will of the writer. Nine Pens, Medium, Fine, Extra Fine, or Broad Points, with Holder.....2s. 6d.
Nine Double Patent Perryian Pens, medium, fine, extra fine, or broad points, with Holder.....2 0
Nine Patent Perryian Regulating Spring Pens, medium fine, extra fine, or broad points with Holder.....2 6
Nine ditto ditto Flat Spring Pens, medium, fine, extra fine, or broad points, with Holder.....2 0
Nine ditto ditto Elastic Fountain Pens, medium, fine, extra fine, or broad points, with Holder.....2 6
Nine ditto ditto School Pens, for large, round, or small hand, with Holder.....2 0
Six ditto ditto for Writing Music, with Holder.....2 0
Six ditto ditto Drawing or Mapping Pens, of the most exquisite fineness.....3 6
Six ditto ditto Lithographic Pens, of unequalled delicacy and Flexibility for the Stone, &c. with Holder.....3 6
Nine ditto ditto Office, with Holder.....1 0
Nine ditto ditto Varnished Pens, with Holder.....0 6

ELASTIC PEN-HOLDER.—The novel construction of the PATENT PERRYIAN ELASTIC HOLDER confers on the Pen unequalled advantages, by imparting an agreeable softness and flexibility, rendering it so perfectly unconstrained in its action, that it never fatigues the hand, and enables it to pass over every description of paper with ease and expedition. It may be had with the Perryian Pens, at an advance of THREE-PENCE per Card.

Sold by all Stationers and Dealers in Metallic Pens, and at the Manufactory, 37, Red Lion Square, London; on Cards or in sealed Packets, signed JAMES PERRY & Co.

FAMILIES of DISTINCTION and others, who may be about to make extensive Purchases, will find important advantages in the present improved style of FURNISHING at HENRY L. COOPER'S Manufactory for rich Upholstery, Carpeting, Chairs, Cabinet Work, and Looking Glasses, of a quality and price that fears no competition.—93, Bishopsgate-street Within, and 57, Conduit-street, nine doors from Regent-street, left-hand side.

H. L. C. begs respectfully to solicit particular attention to this address.

ON THE
ART OF IMPROVING
THE SKIN AND COMPLEXION.

ONE of the principal features of **PERSONAL ATTRACTION** in the human frame is **PURITY OF COMPLEXION**—or a **CLEAR FINE SKIN** happily blending that radiant whiteness and that roseate bloom, so essential and confirmatory of the influence of **FEMALE BEAUTY**.

“On her white breast a sparkling cross she wore.”—POPE.

To irradiate the fascination of female beauty has ever been the favourite object of scientific research; and the grandest attainment is a fine Skin, which has ever been considered of the greatest importance to **HEALTH**, as well as to **PERSONAL ATTRACTION**.

The most invaluable discoveries are frequently opposed in their progress to celebrity by prejudice and unbelief; but **INTRINSIC MERIT** surmounts all difficulties, and triumphs ultimately in the attainment of public approbation.

ROWLAND'S KALYDOR,

As a preparation for the Skin, is, in preference to all others, selected by the Ladies as an indispensable toilet requisite and sustainer of a fine complexion, and the conservator of female beauty in all climates, and during all stages in the progression of life, from youth to age,—has already become a favourite and indispensably appreciated article with Female Rank, honoured with the **AUGUST PATRONAGE** of **THEIR MAJESTIES** and the **ROYAL FAMILY** of Great Britain; Her Majesty the **QUEEN OF THE FRENCH**; the **PRINCE** and **PRINCESS ESTERHAZY**; and the most distinguished Nobility and Gentry of all civilized Nations; and is zealously recommended by the most eminent of the Faculty.

The ingredients of **ROWLAND'S** solely-genuine **KALYDOR** are extracted from the most **BEAUTIFUL EXOTICS** of the mildest nature—**WARRANTED PERFECTLY INNOCENT**—operating as a thorough cleanser of the Skin, yet powerfully efficacious; eradicating **FRECKLES, PIMPLES, SPOTS, REDNESS**, and all Cutaneous Eruptions, from whatever cause originating; and transforms into radiant brilliancy the most **SALLOW COMPLEXION**.

By persevering in the use of the **KALYDOR**, it gradually produces a clear and soft Skin, smooth as velvet, actually realizing a delicate

WHITE NECK, HAND, AND ARM,

and a healthy and juvenile bloom will in a short time be infallibly elicited, while its constant application will tend to promote the free exercise of those important functions of the Skin, which are of the utmost importance for the preservation of a **BEAUTIFUL COMPLEXION**, and as averting the characteristics of age, even to a remote period of human life.

The following Testimonials of the extraordinary good effects of ROWLAND'S KALYDOR have been selected from an immense number. Many from the Nobility MAY BE SEEN AT THE PROPRIETORS:—

TO MESSRS. ROWLAND AND SON,

GENTLEMEN,—I with pleasure acknowledge the singular benefit I have received from your excellent KALYDOR. My face, which has been subject to Inflammation and Eruption for years, is now restored; and my friends, to whom I have recommended it, give it their decided approbation. Please to send six bottles per bearer of this note.

I remain, Gentlemen,
Your obedient Servant,
A. H. S.

Bangor, Sept. 17, 1827.

TO MESSRS. ROWLAND AND SON.

GENTLEMEN,—I have derived so much benefit from the use of your KALYDOR, in extirpating the Pimples and Inflammation from my face, that I am induced to continue it; therefore will thank you to send me three of the largest sized bottles (packed in a box), by bearer, who will discharge the amount.

Your humble Servant,
MARIA W. R.

Richmond, Aug. 17, 1830.

TO MESSRS. ROWLAND AND SON.

High Street, Windsor.

GENTLEMEN,—I am happy to say your KALYDOR meets with universal approbation; many ladies of distinction have testified their high admiration of its virtues.

I remain, Gentlemen,
Your obedient Servant,
M. ALDER.

Aug. 17, 1829.

TO LADIES NURSING THEIR OFFSPRING.

ROWLAND'S KALYDOR

Is equally indispensable in the NURSERY as at the TOILET. Warranted perfectly innocuous; it may be used by the most delicate Lady or Child, with the assurance of safety and efficacy.

To MOTHERS, who suffer under agonizing pangs arising from Sore and Inflamed Nipples, as an emollient it never fails in alleviating and removing the pain and soreness, and in all cases of incidental Inflammation it gives immediate relief; it cools the mouth of the Infant, and enhances maternal pleasure in the act of administering alimentary nourishment.

By continued application, its Balsamic virtues will prove beneficial and pleasing; and it is recommended as an indispensable requisite previous to Accouchement.

"The salutary and unrivalled effects of ROWLAND'S KALYDOR, with respect to one of its multifarious eminent properties, is daily evidenced.—The Proprietors have the authority of a lady of high respectability, to say, that during the period of suckling, she received the most soothing relief from the use of that invaluable article."—*Morning Post*, May 10, 1830.

SUMMER.

THE BANEFUL EFFECT OF SOLAR HEAT ON THE SKIN.

Ladies who occasionally sojourn on the Sea-coast, or are partial to Aquatic Excursions, or are about to encounter long Voyages, should invariably provide themselves with the KALYDOR, by the use of which, during the novelty of such recreation, and after saline immersion, or sea bathing, the pristine fascination of a fine Skin and animated Complexion are guarded from otherwise certain, and, perhaps, lasting injury: as the influence of the Sun on the Skin produces TAN, SUN-BURNS, ROUGHNESS, TENSITY, &c.

Similar results are occasioned in RIDING, DRIVING, PROMENADING, &c. During the novelty of such recreation the KALYDOR is indispensable—it acts as a protector and restorative.

It immediately allays the smarting irritability of the Skin—diffusing a **pleasing coolness** truly comfortable and refreshing. Also, in cases of Stings of Insects, or any Inflammation, it affords immediate relief.

Extract of a Letter from a Lady to her Friend.

“ You are sensible anything that I consider will add to your comfort, I feel a pleasure in communicating.

“ As you are going to travel, and knowing that you always suffer much from the burning influence of the Sun, take with you some of ROWLAND'S KALYDOR. You will find it beneficial—I have proved it by experience. It cools and refreshes the Skin; in short, I find it indispensable.”

TO MESSRS. ROWLAND AND SON.

Hambro', March 23, 1833.

GENTLEMEN,—I am nappy to inform you, that the virtue of your KALYDOR has obtained great fame, and that there is scarcely a lady in Hambro' but what has it at her Toilet; it is not only a favourite with the ladies, but is equally beneficial to gentlemen; and one of our first physicians, sixty years of age, whose face was in a state of continual Inflammation, so as to render shaving impossible, has been entirely cured. He is much gratified, and recommends it to all families.

I am, Gentlemen, your's, &c.

G. VOSS.

From the Bath Herald, Dec. 1831.

“ During some years a young lady (resident of this place) had been regularly subject, about the month of May, to eruption and other unseemly defects of the Skin. Last Spring season she was more than usually affected, and for the first time resorted, by recommendation of an experienced companion, to ROWLAND'S celebrated KALYDOR. This unflinching successful renovator fully realized the most sanguine hopes in removing every blemish, and the young lady continuing its use, her friends feel confident that her annual visitor will not again return.”

TO THE TRAVELLER.

To the Traveller, whose avocations expose him to various changes of the weather, it proves an infallible specific—a prompt resource—and, as conducing to comfort, a pleasing appendage and infallible acquisition.

TENDER SKIN.

To GENTLEMEN, whose faces are tender after SHAVING.—A great infelicity which attends the operation of SHAVING is the irritation of the Skin—many gentlemen suffer greatly from this cause. ROWLAND'S KALYDOR will be found excellent beyond precedent, in ameliorating and allaying that most unpleasant sensation; and affords to the face a delectable and soothing relief.

Extract of a Letter from Ballenstadd, near Hamburgh, July 3, 1833.

“ ROWLAND'S KALYDOR having been recommended to the Court Councillor, Mr. CURTZ, by Dr. SCHLESSEN, Physician, who has repeatedly witnessed its wonderful efficacy, Mr. Rowland's Agent is requested to send three packets immediately to the Post Office, where the same will be paid for.

To prevent Imposition, and by authority of HIS MAJESTY'S HONOURABLE COMMISSIONERS OF STAMPS, the Name and Address is engraved on the *Government Stamp*, which is pasted over the Cork of each bottle,

A. ROWLAND & SON, 20, HATTON GARDEN.

Sold in Half-Pints, at 4s. 6d. and in Pint Bottles, at 8s. 6d. each, duty included by the sole Proprietors, as above.

Growth and sustainment of the Hair.

A FINE HEAD OF HAIR, displayed in exuberant tresses, and in those silken ringlets that luxuriate on the brow of beauty, is justly appreciated as the most invaluable endowment of Nature, and the art by which such is realized, is held in estimation.

ROWLAND'S MACASSAR OIL,

During a period of many years, has never once failed of eliciting redundancy of hair, even on parts of the head that were previously bald; proved by testimonials received from the most distinguished personages in all parts of the globe; and in preventing the hair from falling off or turning grey, to the most advanced period of life.

This celebrated Oil generates with infancy ample growth of beautiful hair, and will sustain it in perfection through all stages of existence. Subduing all relaxing tendencies, it firmly keeps the hair in curl and other decorative formation, during many hours, unimpaired by damp weather, crowded assemblies, the dance, or even equestrian exercise.

In exposure to marine atmosphere, and in sea-bathing, the hair is subject to change—a glossy appearance and silky feeling of the hair, being frequently superseded by palpable coarseness and harsh texture; these subversive results are all averted, or removed, by this incomparable Oil—the friend of both sexes; for while it facilitates the progress of female beauty, it enhances, by producing WHISKERS, MUSTACHIOS, &c., the graces of manhood.

Patronized by Royalty, and confirmed in surpassing excellence, by experience, ROWLAND'S solely genuine MACASSAR OIL is universally acknowledged as well deserving the station it now holds of the highest public distinction.

NOTICE.—The lowest price is 3s. 6d., the next price is 7s.—10s. 6d.—and 21s. per bottle. Ask for "ROWLAND'S MACASSAR OIL," and observe their Name and Address on the Wrapper, in Lace-work.

"A. Rowland & Son, 20, Hatton Garden,"
And Counter-signed, "**Alex. Rowland.**"

Impostors call their trash the GENUINE, and omit the (&) in the signature—offering it for sale under the lure of being cheap.

Particular attention to this Caution, on purchasing, is respectfully solicited, as the Proprietors cannot be responsible for the serious injury resulting from the use of base imitations now offered to the Public.

Extract of a Letter from a Lady to her Friend.

"You will recollect that I was distinguished by the possession of a beautiful head of hair. Miscarriage, and anxiety of mind, united, however, to deprive me of that ornament; my hair fell into rapid decline, became extremely thin and grey, and assumed the appearance of advanced age. Speaking truly, I became actually horrified by the humiliating change, which, however, (resorting to borrowed locks,) I contrived to conceal. These substitutes are no longer necessary.—I, happily, was made acquainted with a restorer for my lost hair; and my head now abounds with its accustomed ringlets—reinstated in beauty by the use of ROWLAND'S MACASSAR OIL."

ROWLAND'S ODONTO, or PEARL DENTIFRICE.

This justly celebrated Dentifrice is a combination of Oriental herbal medicament, forming an efficient VEGETABLE WHITE POWDER, ANTI-SCORBUTIC, and of potent efficacy, though mild in operation, as a thorough exterminator of existing diseases to which the Teeth and Gums are liable, rendering the former perfectly sound, arraying in pure whiteness and firmly fixing them in their sockets—producing a beautiful set of PEARLY TEETH—and endowing the breath with fragrancy, at once delightful and salubrious. The efficacious virtues of which this is composed, constitute it the best Dentifrice ever offered to public notice.

Rowland's Original Odonto is recommended by the Faculty, is patronized by Royalty and other distinguished Personages, and will uniformly be found, as a restorer of the Teeth and Gums, to exceed even the most sanguine expectation.—Price 2s. 9d. per box, duty included.—Each box has the Name and Address of the Proprietors engraved on the Government Stamp—

A. ROWLAND & SON, 20, Hatton Garden.

Northcroft & Co. Printers to His Majesty, 96 & 97 Chancery Lane.

ON THE FIRST OF JUNE, 1836,
WILL BE PUBLISHED, PRICE SIXPENCE,
WITH COLOURED PLATE, AND OTHER ILLUSTRATIONS,
NO. 1.
TO BE CONTINUED MONTHLY, OF THE
FLORICULTURAL MAGAZINE
AND
MISCELLANY OF GARDENING.

CONDUCTOR,
ROBERT MARNOCK,

CURATOR OF THE BOTANICAL AND HORTICULTURAL GARDENS, SHEFFIELD.

It is a gratifying fact that, within the last few years, a fondness for gardening, and especially that taste for the cultivation of flowers which has long characterised almost every class of persons in this country, has led to the publication of a variety of works, all more or less calculated to cherish, to improve, and to extend these laudable predilections. It has thus happened, that while some knowledge of systematic Botany has become indispensable as a part of the polite education of the youth of both sexes, the attractive and healthful recreation of Floriculture, has received a decided stimulus from the facility with which an acquaintance, not only with the names and peculiarities of those floral rarities which are constantly finding their way from all parts of the world into our first-rate Conservatories, and out of those Conservatories into the stoves and greenhouses, or even into the gardens of private persons and others—but likewise with the modes of culture and propagation of these exotics, is circulated by means of periodicals. To meet and to minister to this naturally elegant and delightful taste, forms a principal object of the present work.

There is, however, one source of gratification and advantage, to which, as recommendatory of such a work as the Floricultural Magazine, it becomes proper more particularly to notice. Instead of being confined to the dry preceptive form of writing, which would allow privilege of expression only to the Editor, a periodical of this class invites and publishes communications from all quarters, from all parties, and on all subjects coming within the province of Floriculture especially and of Gardening in general. An intercourse is thus opened between the professional man and the amateur cultivator: so that any

gentleman or lady seeking information, or generously wishing to extend beneficial knowledge, will possess a ready, economical, and efficient vehicle in the Floricultural Magazine.

The favours of practical and experimental Florists will always be peculiarly acceptable offerings to the pages of our work: and here, perhaps, the Conductor may be permitted to confess, that he feels something like complacency in being professionally identified with a numerous and intelligent class of men, who, with few exceptions, delight to render voluntary assistance to whatever tends to promote the common success and admiration of their labours—labours, in which art beautifully co-operates with or exchanges favours with nature. It is by means of this free and zealous intercommunication between ardent devotees of one of the least selfish of pursuits, on the one hand, and of an attention to the concurrent interests of the Public on the other, that the Floricultural Magazine aspires to distinction, as a valuable Repertory of facts, hints, enquiries, and instructions in that delightful and popular department of knowledge to which its subjects belong.

Of his abilities, for the performance of the task here undertaken, the Conductor must leave it to his labours to testify in due course: meanwhile for his character, experience and opportunities, it may be sufficient, respectfully to refer to his connexion with the Sheffield Gardens, comprising, as they do, one of the most ample, as well as beautifully situate establishments of the kind in the kingdom: added to which, as already intimated, he has the advantage of possessing the friendship of intelligent individuals, superiorly connected with the principal public and private gardens in Great Britain.

It is the determination of the Publishers of the Floricultural Magazine to present to the admirers and cultivators of the rarer, more beautiful, or other wise interesting description of Plants, a work which, while in price it will rank with the very cheapest of its class, will aspire to deserve the commendation bestowed upon its more expensive rivals; while in candour, impartiality and attention, its literary department shall be inferior to none. The arrangement will comprise Original Communications and Enquiries; Editorial Observations and Answers; Notices of New Flowers, or novel modes of cultivation, Reviews of Books, Selections from interesting Works, Current and other Notices, &c.

The Work will be printed on a good Paper and Type; each Number consisting of 24 closely filled pages: a copper-plate engraving of Flowers, beautifully coloured, and occasional Wood Cuts, combined with the Letter-press, will constitute the illustrations.

LONDON:

PUBLISHED BY SIMPRIN AND MARSHALL, STATIONERS' HALL COURT; AND BY
 GEORGE RIDGE, MERCURY OFFICE, KING-STREET, SHEFFIELD;
 TO WHOM COMMUNICATIONS, BOOKS, &c. (ADDRESSED
 TO THE EDITOR), ARE RESPECTFULLY
 REQUESTED TO BE SENT.

December, 1849.

LIST OF WORKS

PRINCIPALLY ON

NATURAL AND PHYSICAL SCIENCE,

PRINTED AND PUBLISHED BY

REEVE, BENHAM, AND REEVE,

KING WILLIAM STREET, STRAND.

I.

PANTHEA, THE SPIRIT OF NATURE. By ROBERT HUNT,
Author of 'The Poetry of Science.' One vol. 8vo. 10s. 6d.

"The object of the author of this singular work is to show the difficulties which an inquiring mind has to encounter when searching for truth through the various systems of modern philosophy. Throughout, ample opportunities are afforded for conveying scientific information in a popular form, and these have been liberally and well embraced by the author."—*Athenæum*.

"A brave attempt to range from the elemental to the universal, and from the known to the unknown."—*Literary Gazette*.

"There is, throughout, the closeness of matter and eloquence of style which distinguished the 'Poetry of Science.'"—*Spectator*.

II.

A REVIEW OF THE FRENCH REVOLUTION OF 1848,
from the 24th of February to the Election of the First President.
By CAPTAIN CHAMIER, R.N. Two vols. 8vo. 21s.

"Much as we have heard about the French Revolution, this dashing account, from the pen of an eye-witness of no common talent or powers of description, will gratify no small share of public curiosity."—*Literary Gazette*.

"Books like Captain Chamier's, full of information on every point relative to the Revolution, with little comment or philosophy, are the very things we want. The writer was on the spot during the whole time, or nearly so, his curiosity drove him abroad on every occasion—he inquired into everything—listened to everything—noted everything. In consequence he has produced by far the most interesting work on the subject we have seen. It will be read with avidity as a graphic, most amusing and exciting sketch, overflowing with incident and anecdote."—*Atlas*.

VIII.

THE RHODODENDRONS OF SIKKIM-HIMALAYA ;

With coloured drawings and descriptions made on the spot.

By JOSEPH DALTON HOOKER, M.D., F.R.S. Edited by Sir

W. J. HOOKER, D.C.L., F.R.S. *Second Edition.*

"In this work we have the first results of Dr. Hooker's botanical mission to India. The announcement is calculated to startle some of our readers when they know that it was only last January twelvemonths that the Doctor arrived in Calcutta. That he should have ascended the Himalaya, discovered a number of plants, and that they should be published in England in an almost UNEQUALLED STYLE OF MAGNIFICENT ILLUSTRATION, in less than eighteen months—is one of the marvels of our time."—*Athenæum.*

"We have here a botanical work, in large folio, consisting of ten magnificent and exquisitely coloured plates, from drawings after nature, with explanatory text, giving a detailed and critical description of not fewer than eight new Indian species of *Rhododendrons*, each one more magnificent than the other in flower and foliage; and also a general exposition of all the species that have come under the author's observation in the lofty regions of his present tour."—*Literary Gazette.*

"A most beautiful example of fine drawing and skilful colouring, while the letter-press furnished by the talented author possesses very high interest. Of the species of *Rhododendron* which he has found in his adventurous journey, some are quite unrivalled in magnificence of appearance."—*Gardeners' Chronicle.*

* * * In handsome imperial folio, with ten beautifully coloured plates. Price 21s.

IX.

CURTIS'S BRITISH ENTOMOLOGY, being Illustrations and

Descriptions of the Genera of Insects found in Great Britain and Ireland, comprising coloured figures, from nature, of the most rare and beautiful species, and, in many instances, of the plants upon which they are found. By JOHN CURTIS, F.L.S.

The 'British Entomology' was originally brought out in Monthly Numbers, size royal 8vo, at 4s. 6d., each containing four coloured plates with text. It was completed in 1824, and completed in 1840, in 193 Numbers, forming 16 volumes, price £43 16s.

The work is now offered new, and in the best condition :—

Price to Subscribers for complete copies in sixteen volumes £21.

Price of the new issue, and of odd Numbers . . . 3s. 6d. per No.

X.

TRAVELS IN THE INTERIOR OF BRAZIL; principally through the Northern Provinces and the Gold and Diamond Districts, during the years 1836-41. By the late GEORGE GARDNER, M.D., F.L.S., Superintendent of the Royal Botanic Gardens of Ceylon. *Second and cheaper Edition.*

"This volume is from the pen of an able naturalist. Not satisfied with the mere exploration of the coasts, he plunged into the interior as far to the west as the tributaries of the Amazon, 'and from near the equator to the 23rd degree of south latitude.' A range so wide required three years to be traversed,—independently of the time passed in researches on the coast. The author's peculiar object was Natural History,—under its forms of geology, the animal kingdom, and botany; but, fortunately, he has not confined himself to the physical department. Some of the regions which he visited have seldom been trodden by Europeans—never by Englishmen; so that his observations derive value from the novelty of the matters to which they relate."—*Albion*.

"The narrative of his varied adventures forms not only to the enthusiastic botanist, but to the general reader, an exceedingly entertaining and also instructive book, from the new view which it gives of the society of Brazil—particularly in its less known provinces."—*Tait's Edinburgh Magazine*.

"When camping out on the mountain-top or in the wilderness; roughing it in his long journeys through the interior; observing the very singular mode of life there presented to his notice; describing the curious characters that fell under his observation, the arts or substitutes for arts of the people, and the natural productions of the country—these *Travels in the Interior of Brazil* are full of attraction. The book, like the country it describes, is full of new matter."—*Spectator*.

* * * In one volume octavo, with a Map of the Author's Route and View of the Organ Mountains. Price 12s. cloth.

XI.

THOUGHTS ON A PEBBLE; or, a First Lesson in Geology. By GIDEON ALGERNON MANTELL, LL.D., F.R.S., Vice-President of the Geological Society, &c. *Eighth Edition.*

"This elegant little book, primer-like in size, and illustrated by fine coloured plates and wood-engravings, serves still to convey some of the grandest truths in Geology. The style is lucid, eloquent, poetical, and philosophical, for all these attributes are combined in Dr. Mantell's writings."—*American Journal of Science*.

"I have just procured a little work for my young pupils, a most delightful introduction, entitled 'Thoughts on a Pebble, or a First Lesson in Geology,' by Dr. Mantell, and I must request you to read it; for although it does not consist of more than thirty pages [increased in the present edition to upwards of a hundred] it will expand to your view a new world that will astonish and delight you."—*Philosophy in Sport*.

Considerably enlarged, with four coloured plates, twenty-eight woodcuts, and Portrait of the Author engraved on steel, handsome cloth, gilt edges, pp. 102, price 5s.

XII.

POPULAR HISTORY OF BRITISH SEA-WEEDS; comprising a familiar and technical description of the MARINE PLANTS inhabiting the shores of the British Isles. By the Rev. DAVID LANDSBOROUGH, A.L.S., Member of the Wernerian Society of Edinburgh.

"Just as the people are migrating from the metropolis and the dingy manufacturing towns, to the open and free space where the land meets the ocean, Mr. Landsborough supplies them with a familiar and beautiful description of some of the wonders they will see there, helping to amuse and instruct them, and pointing out to them many objects of curiosity that might otherwise escape their attention. The book is as well executed as it is well timed. The descriptions are scientific as well as popular, and the plates are clear and explicit. Not only the forms, but the uses of Algae, are minutely described. It is a worthy SEA-SIDE COMPANION—a hand-book for every occasional or permanent resident on the seashore."—*Economist*.

"This charming contribution to the study of a very interesting branch of Natural History combines scientific correctness with artistical beauty."—*Literary Gazette*.

* * * In one vol. royal 16mo, with twenty plates of figures and two plates of fructification. Price 10s. 6d. coloured.

XIII.

POPULAR BRITISH ORNITHOLOGY; comprising all the British Birds. By P. H. GOSSE, Author of 'Birds of Jamaica,' 'The Ocean,' &c.

"To render the subject of ornithology clear, and its study attractive, has been the great aim of the author of this beautiful little volume. It contains descriptions of all our British birds, with the exception of stragglers, not likely to fall in the way of the young naturalist. It is embellished by upwards of 70 figures of British birds beautifully coloured."—*Morning Herald*.

"Goes over every month of the year, figures the birds naturally in coloured plates, describes them and their habits well, and is a capital manual for youthful naturalists."—*Literary Gazette*.

"This book was much wanted and will prove a boon of no common value, containing, as it does, the names, descriptions, and habits of all the British birds. It ought to find a place on the shelves of every book-case."—*Mirror*.

* * * In one vol. royal 16mo, with twenty plates of figures.
Price 7s. plain; 10s. 6d. coloured.

XIV.

POPULAR BRITISH ENTOMOLOGY, comprising a familiar and technical description of the Insects most common to the British Isles. By MARIA E. CATLOW.

"Judiciously executed, with excellent figures of the commoner species, for the use of young beginners."—*Annual Address of the President of the Entomological Society.*

"Miss Catlow's Popular British Entomology contains an introductory chapter or two on classification, which are followed by brief generic and specific descriptions in English of above 200 of the commoner British species, together with accurate figures of about 70 of those described. The work is beautifully printed, and the figures nicely coloured, and will be quite a treasure to any one just commencing the study of this fascinating science."—*Westminster and Foreign Quarterly Review.*

* * * In one vol. royal 16mo, with sixteen plates of figures.
Price 7s. plain; 10s. 6d. coloured.

XV.

POPULAR FIELD BOTANY; containing a familiar and technical description of the plants most common to the British Isles, adapted to the study of either the Artificial or Natural Systems. By AGNES CATLOW. *Second Edition.*

"This is a useful aid to young persons in the country who are at a loss how to take the first steps in Botany. In this, as in so many other pursuits, the earliest stage is that which is most difficult to get over—each succeeding advance becomes more easy than its predecessor. One of the impediments in the way of those who have no teachers, is the uncertainty that in the beginning attends all attempts at making out the names of the objects they have to examine, and this impediment can only be removed by drawings and very familiar descriptions. Miss Catlow, in the work before us, has furnished a clear and concise supply of both. We recommend her Popular Botany to favourable notice."—*Gardeners' Chronicle.*

"How pleasant to wander in the fields, with this instructive guide."—*Literary Gazette.*

"The design of this work is to furnish young persons with a Self-instructor in Botany, enabling them with little difficulty to discover the scientific names of the common plants they may find in their country rambles, to which are appended a few facts respecting their uses, habits, &c. The plants are classed in months, the illustrations are nicely coloured, and the book is altogether an elegant, as well as useful present."—*Illustrated London News.*

"This book may be used by the beginner; its advantage consists in its cheapness."—*Athenaeum.*

* * * In one vol. royal 16mo, with twenty plates of figures.
Price 7s. plain. 10s. 6d. coloured,

XVI.

ILLUSTRATIONS OF BRITISH MYCOLOGY; containing
Figures and Descriptions of the Funguses of interest and
novelty indigenous to Britain. By Mrs. HUSSEY.

"This talented lady and her sister were in the first instance induced to draw some of the more striking Fungi, merely as picturesque objects. Their collection of drawings at length became important from their number and accuracy, and a long continued study of the nutritive properties of Fungi has induced the former to lay the results of her investigations before the public, under the form of illustrations of the more useful and interesting species. The figures are so faithful that there can be no difficulty in at once determining with certainty the objects they are intended to represent; and the observations, especially those of the culinary department, will be found of much interest to the general reader, and we doubt not that our tables will in consequence receive many a welcome addition; while, from the accuracy of the figures, there will be no danger, with ordinary attention, of making any serious blunder."—*Gardeners' Chronicle*.

* * * In one handsome quarto volume, bound in cloth and gilt.
With 150 handsome coloured drawings. Price 7l. 12s. 6d.

XVII.

THE DODO AND ITS KINDRED; or, the History, Affinities,
and Osteology of the DODO, SOLITAIRE, and other extinct
birds of the islands Mauritius, Rodriguez, and Bourbon. By
H. E. STRICKLAND, Esq., M.A., F.R.G.S., F.G.S., President of
the Ashmolean Society, and A. G. MELVILLE, M.D., M.R.C.S.

"The labour expended on this book and the beautiful manner in which it is got up render it a work of great interest to the naturalist. * * * It is a model of how such subjects should be treated. We know of few more elaborate and careful pieces of comparative anatomy than is given of the head and foot by Dr. Melville. The dissection is accompanied by lithographic plates, creditable alike to the Artist and the Printer."—*Athenæum*.

"A piece of ornithological biography which seems singularly to combine the familiar with the fabulous. Thanks to an accomplished and persevering naturalist of our own day, we have now all the facts, and most of the fancies, laid before us in a splendid royal quarto volume just published, with numerous plates, devoted to the history and illustration of 'the Dodo and its Kindred.' The author has produced one of the best and most interesting monographs with which it is our fortune to be acquainted. * * * We beg to call attention very especially to Plates viii. and ix., as the most beautiful examples of lithographic art, applied to natural history, which we have yet seen executed in this country."—*Blackwood's Magazine*, Jan. 1, 1849.

* * * One vol. royal quarto, with eighteen plates and numerous wood illustrations. Price 21s.

XVIII.

A CENTURY OF ORCHIDACEOUS PLANTS, selected from those most worthy of cultivation figured in Curtis's Botanical Magazine, with coloured figures and dissections, chiefly executed by Mr. FITCH; the descriptions (entirely re-written) by Sir WILLIAM J. HOOKER, F.R.S. With an introduction on the culture and management of Orchidaceæ generally, and on the treatment of each genus; by JOHN C. LYONS, Esq.

"In the exquisite illustrations to this splendid Volume full justice has been rendered to the oddly formed and often brilliantly coloured flowers of this curious and interesting tribe of plants."—*Westminster and Foreign Quarterly Review*.

"A very acceptable addition to our knowledge of the Orchis tribe. The plates are beautifully executed, and have been selected with great care, so as to place before us an extensive and varied series, arranged systematically into proper groups. Each species has a brief character attached, and to each genus botanical and practical observations, from the pen of Sir William Hooker, are prefixed. The work is also enriched with a prefatory memoir by Mr. Lyons, full of sound judgment and experience on the best and most approved method of growing Orchids."—*Literary Gazette*.

** In one volume, royal 4to, containing one hundred plates.
Price *Five Guineas*.

The Publishers intend re-issuing this work in monthly Nos. each containing five plates, price 5s. No. 1 will be issued in January.

XIX.

CURTIS'S BOTANICAL MAGAZINE (commenced in 1786); Continued by Sir WILLIAM JACKSON HOOKER, K.H., D.C.L., &c., Director of the Royal Gardens of Kew. With observations on the culture of each species, by Mr. JOHN SMITH, A.L.S., Curator of the Royal Gardens.

CURTIS'S BOTANICAL MAGAZINE is now the only illustrated monthly record of the new plants.

** Published in monthly numbers, each containing six plates, price 3s. 6d. coloured, and in volumes, price 42s. Part 60, completing the 5th volume of the *Third Series*, just published.

XX.

HOOKE'S JOURNAL OF BOTANY and KEW GARDENS MISCELLANY. Edited by Sir WILLIAM JACKSON HOOKER.

This New Botanical Journal, in addition to original papers by Eminent Botanists, contains the Botanical News of the month, Proceedings of Societies, Communications from Botanical Travellers, Notices of New Books, &c.

** In monthly numbers, with a plate, price *One Shilling*; and in volumes, price 12s. 6d. No. 12, and Vol. 1, just published.

XXI.
CONTRIBUTIONS TO ORNITHOLOGY. By SIR WILLIAM
JARDINE, Bart., F.R.S.E., F.L.S., &c.

The "CONTRIBUTIONS" are devoted to the various departments of Ornithology. They are published at intervals in Parts, and form an annual Volume, illustrated by numerous Coloured and Uncoloured Plates, Wood Cuts, &c.

The Series for 1848, containing ten Plates, price 9s.
Nos. 1, 2, 3, & 4, for 1849, containing four Plates each, price 3s.
per Number.

XXII.
PHYCOLOGIA BRITANNICA; or, History of the British Sea-
Weeds; containing coloured figures, generic and specific characters, synonyms, and descriptions, of all the species of Algae inhabiting the shores of the British Islands. By WILLIAM HENRY HARVEY, M.D., M.R.I.A., Keeper of the Herbarium of the University of Dublin, and Professor of Botany to the Dublin Society.

"The 'History of British Sea-Weeds' we can most faithfully recommend for its scientific, its pictorial, and its popular value; the professed botanist will find it a work of the highest character, whilst those who desire merely to know the names and history of the lovely plants which they gather on the sea-shore, will find in it, when complete, the faithful portraiture of every one of them."—*Annals and Magazine of Natural History*.

** Svo. Published monthly, in parts, price 2s. 6d., coloured; large paper, 5s. To be completed in sixty parts, containing three hundred and sixty plates. Part XLV. just published.

Vols. I. and II., price 2l. 10s. each, are now ready.

XXIII.
NEREIS AUSTRALIS; or, Illustrations of the Algae of the Southern Ocean, being Figures, Descriptions, and Remarks upon new or imperfectly known Sea-Weeds, collected on the shores of the Cape of Good Hope, the extra-tropical Australian Colonies, Tasmania, New Zealand, and the Antarctic Regions, and deposited in the Herbarium of the Dublin University. By WILLIAM HENRY HARVEY, M.D., M.R.I.A., Keeper of the Herbarium, and Professor of Botany to the Dublin Society.

"Of this most important contribution to our knowledge of exotic Algae, we know not if we can pay it a higher compliment than by saying it is worthy of the author. It should be observed that the work is not a selection of certain species, but an arranged system of all that is known of Australian Algae, accompanied by figures of the new and rare ones, especially of those most remarkable for beauty of form and colour."—*London Journal of Botany*.

** Imp. Svo. To be completed in Four Parts, each containing twenty-five coloured plates, price 1l. 1s.

Part I. recently published. Part II. now ready.

XXIV.

CONCHOLOGIA ICONICA; or, Figures and Descriptions of the Shells of Molluscous Animals, with critical remarks on their synonymes, affinities, and circumstances of habitation. By LOVELL REEVE, F.L.S.

The CONCHOLOGIA ICONICA is mainly illustrated from the cabinet of Hugh Cuming, Esq., F.L.S., the result of "more than thirty of the best years of his life in arduous and hazardous personal exertions, dredging, diving, wading, and wandering, under the Equator and through the temperate zones, in the labour of collecting.—No public collection in Europe," continues Professor Owen, "possesses one half the number of species of shells that are now in the Cumingian collection, and probably one-third of the number would be the correct statement as regards the national museums of Paris and Vienna."

** Demy 4to. Published monthly, in Parts, each containing eight plates. Price 10s.

[Nearly ready.]

"This great work is intended to embrace a complete description and illustration of the shells of molluscous animals; and so far as we have seen, it is not such as to disappoint the large expectations that have been formed respecting it. The figures of the shells are all of full size; in the descriptions a careful analysis is given of the labours of others; and the author has spared no pains to make the work a standard authority on the subject of which it treats."—*Athenæum*.

"The figures, by Mr. Sowerby, are of the natural size, and most accurately coloured. The text abounds with important criticisms and synonyms, whilst it embodies a vast amount of information on the habits, modes of development, and progress of growth; together with the localities and circumstances of habitation, resulting from the communicated experience of Mr. Cuming."—*Literary Gazette*.

"Since the discovery of extra-tropical America, and the diffusion of our empire into newly discovered lands, the science of conchology has received important aid from inland workers, dependent rather on communicated materials. The principal of these are Lister, Seba, Martyn, Gualter, Linnaeus, Martini, Chemnitz, Bruguière, Lamarck, Broderip, Sowerby, and, lastly, Lovell Reeve, whose ponderous tomes, so admirably illustrated by the younger Sowerby, will be a lasting monument of patient industry and sound critical discernment."—*Morning Post*.

The figures are drawn and lithographed by G. B. SOWERBY, Junr., of the *natural size*, except those requiring to be enlarged.

XXV.

CONCHOLOGIA ICONICA. *Uncoloured edition*. For geological purposes. A reprint of the foregoing work.

* * * In monthly numbers, each containing six plates, price 2s. 6d.

XXVI.

ELEMENTS OF CONCHOLOGY; or, Introduction to the Natural History of Shells and their animals. By LOVELL REEVE, F.L.S.

"The work before us is designed to promote a more philosophical spirit of inquiry into the nature and origin of Shells."—*Ecclesiastical Review*.

* * * To be completed in twelve parts, royal 8vo, with numerous illustrations, price 3s. 6d. coloured. Part X. just published.

XXX.

(Under the Authority of the Lords Commissioners of the Admiralty.)

FLORA ANTARCTICA; or, Botany of the Antarctic Voyage of H.M. Discovery Ships *Erebus* and *Terror*, during the years 1839-1843, under the command of Capt. Sir James Clark Ross, R.N., F.R.S. By JOSEPH DALTON HOOKER, M.D., R.N., F.R.S., &c., Botanist to the Expedition.

"The descriptions of the plants in this work are carefully drawn up, and much interesting matter, critical, explanatory, and historical, is added in the form of notes. The drawings of the plants are admirably executed by Mr. Fitch; and we know of no productions from his pencil, or, in fact, any botanical illustrations at all, that are superior in faithful representation and botanical correctness."—*Athenæum*.

** In two vols., royal 4to, pp. 574, plates 200. Price 10*l.* 15*s.* coloured; 7*l.* 10*s.* plain.

XXXI.

CRYPTOGAMIA ANTARCTICA; or, Cryptogamic Botany of the Antarctic Voyage of H. M. Ships *Erebus* and *Terror*. By JOSEPH DALTON HOOKER, M.D., F.R.S., &c.

A separate issue of the Cryptogamic portion of the Antarctic Botany, for the convenience of those Naturalists whose interest is more particularly directed to that branch of the science.

** In one vol., royal 4to, pp. 258, plates 74. Price 4*l.* 4*s.* coloured; 2*l.* 17*s.* plain.

XXXII.

THE BRITISH DESMIDIEÆ; or, Fresh-Water Algae. By JOHN RALFS, M.R.C.S., Honorary Member of the Penzance Nat. Hist. Society. The Drawings by EDWARD JENNER, A.L.S.

"A more beautiful or creditable work than this has seldom issued from the press. It combines great powers of observation, much originality, exactness of detail, and skill of execution, and is distinguished pre-eminently by diligent study and the zeal with which the author has applied to every available source of information. The subject is one which was till within a very few years almost unknown in this country. A few species of Desmidiæ had been figured and a small number recorded as natives; but it was scarcely suspected that a tribe of the most exquisite beauty and symmetry abounded in every exposed pool in many parts of the kingdom. It would be unjust to conclude this notice without due credit to Mr. Jenner for the drawings from which the plates are engraved, which leave little or nothing to be desired, and his contributions to the work are by no means confined to the artistic department."—*Gardeners' Chronicle*.

** Complete in one volume, royal octavo, thirty-five coloured plates. Price 3*6s.* cloth.

XXVII.

(Under the Authority of the Lords Commissioners of the Admiralty.)
ZOOLOGY OF THE VOYAGE OF H.M.S. SAMARANG.
 Edited by ARTHUR ADAMS, F.L.S., Assistant-Surgeon, R.N.,
 attached to the Expedition.

* * * Part I. FISHES. By Sir JOHN RICHARDSON, M.D., F.R.S.
 10 plates, price 10s. 6d.

Parts II. and IV. CRUSTACEA. By the EDITOR and ADAM
 WHITE, F.L.S. No. 1, 6 plates, price 8s.—No. 2, 7 plates, price
 10s. 6d.

Parts III. and V. MOLLUSCA. No. 1. By the EDITOR and LOVELL
 REEVE, F.L.S., including the anatomy of the *Spirula*, by Prof. OWEN,
 F.R.S. 9 coloured plates, price 10s. 6d. No. 2 nearly ready.

Part IV. VERTEBRATA. By JOHN EDWARD GRAY, F.R.S.,
 Keeper of the Zoological Department of the British Museum.
 8 coloured plates, price 10s. 6d.

XXVIII.

NOTES OF A TOUR IN THE PLAINS OF INDIA, THE
 HIMALA, &c.; being extracts from the private letters of
 Dr. HOOKER, written during a Government Botanical Mission to
 those countries. Part I. ENGLAND to CALCUTTA. Price 2s. 6d.

"A delightful sketch of Dr. Hooker's Journey to Calcutta with the suite of
 Lord Dalhousie."—*Literary Gazette*.

XXIX.

(Under the Authority of the Lords Commissioners of the Admiralty.)
NARRATIVE OF THE VOYAGE OF H.M.S. SAMARANG,
 during the years 1843-46. By Capt. Sir EDWARD BELCHER,
 C.B., F.R.A.S. and G.S., Commander of the Expedition.
 With a Popular Summary of the Natural History of the
 islands visited, by ARTHUR ADAMS, F.L.S.

Commencing at Borneo, the Expedition extended as far north as
 Korea and Japan, including within its limits the islands of Quel-
 part and Loo-Choo, the Meia-co-shimah and Batanes Groups, the
 Philippine and Sooloo Archipelagos, Celebes, Ternate, and Gilolo,
 with other islands of the Blue and Yellow Seas.

"These volumes give the official and authorized account of the surveying
 voyage of the Samarang in the Eastern Archipelago and Northern Seas of China
 and Japan. Besides much geographical and practical information, Capt. Belcher's
 Narrative contains a close and mature view of the ministers and monarchs of
 those distant regions. Quelpart and the Korean Archipelago are new ground."—
Examiner.

* * * In 2 vols., 8vo, 964 pp., 35 Charts, Coloured Plates, and
 Etchings. Price 36s. cloth.

XXXIII.

THE ESCULENT FUNGUSES OF ENGLAND; a treatise on their History, Uses, Structure, Nutritious Properties, Mode of Cooking, Preserving, &c. By the Rev. Dr. BADHAM.

"We lately noticed the beautiful fasciuli of Mrs. Hussey, illustrative of what is useful and interesting in the neglected class of Fungals. The present work, which owes the greater part of its figures to the same exquisite pencil, and some portion of the information it contains to the experience of Mrs. Hussey, will be acceptable either as an appendage to the Illustrations, or as containing in itself a mass of entertaining and valuable matter. It is scarcely possible that two works so beautifully illustrated, written with such evident interest in the subject, and in such a lively manner, should fail to draw attention to the objects they describe; and the matter is in general so judiciously handled, that, with any ordinary precaution, there will be no danger of mistakes being made. The common Mushroom is in some years extremely scarce, but there are many species abounding in our woods and meadows which may be substituted with safety; and some, which, though usually rejected, are in many respects superior. The work of M. Bognes has had the effect at Paris of removing much prejudice on the subject; and we hope that many a group of Fungi, which would hitherto have been trampled under foot, will now, in consequence of the labours of Mrs. Hussey and Dr. Badham, be duly honoured."—*Gardeners' Chronicle*.

* * * In one handsomely illustrated volume, super royal 8vo.
Price 1*l.* 1*s.* coloured.

XXXIV.

CONCHYLIA DITHYRA INSULARUM BRITANNICARUM.

The Bivalve Shells of the British Isles, systematically arranged. By WILLIAM TURTON, M.D. Reprinted verbatim from the original edition. The illustrations, printed from the original copper-plates, are distinguished for their accurate detail.

* * * Large paper, 328 pp., 20 coloured plates. Price 2*l.* 10*s.*

XXXV.

CONCHOLOGIA SYSTEMATICA; or, Complete System of Conchology, in which the LEPADES and MOLLUSCA are described and classified according to their natural organization and habits, illustrated with 300 plates of upwards of 1,500 figures of Shells. By LOVELL REEVE, F.L.S.

"The text is both interesting and instructive; many of the plates have appeared before in Mr. Sowerby's works, but from the great expense of collecting them, and the miscellaneous manner of their publication, many persons will no doubt gladly avail themselves of this select and classified portion, which also contains many original figures."—*Athenaeum*.

* * * In two quarto volumes, cloth. Price 10*l.* coloured; 6*l.* plain.
(Published at Twelve Guineas.)

XXXVI.

CONCHOLOGIST'S NOMENCLATOR ; or, Catalogue of recent species of Shells, with their authorities, synonyms, and references to works where figured or described. By AGNES CATLOW, assisted by LOVELL REEVE, F.L.S.

A catalogue of three hundred and twenty closely printed pages, serving as a register of all the known species.

* * * In sheets for labels, 20s. Cloth, 21s. Half-bound in calf, cloth sides, interleaved with blank pages for remarks, 25s.

XXXVII.

THE PLANETARY AND STELLAR UNIVERSE. By ROBERT JAMES MANN.

"A brief abstract of the discoveries of Newton clearly explained, and elegantly illustrated."—*Westminster and Foreign Quarterly Review*.

* * * In one vol. 8vo, with 50 astronomical Diagrams and Map of the Circumpolar Constellations. Price 5s. cloth.

XXXVIII.

ILLUSTRATIONS of the WISDOM and BENEVOLENCE of the DEITY, as manifested in Nature. By H. EDWARDS, LL.D. Cloth, 2s. 6d.

"A little excursion in the track of Paley and the broad road of the Bridge-water Treatises. Animals, Atmosphere, Organic Matter, Light, and Electricity are the natural elements out of which the author deduces his pious lessons, leading to a First Cause in wonder, admiration, and worship."—*Literary Gazette*.

XXXIX.

THE LONDON JOURNAL OF BOTANY. Edited by SIR W. J. HOOKER, K.H., D.C.L., F.R.S., &c.

* * * Vol. VII., completing the Series, Price 30s.

Edinburgh, 1st January 1839.

Principality. Edited by Capt. BASIL HALL, R.N. The Catechism separate. 2d Edit.

Preparing for Publication,

THE BEAUTIES OF SIR WALTER SCOTT, BART.

In POETICAL and PROSE SELECTIONS from his LIFE and WORKS.

ROBERT CADELL, Edinburgh : WHITTAKER & Co. London.

The Toilet.

An age remarkable for the rapid progress of refinement, demands in this particular department a combination of the useful and elegant, as indispensably necessary to the establishment and maintenance of undoubted reputation. ROWLAND & SON, have had (during an extended experience) the felicity of introducing to PUBLIC NOTICE many prominent appendages of the TOILET of unequalled efficacy and celebrity, which the most ILLUSTRIOUS and distinguished PATRONAGE entitles them to assume, as coming entirely within this description; one of them ROWLAND'S KALYDOR, especially claims attention at this season of the year, as a Specific for counteracting the effects upon the complexion, of those remarkable vicissitudes of temperature incident to the climate of Britain.—It possesses qualities, which were vainly sought for in preparations of a prior date bearing that appellation, and is probably the first and only one deserving it; with the distinction of perfect originality, is united a certainty in operation, which has excited surprise and gratification in the most elevated circles of rank and fashion, and extended its reputation even to the utmost verge of civilization, can duly estimate the advantages derived in its progress from the beaming lustre of the female countenance.

ROWLAND'S KALYDOR,

Composed of the most precious Balsamic Exotics, is perfectly innocuous, and the entire reverse of a mineral astringent; its effects upon the exceedingly minute vessels of the Skin are PURIFYING, REFRESHING and INVIGORATING,—qualities before which the host of minor cutaneous affections, as Pimples, Spots, Redness, Sallowiness, (either natural, or the result of a protracted residence in tropical latitudes) imperceptibly disappear, and are succeeded by a Transparency and Radiant Whiteness, which the sensibility of beauty decorates with a mantling blush; while the more formidable class of eruptions yield to its continued application, and are eradicated by the restoration of a perfect tone and action of the Skin, so essential to health, as well as to personal comfort and appearance.

The mild and soothing effects of ROWLAND'S KALYDOR are conspicuous in the NURSERY, where it becomes an invaluable resource for promptly allaying every description of casual inflammation, cooling the mouth of the infant, and rendering still more delightful those tasks which maternal solicitude impose.

ROWLAND'S KALYDOR, infallible in removing all harshness and irritability of the Skin, will also be found highly useful to GENTLEMEN, who suffer inconvenience from those causes after Shaving. To GENTLEMEN engaged in Naval or Military Service, to the TRAVELLER, and to all whose pursuits expose them to variations of Temperature of Weather, it affords secure protection against those ravages upon the Skin, which are frequently felt a drawback upon the happiness of a safe return:—in fact, whether as an appendage to the ELEGANT TOILET, DRESSING ROOM, or TRAVELLING EQUIPMENT, Rowland's Kalydor will be found to realize the most sanguine expectations that can be formed, of its refreshing, purifying, and restorative properties.

Price 4s. 6d. and 8s. 6d. per Bottle.

To PREVENT Imposition, the Name and Address of the Proprietors is engraved on the Government Stamp affixed over the cork of each Bottle.—*All others are spurious.*

ROWLAND'S MACASSAR OIL,

The Original,

FOR PRESERVING AND BEAUTIFYING THE HAIR,

Is composed of Vegetable Ingredients (appertaining to the Island which name it bears,) has always been much admired, and with rank, fashion, and discernment, supersedes all preparations of professed similar import.

This Oil is pre-eminently successful in nourishing, strengthening and preserving the Hair in all climates and seasons; accelerates its growth, sustains it in maturity, and continues its possession of vigour, silky softness, and luxuriant redundancy, to the latest period of human life.

More surprisingly are the reproductive faculties of this Oil illustrated in cases of Baldness, from whatsoever cause arising, (proved by testimonials received from all parts of the globe.)—This regenerative fluid clings to the latent stem, and elicits, unerringly, the active progression of vitality; so that in many instances, where others have failed, ROWLAND'S MACASSAR OIL has superseded the ornaments of art, by reinstating in full plenitude of beauties the permanent graces and utilities of nature. Finally, its protective vigilance excludes as well transformation as decay; for the hair by its use becomes invulnerable to change, and will retain its original purity and glossy hue through all stages of life.

Subduing all relaxing tendencies, it firmly keeps the hair in curl and other decorative formation during many hours, unimpaired by damp weather, crowded assemblies, the dance, or equestrian exercise. In fact, it is THE FRIEND OF BOTH SEXES; for, while it facilitates the progress of female beauty, it enhances (by producing whiskers, mustachios, &c.) the graces of manhood.

Thoroughly eradicating all obstructions to which the heads of Children are particularly liable, this celebrated Oil generates with infancy ample growth of beautiful hair, and will sustain it in perfection through all stages of existence.

It is a proud satisfaction to the Proprietors, on the increased number of testimonials they are daily receiving from all parts of the Globe of the wonderful efficacy of the Oil.

TESTIMONIALS,

Selected from a great number;—the Originals may be seen at the Proprietors

A Literary Gentleman has transmitted to the Proprietors a case of an extraordinary nature. He had for many years been entirely bald, and has, at the age of 54, by using the Oil only a short time, recovered his hair, which is gradually augmenting by the continued use of the Oil.

EXTRACT of a LETTER from a Gentleman in Hamburgh to his Friend in London. dated August 6, 1830.

"I have another pleasing remark to make. I had no hair on the top of my head for years; and more than fifty persons declaring to me they had recovered their hair by using ROWLAND'S MACASSAR OIL, induced me to make trial of that article. I used three bottles, and regained my hair."

"To Messrs. Rowland and Son,

St. Petersburg.

"GENTLEMEN,

"In consequence of the good effects of your MACASSAR OIL, I have it in command from His Imperial Majesty the EMPEROR of all the RUSSIAS, that you will, without delay, send the sum of ten guineas' worth to the Emperor of Russia, St. Petersburg, and receive the amount of the same from his Highness Prince de Lieven, His Majesty's Ambassador at the Court of Great Britain.

"I have the honor to be, Gentlemen,

"Your most obedient servant,

JAMES WYLIE."

If any thing more than another be needed as an indubitable proof of the celebrity of ROWLAND'S MACASSAR OIL, it is the fact, that no known production in the world has so many spurious and base imitations, which a set of unprincipled vendors endeavour to foist on the Public under the lure of being CHEAP.

To prevent such vile Imposition, ATTENTION to the following is solicited

☞ The LOWEST PRICE of the ORIGINAL MACASSAR, or ROWLAND'S OIL, is 3s. 6d. per bottle; the Label has the words "Rowland's Macassar Oil," and between those words are the same words minutely and curiously engraved 24 times, also the Name and Address, in Red, on Lace-work,

A. ROWLAND & SON, 20, HATTON GARDEN,

Counter-signed ALEX. ROWLAND.

All others are Frauds.

PARTICULAR ATTENTION, on purchasing, is highly necessary and most respectfully solicited, as the Proprietors cannot be responsible for the serious injury resulting from the use of base and cheap imitations of injurious quality, now offered to the Public as the "GENUINE."

A FINE SET OF TEETH is the grand desideratum of all ages and nations;—without which the otherwise perfect human features fail to please, and Beauty herself loses fascination.

ROWLAND'S ODONTO,
OR
Pearl Dentifrice.

The high and important character this Powder has obtained for a considerable time from some of the most eminent of the Faculty, also from Distinguished Personages, has induced Messrs. Rowland to recommend it to the Notice of the Nobility, Gentry, and the Public, as the mildest, yet most salutary and efficacious Dentifrice, ever emanated from scientific research in past or present times.

This justly celebrated Dentifrice is a combination of Oriental Herbal Medicament, forming an efficient Vegetable White Powder, Anti-Scorbutic and of potent efficacy, though mild in operation as a thorough exterminator of existing diseases which the Teeth and Gums are liable, rendering the former perfectly sound, arraying in pure whiteness, and fixing them firmly in their sockets—producing

A Beautiful Set of Pearly Teeth!

and endowing the Breath with fragraney at once delightful and salubrious, —the efficacious virtues of which this is composed constitute it the best Dentifrice ever offered to Public Notice.

Price 2s. 9d. per Box.

Peart & Co. Printers, 143, St. John Street Road.

THE TOILET.

The preparations of Messrs. ROWLANDS, for the several purposes under-mentioned, have been long renowned, and are now justly held in high estimation, for their efficient yet mild operation; and the fact of the very high patronage they enjoy even in the remotest regions into which the genius of British commerce has penetrated, sufficiently proves the value of their *Kalydor*, *Macassar Oil*, and *Odonto*.

SPRING.

It is in the beautiful season of the spring, when the sun enters the Vernal Equinox, that nature commences her annual rejoicing over the apparently sterile earth, when the earth becomes adorned with her brilliant liveries,

"Midst fertile vales and dewy meads."

The senses become delighted with her fragrance, and the garlands are composed of the most pleasing varieties in the botanical world.

At this period of the year, cutaneous diseases very frequently occur, and thereby shews the absolute necessity of preserving the skin in a pure and healthy state, so that its functions may be duly performed—Obstruction of the fluids through the pores of the skin very often take place, and from the acrid and ponderous particles which are left behind, the disordered state of the secreting office is disturbed, and thereby produces symptoms of great virulence, which are not only distressing, but most displeasing to the sight; and, above all others, when the face is attacked, the suffering is often extremely great.

The above simple illustration may be sufficient to invite the attention of Ladies to the means both of prevention and cure afforded by

ROWLANDS' KALYDOR,

THE ONLY EFFICIENT PROTECTOR OF THE SKIN,

from the vicissitudes of our variable clime, as well as the injurious degree of heat felt in crowded assemblies, or exposure to harsh winds, and the effects of midnight dew.

This delightful preparation is extracted from Exotics of the mildest and most balsamic nature, is WARRANTED PERFECTLY INNOCENT, and free from mineral admixture—operating as a powerful cleanser of the skin, it speedily eradicates *Freckles*, *Tan*, *Pimples*, *Spots*, *Redness*, and every other *Cutaneous Defect*, while its most remarkable property is, the removal of every trace of *Sallowness* from the *Complexion*, which it restores to a *freshness of tint*, exciting both surprise and the most pleasurable sensations.

Perseverance in the use of the *KALYDOR*, preserves unimpaired, those important functions of the *Skin* on which depend its purity, softness—not inaptly compared to velvet, and elasticity; the *Neck*, *Hands*, and *Arms* assuming and retaining the *Radiant Whiteness* so much admired, and so unequivocal a mark of attention to the niceties of the *TOILET*, and the graces of personal attraction.

To *GENTLEMEN*, whose faces are tender after shaving, *ROWLANDS' KALYDOR* will be found excellent beyond precedent in *ameliorating* and *allaying the irritation and smarting pain*, and *rendering the skin soft and smooth*.

This exotic preparation is perfectly innocuous, acting in all cases by promoting a healthy tone of the minute vessels, and is

THE MOST ELEGANT AS WELL AS EFFECTIVE TOILET APPENDAGE
HITHERTO SUBMITTED TO UNIVERSAL PATRONAGE.

Sold in half-pint Bottles, at 4s. 6d. each, and in Pints at 8s. 6d. each, duty included.

☞ Ask for "ROWLANDS' KALYDOR."

ROWLANDS' MACASSAR OIL,

A VEGETABLE PRODUCTION.

THIS ELEGANT, FRAGRANT, and PELLUCID OIL, far surpasses any preparation ever discovered for the HAIR, and is in UNIVERSAL HIGH REPUTE for its unequalled *Restorative, Preservative, and Beautifying* properties.

It is the only article that really produces and restores HAIR, even at a late period of life, prevents it from falling off or turning Grey, and possesses the desirable property of preserving it in its natural shade, (which renders it invaluable to those whose HAIR is of a delicate and light colour,) *frees it from scurf*, and renders the most harsh and dry hair as soft as *silk, curly and glossy*; *preserves it in curl* and other decorative formation—unimpaired, by the damp atmosphere, violent exercise, or the relaxing tendencies of the Ball Room.

To CHILDREN, it is invaluable, as it lays a foundation for

A BEAUTIFUL HEAD OF HAIR.

This Oil possesses wonderful properties for preserving the Hair in Hot or Cold Climates;—for which it is held in high estimation by distinguished Personages abroad. In fine, as adding strength, affording nourishment, exciting to a luxuriant growth, and brilliantly ornamenting and embellishing the human Hair, the Proprietors of the Macassar Oil can with truth aver, it has not its equal in the world; and the distinguished sanction it has ever received from Royal and Illustrious Personages, and the flattering Testimonials constantly received of its efficacy, places this declaration above suspicion.

Notice.—Each Bottle is enclosed in a wrapper, on which are engraved the words "ROWLANDS' MACASSAR OIL," and between those words are the same minutely and curiously engraved 24 times, and the Name and Address, in *Red*, on Lace-work,

A. ROWLAND & SON, 20, HATTON GARDEN,
Counter-Signed ALEX. ROWLAND.

The LOWEST PRICE is 3s. 6d.; the next 7s. or Family Bottles, (containing 4 small) at 10s. 6d.; or Double that size, £1. 1s.

ROWLANDS' ODONTO,

OR,

PEARL DENTIFRICE,

A Vegetable White Powder, prepared from Oriental Herbs, of the most delicious odour and sweetness, and free from any mineral, or pernicious ingredient—It *eradicates tartar from the teeth, removes decayed spots, preserves the enamel, and fixes the teeth firmly in their sockets, rendering them beautifully white*. Being an ANTI-SCORBUTIC, it *eradicates scurvy from the gums, strengthens, braces, and renders them of a healthy red*; it *removes unpleasant tastes from the mouth, after fevers, taking medicine, &c. and imparts a delightful fragrance to the breath.*—2s. 9d. per Box.

ROWLANDS' ALSANA EXTRACT,

Immediately relieves the most violent Tooth-ache, Gum Boils, Swelled Face, &c.; it is also an excellent STOMACHIC, in Cases of *Flatulency, Spasmodic Affections, &c.* and gives IMMEDIATE RELIEF.

Price 2s. 9d.—4s. 6d. and 10s. 6d. per Bottle.

Notice.—The Name and Address of the Proprietors,

A. ROWLAND & SON, 20, Hatton Garden, London, are engraved on the Government Stamp which is pasted on the first and two latter Articles; also printed in *red*, on the Wrapper in which each is enclosed.

Many *Shop-keepers* sell Counterfeits of the above, composed of the most pernicious ingredients. They call their trash the "GENUINE," and sign *A. RowlandSon*, omitting the "&," recommending them as being *Cheap*

Be sure to Ask for "ROWLANDS."

Sold by them, and by respectable Perfumers and Medicine Vendors.

FEANT & CO., PRINTERS, 143, ST. JOHN STREET ROAD.

London: John Churchill, Princes-street, Soho.

CORSETS.—PATENT CAOUTCHOUC INSTANTANEOUS CLOSING or UNCLOSING CORSETS, recommended by several eminent Physicians, and patronized by many ladies of distinction. The novel application of Indian Rubber in the Manufacture of Corsets is by far the most extraordinary improvement that has ever been effected; it admits of free evaporation and ventilation, preserving the body in a natural state of temperature, is free from the excessive pressure of ordinary stays (which tend to produce innumerable internal injuries) unalterable in shape, it bestows on the figure a most exquisite symmetrical appearance. Manufactured and Sold only by Madame and Mrs. FOLLETT, 53, New Bond Street, London, and Rue Richelieu, a Paris.

NEARLY FORTY YEARS ESTABLISHED,

For the sale of Shirting, Sheeting, Household and Table Linen, manufactured without any admixture from pure Flax, and sold in any quantity. Whole Pieces at the Factors' Prices.

AT 4, HOLBORN SIDE OF BLOOMSBURY SQUARE.

THE IRISH LINEN COMPANY

Reg leave to state, that the above house is their only Establishment. Purchasers are requested to take notice that since the dissolution of the Irish Linen Board, vast quantities of Shirting, Bed and Table Linen, made from an admixture of Cotton and Flax, are constantly imported from Ireland into this country, and vended to the Public as genuine Linen Cloth. Such fabrications are not, and never will be, sold at this Establishment; and the Public may rely on being supplied with real Flaxen Cloth, the same as that sold at this House for nearly forty years, at greatly reduced prices. The purchase money returned should any fault appear. Good Bills and Bank of Ireland Notes taken in payment, or discounted. Country and Town orders punctually attended to by

JOHN DONOVAN, 4, Bloomsbury Square.

FRASER'S MAGAZINE,

Price Half a Crown Monthly, or Thirty Shillings per Annum.

As few Copies of the January Number remain on hand, Subscribers desirous of commencing or continuing the Work ought to apply early.

The January Number commences the Vol. for 1835; and New Subscribers are recommended to order their respective Booksellers to procure for them the present year's Numbers; viz. those for January, February, March, and April.

JAMES FRASER, Publisher, Regent Street, London.
