We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

air

Dear Sir,

while looking
thru, "Who is who in America", in
the library the other day, I saw
your name, which I remembered
since 1938 or 1939.

at that time you visited
Sweden during the summer.

You called on Mrs. Hildegard
Hellstrom of 40 Bergvipsstreet in
Stockholm.

I am her son who at that
time was about 14 years old.
I am now in the United States
and should very much like to
get in contact with you.

Very sincerely yours

Sigfrid Hellstrom

My address:

Sigfrid Hellstrom
240 South Broad St.
Nazareth, Pa.

July 12, 1949

Mr. Sigfrid Hellstrom
240 South Broad Street
Nazareth, Pennsylvania

Dear Mr. Hellstrom:

It was exceedingly kind of you to write to me, and Mrs. Goodspeed and I are glad to be in touch with you.

We remember the pleasant visit in your home in August, 1938 and the happy days in 1922-23 when your mother was with us in Stockholm. Please give us news of your family because we have had no word of them for some time.

We have been in South America four times in the last ten years, conducting plant exploring expeditions. Our plan had been to go to Europe this fall. Now we hope to go next spring and to attend the International Botanical Congress to be held in Stockholm in July, 1950.

It will be a pleasure to hear more about you and what you are doing in this country. With best wishes and kindest regards,

Cordially,

THG:hm

T. H. Goodspeed

Hazareth Aug 26, 1949

Dear Mr. Goodspeed,

It was very kind of you to answer my letter, and I shall try to give you some news about our family and what has happened in the past 11 years.

I remember you very well when you visited our home in Stockholm and you were the person who gave me the initial spark of getting over here.

At that time my two brothers, Gunnar who now is 22, and Gunnar who is 19, were attending grammar school while I was going to high-school.

After finishing high school, Gunnar went to college in Stockholm where he now is on his second year. He is taking up architecture. He and I correspond regularly and he tells me, he likes school very much.

The latest news from him told me that he just had got engaged to a girl in Stockholm, whom

he will marry when school is finished.

Junnae went after grammar school to college where he took up civil engineering. After completed 4-years he had to go in the service for 2 years, as military training is compulsory in Sweden. Boys who have gone through grammar and high school are only compelled to one year of military training. Almost everyone who has gone through college and is in good physical condition has to serve one year extra, because they want to make them officers in the reserve. Junnae made out good and became second lieutenant in the coast guard. He finished the service last spring and got married on June 18. He and his girl then went on a combined honeymoon and studying trip to England. They will return this fall to live in Jothamburg where Junnae is going to take up advanced study in civil engineering at 'Chalmers Tekniska Institut'.

His girl is going to take up trends at the same University.

The year of 1943 was very sad because our much beloved mother passed away after an operation. She was such a good mother and it seemed so strange that, just when you were at the age, when you could do things for her, to show appreciation for all the things she had done for you from birth on and up, she had to pass away. But I guess that such is life.

My father is still having his own contracting business and is making out very well. He has several men working at his office, and is doing a lot of housebuilding.

He remarried in 1945, to a lady by name Martha Engstrom.

The same year he bought himself a farm which he has for recreation. There he can go hunting or fishing, and relax on his time off.

From the latest letter from home I can see that everyone is getting along swell and is healthy.

When I had finished high school
I started at Stockholm's Tech. Institute,
where I took up chemical engineering.

In 1943 was graduation and I started
to work with research in plastics,
this kept on for a year, when I was
offered a job as ship engineer at a research-
plant in synthetic rubber at Ljunga-
werk in the north of Sweden. This
job ended because I had to go in
the service in 1945. I was lucky and
did only have to stay for one year.
I was in the army. There I met a
friend of mine who had gone to
college at the same time as I. We
were talking about what to do
when we came back from the army.

I told him that I wanted to
go to the United States and he
said, "fine I shall join you". He had
an uncle who is president for the
Lane Star Cement Corp. We asked him
what he could do for us and he
told us that once we came over
here he would get us jobs.

We applied for our visas and
were told that it would take us
at least one year to get entered
on the quota.

in the spare time I wanted to get some experience in the cement-manufacturing, so I learned all I could at a 2 months stay with Skånska Cement A.B. in Röpung, Sweden.

After that I wanted to get some knowledge about the wood pulp industry, so I took a job as lab. assistant at a wood pulp plant in the north of Sweden where I stayed till May 1947.

My friend and I had then got our visas ready and on May 23, 1947 we sailed for the U. S. with ^{m/s.} Gripsholm.

It was a wonderful voyage and to see New York after 10 days on the Ocean was exciting.

We saw all we could for a 10 days stay in the city.

We met my friend's Uncle and he told me that I could start at one of the Lone Star's plants in Hudson U. Y.

My friend wanted to study wood-pulp and was sent to St Regis Paper Co. at Watertown, U. Y.

After one year at Hudson the company sent me down to Hagafors.

Pa. where I am at the present time.

In January this year I bought myself a 38 Ford which was a good move because a few days after the company sent me down for a 2 months stay at their plant in Norfolk, Va. By having that car I could see much more of the country.

For the past half year I have been helping a man making concrete building blocks as part time job in the evenings, because a fellow like I can always use some extra cash.

I like it very much over here and applied for my first citizen papers in October 1947, so I have 3 years more to go to become an American citizen.

The only thing I have been missing is the winter time with lots of snow. I have had to do without skiing and ice skating which two sports I like so much.

Among the sports over here I like to watch baseball and am crazy about football. I can't hardly wait till the football season begins again. You have got a very good team where you teach and I wish you luck this season.

4.

During my stay here in the eastern states I have done a lot of traveling. When up in Hudson, I visited Vermont, Massachusetts and Connecticut. Vermont is beautiful with its mountains and is very much like Sweden.

When here in Pa. I have seen New Jersey with its so much advertised Atlantic City. When I went to Virginia I went thru Maryland and Delaware.

All those states are a little bit different from each other but they have one thing in common, whether you are English, German or French, you are just as good as your neighbor and people live peacefully together.

Here Europe has something to learn.

I don't think that there is anything more to say that isn't said before so I close with the best regards to you and your family.

Sincerely yours,

S. Hellstrom

P.S. There is a change in address in case you want to write me sometime.

American Hotel,
202 So. Main St.
Nazareth, Pa.

CALIFORNIA HERB SOCIETY

August 14, 1952

Dr. F. Harper Goodspeed, Director
Botanical Gardens
University of California
Berkeley, California

Dear Dr. Goodspeed:

It has just come to our attention that the restriction placed upon the Herb Garden, by participating groups, has been removed, and, inasmuch as our organization is, and has been, so vitally concerned and interested, wish to have this fact confirmed.

You, I know, are fully cognizant of not ^{only} outstanding interest, but of the great amount of time and plant material, our members in the Bay Area, as well as over most of the state, have felt honored to give to the Herb Exhibit. We felt it an outstanding achievement to give, even in a little way, this educational and interesting development to the people visiting your fine project.

Time has not only increased our interest over a vast part of our state, in foreign lands, but has tended to promote an educational program as well.

Could we have the privilege of your cooperation, so that we may resume the donation of time and plants to this great public cause?

Awaiting your early reply

Sincerely

Mrs. Harold Gordon Henningsen
Secretary
7924 MacArthur Blvd., Oakland 5

Suggested reply to letter of August 14, 1952, from California Herb Society
Mrs. Harold Gordon Henningsen, Sec'y

Dear Mrs. Henningsen:

I do not quite understand your letter of August 14 inquiring about the Herb Garden at the University of California Botanical Garden in Berkeley, but try to clarify the situation there.

Some five or six years ago the treasurer* of the California Herb Society made a trip to the Botanical Garden to tell the superintendent that your society was more interested in cooking with herbs than in gardening and that you had neither the money nor desire to assist with our herb planting any longer. A short time later your president* and yourself, in conversation and correspondence with us, indicated a misunderstanding of the rights and privileges held by any society cooperating with a State institution such as the University of California. Under these circumstances it seemed advisable at that time to maintain the herb planting without the help of any outside organization.

When we later decided that the herb planting needed complete resetting with new material, we asked the cooperation of the Northern California Chapter of the Herb Society of America, as a number of the individuals who are members of that group have been interested in and contributed to various plantings in the University Botanical Garden for some years. The Herb Society of America is a horticultural organization of national scope and its local members have been able to call upon those in other parts of the country for assistance in collecting the various herb species that are now in the Herb Garden here.

The Herb Garden has been entirely replanted with new material within the past year or so, with the exception of a few large shrubs that were originally given the University by Mrs. Dorothy Parker some (?) years ago when she turned her collection of herbs over to us at the time she moved to the Eastern part of the country.

We feel it would be rather confusing to have more than one group participating in this project. However, we thank you for your offer of assistance and trust you will find other opportunities for promoting interest in herbs in the Bay Area.

Yours truly,

*The treasurer referred to above is Mr. McCormack, who is still treasurer and one of the three permanent directors of the since incorporated California Herb Society. Mrs. George Politos is still the president after seven or eight years in that office, and Mrs. Henningsen is the third permanent director and corresponding secretary for an indefinite term.

Berkeley 4, California
November 10, 1952

Mrs. Harold Gordon Henningsen
7924 MacArthur Blvd.
Oakland 5, California

Dear Mrs. Henningsen:

I regret that your letter of August 14 has not earlier been acknowledged.

Your reference to a "restriction" being removed in the case of the Herb collection in this Botanical Garden I do not understand.

During the past year or two this collection has been almost completely replanted with new material obtained by me from a variety of sources. I judge that it now represents one of the more interesting and complete collections in this country.

As in the past the cooperation of members of all Herb Societies is welcomed. As individuals we would be glad to receive from them plant material which will increase the value of our collection.

Sincerely,

THG:T

May 24, 1949

Mr. Fred W. Herbert
Soil Conservation Service
P.O.Box 369
Berkeley, California

Dear Mr. Herbert:

Copy of your memorandum to Mr. Fosberg is at hand. I am holding all day Wednesday, June 8 open on the possibility that Mr. Fosberg and I can look over the water development situation at the Botanical Garden. I judge that I will be speaking directly to Mr. Fosberg concerning this appointment. Many thanks for your interest and cooperation.

Cordially yours,

THG:T

Fred W. Herbert, SCS, Berkeley

Request for assistance from Dr. T. H. Goodspeed, University of California

Dr. Goodspeed, as you probably know, is Professor of Botany and director of the botanical gardens on the University campus. The gardens are located in the canyon back of the University. There is a small stream that runs into the garden and a good many years ago a certain amount of water was developed to supply a small pool. This was done by going down through the clay to the rock. There are some springs back up in the canyon and Dr. Goodspeed states that about 50 years ago a rancher who owned the land there developed all the water needed for domestic use and for some stock. Dr. Goodspeed is interested in insuring a water supply for the botanical garden and for fire protection. He would like to have suggestions as to the most feasible way to trap water and open up some springs. The University has recently "brushed off" the slopes and these need replanting.

Dr. Goodspeed has an appropriation which is good until June 30 to do some work on this project. He believes, however, that he can carry the money over into the next fiscal year if he has some work planned and can itemize proposed expenditures.

I find Dr. Goodspeed will not be available on May 31, which is a day before you are scheduled to meet Mr. Muceus here. I am wondering if you could plan to be here on June 8, the day before you go to Sacramento. At any rate, I suggest you get in touch with Dr. Goodspeed direct and make an appointment. If you wish to telephone to him, his number is Ashberry 3-6000, local 344.

Rock

July 8, 1932

Mr. Fred P. Herbst
Herbst Brothers, Inc.
92 Warren Street
New York City

My dear Mr. Herbst:

I have your letter of June 22, concerning the possibility that Dr. J. F. Rock may be in a position to act as your collector in western China and Tibet. I may say that Doctor Rock, last April, undertook a plant exploring expedition under the auspices of the Botanical Garden of this University, with the understanding that the products of this expedition were to become the property of the University. In order to make this expedition possible, I have been engaged for some time in an effort to secure funds from nurserymen, and particularly from amateur Rhododendron enthusiasts. Contributions in larger and smaller amounts have come from a considerable number of persons both in this country and abroad. The arrangement in each case is that those who contribute will receive seed of everything which Doctor Rock collects.

As you may know, this Botanical Garden, some years ago, received by gift a very important collection of Rhododendrons. We are particularly interested in Doctor Rock's expedition because of the new or little known species of Rhododendron which he is certainly going to find.

My suggestion would be that you make a contribution to the Rock Expedition on the same understanding as other contributors. All pledges toward the expedition fund are received by me for transmittal to the comptroller of the University, who is managing the financial arrangements just as he does any other University business.

Very truly yours,

T. H. Goodspeed
Professor of Botany and
Curator, Botanical Garden

We thank you for your letter of July 8, with reference to Rhododendron seed being collected in Yunnan by Dr. J. F. Rock. It occurs to us that we can possibly do you and Dr. Rock's expedition more good by offering you our services as distributors of seed to the nursery trade. We believe that in this way we could secure for you greater returns for the seed Dr. Rock is able to send back and bring about a much larger distribution. If this thought appeals to you, we would even go so far as to give you the names of the buyers of this seed, so that you could check the results produced in various parts of the United States.

We only recently secured an offer of 48 packets of Rhododendron seed brought back by George Forrest and we have interested several prospective buyers in these 48 packets at the price of \$150.00. This will give you some idea as to the possibility of the proposal we are making. If it is of interest, we would appreciate your advising this office by return mail, so that the writer may get in touch with you some time in the early part of August when he expects to be at Los Angeles. We will then advise you of the exact date.

Thanking you for your courtesy, we remain,

Yours very truly,

July 18, 1932

Rock

Mr. Fred P. Herbst
Herbst Brothers, Inc.
93 Warren Street
New York City

My dear Mr. Herbst:

I am today in receipt of your letter of July 13, containing your suggestion that your firm act as distributors of the seed to be obtained by the Rock Expedition. I fear that I did not make ~~it~~ clear in my previous letter to you the nature of this expedition and its relation to the Botanical Garden of this University.

We are interested solely in the scientific products of this plant exploration. The plant materials which Doctor Rock will send exclusively to us will be of various kinds, and will be useful in our scientific work in various directions. This University is acting as the sponsor of the expedition, and is providing the entire cost thereof. The financing is being done primarily through private subscription, and the understanding is that each person or institution which subscribes will receive free of charge the products of the expedition. Included among the list of subscribers is a considerable number of nurserymen who are, I presume, primarily interested in the propagation of new and interesting plants for the trade.

From the point of view of this University, our greatest interest lies in being able to distribute, free of charge, to other botanical gardens throughout the world, seed and herbarium specimens of what Doctor Rock collects. These institutions will feel very highly gratified, and will, in return, send us the products of similar expeditions which they will sponsor. I believe that over a long period of years such exchanges will flow into our garden and herbarium, the net product being of very considerable monetary value. We are therefore exceedingly anxious not to place the distribution of the products of the expedition on any commercial basis, and are particularly anxious that those who contribute will feel that they are receiving something of real value in return for the money invested.

As I said in my earlier letter, we will be glad to add your name to the list of contributors, in case you feel you would care to come into the situation on this basis.

Sincerely yours,

T. H. Goodspeed
Professor of Botany and
Curator, Botanical Garden

THG:ML

January 18, 1933

Mr. Fred P. Herbst,
Herbst Brothers, Inc.,
92 Warren Street,
New York City.

My dear Mr. Herbst:-

You may recollect that we have had some correspondence concerning collections of Rhododendron seed made by Dr. Joseph F. Rock in unexplored territory on the China-Tibet border.

As I indicated to you in earlier letters, we have been endeavoring to finance the cost of Dr. Rock's expedition, which is being carried on under the auspices of this University, through private donations. My success in securing funds has been considerable but there is still some doubt as to whether we shall be able to secure the entire sum necessary before we receive this seed. I am therefore writing to inquire just what arrangements the University would make with you in case it is decided that we must attempt to secure funds through sale of the seed.

At the present time I have a considerable quantity of Rhododendron seed obtained by Dr. Rock on a preliminary expedition into the Likiang Snow Range. He found a considerable number of types which in his experience were previously unknown. If a favorable decision is made by the University authorities in the matter of selling seed, it would be possible to turn over to you the product of this preliminary expedition.

The longer expedition, which is just coming to an end, has been very successful, according to Dr. Rock. He is particularly enthusiastic about the new and interesting species collected in and beyond the Muli Kingdom. He has promised us approximately 500 packets of seed and they should reach us sometime within the next two months.

I think you will understand that I am writing you simply for information, and unofficially. If you would care to submit a proposal as to the possible sale of the seed, I believe that it would be wise for the President of the University to take it under consideration. I should appreciate an early response, since we are taking up this proposal with other seedsmen.

Very sincerely yours,

T. H. Goodspeed
Professor of Botany and
Curator of the Botanical Garden

Gentlemen:

Attention of Prof. T. H. Goodspeed

HERBST BROTHERS, INC. GIVE FOR THEMSELVES OR THEIR PRINCIPALS, NO WARRANTY EXPRESS OR IMPLIED AS TO DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER OF ANY SEEDS, BULBS OR PLANTS THEY SELL AND WILL NOT BE RESPONSIBLE FOR THE CROP. SELLER'S LIABILITY IN NO CASE EXCEEDS INVOICE COST.

We have your letter of January 18th and appreciate very much your thinking of us in connection with the disposition of Rhododendron Seed secured by Dr. Rock's expedition.

Since some years we have given special attention to the importation of new and rare varieties of Rhododendron seed and believe that we have developed the best outlets for them. The continuance of the depression has, however, so reduced the demand for luxury items that it would be difficult to even guess at the sales prospects for the seed you have.

Of course, there is always a definite sale for rare and new Rhododendron seed and if you will give us some idea of what you wish to dispose of we will sound out a few of our customers. Subject to favorable response, we could approach the entire American nursery trade through direct mail solicitation and through the magazines. Naturally in doing so all credit for securing the seeds would be given to the University of California and to Dr. Rock and we would send you a list of the buyers and their orders so that you could follow up scientific questions which you may have in mind. From this viewpoint, a wide distribution might be of very particular interest.

Without further details the questions to be considered can

January 23, 1933

January 30, 1933

Mr. Fred P. Herbst
Herbst Brothers, Inc.
92 Warren Street
New York, N. Y.

My dear Mr. Herbst:

I have just received your interesting letter of January 23, concerning the possible sale of Rhododendron seed collected by Dr. Rock.

I realize, of course, that no final decision in this matter can be made before we have received the products of the expedition. Thereafter we must, of course, secure the identification of as much of the seed as possible. However, these identifications, which, presumably, must largely be made at the Botanical Garden in Edinburgh by specialists, will require a certain period of time, and it might be better to offer for sale, simply with Rock's collector's notes, species which he feels quite certain are new and interesting, and, indeed, as you know, many of the very numerous Rhododendron species which have been named by botanists, have been received only as dried specimens, or the original seed collected of them has been small in amount, inviable, or the plants have not been successfully grown; in other words, we would probably be entirely safe in listing as new a great proportion of what Rock finds, and later on perhaps be in a position to give those securing the seed the correct names. Of course, we will ultimately publish a list of Rock's numbers, so that the interested amateurs would be able to secure the names for themselves.

As I think I told you in my previous letter, we have reason to expect to receive the new seed within a month or six weeks. When it is in hand and at least a partial list can be provided, I will take the matter up with you again in the hope that there will be sufficient demand to justify us in attempting to sell the seed.

With thanks and best wishes,

Very sincerely yours,

T. H. Goodspeed

Attention of Professor T. H. Goodspeed

HERBST BROTHERS, INC. GIVE FOR THEMSELVES OR THEIR PRINCIPALS, NO WARRANTY EXPRESS OR IMPLIED AS TO DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER OF ANY SEEDS, BULBS OR PLANTS THEY SELL AND WILL NOT BE RESPONSIBLE FOR THE CROP. SELLER'S LIABILITY IN NO CASE EXCEEDS INVOICE COST.

We have your letter of January 30th and thank you very kindly for the consideration you have given our last letter.

As the seed collected by Dr. Rock on his trip through the Muli Kingdom may not be expected for another month or so, we are wondering whether we could not try out some work on the seed which you have from Dr. Rock's preliminary expedition.

We would suggest that we offer to our prospects a list of the various varieties numbered, and opposite each number give Dr. Rock's notes. We think that the seed could be sold on this basis. We would try to arrange sales in various parts of the United States so that you would have a chance of studying each species under different climatic soils and conditions.

In approaching the subject further, we wonder whether with regard to the preliminary expedition, you can send us such a list with the approximate quantities of seed of each number indicated.

After we see the length of the list and the quantities of seed available, we may be able to make you a definite proposition. In the meanwhile, we are wondering what means of remunerating us you would prefer. We could sell as your agents, or under our own name.

Yours very truly,

HERBST BROTHERS, INC.

Berkeley 4, Calif.

Dear Miss Thompson:

We have your letter of November 20 questioning our Invoice No. 23709 for three copies of THE GENUS NICOTIANA for Dr. Goodspeed.

When Chronica Botanica forwarded his order of September 27 to us, Dr. Verdoorn advised that the discount of 40% was provided for by contract, so we billed at that rate without further question.

Our copy of the contract also states 40% for orders from Dr. Goodspeed. Inasmuch as the maximum discount is 20%, Dr. Goodspeed receives an exceptionally favorable price as billed.

Very truly yours,

THE RONALD PRESS COMPANY

Otto Herbst

March 9, 1957

Dr. T.H.Goodspeed,
2480 Virginia street,
Berkeley 9, California

Dear Dr. Goodspeed:-

I had hoped to come to Berkeley and see you but have been unable to get away. Now it looks as tho I'll not be able to do so before returning to Seattle.

My friend Eyerdam writes me that you are considering sending him on a collecting trip to Chile. I hope you are able to arrange for him to do so, for I know no one whose heart is more wrapped up in collecting than W.J.Eyerdam. As you know, he is a successful collector with a wide range of interests.

If you send him, I hope that you will see that he gets a full complement of the interesting and spectacular lichens which occur in Chile, particularly in south Chile. I understand that the forests there have little known Usneas and Stictas, which would be of great interest to lichen students.

I return the end of this month to Seattle for the spring quarter, having been in Santa Cruz since last August because of my wife's condition. In June I expect to make my final *adieu* to the fishes and devote my entire time to lichens.

For the past year most of my time has been given to the study of Usneas, the "beard moss" of poetry and folk lore. Am working on the Usneas of the United States and Canada - about 80 species, instead of the 7 or 8 into which all sorts have been jammed in the past. Hope to get a paper in shape by the end of the year but shall have to examine the U. California herbarium and some others first.

The west coast states have many not found elsewhere in North America and hitherto known only from high mountains of central Europe or the north of Fenno-Scandinavia.

After June I expect to be permanently in Santa Cruz, California.

Yours sincerely,

507 Caledonia, Santa Cruz

Dear Dr. Herre:

Thank you for your interesting letter of March 9th.

Until I have a decision concerning my request for a grant from the National Science Foundation in favor of my proposed 6th South American Expedition I cannot be entirely certain of financing Eyerdam's inclusion in it.

However, I think that the chances of his going are sufficiently good so that you might care to give him any instructions he should have to get you what you want in Chile. I certainly will be glad to cooperate.

With best wishes,

Cordially,

THG:T

Dept. of Botany

Mr. H. Herre, Curator
Stellenbosch Botanical Gardens
Stellenbosch University
Stellenbosch, C.P.
Union of South Africa

Dear Mr. Herre:

As you know Mr. Paul C. Hutchison, member of the staff of this Botanical Garden, is carrying on research for which living plant material which you can supply is essential. Having had considerable success with a recent shipment personally arranged by him he has requested an allotment of \$100.00 to cover cost of additional plants and their shipment. A draft in that amount made in your favor is enclosed. It is understood that Mr. Hutchison will be entirely responsible for all negotiations concerning the nature of the material you will supply and for shipping instructions.

With thanks for your past cooperation and best wishes

Sincerely,

THG:T

777 Pedro 276/48

Señor Profesor Doctor T. H. Goodspeed
Director del Jardín Botánico
University of California
Berkeley, Calif.

Mi distinguido Profesor Goodspeed:

Desde su última carta fechada Abril 14 de 1938 no he recibido noticias suyas. Estuve dos veces en Europa, en misión oficial del Gobierno Uruguayo (Junio de 1938 y Mayo de 1939) para continuar mis estudios en los museos botánicos. Lamento mucho no haber podido saludar a Vd. en Montevideo y emprender algunas excursiones botánicas por el país. Me preguntó Vd., en la carta mencionada, cuales son los meses más apropiados para estudios botánicos en el Uruguay. Creo que le contesté, ya, que la mayoría de las especies, y especialmente las Nicotiana que le interesan tanto, florecen en los meses Octubre hasta Marzo. Muchas plantas empiezan a florecer en Setiembre y duran hasta Abril y Mayo. La mejor época es la primavera porque no hay todavía bichos (Tetranychus, mosquitos, moscas, pulgas, chinches), pero el otoño es, tal vez, más agradable todavía, no hay más bichos colorados (Tetranychus) y los días no son más calurosos. La mejor época para Criptógamas es, naturalmente, el invierno, Mayo hasta Agosto. Espero tener más suerte cuando Vd. pasa por tercera vez por el Río de la Plata, *esta vez sí*.

De regreso al Uruguay desde el año 1946 me ocupo nuevamente de la recolección de material botánico para mis PLANTAS URUGUAYENSES EXSICCATAE. He organizado, en los tres últimos inviernos, tres exposiciones "permanentes" de hongos, coleccionando mucho material criptogámico que repartí entre los especialistas. Desgraciadamente no puedo continuar mi FLORA ILUSTRADA DEL URUGUAY por falta de interés y de "rubro" en las oficinas del Gobierno. Colaboro casi exclusivamente con el extranjero, U.S.A. y Suiza. La casa Lechevalier en Francia me pidió algunos manuscritos (INDEX LYCOPODIORUM UNIVERSALIS y FUNGI EDULES), pero según parece, hasta en Francia no se puede publicar algo en este tiempo. El mayor interés para mis publicaciones y plantas hay en los grandes herbarios norteamericanos. El único Herbario que no ha renovado su suscripción es el de Berkeley, lo que me extraña mucho dado que la ^{más grande} University of California es la primera del mundo y tiene la colección de plantas sudamericanas como me escribe el colega Eyerdam. Me da lástima no tomar en cuenta este

instituto que antes era uno de los primeros en recibir mis colecciones. Naturalmente estoy también dispuesto en colaborar con el Jardín Botánico, en cualquier forma que mi señoría en Alemania y estoy libre para viajar y coleccionar o para trabajos internos como en Europa donde trabajé en los museos de Berlín y París subvencionado por los respectivos gobiernos. Siempre a sus gratas órdenes y con los mejores votos saludo a Vd. muy atentamente

Cher Monsieur,

Effectuant des recherches de gé-
-nétiqne sur les Tabacs, j'aurais besoin
- pour réaliser un certain nombre de
croisements interspécifiques - de l'espèce:

Nicotiana Bigelovii, Wats.

Ce tabac étant originaire de Californie,
je vous serais très obligé si vous pourriez
m'en envoyer des graines.

En espérant vivement qu'il
vous sera possible de satisfaire ma
demande, je vous prie d'agréer, Cher
Monsieur, mes cordiales salutations et
mes remerciements anticipés.

A. Heslot

Dear Professor Goodspeed,

I have undertaken research work on the genetic mechanism of sex determination in the Cucurbitaceae. Consequently, I am trying to collect seeds of the various dioecious species belonging to this family.

Could you help me and send me seeds of the ~~various~~ species you may have in your collection? I am enclosing herewith a list of the genera of Cucurbitaceae which interest me.

With my best thanks,

Yours very respectfully,

H. Heslot

M^r Henri HESLOT
Chef de Travaux

P.S. In case you have no one of the species required, would you be kind enough to send my letter to some other U.S. Botanic Garden which could satisfy me?

Dear Mr. Heslot:

Enclosed is seed of Acanthosicyos horrida, a species listed in your letter of December 15, 1950.

I have examined the numerous seed exchange lists received from Botanical Gardens and do not find any of the other species you require. However, I believe that you may obtain some of those species or further information concerning sources of seed from Mr. Thomas Whitaker, Box 150, La Jolla, California. Mr. Whitaker is, I think, a member of a United States Dept. of Agriculture Experiment Station.

With best wishes

Sincerely,

THG:T

Dear Professor Goodspeed,

Thank you very much indeed for your kind letter of March 2d and seeds of *Acanthosicyos horrida*: I had not yet succeeded in securing seeds of this species, and these seeds will be very useful for my research work.

I am deeply grateful to you for exchanging seed exchange lists and, on your advice, I will write to Mr. Whitaker, hoping he will be able to help me.

With my best thanks,

Yours respectfully,

H. Heslot

Dear Dr. Goodspeed,

Investigating possible Arboretum corporation articles, by-laws, and compromises required so much more time than anticipated that we had to side track working on our findings from the Arboretum Panel of March 28th.

It is next on our list to get back to them and we trust you will permit us to keep until then your informative paper on the University Botanic Garden which we will return as requested.

On April 25th, we held the committee meeting summarized in the enclosed report.

The majority of the arboretum minded, professional, horticultural persons we have contacted want to wait and see what happens to the proposed Durant Park deal and the present Zoological society.

If the deal goes thru and an adequate arboretum site is assured and if the zoological society changed enough in name and purposes to be attractive to the arboretum people, then the latter would be willing to join with the former to make the new corporation the leading Northern California Arboretum organization.

Mean while, our Council Arboretum Committee will continue its studies and we have appreciated your personal aid.

I also enclose a copy of a constitution submitted for debate. It closely follows the experience of the Save-the-Redwoods League in many ways.

Some time, I should like to talk arboretums with you, and in closing may I congratulate you on the quality of the University Botanic Garden exhibits in the Garden Show?

Truly,

Ernest Higgins

Ernest Higgins

The twenty three guests of the Arboretum Panel Dinner given by the California Horticultural Council on March 28, 1947 at the Leamington Hotel in Oakland, agreed that a system of proper arboreta in California corresponding to its major climatic zones, was desirable and that a committee from Northern California invite a committee from Southern California to meet no later than the evening of Thursday, June 19th at Berkeley, California, (The date and place of the first day of the Fourteenth Western Shade Tree Conference) to form the basis of an organization that would associate scientists, professionals and laymen interested in trees, arboreta and the public welfare, for the purpose of fostering a system of arboreta in California.

Friday evening, April 25th at Hotel Leamington, the following committee held a preliminary meeting:

- Ray Hartman, Leslie Mayne, Harry Nelson and Ernest Higgins of the Executive Committee of the California Horticultural Council and;
- Professor Leland Vaughn of the University of California;
- Professor H. E. McMinn, Mills College and East Bay Regional Parks;
- H. M. Butterfield, Vice President, California Horticultural Society;
- Benton Robinson, President, Alameda County Arboretum and Zoological Soc.

State-wide co-operation and organization of tree and arboretum interests was held to be paramount to win the widest private and public support for the building and management of arboreta in California, for the purpose of promoting science, educating students, aiding public park and highway officials and others in their tree problems, promoting horticultural industry and generally serving and offering enjoyment to the people.

Experience of the minority of the committee in the state-wide California Nurserymen Association, the Western Shade Tree Conference and the California Garden Clubs Inc, inclined them to favor a strong, single, non-profit corporation with chapters to deal with local problems.

The majority held that independent, non-profit, regional associations with complete control of local finances would work best in each climatic zone and that state-wide coordination could be achieved by the founding of a non-profit federation with some such name as "California Arboreta Inc." whose function would be:

"The formulation of policies and plans for the comprehensive development of a system of arboreta in the state" and whose members would be:

"Any public body or non-profit organization having control and management of public or quasi-public arboreta in this state"

The leadership of Southern California in pioneering a regional arboretum, finally located on the Baldwin Tract in Arcadia was commended.

The public service of the officers, directors and members of the Alameda County Arboretum and Zoological Society in obtaining, holding and offering to convey to the State of California, under the "matching clause" provision of the 1927 State Park Act, the four hundred and fifty acre "Durant Park" tract, as a possible site for a Northern California Arboretum, was also commended.

Inquiries and comments on the foregoing are invited.

Ernest Higgins, Chairman
2512 Blake St.
Berkeley 4, California

ARTICLES OF INCORPORATION OF THE CALIFORNIA ARBORIST SOCIETY Approved 10, 1947

KNOW ALL MEN BY THESE PRESENTS, That we,

hereinafter called governors, a majority of whose offices and residences are in the State of California have this day and year voluntarily and lawfully associated ourselves together for the purpose of forming a corporation under the laws of the State of California, and we do hereby certify:

First: That the name of said corporation shall be:

CALIFORNIA ARBORIST SOCIETY

Second: That the purposes for which the said Corporation is formed are:

- A. To encourage individuals and groups to study and appreciate trees and associated plant and animal life and their proper management in nature, home-gardens and public parks and along public streets and highways.
- B. To stimulate and advance public interest in local and specialized arboriculture.
- C. To create and extend public interest in the establishing and maintaining of a state arborist with at least a unit in each the Northern and Southern climatic zones of the State of California, and the coordinating of the management of the units with the education, inspiration and recreation of both the adolescent and adult persons of the State.
- D. To solicit, receive and distribute private funds to buy, acquire, own and hold areas of land suitable for the establishment of units of the State arborist, and in conjunction with the California State Park Commission, the University of California, other universities and institutions and local government units to plan, organize, execute, manage and maintain units of the State arborist for the study, use and enjoyment of the public.
- E. To correlate and bring into unity of purpose and action all of any interests concerned with the establishment and management of state park and local and specialized arboriculture for scientific, educational and recreational purposes.
- F. To co-operate with the California State Highway Commission and other agencies and interests in promoting the proper management of trees and country side beauty along the highways and throughout California.
- G. To support preservation of natural areas and proper reforestation.
- H. To purchase, lease or otherwise acquire, have, hold, own, enjoy, to sell, lease, mortgage and otherwise encumber and dispose of any and all and every kind of lands or real and personal property.
- I. To do and perform any and all lawful acts which may be either necessary for, or proper or incidental to, the exercise of any of the foregoing purposes.

Said corporation is not organized or formed for profit and its work and purposes and objects are purely scientific, educational, philanthropic, charitable and benevolent and solely in the public interest.

Third: That the main office and the place where the principal business of said corporation shall be transacted is the City of Berkeley, County of Alameda, State of California.

Fourth: That there shall be no limitation upon the term of existence of this corporation and that instead, this corporation shall have a perpetual existence.

Fifth: That the number of directors of this corporation shall be such number as may from time to time be fixed and provided by a by-law or the by-laws of this corporation; that authority to fix or change the number of directors from time to time by by-law or by-laws is hereby conferred; and that the names and residences of directors elected for the first year and until their successors shall have been elected shall have accepted office are as follows:

<u>NAMES</u>	<u>RESIDENCES</u>
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

SIXTH: That the number and qualifications of members or classes of members of this corporation; the classes of members or memberships; the property, voting and any and all other rights, interests and privileges of each member, membership or class of members; the liabilities and obligations of each and/or all members or classes of members ~~xxxxxxxxxxxxtxxxxxxx~~; and particularly the liability of each and/or all members or classes of members for fees of admission, dues, assessments and other fees and charges and the amount and method of collection thereof; and the qualifications, method and/or grounds of and for admission, election, appointment, assignment to chapters, duration, withdrawal, suspension, expulsion and termination of members, memberships and /or classes of members shall be such as may from time to time be set forth, fixed, changed, or provided by by-law or by-laws of this corporation and authority to adopt any and all such by-law or by-laws is hereby conferred.

(space reserved here for/ names of additional governors)

BY-LAWS OF CALIFORNIA ARBORETUM SOCIETY
ARTICLE I. BOARD OF ~~EXECUTIVE~~ GOVERNORS

Within these by-laws the Southern climatic zone of the state of California, hereinafter called: the Southern zone shall include the cities of Bakerfield and San Luis Obispo and the general East-West line connecting them and projecting beyond them generally East to the Eastern border of California and generally West to the Western border of California shall be considered the Northern boundary of the Southern zone. All of California South of this boundary shall comprise the Southern zone. All of California North of the Southern Zone shall comprise the Northern Climatic zone, hereinafter referred to as the Northern zone.

There shall be chosen, by election from the members of this corporation, a Board to be known and designated as "The Board of Governors". The ~~xxx~~ said Board shall be composed of forty-two (42) members half of which shall come from the Northern zone and half from the Southern zone, who shall serve for a term of three years; except that it shall be arranged that the terms of one-third of said members expire during each year.

At the election at which the Board is created, the full forty-two members thereof shall be elected but shall by first dividing into Northern and Southern groups, by lot, immediately thereafter classify themselves into three groups of seven each, the said groups to be designated first, second and third groups respectively. The term of office of the members of the first group shall terminate at the next annual meeting of the Board; that of the members of the second group shall terminate one year from said annual meeting; that of the members of the third group shall terminate two years from said annual meeting. Thereafter the Board, including members whose term is about to expire, shall annually elect fourteen (14) (seven Southern and seven Northern) members of this corporation, to serve for a term of three years, to replace those members whose term of office is about to expire. A two-thirds majority vote of the total membership of the Board of Governors shall be necessary to the election of any member to said Board.

Any vacancies in the Board of Governors shall be filled by appointment by the President of the corporation and such appointees shall hold office until the next annual meeting of the Board ~~of~~ and until a successor is elected. At the next annual meeting after such vacancy, a successor shall be elected for the then unexpired term of the member whose office was vacated.

In the event any member of the Board of Governors shall cease to be a member of this corporation for any reason, his membership on said Board shall likewise immediately cease.

The Board of Governors shall have sole power to admit members into membership in this corporation and shall be the sole judge of the qualifications and desirability of any proposed member. Only members of the Board of ~~Governors~~ ^{Governors} shall have power to nominate any proposed member for membership. The affirmative vote of two-thirds of the total members of the Board shall be necessary to the election of any such nominee to membership in any class of members of this corporation.

Article II MEMBERS - MEMBERSHIPS

There shall be ~~eighteen~~ nine (9) classes of memberships in this corporation. Membership in any class shall be conditioned upon the payment of the membership fee required to be paid by each member of that class. The classes of memberships and the ~~an~~ membership fee required to be paid for membership therein are:

CLASS	MEMBERSHIP FEE
Benefactor	\$50,000.00
Donor	10,000.00
Founder	5,000.00
Patron	2,500.00
Life Member	500.00
Sustaining Member	100.00
Contributing Member	10.00
Annual Member	2.00
Junior Member	.50

Any individual, association or corporation shall be eligible for membership in any one of such classes or, if already a member of one class, shall be eligible for membership in a higher class, except that only individuals under the age of fourteen (14) shall be eligible for membership in that class of memberships known as Junior Members. Membership in any particular class shall be acquired by nomination by any ~~EMERITUS~~ Governor, followed by election to such class by the two-thirds majority vote of the Board of Governors and the payment of the membership fee required for that particular class.

In addition to the membership fee, the members shall annually pay the following dues, payable on or before January 1st or July 1st of each year, beginning the year following that of their election to membership, viz:

1. Sustaining members, Contributing members, Annual members and Junior members shall pay an annual due of \$100.00, \$10.00, \$2.00, and Fifty cents, respectively.
2. Benefactors, Donors, Founders, Patrons and Life Members shall not be required to pay, nor shall they be liable for, any dues whatsoever, the sole requirement being the payment of their initial membership fee.

The membership and any and all rights of any member shall cease and terminate upon his death, resignation, expulsion, or, at the option of the corporation, whenever such member shall fail to pay the annual dues required by such member to be paid to the corporation. Any member may be expelled at any time by the three-fourths majority vote of the Board of Governors.

Article III Directors

The Board of Directors of this corporation shall consist of eight Directors, four of whom shall be chosen from the members ^{of the Board of Governors} in the Northern zone, and four (4) of whom shall be chosen from the members ~~in the Southern zone~~ of the Board of Governors in the Southern zone. Five (5) directors shall constitute a quorum for the transaction of business.

ARTICLE IV ELECTION OF DIRECTORS

The Directors shall be elected by ballot by the Board of Governors at the annual meeting of the Governors and shall be elected to serve for one year and until their successors are elected. Their term of office shall begin immediately upon election and qualification.

Nomination for the office of Director shall be made at the annual meeting of the Governors by a Nominating Committee of three, who shall be Governors of the Society, and shall be appointed by the President prior to the annual meeting of the Board of Governors. Nominations may also be made from the floor at the annual meeting of the Governors.

ARTICLE V VACANCIES

Vacancies in the Board of Directors shall be filled by appointment by a majority of the remaining Directors, although less than a quorum, or by a sole

remaining Director. Such appointees shall hold office until the next annual meeting of the Board of Governors and until their successors are elected.

ARTICLE VI POWERS OF DIRECTORS

The Directors shall have power:

(1) To call special meetings of the Board of Governors whenever they deem it necessary, and they shall call such meetings at any time upon the written request of at seven (7) Governors.

(2) To appoint and remove at pleasure all officers, except those elected by the Governors, agents and employees of the Society, prescribe their duties, fix their compensation and require from them security for faithful service.

(3) To conduct, manage and control the affairs and business of the corporation and to make rules and regulations not inconsistent with the laws of the State of California or the by-laws of the corporation for the guidance of the officers and management of the affairs of the corporation.

ARTICLE VII

It shall be the duty of the directors:

(1) To cause to be kept a complete record of all their meetings and acts and of the meetings of the Board of Governors showing in detail the assets and liabilities of the corporation and generally the condition of its affairs. A similar statement shall be presented at any meeting of the Board of Governors when requested by a majority of the ~~Executive~~ Governors.

(2) To supervise all officers, agents and employees and see that their duties are properly performed and to cause certificates of membership to be issued to the members of the corporation.

ARTICLE VIII OFFICERS

The officers shall be president, vice-president, secretary and treasurer. The president shall be elected by and hold office at the Board of Governors providing that the after ~~some years~~ ^{one zone}, the next year the president will be chosen from the other zone. The vice-president shall come from the opposite zone from the president. The vice-president, secretary and treasurer shall be elected by and hold office at the pleasure of the Board of Directors. The president and vice-president shall be elected from among the Governors of the corporation, but the secretary and treasurer need not necessarily be Governors or members or patrons of the corporation.

The compensation and tenure of office of all the officers of the corporation, other than the president, shall be fixed and determined by the Board of Directors. All officers, other than the president, of the corporation may be appointed and elected by the directors upon nomination duly seconded and carried or by resolution of the directors.

ARTICLE IX PRESIDENT AND VICE-PRESIDENT

The directors shall, at their first regular meeting, elect one of their number to act as vice-president, and if at any time the president shall be unable to act, the vice-president shall take his place and perform his duties, and if the vice-president from any cause shall also be unable to act, the directors shall appoint some other member of the Board of Directors to act, in whom shall be vested for the time being all the duties and functions of the office of president. The president, or in his absence or inability to act, the vice-president, or in the absence or inability to act of both the president and vice-president, the director appointed above provided:

(1) Shall preside over all meetings of the Board of Governors and Directors and shall have the casting vote.

(2) Shall sign as president all certificates of membership.

(3) Shall have such other powers as may be conferred upon him by the

(4) The President and Vice-President shall be ex-officio chairmen of their Executive committees of their respective zones and may call meetings of their respective Zone Executive Committees.

ARTICLE X - SECRETARY

The directors shall elect a secretary. He shall have power by and with the consent of the directors to appoint such assistant or assistants as may be needed. He shall carry into effect any plan which has been approved by the directors or by a majority of the governors of the corporation called for considering such a plan. He shall be responsible to the directors for the conduct of his office. He shall submit to the Board of Governors and Directors at their regular meetings a detailed statement of the work of his office.

It shall be the duty of the secretary:

(1) To keep a record of the proceedings of the directors and of the meetings of the Board of Governors.

(2) To keep the corporate seal of the corporation and the book of blank certificates of membership and fill in and countersign all certificates issued and make the corresponding entries in the margin of such book upon issuance and shall affix the corporate seal to all papers requiring a seal.

(3) To serve all notices required either by law or the by-laws of the corporation, but in case of his absence, inability, refusal or neglect to do so, then such notices may be served by any person thereunto directed by the president, or vice-president of the corporation.

The secretary shall keep a book in which all changes of membership of the corporation shall be entered and shall discharge such other duties as are pertinent to his office and as are prescribed by the Board of Directors.

ARTICLE XI - TREASURER

The treasurer shall receive and deposit in such bank or banks as the Board of Directors may direct all funds of the corporation. He shall prepare a financial statement to be rendered at the annual meeting of the Board of Governors and shall render such other statements as may be called for by the Board of Directors. He shall be required to give bonds of such character and in such amount as shall be prescribed by the Directors.

ARTICLE XII - BOOKS AND PAPERS

The books and such papers as may be placed on file by vote of the Board of Governors or Directors shall at all times in business hours be subject to the inspection of the Directors or of any Governor.

ARTICLE XIII - CERTIFICATES OF MEMBERSHIP

Certificates of membership in the corporation shall be in such form and device as the directors may prescribe and each certificate shall be signed by the president and secretary and express on its face its number, date of issuance and class of membership, whether governor, regular or patron.

ARTICLE XIV - TRANSFER OF MEMBERSHIP, PROPERTY RIGHTS AND INTERESTS

Membership in the corporation shall not be transferred; neither shall a certificate of membership be assignable. The voting power and property rights of the members shall be unequal. The voting power and all rights and interests in the property of the corporation shall be vested solely in the members of the Board of Governors but such rights and interests shall not be assignable. The rights and interests of any member of the Board of Governors in the property of the corporation shall revert to the corporation and/or become vested in his successor in office without compensation therefor whenever such Governor shall cease to be a member of the Board.

ARTICLE XV MEETINGS

Regular meetings of the Board of Directors shall be held alternately at the principal place of business of the corporation and at a place in the Southern Zone chosen by the Directors, at 2:00 PM on the last ~~Th~~ Wednesday of February, May, August and November on one week's written notice by the secretary. The Board of Directors may change by resolution the day and place of the regular meetings.

Special meetings of the Board of Directors may be held at the call of the president or two-fifths the directors, written notice of such special meetings shall be mailed to all members of the Board of Directors at least ~~ten~~ ^{seven} days previous to the date of such special meeting by depositing in the United States Post Office at Berkeley, California, a written or printed Notice, with postage thereon prepaid, addressed to each director at the address left with the Secretary or by personally serving such notice on each director three days before such meeting. Such service of notice shall be entered on the minutes of the corporation and the said minutes upon being read and approved at a subsequent meeting of the Board shall be conclusive on the question of service.

Special meetings of the members of the corporation may be called by notice printed in one or more newspapers published in the County of Alameda as the directors may direct or by a notice in writing mailed to each member at the address left with the secretary, such notice to be deposited in the United States Post Office at Berkeley, California at least ~~seven~~ ^{seven} days preceding the date of meeting.

Regular meetings of the Board of Governors shall be held at the principal place of business of the corporation or may be held alternately at a place in the Southern zone chosen by the Directors, at 5 o'clock PM on the last Wednesday of August of each year and written notice of the same mailed to all the Governors, shall be given by order of the acting president, unless all of the Governors shall waive such notice in writing.

Special meetings of the Board of Governors may be held at the call of the President. Written notices of such special meeting must be mailed to all of the Governors at least ~~7~~ ^{seven} days previous to the date of such special meeting.

Upon written request therefor, addressed to the president, specifying the matter to be taken up and signed by five of the Governors, the president shall be required to call such special meeting within seven days after receipt by him of such request. The president shall cause a notice of such special meeting to be mailed, which notice shall specify the matters to be taken up at such meeting, to-wit, the matter specified in such request, and such notice shall fix the time at which the meeting shall be held, and the place, which shall not be less than seven days following the mailing of such written notice.

All notices to be mailed shall be addressed to the last address of the director, member or governor as appears on the records of the corporation.

Twenty-five members in person or by proxy at any meeting of the corporation shall constitute a quorum thereof for the transaction of business. ~~Twenty~~ ^{Twenty} members present in person or by proxy at any meeting of the Board of Governors shall constitute a quorum thereof for the transaction of business.

ARTICLE XVI CHAPTERS

For the purpose of local study and discussion of the Society's purposes and matters, ten members including a governor of the Society may form a chapter of the society and they may set up extra rules and assess themselves extra dues for their own purposes providing they do not conflict with these bylaws nor embarrass the Society. Under Article VI (5) of these by-laws the Directors may charter and dissolve chapters. To become official, chapters must have written sanction from the Board of Directors, and thereafter shall submit annual reports of activities and finances with the Society's secretary.

ARTICLE XVII VOTING

Each member of the Board of Governors shall have one vote, which vote may be given in person or by written proxy. A majority of the voters present at any meeting of the Board of Governors or directors shall be required to decide any

question submitted to vote, except amendments to the by-laws and election of new members. Voting by mail may be initiated by the directors upon all questions which the Board of Directors may desire the opinion of the Governors or Directors. Voting by mail shall be conducted by direction of the President or Chairman of the Board of Directors, and shall involve mailing by the Secretary to each Director of a statement of each question to be voted upon, together with a ballot to be returned to the main office of the ~~Society~~ ^{Society} by each director with his vote thereon. The result of such vote shall be entered in the minutes of the ~~Executive~~ ^{Executive} Society.

ARTICLE XVIII DEPOSITARIES

Depositaries for the funds of this corporation shall be designated by the Board of Directors and checks against such funds shall be signed by such officer or officers as the directors may determine.

ARTICLE XIX SEAL

The corporation shall have a common seal consisting of a circle having conveniently arranged the words:

"CALIFORNIA ARBORETUM SOCIETY, INCORPORATED"

ARTICLE XX NATIONAL AND WORLD WIDE ARBORETUM AFFILIATIONS

This corporation being composed of persons wishing to make their own localities more useful and beautiful for ~~themselves~~, their families, neighbors, and guests and for the future generations; and recognizing that the energies, pattern and life surrounding, permeating and issuing from the substance, forces and soil of this planet are useful and enjoyable to all creatures; shall favor national and world-wide affiliations with other groups thinking and acting along the lines set forth in the articles of incorporation and by-laws of this corporation, to such extent deemed wise by the government of this corporation.

ARTICLE XXI AMENDMENTS

The By-Laws may be amended or repealed or new By-Laws adopted either by vote of two-thirds of the members of the Board of Governors of this corporation at any annual meeting of said Board or at a special meeting called for that purpose; or at any time by the written assent of two-thirds of said Governors; or the By-Laws may be amended or repealed or new By-Laws adopted by the vote of a majority of the Directors of this corporation at any regular Director's meeting, or at a special meeting called for that purpose, subject always to the power of said Governors to adopt, amend or repeal any such By-Laws.

ADDITION TO ARTICLE VI POWERS OF DIRECTORS

(4) In recognition of the ~~geographical~~ climatic differences and of the geographical distance of separation between the Northern and Southern Zones, the directors elected from each zone are ex-officio members of the Executive Committee of their respective zone.

These Zone Executive Committees may locally study and discuss, in ~~any~~ camera or publically, local conditions and circumstances prior to presenting motions to the Board of Directors.

These Zone Executive Committees may also explain locally the actions of the Board of Directors and carry out such local actions or projects as the Board of Directors may authorize.

Any two directors on a Zone Executive Committee may instruct its chairman to call a committee meeting on two days personal notice, or in his absence or inability to act, ~~may~~ call a committee meeting themselves on two day's personal notice, at which three directors of the Committee will constitute a quorum, one of whom shall be chosen as acting chairman.

It shall be the policy of the Board of Directors that funds collected in a zone shall be reserved for expenditure in that zone except when two-thirds of the entire Board of Directors in ~~one~~ of their meetings agree to waive this policy in specific instances only.

In all questions arising from differences of opinion between the Northern and Southern Zones, the Board of Directors shall reflect the unity of the State of California in all its aspects.

Dear Professor Hilton:

I am appreciative of your invitation to attend the conference on Brazil. Unfortunately Mrs. Goodspeed is very seriously ill and I am quite certain that it would not be possible for me to leave Berkeley even for a brief period.

With best wishes for the success of the conference and kindest personal regards

Sincerely,

THG:T

Professor Dr. T. H. Goodspeed
Botanical Garden
University of California
Berkeley 4, Cal. U.S.A.

Dear Profesor Goodspeed:

Als ich Sie letztes Mal in Tucuman traf, waren Sie so freundlich, mir Ihre Hilfe anzubieten, falls ich hier in Schwierigkeiten kommen würde. Der Zeitpunkt ist jetzt gekommen, da ich nicht weiss, was ich machen soll. Nachdem ich über 2 Jahre nach einem bestimmten Arbeitsplan gearbeitet habe und im letzten Jahre fast meine ganze Zeit auf die Organisation einer Versuchsstation 45 Kilometer südöstlich von Tucuman geopfert habe, hat der Rektor alle meine Arbeitspläne verworfen und wünscht anscheinend unser Institut bei Santiago del Estero in einer landwirtschaftlichen Schule anzubringen. Da die Verhältnisse in Santiago ein völlig neues Studium verlangen und ich wenig Glauben daran habe, dass unser Institut in Santiago funktionieren kann, werde ich wohl gezwungen sein, mich von meiner jetzigen Stellung zurückzuziehen. Unsere anderen Versuchsstationen müssen wahrscheinlich niedergelegt werden, da kein Geld für die nötigsten Dinge bewilligt wird. In El Suncho in Catamarca kann eine sehr grosse Sammlung von Kartoffelsorten aus dem Norden Argentiniens nicht geerntet werden, da 10.000 Pesos für einen Kartoffelkeller abgeschlagen wurden. Ich habe unter diesen Verhältnissen den Glauben daran verloren, dass hier die Möglichkeit einer planmässigen Arbeit besteht. Mit dem Rektor kann man seit einigen Wochen nicht sprechen; es wird gesagt, dass er sich zur Zeit ausschliesslich mit politischen Fragen beschäftigt.

Unter diesen Umständen möchte ich Sie fragen, ob es möglich wäre, eine Stellung in den Vereinigten Staaten zu erlangen. In den nächsten Jahren würde mir viel daran liegen, eine ruhigere Stellung zu haben, da ich von dem harten Arbeitstempo und den zahlreichen Schwierigkeiten etwas ermüdet bin. Unter dem hiesigen Klima ist man auf die Dauer nicht ganz so widerstandsfähig wie in Europa. - Bestehen noch immer grosse Schwierigkeiten, ein Visum zu erlangen?

Mit den besten Grüssen

Dr. Gunnar Hiorth

Tucuman
Argentina

[No date.]

Professor Dr. T. H. Goodspeed
Botanical Garden
University of California
Berkeley 4, Cal. U.S.A.

Dear Professor Goodspeed:

When I last met you in Tucuman, you were friendly enough to offer me your help in the event that I should get into any difficulties. The time has now come when I do not know what I ought to do. After I have worked more than two years on a definite project and have sacrificed almost all my time during the past year to the organization of an experimental station 45 kilometers southeast of Tucuman, the Rector has rejected all my plans and apparently wishes to incorporate our Institute at Santiago del Estero into an agricultural school. Since circumstances in Santiago require a completely new pursuit of study, and since I hardly believe that our Institute can function in Santiago, I shall probably be forced to resign from my present position. Our other experimental stations will probably have to be closed down because no money is being allocated for things most necessary. In El Suncho in Catamarca a very large collection of various kinds of potatoes cannot be harvested from northern Argentina because 10,000 pesos allocated for a cellar for potatoes have been cut. Under these conditions I no longer believe that the possibility of well-regulated work exists here. It has been impossible to talk with the Rector for some weeks; it is said that he is currently occupied exclusively with political questions.

Under these circumstances, I should like to ask you if it would be possible to secure a position in the United States. It would mean a great deal to me in the coming years to have a quieter position, since I am somewhat tired out by the strenuous pace of work and by numerous difficulties. Over a period of time, one's resistance is not as great in this climate as in Europe. Is it still very difficult to obtain a visa?

With best wishes

Dr. Gunnar Hiorth

March 30, 1950

Dr. Gunnar Hiorth
Instituto de Genetica
Miguel Lillo 205
Tucuman, Argentina

Dear Friend:

Your recent letter was received and I am sorry to learn that you find conditions in Tucuman unfavorable for the continuation of your work. I know that you had anticipated an opportunity to advance your research as well as teach and organize practical plant breeding projects.

Unfortunately I am not actively in touch with the opportunities in this country for geneticists. Certainly there are very few strictly research positions. Since I do not know how well you speak and write English it would be impossible for me to make inquiries concerning positions which would undoubtedly involve teaching as well as research. Therefore, will you kindly tell me how successful you feel that you would be in a teaching position or one which would include consultation with agriculturalists on practical breeding problems.

Concerning the obtaining of a visa for entry into this country I think that you should seek information from the American Embassy in Buenos Aires.

With all good wishes

Cordially yours,

THG:T

Dr. T.H. Goodspeed
Dept. of Botany
Univ. of California
Berkeley 4
California,
U.S.A.

24/9/50

Dear Dr. Goodspeed:

Ich habe lange damit gewartet auf Ihren freundlichen Brief vom 30/3 zu antworten, da die Lage des Institutes von Zeit zu Zeit wieder besser erschien und ich meine Stellung nicht ohne zwingende Gründe verlassen wollte. Inzwischen werden Sie aus dem beiliegenden Ausschnitt der Gazetta, der grössten Zeitung des nördlichen Argentinas, entnehmen, was mit dem Institut geschah. Es wurde vor kurzem "intervenido". Der Interventor, ein 29 jähriger Schweizer, ist ein Mitglied des Institutes und ein persönlicher Gegner von mir.

In Bezug auf Ihre Fragen muss ich leider antworten, dass ich die englische Sprache nur lesen kann, und dass es vermutlich 1-2 Jahre dauern würde, bis ich sie fliessend sprechen kann. Meine Kenntnisse in praktischer Landwirtschaft sind gering. Von wissenschaftlichen Arbeitsprogrammen bin ich jetzt ziemlich ermüdet, wenn nicht ganz klare Verhältnisse vorliegen. Wenn es irgend eine ruhige Stellung gäbe, gleichgültig auf welchem Gebiete, die für einen Wissenschaftler von meinem Typus passt, wäre ich sehr zufrieden, vorausgesetzt, dass sie so gut bezahlt würde, dass ich Geld für die Ausbildung meiner Kinder nach Norwegen schicken könnte.

Sollten Sie zufälligerweise einige Ratschläge geben können, wäre ich Ihnen sehr dankbar. Sonst möchte ich Sie nicht mit diesen Problemen belastigen, da ich selber genau weiss, wie gross die Schwierigkeiten sind.

Mit besten Grüssen

Gunnar Hiorth
Instituto de Mitotecnia
Miguel Lillo 205
Tucuman
Argentina

G. Hiorth

Dear Dr. Goodspeed,
I have waited for quite some time to answer
your friendly letter of March 30, since the
position of the Institute appeared to improve from
time to time and I did not wish to leave
my position without compelling reasons. In the
meantime you will see from the enclosed
cutting from the "Gazetta", the largest paper
in northern Argentina, what has happened to
the Institute. Recently it became "intervenido";
the interventor, a 29 year old Swiss, is a
member of the Institute and a personal
enemy of mine.

In connection with your questions I
regret to have to reply that I can only read
English and that it would probably take 1-2
years until I could speak it fluently. My
knowledge of practical agriculture is limited.
I am now rather tired of scientific work unless
quite clear conditions are involved. If there were
a quiet position somewhere, regardless in which
field, which would be suitable to a man with
my knowledge, I would be most content provided
that it would be well enough paid so that I
could send money to Norway for the education
of my children.

Should you by chance be able to give
me any advice I would be most thankful.
Otherwise I would not like to burden you
with these problems for I myself know
how big the difficulties are.

With best greetings.

Link

Dear Dr. Goodspeed:

Da gewisse Möglichkeiten zu bestehen scheinen, durch Vermittlung des Exchange of Persons Service der Unesco eine Stellung in Indien oder in anderen Ländern zu erhalten, erlaube ich mir hiermit anzufragen, ob Sie mir ein kurzes Gutachten über den Wert meiner wissenschaftlichen Abhandlungen geben könnten. Eine Liste über dieselben lege ich zu diesem Zwecke bei.

An der Universität Tucuman wurden die Direktoren der 3 Institute Fitopatología (León Grodzinsky), Silvicultura (de la Cruz) und Fitotecnica (Hiorth) abgesetzt und die 3 Institute werden jetzt in eins zusammen geschmolzen. Für mich war die Lage besonders unangenehm, da ich im September 1950 als ich meine Stellung verlor, mein ganzes Geld an das Institut verliehen hatte, da die Universität uns 7 Monate lang kein Geld für die Ausgaben des Institutes gegeben hatte.

Jetzt ist ein neuer Rektor gekommen und vieles wird im Laufe der Zeit verbessert werden. Es fällt mir aber schwer noch länger zu warten, da ich schon 8 Monate ohne Stellung bin.

Ich wäre sehr dankbar, wenn Sie mir den Empfang dieses Briefes bestätigen würden.

Mit den besten Grüßen

Dr. Gunnar Hiorth

Gunnar Hiorth

Un Instituto Sin Local

Muebles y útiles del Instituto de Fitoecnia de la Universidad trasladados a una galería de la Quinta Agronómica.

Por disposición de las autoridades de la Universidad Nacional de Tucumán, cuyo carácter preventivo hizo imposible toda dilación, fué ayer prácticamente desalojado el Instituto de Fitoecnia, que dirige el doctor Gunnar E. Hjorth, que funcionaba en el Instituto Lillo.

La medida, transmitida verbalmente para su inmediato cumplimiento, no explicó a los miembros del Instituto la razón en que se fundaba, y si bien disponía ella, además, que éste ocupara un local ubicado en la Quinta Agronómica, las pésimas condiciones en que se halla éste, con sus techos destruidos, ventanas destrozadas y sin vidrios, impidieron su ocupación.

Obligados por la situación de hecho, las autoridades del Instituto se vieron forzadas, entonces, a amontonar muebles, útiles, máquinas de escribir, bibliotecas con los resultados de las investigaciones practicadas hasta ese momento y demás documentación, en una ga-

lería de una de las dependencias de la Quinta Agronómica.

Una ligera inspección en el local que se había destinado para el Instituto, permite calcular que serán necesarios 15 días para repararlo, lapso en el que su personal técnico y administrativo se verá imposibilitado de continuar su labor.

Mr. Henry Hjersman
Bureau of Game Conservation
Ferry Building
San Francisco

Dear Mr. Hjersman:

Since the erection some years ago of an 8' wire fence with overhang around the Botanical Garden of this University at the head of Strawberry Canyon damage by deer to the valuable collections of living plants has beased entirely until this year.

During the last month one or more deer have jumped the fence and are seriously damaging our living plant material which is essential for the success of classroom work and research in botany at the University. I am informed that you will assist us in meeting this problem. The Botanical Garden is open to the public from 9 A.M. to 4 P.M. daily including Sundays but entrance at other times can be arranged by making contact with my office (2079 Life Sciences Building, Ash. 3-6000, Extension 344). We will certainly appreciate whatever attention you can give to this matter at you earliest convenience.

Sincerely yours,

THG:T

Mr. Henry Hjersman
Bureau of Game Conservation
Ferry Building
San Francisco, California

Dear Mr. Hjersman:

Some time ago you were kind enough to inspect the fence surrounding the Botanical Garden of this University at the head of Strawberry Canyon and suggest certain repairs needed to protect the Garden from damage by deer.

Your recommendations have all been carried out and we are very appreciative of your effective cooperation in meeting this problem.

With many thanks and all good wishes

Sincerely yours,

THG:T

April 1, 1957

Dr. Thomas H. Goodspeed
661 Woodmont Avenue
Berkeley 8, California

Dear Doctor Goodspeed:

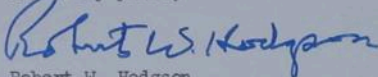

I have recently accepted a 4-month assignment as consultant in connection with the University of California Agriculture contract in Chile. The general nature of my assignment will require rather close contacts with the University of Concepcion and the University of Santiago.

In thinking about the development of plans for the trip, which will start about the middle of June, the thought occurred to me that these are universities with which you are undoubtedly well acquainted. It is my recollection that you made a number of exploration trips and I am sure you had numerous contacts with faculty people at these institutions. Indeed, I have the recollection that you have received honors from one or both of them.

If there are people there whom you think it would be desirable for me to meet, I would be glad to have their names and titles. Any suggestions or comments you might care to offer with reference to preparations for the trip will also be greatly appreciated. I am expecting to have my headquarters in Santiago but to spend some time at Concepcion.

Expressing the hope that this letter will find you in good health, and with kind personal regards and best wishes, I remain

Sincerely yours,

Robert W. Hodgson
Dean and Assistant Director

Dr. Robert W. Hodgson
Dean and Assistant Director
College of Agriculture
University of California
405 Hilgard Avenue
Los Angeles 24, California

My dear Bob:

Your recent letter concerning your proposed visit to Chile reminded me that it has been much too long since I have had even a glimpse of you.

There are only a few names that come to mind of those with whom you might be associated in Santiago and at the new "campus" of the Escuela de Agricultura nearby. I no longer have contacts at Concepcion.

Probably you will be accredited to Gomez, the Rector of the University, and may have met him when he was in California about a year ago. He appears to be an effective person. I have had correspondence with him recently concerning the obtaining of support in this country for the Jardin Botanico Nacional. In 1942-43 and again in 1952 I made myself responsible for the basic development of that institution which is near Vina del Mar. Since Gomez might discuss the project with you it might be desirable for you to have copies of some of the correspondence with him.

Of others in Santiago you might meet or work with I think first of Ing. Agr. Carlos Munoz. He has had a variety of positions in the Ministerio de Agricultura -- of larger or smaller importance depending upon the political complexion of the particular government in office at the time. Munoz is at heart a taxonomic botanist and the best one in Chile although relatively unproductive. He has been in charge of the herbarium at the Museo de Historia Natural. He speaks excellent English and has often visited this country on fellowships and government assignments. He is a friend of Lincoln Constance who, incidentally, should be able to give you names of those in Concepcion as well as Santiago who might be useful. Constance spent some months in Chile two years ago.

Ing. Agr. Edmundo Pisano was earlier an employee of the Ministerio de Agricultura in Santiago and left to go into sheep raising, etc. near Valparaiso and also in Patagonia. He has recently become connected with the agricultural interests of the University of Chile, under Gomez. Currently he is in California on an assignment to study dry land agriculture. I see him now and then when he comes in from the field and his headquarters are in room 163 Forestry Building, Berkeley.

If he is to be in southern California before his return I think it might be helpful for you to see him. He should be able to give you a pretty complete picture of all aspects of the current Chilean agricultural situation.

You may also run across Ing. Agr. Alvaro Montaldo who is the Director of the Jardín Botánico Nacional and an employee of the Ministerio de Agricultura.

I hope that during your Chilean visit you may meet my friend of twenty years standing, Dr. Edwyn P. Reed (address Casilla 1802, Valparaíso). He is an Anglo-Chilean physician and scientific consultant of the Ministry of Fisheries. He heads a citizens' committee concerned with the development of the Jardín Botánico Nacional.

As you may know I am directing a 6th Botanical Expedition to South America this fall. Unfortunately, we will not get to Chile, after Peru, until about November 1 and thus will miss you. In addition to collecting I will do some lecturing and assist once more in the development of the Jardín Botánico. This will be my seventh visit to South America since 1935.

You will find the Chilean Spanish difficult as contrasted with the Mexican or Colombian, for example. Without a pretty adequate knowledge of Spanish one really can't accomplish too much, in my experience. Although many people speak some English they usually do not really understand it too well. This is particularly true of lectures or speeches. I am not particularly good at Spanish and I always have what I want to say translated. Even though my pronunciation may be somewhat defective the South Americans understand my Spanish much better than they do my English.

I am sure that you will enjoy your forthcoming Chilean experience and will look forward to comparing notes sometime after your return. As you know it will be rather cool and rainy during the period of your stay in Chile. The large hotels will be adequately heated but institutions, stores and private homes will probably be too cool for comfort unless you are quite warmly dressed.

With all good wishes,

Cordially,

THG:T

Mar. 14th 1951

3/14/51 ACK

Dear Mr. Goodspeed;

The party Dr. Holtsmark can purchase seed from.

Frank Gamble Orchids.
Millvalley, Calif.

Fennel Orchid Jungle
Miami Florida.

The seed will not be anything fine but for experimental work guess would be O.K.

I am mailing him sufficient extra viable seed to plant 25 flasks at least. This should keep him buisy for awhile.

Have been trying to get time to run up and see you, but always something turns up. Will make it ere long.

Best wishes.

Dear Mr. Hoog:

I have your letter of April 18 concerning *Alstroemeria* seed. As yet we have not flowered any of the *Alstroemerias* collected last year in Chile but hope to do so this summer. It has been necessary to resow some of the species and there is no seed left for distribution in the original collections.

If you care to remind me in the fall I hope that we may be able to share with you seed of this summer's cultures.

Sincerely,

THG:T

NEW YORK 1, N. Y.

August 9, 1957

Dr. Thomas H. Goodspeed
Professor Emeritus
Department of Botany
University of California
Berkeley, California

Dear Dr. Goodspeed:

The Annual Research Seminar of the Cigar Manufacturers Association of America will again be held on December 4th and 5th, at the Claridge Hotel, Atlantic City, N.J. The purpose of this letter is to extend to you a cordial invitation to attend this research function as a member of the speakers' panel.

Dr. R. F. Dawson, of Columbia University, has suggested that you present a general talk on the Evolution of Tobacco. I am sure that such a talk presented by you as an authority in this field would be accepted with great interest both by the professional scientists present at the Seminar and by the leaders of the Cigar Industry who, to an increasing extent, realize the value and potentialities of systematic research in all the fields important for our industry.

Your talk will be scheduled as a final talk of the Seminar on Thursday, December 5th. We have allotted you 30 minutes. Please let us know if this will give you sufficient time for your presentation.

You are also invited to the informal "acquaintance" dinner in the West Room, which will be held on Wednesday, December 4th, at 6:15 P.M. After dinner, a few short papers will be presented.

I trust you will accept this invitation, and give us a survey of the highly important work done under your direction.

As soon as we hear favorably from you, Mr. Joseph F. Vasko, Assistant to the President of our Association, will give you further details.

Cardially yours,

Charles H. Horn
Chairman
Research Seminar

2089 Life Sciences Bldg.
University of California

August 15, 1957

Mr. C. H. Horn
Cigar Manufacturers Association of America Inc.
350 Fifth Avenue
New York 1, N. Y.

Dear Mr. Horn:

Many thanks for your invitation to present a paper at the December 5th Research Seminar of the Cigar Manufacturers Association.

Unfortunately, I shall be in South America at that time. I am leaving late next month to spend six months in Peru, Chile and Argentina to continue my research on the species of Nicotiana and their distribution.

Perhaps another year, should you so desire, I might be able to meet with you.

With thanks again for your invitation and with best wishes,

Sincerely,

THG:T

Professor T.H. Goodspeed,
Department of Botany,
University of California,
Berkeley 4,
California, U.S.A.

My dear Harper,

Your letter of May 14th has just arrived. I was delighted to receive it and am also happy to think that very soon I shall have the pleasure of seeing you and Ellen in London.

Are you going direct to Stockholm? The reason why I ask you is because I leave for Paris on July 13th or 14th, and I return to England during the first week in August prior to sailing on the 15th of August for the States. I then return, and by return I mean I am due to leave New York by ship on September 15th, arriving in England about the 23rd September. We simply must make arrangements now to see each other, because I cannot tell you how much I am looking forward to seeing you and Ellen again. I am glad you are going to Italy and other places on the Continent, because a holiday is the very thing you both need and I know some wonderful spots, both in France and Italy, that I visit every year which, I think, you should love. Is Ellen's husband coming too? I have heard a good deal about him from Dr. Frost and also from yourself, and needless to say I should very much like to have the pleasure of seeing him too. When you have time, my dear Harper, please drop me a little note and let me know, as you have my dates, when we can meet because I would like to have these arrangements well in hand, as it is such a long time since we have seen each other.

I am sending this letter to the University because unfortunately I have lost the envelope which contained your address.

With best wishes,

Yours ever,

Eric Harming

June 8, 1950

Dr. Eric Horning
The Chester Beatty Research Institute
The Royal Cancer Hospital
Fulham Road
London, S.W. 3, England

Dear Eric:

It was good to have your letter of May 22, giving me a basis for hopefully arranging a reunion between the three of us.

We fly direct from New York to Stockholm and from Stockholm after the Botanical Congress on July 22 direct to Zurich. We stay in Zurich, Romanshorn on the Lake of Constance and in Lucerne until July 31. From that date to August 19 we will be in Italy and fly from Rome direct to London. We will be at the Author's Club in London, 2 Whitehall Court, London, S. W. 1, from August 19 to August 31 and from that date on until we fly from Glasgow on September 8 we will be in the English Lake region and Edinburgh. We arrive in New York Saturday, September 9, on Scandinavian Air Systems Flight No. 911 and will stay in New York at least Saturday night and perhaps Sunday night before leaving for San Francisco by air. In other words, it looks as though our best chance of seeing you might be in New York September 9 or 10. However, you may plan to be Switzerland late in July or early in August in which case we might arrange to meet. Since European travel by Americans is going to be so extremely heavy this summer we must make all hotel reservations in advance and so our program in Switzerland cannot be altered after our arrival there.

In the hope that we can get together soon and with the best of greetings from Ellen and myself,

As ever yours,

T. H. Goodspeed

concordance
Sept - if
revised*

22nd June 1950.

My dear Harper,

I was delighted to get your letter of June 8th, informing me that you and Ellen were paying a visit to Europe. I can't tell you how much I am looking forward to meeting you both again. I am sorry to see you fly direct from New York to Stockholm without touching down in England, because I would love to have seen something of you before you left for Stockholm and the Botanical Congress at Zurich. I gather you will fly or go by rail from Stockholm to Zurich direct. I note that on August 19th you will be in Italy, that you intend to fly from Rome direct to London where you are due to arrive on August 19th, and that you remain here until August 31st, and fly from Glasgow on September 8th. Am I correct in assuming that you and Ellen are due to arrive in New York on September 9th? - because if so it means we can't meet either in England or on the Continent, as I leave Southampton on August 15th for the International Congress for Cell Biology at Yale, and I remain in the States until Thursday September 14th, when I am due to sail in the R.M.S. "Queen Mary" back to England. So it looks as if our best chances of meeting will be in New York, which is particularly sad, because I should love to have had the opportunity not only of seeing you and Ellen but of entertaining you in London Town.

Unfortunately I pay a very brief visit to Paris in order to attend the International Cancer Congress on July 13th, and I remain in Paris until July 23rd, when it is essential for me to return to London. It is hard luck being so near and yet so far

/from

from each other, but do let me know your latest movements, in case you have any alteration in plans which might make it possible for us to have a rendez-vous either on the Continent or in England.

With love to you both,

Yours ever,

Lucie

U.S.A.

My dear Harper,

It was very sad indeed just having missed you in New York by a few days. Unfortunately, I had to sail on the "Queen Mary" which left New York for Southampton on Thursday, September 14th. During my stay in New York City I stayed at the Commodore Hotel and this made it all the more tantalising to think in a few days that you and Ellen would be staying there whilst I was on the high seas bound for England. I did try to postpone my return, but there were so many difficulties involved, such as the dollar crisis, which we all experience when visiting the States as the Bank of England would only allow us fourteen dollars a day and not a cent over. Still more, I should have loved to have been in England on your arrival, so as to have had the pleasure of seeing you and taking you both around. There is just a slight chance that I might go to America again next year and, if so, we shall certainly meet !

A great friend of mine, Mr. Victor Pinkham, who is House Governor of the Royal Cancer Hospital as well as Secretary, will be visiting the U.S.A. officially and hopes to go to San Francisco to see something of the hospitalisation in the West. I have therefore taken the liberty of giving him a letter of introduction to you. I know he would love to meet you and would be most appreciative of anything you did for him. As far as I know he has no contacts in California.

With best wishes to you and Ellen,

Yours ever,

Eric Horning

AIR MAIL

Dr. Eric Horning
The Chester Beatty Research Institute
The Royal Cancer Hospital
Fulham Road
London, S.W. 3
England

Dear Eric:

It was good to have your letter of October 18 but sad to realize that we may have been in the Commodore Hotel in New York without knowing that you were there. We arrived by air in New York on the morning of September 9 and were at the Commodore until noon the next day. I wrote you from London to the New Haven Congress that this was our program.

Ellen and I enjoyed all our travels in Sweden, Switzerland and Italy, and especially in England and Scotland where we had almost three weeks. It would have added a lot to our pleasure if you had been there. We must now look forward to the possibility of your being in this country next year and of our having a chance to see you at long last.

I hope that your friend Mr. Pinkham will let me hear from him when he comes to San Francisco so that I may be able to be of any possible assistance to him.

Ellen and I join in affectionate greetings.

Always yours,

MT:am

TEL. & TEL.

August 20

Dr. T. H. Goodspeed
Department of Botany
University of California
Berkeley, California

Dear Harper:

Hello - it's about time I got off the button and dropped you all a line. Dr. Briggs has given me word of you from time to time and I've been meaning to write since leaving California last November. Had certainly meant to drop over to the University and see the old gang while I was living near Los Gatos, but since had originally intended to live there permanently I kept expecting to do so "next week". However with Dads death it seemed best, again, for me to return to Wyoming and help straighten out here and after closing my affairs at Los Gatos I joined the family for the winter in Arizona.

Got back here early this spring and have been hard at it ever since. We have had a fairly reasonable amount of business this summer, especially during August, but nothing to compare with the past two years. Brother Bill and his new wife; Mrs. Frank Horton and myself have been on hand this time. I still am far from satisfied with my setup here, as I have been for many years and am still hoping to be able to get out from under my obligations to the ranch.

Brother Jack, who has been with Socony-Vacuum Oil in Venezuela for about eight years came up for a few weeks last August and tried to get me to go back down with him as Paleobotanist. Of course I am primarily interested in that Science - along with Botany and probably was a fool ever to leave the field when I had such a good chance to continue along those lines in 1939. Jack has recently gotten a years fellowship at Princeton to get his Masters Degree in Oil Geology and probably some business management to boot. He will be here next week for a few days ere he starts to school again.

Since hearing this news the thought has been growing in my mind that it might not be too late for me to catch up the lost chances and go ahead in something that I am really interested in. With this in mind I wonder what your reaction might be to my trying to come back to Berkeley, possibly with the help of the GI Bill Of Rights. I realize that by this time I am pretty rusty and that it would take a lot of hard work and study, but in the state of mind I find myself, I think that this is about the best salvation I have. Somehow my first love now seems to be experimental work in Horticulture, but not Agriculture. However this isn't particularly lucrative work and I am by no means backed by too much of an income.

With the growing demand for Paleobotanist by the Oil Companies, I imagine that with a Masters Degree in that field I could branch further out. I plan to talk this over with Jack next week but wanted to give you an idea first of the lay of the land. I know that it would be too late for me to get started this fall, but possibly I could be enrolled for the second term. In this event what would the possibilities be of my coming out to Berkeley early in the fall and trying to fill in the gaps of lost memory on my own hook. In this way I would have a better idea by the first of the year of what subjects would be most suited to my needs and desires.

At any rate I should enjoy hearing your reactions to this plan of mine. It is not a new one, but at last I seem to be getting into a position where I can take off on something I should have done long ago.

I am writing to Dr. Chaney along these same lines, though more impersonal, as I doubt that he remembers me too well after these past eleven years.

Please give my best regards to all and sundry that you see love to your family and my very best personal regards to you.

Sincerely,

Bob Horton

September 20, 1949

Mr. Bob Horton
H F Bar Ranch
Saddlestring, Wyoming

Dear Bob:

It was good to have your letter of August 20, particularly because Harvey Stoek was here working with me on an account of the character and accomplishments of the four University of California Botanical Garden expeditions. My delay in acknowledging your letter is due to Florence's serious illness. She was operated on three months ago and her condition is considered hopeless by the physicians. We however refuse to give up hope. Since she has no knowledge of how serious her condition is it might be well not to mention it to others.

I highly applaud your proposal to fit yourself for a professional career some of the fundamentals of which you doubtless have in mind more thoroughly than you realize. By this I mean that you would pick up the threads of what you did as an undergraduate in geology and paleontology more readily than you might think possible. This statement is made on the basis of experience with a number of persons who have been more or less in your situation and have elected to attempt what you have in mind. Of course if there should be anything specific that I could do for you in advance or after you arrive in Berkeley I am entirely at your service.

It was good to have the news of you and your family. Steve has just been made an Assistant Professor in Political Science at the Santa Barbara "branch" of the University. Ellen was divorced last December and has married again apparently very happily. I am about as usual but the five visits to South America, some of them for as long as eighteen months at a stretch have kept me a little out of touch with the academic routine.

We all join in affectionate greetings to you.

As ever yours,

THG:T

Mr. O. B. Horton
Box 101
Carmel, California

Dear Bob:

Your note, of months ago I guess and written when I missed your last visit in these parts, has come to light again. Everything has been neglected since the proof of my book began to arrive.

I hope to be in Carmel before too long and will bring your South ~~American~~ "Journal" with me to loan you. Should you not hear from me in Carmel within a month or so remind me and I will send the "Journal" to you.

Glad you have yourself well in hand and know that it will be permanent.

My best to you, always,

THG:T

Pacific Flower Shows, Inc.

6138 ORANGE AVENUE • LONG BEACH 5, CALIFORNIA

Dr. Harper Goodspeed,
Univ. of Calif.
Berkeley Calif.

July 5, 1948
7/10 Tel.
Report unable accept invitation
letter follows

Dear Dr. Goodspeed:-

I believe that Roy Medcalf spoke our hope that we can have you speak at the Long Beach Flower Show. I delayed writing until I knew the exact day. May I plan for your talk at 8:30 P. M. on Aug. 6. You may choose your subject, but I would hope to have you speak of the role of plant exploration as a contribution to our gardens. But you can discuss your own valued explorations as well.

We shall, of course, take care of your

expenses. I believe that we can use a photograph of you — Perhaps a shot taken in one of your explorations.

I shall look forward to meeting you.

Yours,

Alfred Wetters

July 15, 1948.

Mr. Alfred C. Hottes,
6138 Orange Avenue,
Long Beach 5, California.

Dear Mr. Hottes,

Many thanks for your letter of July 5 which awaited my return from a brief holiday. I appreciate very much your thoughtful invitation to have a share in the forthcoming Long Beach Flower Show.

Since talking with Roy Metcalf some time ago and indicating to him my desire to cooperate with you my plans have changed considerably. I am leaving for South America the first of October to be away two months, having accepted recently an invitation to be responsible for a division of the Second South American Botanical Congress to be held in Tucuman, Argentina, this fall. To get away on schedule will require every moment here that I can find.

I regret very much that I cannot be with you in August and hope that your invitation may be renewed another year. With all good wishes for the success of the Show,

Sincerely yours,

Berkeley 4, California
November 7, 1951

Mrs. A. Hougardy
615 Baywood Avenue
San Jose 28, California

Dear Mrs. Hougardy:

Mr. Butterfield has turned over to me your letter of October 24 concerning import of Hoya cuttings.

In the first place I would say that such material will receive the same treatment (fumigation, etc.) whether sent to you personally or to this Botanical Garden. We should be glad to have the species referred to to add to our collection of Hoyas and I note that you would be willing to let us propagate the material in question, ultimately turning over cuttings to you. In these circumstances I suggest that you ask your Australian correspondent to place the enclosed permit on the outside of the package and inside the package list the species and say "To be delivered to Dr. T. H. Goodspeed, Director Botanical Garden, University of California, Berkeley 4, California". Also request your correspondent to send the package airmail or air express, whichever is cheaper. If he will then send me a statement of air transportation charges I will reimburse him.

Trusting that this arrangement will prove satisfactory,

Sincerely yours,

THG:T

Dear Dr. Goodspeed:

We are enclosing a letter from Mrs. A. Hougardy, 615 Baywood Avenue, San Jose 28, asking if the University Botanical Garden would assist in the importation of certain Hoya cuttings from Australia. Since this office has nothing to do with the matter, we are simply forwarding her letter on to you, with the hope that you will acknowledge it directly.

Sincerely,

H. M. Butterfield
Agriculturist

Oct. 24, 1951

OCT 25 1951

Dear Mr. Butterfield:

About two years ago I began corresponding with a gentleman in Australia whose name appeared in the Begonian. I have sent him all the Sud-Frand seeds I purchased and a book on African Violets.

Because of this, he wishes to send me Kaya cuttings of 9 varieties, (other than Carnosa & the Variegated) but the permit I sent him calls for 7 cuttings and one bulb, a caryopsis.

Mr. Simmonds believes that if the cuttings are sent to me direct, that the fumigation they will receive will lessen my chance of getting them to grow. He feels that if I can have them sent through a Botanic Gardens, I will have a better chance of their surviving.

If it is possible for these cuttings to be sent to the U.C. Botanical Gardens, they can keep them & later on give me a cutting of each one.

Quoting from Mr. Simmonds' letter, "I would like to be able to give you some thing that is unobtainable elsewhere as some slight return for all you have sent me." *N. Parsonii*, *N. Shepherdii* & *N.*

and if cut about will die ^{right} back and may not recover.
The best way with those is to put the basket down
on the bench, pin them down on coal ashes (moist) and let
them root in their own tonic.

I have an Olyft Greenhouse and have had so
much pleasure from growing the seeds and from
spores purchased from Mrs. Florence Savell of the
Begonia Society. Mr. Simmonds ^{had} about her Hoya
cuttings which came to her in bad condition.

Please may I hear from you at your
earliest convenience.

Thanking you in advance, I am

Sincerely yours.

Mrs. A. Hargrady.

Count Rudolf Hoyos
Horn, Austria

Dear Count Hoyos:

Thank you for your letters of November 17 and 18. The first shipment of seed of Sequoia sempervirens doubtless was sent through the efforts of the Save the Redwoods League, at Mrs. Esberg's suggestion. I am glad that it is germinating and hope that you will have equal success with the first collection of seed I sent.

I have just received another seed collection which may be still more viable than either of the two other collections. I am sending it to you under separate cover.

With my compliments and best wishes for the coming Christmas season and the New Year,

Sincerely,

THG:T

August 26, 1948

Mr. William B. Hubbard
231 Winston Street
Los Angeles, California

Dear Bill:

Florence and I are off to South America, for the fifth time since 1935, on October 4. This journey to the South is unpremeditated and follows an invitation to me to become President of one of the Sections of the Second South American Botanical Congress which meets in Tucuman, Argentina, October 10 to 17. Since the Congress offered to pay Florence's and my round trip by air and maintenance during its session the invitation was difficult to refuse. Actually, the University has given me leave of absence until December so that after the Congress I can take advantage of the opportunity to carry forward for two months the work of the Fourth botanical expedition to the Andes which I organized when we were in South America in the summer of 1946.

These four expeditions represent one of the largest and most successful areal reconnaissances of the past fifty years. I take most personal satisfaction, however, in the contributions made to the South Americans themselves through the increased knowledge we have provided of their floras and particularly of new or previously little known plants of potential economic importance. The enclosed reprints will give some further idea of what we have accomplished down there.

In the past I have had a part in plant exploration at high altitudes and under other unfavorable conditions in South America. I am told that from now on I should not attempt much of this sort of work and therefore hope to be able to hire local assistance to do some of the collecting I need to do. Because this is a rather personal problem I cannot present it to scientific foundations and institutions which have contributed to the University a considerable proportion of the \$70,000 which past expeditions have cost. I am, therefore, approaching a few of my friends in the hope that I may be able to secure all or a part of the \$1800 which I estimate I will need to make my project a success. Contributions are to be made, through me, to the Regents of the University and are therefore deductible from income tax.

You know me well enough, Bill, to say no without hesitation or explanation. I am also writing to Olin who helped me a little a number of years ago. I have lost track of others of the old group now in Southern California and who might be interested. Have you any suggestions?

Here we go on about as usual except that our daughter Ellen is at home again. The war wrecked her marriage but at present she seems happy and successful in a business career. Steve is an Instructor in Political Science at Santa Barbara College so that there are now two

Goodspeeds on the combined U.C. faculties.

We wish that we might see you oftener than once in every three or four years and join in every good wish for you and yours.

Very cordially,

THG:T

January 17, 1949.

Mr. G. M. Hudson,
Route 2, Box 300,
Pittsburg,
California.

Dear Mr. Hudson,

Your letter concerning orchids has been referred to me.

I have for some years been concerned with collecting and importing orchid plants in Peru and Colombia for this Botanical Garden. No one method of collecting, packing and shipping living orchids can be advised. If you will tell me where the plants are to be collected, what species are involved and how you propose to ship them (by air, by boat, etc.) I will do what I can to assist you.

Sincerely,

THG/EN
