The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear Dr. Langman:

The package of galley proofs do not constitute a burden but I do not like to see them gathering dust. Your idea of sending them to Professor Medellín sounds very practical if he is the kind of person on whom you can rely for sorting them and giving his share to Professor Rojas.

With best wishes, I am

Sincerely yours,

Concha Romero Jones

Dear Dr. Langman:

We have sent the second package of page proofs to Dr. Gómez Pompa and trust that he will forward it to Chapingo if Prof. Judith Espinosa has delivered to the National University the set that was sent to her by mistake.

If I knew how to handle the galley proofs I would do something about their distribution but the fear of making another mistake keeps me from trying. For this reason it might be better to wrap them up and set them aside until you can personally supervise this particular job.

With cordial greetings, I am

Sincerely yours

The College, University of Pennsylvania
Philadelphia, Pennsylvania

Dear Dr. Langman:

All the packages marked VII will be dispatched today. We addressed them according to your instructions and I hope they will reach Chapingo in the course of time. All mail of this type travels very slowly and so I am not surprised that you have not yet received an acknowledgment from Dr. Gómez Pompa.

The package of page-proofs sent to Judith Espinosa was addressed to Capulín 21.

I read Urquidi's piece several months ago, and I must confess that I was amused by it. Of course, I do not believe that he questions Oscar Lewis' integrity and scholarship. The trouble is that too many persons do not understand modern methods of sociological research, particularly those so widely accepted in the field of social anthropology.

The article on Mexico's economic, general progress and problems is now on Ambassador Margain's desk, and I am sure that he will read it with interest and will not fail to note the translation from Siempre on the extradition case of Jaime F. Merino. In the meanwhile, he has asked me to thank you for your kindness in sending it to him.

Be sure to let me know ahead of time when we may have the pleasure of seeing you in Washington because I would be greatly disappointed if a previous engagement should deprive me from a good visit with you.

Sincerely yours,

Concha Romero James

Dear Dr. Langman:

We have dispatched all the packages marked VI, that we have received -with the exception of those that have to be rewrapped - and I assume that you will hear from the Director of the Institute of Biology before very long.

Did you intend to send to Chapingo the other set of page proofs? Judith Espinosa could more easily transfer to Dr. Arturo Gómez Pompas the set that was forwarded to her by mistake.

When you come to Washington -and I hope it will be soon- we can arrange to distribute the galley proofs which seem to be all mixed up.

With cordial greetings, I am

Sincerely yours

Estimada Doctora Langman:

En vista de que a mi me corresponde el placer de despachar las pruebas de su famosa bibliografía botánica de México, me permito molestarla con el siguiente problema:

Ya hemos recibido 2 paquetes de pruebas de página, uno de ellos destinado a la Profesora Judith Espinosa. Le ruego dar me el nombre de la persona que debe recibir el otro paquete. No tenemos ninguna indicación respecto a los destinatarios de las galeradas. Han llegado 7 paquetes y no sabemos realmente a qué atenernos pues no están atados separadamente ni sabemos a quien dirigirlos.

Me permito sugerir la conveniencia de enviar las fichas en paquetes pequeños, bien atados y numerados de tal manera que su distribución pueda hacerse rápidamente y con el mínimo de confusión. En cada paquete debería aparecer el nombre del destinatario.

Le ruego perdonar la molestia que le pueda ocasionar esta consulta y aceptar mi sincero ofrecimiento de cumplir con su encargo debidamente.

La saluda muy cordialmente y queda a sus órdenes,

Concha Romero James

Dra. Ida K. Langman
Department of Biology
The College, University of Pennsylvania
Philadelphia, Pennsylvania

Estimada Doctora Langman:

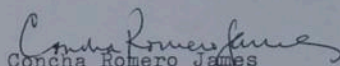

Acabo de recibir su carta del día 29 de mayo, junto con una lista de cinco personas entre las que figura la señorita Judith Espinosa con el número V. Como usted dice que los paquetes de pruebas de página son 2 y que los ha señalado con los números I y II, mucho me temo que se ha cometido algún error, pues como con uno de los paquetes venía una papeleta con el nombre y dirección de la señorita Espinosa, nos imaginamos que usted se lo había destinado a ella y, por consiguiente, se lo enviamos inmediatamente.

Como en la hoja anexa a su última carta usted señala a los señores Gómez Pompa y Hernández Xolocotzi con los números I y II ¿quiere decir que su propósito fue obsequiar un juego de pruebas de página a cada una de las personas mencionadas y no a la señorita Espinosa? De ser así será menester explicarle a esta última que se cometió un error y rogarle que tenga la bondad de enviar el paquete a uno de estos señores.

En vista de que conviene evitar más errores le ruego decirme a quién debo enviar el paquete de pruebas de página que nos queda y que no está numerado. También desearía saber cómo ha dispuesto usted la distribución de los siete paquetes de galeras que nos han llegado sin ninguna indicación respecto a su destino.

Para nosotros no es ninguna molestia cumplir con tan simpático encargo; pero como disponemos de poquísimo espacio en nuestras oficinas deseamos despachar todos los paquetes tan pronto lleguen a nuestro poder.

Con muy cordiales saludos queda a sus órdenes,

Concha Romero James
Consejero
