The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

COLLEGE OF LETTERS, ARTS AND SCIENCES
DEPARTMENT OF BIOLOGY

January 22, 1923.

The Curator of the Herbarium,
Department of Botany,
University of Pennsylvania,
Philadelphia, Pa.

Dear Sir:

During the summer of 1922 I collected a number of plants from the region lying between Flagstaff and the Little Colorado River in Northern Arizona. This region varies from about 4000 feet in elevation in the Painted Desert to about 7000 feet in the yellow pine forest at Flagstaff. All the specimens are in very good shape and fully described and named on regular herbarium labels. The naming has been done mostly by myself in our university herbarium, but in difficult determinations I have been aided by Dr. Paul C. Standley and Professor J. J. Thornber. I am offering the collection of about 250 specimens at ten cents each.

I have another collection consisting of 241 specimens collected in the vicinity of Boulder, Colorado. Of these 183 have been named by myself in the herbarium of the University of Colorado. I am offering this collection at twenty dollars, or the two collections together at forty dollars.

I will be glad to hear if you are interested in either or both of these collections.

Yours very truly,

Herbert C. Hanson
Assistant Professor of Biology.
