The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *Statement on harmful and offensive content*

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

SAN JOSE  
CALIFORNIA

IN "BEAUTIFUL SANTA CLARA VALLEY"

June 6th 1945

Dear Dr Goodspeed,

Nice to hav your letter because it moves me from my inertia to remark some matters..tho perhaps it would be just as well if I kept still! Therefore consider them or not accorxing to y ur feeling...

I as usual was in Berkely only very few hours and limited in time..once with C P Smith who kindly drove me over and back. But I tried to see you especially because I have learned from Cuatrecasas that:

"My first desire is to return to Spain if possible to do so with all guarantees of liberty and authority and means to study at Madrid. If soon this is not definitely assured me I must shortly find another solution in another country. I prefer in these circumstances (that Spain fails to offer me security and opportunity) to obtain a position in the United States and in this case I want to apply for citizenship. Less desirable to me are other possibilities that have been offered me in recent months (..and here he implies they are still open.); namely, " a splendid offer from Brazil", another from London and, more intriguing to me, one from Paris.

I have my personal herbarium, some 12000 numbers more than 2000 by others, mostly in duplicate, mostly sublimated and poisoned so all in good condition. Also have a pertila set of trunks and fruits. My coll here of 1938 is already in Paris, being held for my disposition. All these collections will go the institution which gives me a chance to live and work them up."

The letter was written April 2 and I wrote Killip about it..who in turn talked to I M Johnston and Killip for the two of them wrote agreeing with me that it is no less than tragic for American taxonomy if we let this man and his collections go to Europe...enuf S Am colles went toE uope long ago! I suggested that maybe you would take the initiative and try to get the ball rolling..nearly as bad for him to go to Brazil..maybe Arnold Arb and Calif could jointly take him on..I M J said to say he agrees heartily andhe and K will cooperate in any effort. Quite possible Filed (Chicago) Museum might cooperate or give him aposition but I must n disclose my hand cct PCS opposition , then.

Well so much for that matter; another!

Collection of A W Crawford friend of Rivers, La Cont, etc. conchologist but collected everything, algae, minerals, plants, etc etc..coll said to be well labeled and historically perhaps of value acct now towns as San Jose cover the localities..is housed in home of a Mrs Chappel at 45th or 46th near San Pablo, Emereryville, property now for sale as Mrs C old and with daughter in Texas..learn from relative that fear coll may be thrown out as

HOTEL LEAMINGTON  
OAKLAND, CALIF.

HOTEL SAINTE CLAIRE  
SAN JOSE, CALIF.

HOTEL BRISTOL  
BRISTOL, VA-TENN.

HOTEL HOLLAND

*Johns  
Chamberlain's  
coll was  
with himself  
in S.F. Field.*

junk..Mrs Rutan my mother's nurse was Miss Crawford and thinks it apity if Univ of Calif or other inst doesnt at least see the collection and salvage what if anything is worth having. I spke to Dr Mason about it last year but I think he did nothing. Mrs R says Chief of Police Carey or at least former chief of Poice was a friend of Mrs Chapel and could give address of letters daughter. There was a family feud which never healed so Mrs R can do nothing herself about it. Knowing you dont procrastinate I pass on this inform tion once more. I gave it to Standofrd too but there too everyone waits on everyone else "to do something". Since many of his colls are at Smithsonian and toher inst it is possible the coll should not be dumped out as trash by buyer of proerty until it is looked at. In any stept to see it Mrs Rutans name should not be mentioed as she belongs to the other side of the feud! But as a girl she was nearest her father and hlped him for years with his beloved col ections when he accompanied Calif and Standford natural history professors on heir early hikes. Thire is a shell or two Crawfordd's she sells me and cotypes me aexist inthe collection. *The colls are named a numbered.*

This would be all but for the question raised by you and Killip. Recetly..well late 1944, the Museum via Dr Dahlgren agreedd that material would be loaned me to Stanford (or Calif, presumably) if I asked for it. Previoulasy, in late 1942, such loans were refused me on the ground that "I raised time was too valuable". (I had asked for perhpas a hours week). In as much as they were getting my time free I took this as an insult and dropped the matter until, bored, I thought in 44 to just see what would happen and asked again. However, I have not availed myself of the "opportunity".

The gist of it is that with my sensitiviness to my envinment and my poor health in Chi even in a few weeks, I work my head off in Chi and go there loaded with mss prepared so ar as possible elsewhere..hence the appear nce of the last two numners of the Flora in short order...the m s was already by me and the M only had to pay me about a year's salary and a clerk for several years work. Since I have ben here anyway acct my Mother and have no intention of doing more in Chi than I hav to I have maintained they should co perate with me and at least allocate part of my slary to me to permit me to prepare the basic first draft of the work. They have ignored such requests..I suppose they expect me to burn my ms. when returning to Chi! Or as before to give it to them? But my bills go on just the same. I am the fore not borrowing material or nor trtuing to Chi unless paid for my work, the same work I would be paid for if there. So I cant help you out. If you feel inclined to remark to the Museum that it seems a pity that they are not encouraging me to continue..proveded you think it worthwhile that I do so, it would be very nice. I let my leg be pulled for years in Europe and ever since my return and I am tired of it...I am proud of my profession or ought to be but I dont intend to help set up an aritocracy as in Europe of botany by worki g for nothing. My professional opnions and any botanists should be reimbursed an American tradition so he can be independent like a lawyer or a doctor or what hav you.

well you see whta chance you take when you write me!  
Dont let all this worry you t o much, nothing makes much difference anymore.

*W. M. S.*

IN "BEAUTIFUL SANTA CLARA VALLEY"

June 7 45

Dear Dr Goodspeed,

Supplementing my letter of yesterday as regards the specimens of *Oreopanax* that are undetermined: as I recall the material it would be better to keep it together until it can be studied as no one sheet can show all the characters. I suppose there is no hurry about the matter and eventually some one if not myself can borrow it. As to the *Gauthierias* these could be distributed unnamed as the material is readily divisible into sets..in *Oreopanax* often lower leaves etc are different in lobing and the petioles may show character. I thought one from Puno wasnt might be an early described sp from there but description is too poor to know and there may or may not be a photo of type which too may show only an upper leaf...these things are really very difficult often. A C Smtih did them recently fro the N Am Flora and maybe he would hame them for you..you might ask Killip. Also he might know about the *Gaultherias* which need revision.

There is so much mat rial involved that I do not think, apart from other considerations, that it would be practical to bother Museum and others with expense and trouble in asking for loans for after all if I get to Chi again I can in short time wrk all the matrial together available there so much more effectively.

These remarks are not meant as contradiction to my feeling expressed in the previous letter that in as much as the Museum carries my name on a salary basis my work ought to be of the same value to them wherever done; the "book work" which is basic for a production like the Flora involves a temendous am unt of translation, interpretation and biographical accumulation and this is the work I have mostly done for years when wnd where opportunity presented itself..very nice for Museum prestige but often apart from my time, admittedly worth nothing pehaps, a source of considerable expense *me*.

However all this may be the fact remains that in this case as in others I have never wished to cause expense or trouble unless necessary, and so far as study of your and oher specimens in connection with a final draft of the Flora that always must be consummated finally by someone else if not by myself at the source of the larger amount of materia so the loans would not be justified in my opinon now.

with best to you,

*W. S. Seward*

February 20, 1947

Mr. J. Francis Macbride  
Route 3 Box 411  
Santa Cruz, California

Dear Friend:

I am enclosing copy of a letter which is self-explanatory. Originally I had proposed to write it to you rather than to Just but no one in the Herbarium here seemed to be quite sure of your whereabouts and since Cuatrecasas hopes to start for Chicago in less than a month it seemed to me important that someone at Chicago check up on my and Cuatrecasas' correspondence with Dr. Gregg.

So far as our Peruvian herbarium material is concerned I, of course, hope that if you are to be at Chicago you would be interested in handling it. Since I did not know your plans I made no such suggestion to Just. I think that Woytkowski's collections should prove to be fairly interesting and important because he knows the Peruvian montana very intimately and contends that he has been working in unknown or little known regions.

Cuatrecasas asks for your address and I am giving him the Santa Cruz one. I have the feeling that you are the person really responsible for the happy culmination of his desire to work in this country and I am very appreciative of all that you have done.

With every good wish and in the hope of seeing you or hearing from you soon, I am

Very cordially yours,

THG:T

Cf Dudley Herb., Stanford Univ  
Palo Alto Calif Feb 22, 1947

Dr T H Goodspeed  
Director, Bot Garden  
Univ of Calif at Berkeley

Dear Dr. Goodspeed;

Thank you for yours of the 20th. inst and copy of letter to Dr. Just, with information that Dr Cuatrecasas will leave soon for Chicago. So I have at once written him by airmail assuring him that I understand that his financial status in Chicago will be safeguarded at least so that he and his family will not be in need.

Apropos the det. of the collections mentioned; I think I have remarked that it seems a pity not to have your own dept take the initiative in farming these out to specialists, and hav distrib of dupls. Of course as before I will try to cite Woytkowski specs. that pertain to parts of Flora not publ.; evidently you do not know that at my suggestion the Museum ordered last year from him such families.

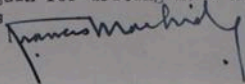

I feel sure that Dr Just will understand the interest and kindness that prompted your last paragraph...knowing Ted rather well I may assure you Don José will feel at once "at home", with no desire except to help him attain his goal.

And let me take this opportunity to thank you, and to congratulate you that your long effort to give him the opportunity so desired is finally successful; I think you will have done much for botany, as well as for Don José.

I expect soon to be at Berkeley from time to time comparing Chicago materials loaned me with your fine South American collections and look forward to saying "hello". As you know the bot. library at Stanford is almost ideal for my text work.

Thanking you again for writing me I am

Respectfully yours

Care

DUDLEY HERBARIUM

STANFORD UNIVERSITY, CALIFORNIA

May 23, 1947

Dear Dr. Goodspeed,

Just a line to ask if the Woytkowski things are now ready for me to run thru them? I dont know just when I will be over but look forward to seeing them.

This morning's mail contains a card from Custreccsas from Miami, apparently delighted to be there.

I was so sorry that Mr Whitehead didnt find my place the other day..it is exactly opposite the Redwood Inn, Los Gatos-Santa Cruz main highway, 5 miles over the summit; a narrow private road descends thru orchard.

Sincerely yours

May 27, 1947

Mr. J. Francis Macbride  
Dudley Herbarium  
Stanford University  
California

Dear Friend:

I have your postal card of May 23 and am glad that you still remember about the Woytkowski specimens.

This material will be ready by June 5th and I am looking forward to having you see it anytime thereafter. I am very appreciative of your cooperation in this matter.

When you come we will have six or seven Fuchsia species ready for you to take back for planting in the new rancho.

Sincerely yours,

THG:T

Dear Dr Goodspeed,

# 3

Ordinary Mail

C P Smith has just told me that he is hoping to publish on the accumulated Goodspeed Exped. Lupines and I have told him about the new collections of Wojtkowski; it occurs to me that if you have not sent the Lupines (if any) of these to Cuatrecasas that Mr Smith would be glad to name them.

If you wish him to see them would you be so kind as to let him know, C P Smith box 531 Saratoga.

It was ever so nice to see you the other day.. I still have the few Geraniaceae and allied families.

Dear Friend:

Many thanks for your card, concerning C.P. Smith and the lupines of our South American expedition. I have ready to send to Dr. Mason the first set of the Woytkowski collection, and I will call Dr. Mason's attention to the fact that Mr. Smith will want to see the lupines some time in the near future.

Looking forward to seeing you again soon, and with every good wish for the Christmas season, I am

Cordially yours,

T:hgg

Stanford Calif

May 22, 50

Dear Dr Goodspeed,

thank you for your note and am glad you wrote me as I have a letter from Ted in which he thanks me for the cooperation but suggests that we do nothing further until he calls upon us..I judge that he hopes that the Gugenheim if recd. and he was the one who pushed for that or Rockefeller as I understand it will be a big leverage to argue for Jose's retention. Of course if the Gug stipend is sufficient he will work as I do at Stanford as a guest but I judge that Ted hopes to get a cont at least on a paper basis so that the position ofr Jose will be retained that is a title, anyway.

Maybe you can stop in on your return trip? Conversations are one thing you know. letters another and so apt to be construed as inference.

I suggest that at most at present you could best merely offer Ted your help when and if the time comes that a letter might help him. In the meantime leave it in his hands as I shall do. If he cant put the matter across Jose will just have to look elsewhere.

But I feel that he will get the Gugenheim which will impress the powers at Chicago and add to his prestige etc.

Hope you can stop and talk with Ted Just one way or the other on your trip..you will enjoy him as he you!

all my best and write me again when you wish or have some suggestions, I may be wrong..

sincerely

J.F.M.

COPY

Enthusiastically and without reserve I endorse the project of Dr. José Cuatrecasas because of my intimate knowledge of his career and my understanding of the wide significance of his exceptional botanical work which, as he proposes, would be most effectively recorded.

I have known Cuatrecasas since he was studying for his doctorate at Berlin-Dahlem. His broad basic European education and his inherent ability have enabled him, in spite of difficulties that few men could have surmounted, to become the outstanding authority on the flora of Colombia. In the short time he was director of the botanical museum at Madrid he displayed the energy and ability that have resulted in achievements that are amazing. His vast collections of Colombian plants and his scholarly published papers on many of them within a relatively short time and without the usual assistance, library facilities, and especially financial peace of mind presumed (and rightly) necessary for such endeavor, mark him as worthy of every aid that can be given him.

He is unquestionably the man for the project he proposes, and it cannot be consummated except in our country. Thanks to his scientific understanding he caused Madrid to share with our National Museum the invaluable early Colombian materials of Mutis and these, together with those of our government, Chicago (including Cuatrecasas) and other institutions, make the United States the right place for the undertaking. It will be of outstanding benefit to many other botanical studies now in progress such as the Floras of Central America, the Flora of Panama, the Flora of Peru and economic problems which of necessity must rely on such works for basic information. And because the position of Colombia makes a sound knowledge of its flora a prerequisite to an overall picture of the distribution of plants and their products in all western America.

Cuatrecasas' scientific consciousness prompted him, just before the civil war, to write me in Vienna suggesting I change my plans and proceed at once to Madrid; as a result there exists a nearly complete set of negatives of plant types from there, together with many duplicates of western American collections many unique, all gotten out but shortly before the revolution from which he and his family had to flee. He is of course eagerly acquiring American citizenship.

I mention this incident to show his will to act, and decisively, for the common good, his basic scientific honesty, his unselfishness. Here is an erudite man of fine training and proved ability, ambitious for accomplishment within the scope of his career and with a project of exceptional merit. He has the support and inspiration of his two boys and a girl, remarkably bright, and a cultured cooperative wife also of wide European education.

I hope with all my heart that he will obtain the Fellowship, confident that it will be for the benefit of us all and those who follow.

Dear Dr Goodspeed, acct of saving time I ventured not to show this copy which you may file or destroy) to you tho I should have liked to... as Dr. Wiggins was in I had him read it, and he thought it satisfactory... he knows C and like him...

José should and I know is grateful to you... I return you letter which is excellent... much more business like and to the point but maybe a personal approach from me will not be amiss... Ira W. thought not...

Thank you so much for your help and if I dont see you before you leave please accept my best wishes for a voyage so occu pied in carrying on that all regrets will be stilled...

May 22, 1950

Mr. J. F. Macbride  
Dudley Herbarium  
Stanford University  
California

Dear Friedd:

I like your letter re José very much indeed. I think it will help a lot, particularly as you can speak more authoritatively than I concerning his accomplishments as a taxonomer.

I have been thinking over our recent conversation and would appreciate your writing me with an outline of possible steps in their proper sequence for obtaining José's continued official status (without salary ?) in the Museum and steps to be taken eventually to secure a permanent post for him.

With all good wishes

Cordially,

THG:T

MRS. PHILIP DOUGLAS MACBRIDE  
HOLLYWOOD FARM  
WOODINVILLE, WASHINGTON

Mr. I. H. Goodspeed  
Director Botanic Garden  
University of California  
Dear Sir

My husband's cousin  
Francis Macbride of the Natural  
History Museum, Stanford, Cal.  
has suggested your book: "Plant  
Hunters in the Andes" - I shall  
get it in New York next week  
before sailing for South America.  
We shall be there three  
months.

Our itinerary is as follows.

Rio de Janeiro - Dec 18-25 -

Hotel Gloria

Buenos Aires Jan 5-12 -

Hotel Alvear Palace

Santiago Jan 19-23

Hotel Carrera

Lima Jan 24 -

Hotel Gran Bolivar

Our plan is to go to Ecuador  
& Venezuela -

I have U.S. permit to send  
out plants. & I shall ap-  
preciate it very much if  
you could let me know

about seeds or plants +

MRS. PHILIP DOUGLAS MACBRIDE  
HOLLYWOOD FARM  
WOODINVILLE, WASHINGTON

what to look for - which might  
grow in our Arboretum or  
in my own garden. I am on  
the Board of Directors of the  
Arboretum & Mr. Brian Mal-  
lagan is interested in ac-  
quiring trees + shrubs which  
would grow here.

If not too much trouble  
for you, I shall appreciate  
your advice - Very sincerely  
Launce W. Macbride

Berkeley 4, California  
December 2, 1955

Mrs. Philip Douglas Macbride  
Hollywood Farm  
Woodinville, Washington

Dear Mrs. Macbride:

Unfortunately your letter postmarked November 23 was misplaced and only appeared today.

My "Plant Hunters in the Andes" would have given you suggestions concerning ornamentals of Peru and Chile. The original (1941) edition has long been out of print and the English edition (1950) was unavailable in London this last summer.

In the Seattle Arboretum and your own garden I doubt whether native Brazilian, Ecuadorian or Venezuelan plants would survive out-of-doors. The best source of South American plants for your area would be southern Chile -- the Lake region. Some of the central Chilean species do well here although we have not had a killing frost since most of them were introduced by us. There are certain desirable Argentine ornamentals which might be hardy.

Both in Chile and Argentina the relative shortness of your visits would make collecting difficult because collecting areas are at a considerable distance from Santiago and Buenos Aires. However, in Buenos Aires you may be able to find natives in the gardens of members of the Buenos Aires Garden Club (an anglo-Argentine society) or of the Sociedad Horticultura, both in the telephone directory, I think.

Since, apparently, you are staying longer in Peru you may have an opportunity to go into the "back country" to collect. However, whether Peruvian species, even from high altitudes, will survive in your area is doubtful. We would be interested in securing a small share of the seed of any wild species of Fuchsia, Calceolaria, Cacti or any ornamental growing at over 10,000' that you may come across. It would be essential that you note the approximate place of collection and date. For advice on collecting areas you might get into touch with Dr. Ramon Ferreyra who is a botanist at La Molina Agricultural College in the suburbs of Lima. He has studied in the United States and speaks English.

With many thanks for your letter and in the hope that your South American journey will be enjoyable,

Cordially,

THG:T

UNIVERSIDAD NACIONAL MAYOR DE SAN MARCOS DE LIMA  
MUSEO DE HISTORIA NATURAL "JAVIER PRADO"

3 Lima, January 16, 1947.

Dr. Thomas H. Goodspeed  
University of California.  
Berkeley, Cal. U.S.A.

Dear friend:

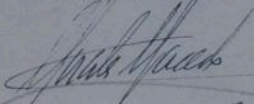

Thank you very much for your Christmas greetings and for your kind letter Nov. 23, received after my arrival from the States. I spent the last months of the past year on a short trip, having the opportunity of visiting the great museums of New York and Chicago.

It was a pleasure for me to talk with Gonzalo Pardo about you and Mrs. Florence, and to receive news in regard to your valuable scientific work. You really deserves a decoration from the Government of Peru and I have pointed out the convenience of conveying to you such honor. Unfortunately the conditions at present prevents me to act as freely as I will do in other times. Let us hope that everything shall come to normal in the near future.

Kindly send me a notice in regard to the botanical species you collected in Peru. The Museum is interesting in keeping the duplicates in a "Goodspeed Herbarium", which will show for ever your keen interest in peruvian nature.

With pleasant remembrances and my best wishes for your welfare and Mrs. Florence happiness, I am

Cordially yours,

Dr. Carlos Morales <sup>M</sup>acedo

February 18, 1947

AIR MAIL

Dr. Carlos Morales Macedo  
Museo De Historia Natural "Javier Prado"  
Universidad Nacional Mayor De San Marcos  
De Lima  
Lima, Peru

Dear Friend:

With much satisfaction we received your kind letter of January 16 and learned that all is well with you.

I am happy that you had an opportunity to visit museums in this country, but I am sad that your journey could not be continued to California for we would have welcomed you most heartily.

Gonzalo Pardo was kind to mention to you the possibility of my receiving some recognition of our twelve ~~years~~ <sup>years</sup> of botanical exploration in Peru. I understand that this recognition was the idea of his father and Dr. Carlos Monge. I doubt ~~of~~ the success of his proposal because governments are notoriously uninterested in scientific work. However, if you are good enough to interest yourself in the idea, I am sure that something will be done.

I am much honored to know that you are keeping our herbarium specimens in a separate collection. You asked me to send you a notice concerning this herbarium, but I am not sure what it contains. If you will send me a list of the numbers or other information by which I can identify the material, I will be happy to write a note concerning it.

Florence and I send you warmest personal greetings and every good wish for the success of the Museo.

Cordially yours,

THG:jd

UNIVERSIDAD NACIONAL MAYOR DE SAN MARCOS DE LIMA  
MUSEO DE HISTORIA NATURAL "JAVIER PRADO"

Lima, February 22, 1947.

Prof. Thomas H. Goodspeed.  
University of California.  
Berkeley, 4. California.

Dear Friend :

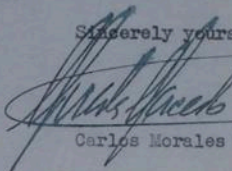

Your kind letter Feb.15 is on hand, and I have the satisfaction to know that you and Mrs. Florence are enjoying home in California and that you keep a keen interest in the peruvian flora.

In regard to my desire to exhibit in this Museum a "Goodspeed Herbarium", it is my duty to state that we have not received so far any notice about the specimens you and Mr Metcalf collected during your last visit to Peru in 1942. As you remember, all the material was packet and carried to the United States and no duplicates were left at this Museum. We only receive the promise that the duplicates would be sent back duly clasified and mounted. This proposition was considered as enterely satisfactory for this Museum and for the University of San Marcos.

I beg you to inquire about these collections, which are really very valuable for our Museum and shall represent for ever the important botanical work you performed in favor of Peru.

With kindest personal regard; to you and Mrs. Florence and every good wish for your welfare, I am

Sincerely yours,

  
DIRECTOR

Carlos Morales Macedo

COMMONWEALTH BUILDING  
WASHINGTON 6, D. C.

February 20, 1953.

Mr. M. Kinnach,  
Botanical Gardens,  
University of California,  
Berkeley 4, California.

Dear Mr. Kinnach:

I cannot tell you how much I enjoyed my visit with you recently and I hope to come over again at the first opportunity.

I am enclosing some self-addressed postcards and I wish you would send me the name of the man who sells succulents in Atherton or Menlo Park.

I would appreciate it if you would let me know if anything unusual or startling develops over there that I might come over to see.

Would you please give me the name of the botany professor who is more or less in charge of the Botanical Gardens. I am interested in a modest charitable foundation which from time to time may be able to make small grants to the garden for the purchase of material which is needed there.

Incidentally, I was under the impression that you showed some interest in our discussion of seedums and if you could use them I can furnish you with some samples of about 10 of the 15 or 20 varieties I have on my place.

With warm personal regards,

Sincerely,

*Marshall P. Madison*

San Francisco, California

Dear Mr. Madison:

Your letter of February 20 has been referred to me by Mr. Kinnach of our Botanical Garden staff. I am glad that you found something of interest in the University's collection of cacti and succulents. With respect to certain genera, at least, it is now recognized as one of the most important research collections in the world.

From collections made by the University's South African expedition and the numerous, privately supported, Botanical Garden expeditions to South America the Garden has received many new or little known species. Our succulent research program requires additional species from the wild and we are in touch with reliable, professional plant collectors in South Africa and South America who can supply them.

The limited budget of the Botanical Garden has made it impossible to secure the cooperation of these collectors to the extent that we would wish. I am, therefore, hopeful that a Succulents Research Fund, administered by the University, may be set up and contributed to by those interested in our program. Such a fund would, from time to time, permit additional collecting in the wild and would also aid in preparation for publication of the results of our research.

You were kind enough to express interest in such a proposal. At your convenience I should be glad to give you further information about it.

We would certainly like to have such cuttings as you can spare of your sedums and hope that there may be items among our duplicates which you would care to grow.

With best wishes

THG:T

Sincerely,

WASHINGTON OFFICE

2079 Life Sciences Building,  
Berkeley 4, California.

*Thursday 12:30*

Dear Professor Goodspeed:

I am very much interested in your letter of February 26th and I believe I can persuade The Madison Fund to make a modest contribution to the University for the purchase of succulent species either directly or through your proposed Succulents Research Fund. I say modest because the Fund itself has relatively small capital and income accounts, but if you will let me know your needs I hope that our contribution added to other funds which may be available to you will permit you to get what you need. I am thinking of about \$200 or \$300 now and possibly more later on.

I now have some rooted sedum cuttings which I can bring over to you or to Mr. Kimnach and possibly if you are planning to be at the University Botanical Garden at some time next week we could arrange to meet there.

Many thanks for your interest and with best regards.

Sincerely,

cc - Mr. Kimnach

Berkeley 4, California.

Dear Professor Goodspeed:

I appreciate more than I can tell you our luncheon and your showing me the University's wonderful Botanical Gardens and I can well understand your interest in and affection for the beautiful specimens there. Paul came to Atherton and we spent a fine afternoon together, much to my education and delight. This gave me the opportunity to discuss the work at the garden and to hear of the interesting research he is doing in the collection and importation of additional specimens from South Africa and other parts of the world. After discussing this with the directors of The Madison Fund, I am authorized to say they are sufficiently interested in making a grant to the University for this work at this time of \$300 and as I told Paul, I am hoping that additional grants can be made semiannually amounting to approximately \$500 per year without, of course, committing the Fund, which I have no authority to do, for any future payments.

While these activities and my other pursuits have left me little spare time for reading, I am already well into your book and I cannot tell you how much I appreciate your thoughtfulness in

U

sending it to me and how much I have enjoyed what I have read. Altogether I have the feeling that the Fund has found a well-deserving cause which will be of continuing interest to it and we all hope that something can be worked out to your satisfaction as well as ours.

With warm personal regards,

Sincerely,

Marshall P. Hadwin

Dear Mr. Madison:

I am very appreciative of your letter of May 1 enclosing a check in the amount of \$300, a donation from The Madison Fund toward continuation of the importation of succulents and related plants. I am today forwarding to the Secretary of the Board of Regents of the University this check together with the covering letter which you also enclosed.

In reporting this gift I am requesting that the Accounting Department of the University set up the following new account. Botany: Botanical Garden -- Research Cacti and Succulents. Requisitions against this account require my signature and will be restricted to the purposes for which the donation has been made.

I believe that Paul has outlined to you the proposals for the continuation of importation and study of new or little known species. This is a field of research in which I am much interested and have been concerned for many years through my botanical explorations in South America. In my experience it is one of the most rewarding aspects of current botanical science, particularly since some at least of the importations prove to be of interest to those who have an amateur as well as professional enthusiasm for the material.

This evidence of your interest and cooperation will, I hope, encourage others to add to the fund now established through your donation. Since our proposals are continuing ones I am happy to note that there may be a possibility of semiannual grants from The Madison Fund of approximately \$500 per year.

In the near future the Regents of the University will officially acknowledge your generosity which all of us connected with the Botanical Garden so much appreciate.

I am glad that you found something of interest in "Plant Hunters in the Andes!" It was my first and probably will be my only effort to present in somewhat popular form one of the types of research with which I have long been concerned.

With thanks again and with all good wishes,

Cordially,

Dear Professor Goodspeed:

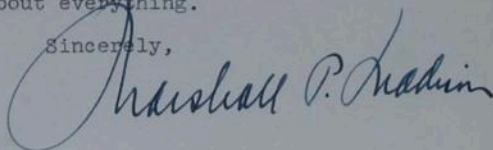

I am returning under separate cover your "Plant Hunters in the Andes" which you were so kind as to lend me. My first impressions of the book were doubly confirmed, and I enjoyed every bit of it. Many, many thanks for letting me read it.

I fully concur in everything you suggest in the letter you sent me, and many, many thanks for this also.

Tomorrow will find me leaving on the Lurline for Honolulu to do a little botanical research for myself, and probably the next time I will see you will be at the Grove where I certainly will search you out. Later I want to visit the botanical gardens again, and Paul has promised to come down and help me to display my succulents.

I am very happy about everything.

Sincerely,

MPM

29 Sept. 1953

Mr. Marshall P. Madison,  
Pillsbury, Madison & Sutro,  
Standard Oil Building,  
San Francisco 4, California

Dear Mr. Madison,

As I was making out the form which is submitted to the Regents when a gift is made I found that your check made out in amount \$300.00 should have been in amount \$200.00 as indicated by the third paragraph of Mrs. Madison's letter of Sept. 22. I am, therefore, returning the check that was enclosed.

Needless to say I am extremely appreciative of the action of the Board of Directors of the Madison Fund quoted in Mrs. Madison's letter, and will comment later upon its significance for the promotion of one of our research programs.

With all good wishes and in haste,

Cordially,

T. H. Goodspeed, Director

THG:ph

Berkeley 4, California  
October 19, 1953

Mrs. Marshall P. Madison  
Pillsbury, Madison and Sutro  
Standard Oil Building  
San Francisco 4, California

Dear Mrs. Madison:

This will acknowledge receipt of check in favor of the Regents of this University in amount of \$200 which together with a previous donation of \$300 represents the generous contribution, for the current year, of the Madison Fund to one of the research projects of this Botanical Garden. The check, together with your letter of September 22, has been transmitted to President Sproul with the indication that it should be added to the fund designated "Botanical Garden Research Cacti and Succulents". In due course you will receive acknowledgment of this donation from the Board of Regents.

May I once more express my deep appreciation of the sustained encouragement and support of the cactus and succulent research program which the action of the Directors of The Madison Fund provides. Like other special collections cacti and succulents have long been grown in the Botanical Garden because I believed that they possessed a particular research potential and that they could, in addition, make a contribution to the knowledge sought by the public interested in that group of plants. Since Mr. Hutchison and Mr. Kinnach have been associated with the Botanical Garden both these beliefs have been increasingly confirmed. Importations, now possible on an increased scale due to your support, have greatly increased the research potential of the collection; indeed, for certain families and genera it is becoming of outstanding research significance in this country and probably in the world also.

Through published articles of a strictly scientific nature and semi-popular ones the importance of our collection of cacti and succulents has received world wide recognition, with resulting stimulation of exchange of information and living material with specialists in this country and abroad.

Thank you and Mr. Madison for your kind reference to what I have been able to accomplish in the Botanical Garden.

With best wishes,

Sincerely,

Berkeley 4, California  
October 21, 1953

Mr. Marshall P. Madison  
Pillsbury, Madison and Sutro  
Standard Oil Building  
San Francisco 4, California

Dear Mr. Madison:

I understand that you have had difficulty in visiting the Botanical Garden on football Saturdays.

Hereafter, please show this letter to Berkeley police officers at barriers near the Stadium. It will be honored and you will be permitted to proceed in accordance with an arrangement made by Capt. Woodward, Chief Campus Police, with the Berkeley Police Dept.

Capt. Woodward suggests that you drive up Dwight Way to Prospect, then left along Prospect to the Stadium rim road. You will then turn right on the emergency road which runs along the north facing slope of Strawberry Canyon. This road enters the regular road on the opposite side of the Canyon at the Poultry Husbandry station and you can then proceed as usual to the Garden.

It will be necessary to return along the same route.

With best wishes,

Sincerely,

THG T

2079 Life Sciences Building,  
Berkeley 4, California.

Dear Professor Goodspeed:

When I saw Paul about ten days ago he told me that some of the succulent material he has been hybridizing has from time to time been turned over to some wholesale succulent nursery in Los Angeles, and that he occasionally gets items from this nursery. Notwithstanding that this nursery only sells wholesale, I plan to be in Los Angeles in the near future, and Paul said that he would write me a letter introducing me to the boss there with some mention of our close association so that I might purchase some items from him if I wished.

Apparently he overlooked writing me this letter and I am wondering if you know the name of the nursery and its address so that I may go there when I am in Los Angeles about a week from now. Even if I could not make any purchases I could at least find the names of some things and possibly arrange to purchase them through Paul when he returns.

If by any chance you are friendly with the people there it might possibly be that you could write a letter for me in place of the one I had hoped to receive from Paul. I will certainly appreciate your cooperation.

With warm personal regards,

Sincerely yours,

Dear Mr. Madison:

Your letter of October 6 has arrived today and I am enclosing herewith copy of one I have just addressed to Mr. E. C. Hummel of Hummel's Exotic Gardens in Inglewood.\*

Mr. Hummel has received a large amount of surplus material from our succulent collection through Paul and, in exchange, has been generous in providing us with material from his nursery which was of special interest. However, I do not believe that he has received from us products of hybridization to which you refer apart perhaps from certain hybrids which have been carried in the trade and which we no longer cared to grow in our increasingly specialized collection.

From Paul's numerous references to the quality and character of Mr. Hummel's material I believe that you will be repaid by a visit to his nursery.

With all good wishes,

Sincerely,

THG:T

San Francisco 4, California

Dear Mr. Madison:

At the suggestion of Paul C. Hutchison, Sr. Botanist in this Botanical Garden, I am outlining below the South American project in the support of which you expressed interest in a recent conversation with him.

I have been invited by the Chilean Government to spend some months in Chile to contribute toward realizing the agricultural potential of that republic by lectures and technical advice. My acceptance will largely depend upon the possibility of financing the continuation of my studies of the composition and distribution of the vegetation of Chile and Peru and, if possible, of adjacent portions of Bolivia and Argentina.

Since 1935 I have directed five botanical expeditions, principally on the West Coast of South America. You have, I think, a recent publication in which the maps show the large area covered by these expeditions. Mr. Hutchison accompanied me on the last expedition, in 1951-52, and proved to be a successful and knowledgeable plant collector.

The past expeditions have received wide recognition because of their contributions to knowledge of the vegetation of previously unexplored or little known South American areas. In addition to such noteworthy scientific products, new plants of potential industrial, agricultural and particularly ornamental importance for California have been found and introduced. To repay in part the sustained cooperation of South American governments I have assisted them in numerous botanical and agricultural projects.

The five expeditions which have cost a total of over \$110,000 were financed entirely from extrabudgetary sources and principally by donations from private individuals interested in their objectives.

From July 1956 to February 1957 I propose to explore additional little known areas in the tropical rain forest on the Peruvian headwaters of the Amazon, on the coasts and on the slopes of the Andes of Chile and Peru and on the Andean plateaus of the Chilean, Peruvian, Bolivian and Argentine frontiers. In addition to scientific products these areas should yield seeds or living plants of trees, shrubs and vines and in particular of Fuchsias, Orchids, Begonias, Ferns, Cacti and Succulents new to or otherwise important for California horticulture.

To carry out this proposal Mr. Hutchison's assistance would be desirable because of his knowledge of the needs of California horticulture and his proven success as a collector. The services of a second assistant and of two to four local plant collectors in South America would also be required. I estimate that for transportation of personnel to and in South America, board and lodging, salaries, shipping and care of plant material after return to California the cost would be \$14,500.

I have obtained tentative approval of the above proposal from Prof. L. Constance, Dean of the College of Letters and Science, and understand that following approval of the Department of Botany, he will refer it to President Sproul. The expedition would be designated the 16th University of California Botanical Garden Expedition

to the Andes," all donated funds would be received by the Regents of this University, credited to the current "South American Expedition Fund" and all expenditures would be made on requisition approved by the Controller's office.

With many thanks for your sustained financial support of the Cactus and Succulent research program in this Botanical Garden, which has permitted importation from South Africa and elsewhere of species essential for it, I am

With best wishes,

April 17, 1956

Mr. Marshall P. Madison  
225 Bush Street  
San Francisco, California

Dear Mr. Madison:

Paul Hutchison tells me that you and certain of your friends will assist in financing to the extent of \$6800 the 6th Botanical Garden Expedition to South America concerning which I wrote you on March 9th.

With this large and generous contribution in hand I feel that the proposed expedition is assured, the extent of our collecting in South America being governed by the amount of additional support I am able to obtain.

You may care to advise contributors that checks should be made in favor of "Regents, University of California." In case covering letters are written it would be convenient if they asked that the donation be credited to the fund "Botanical Garden South American Expeditions" to be used for South American botanical research. Unless a donor wishes to remain anonymous his gift will be given publicity in the lists of donations accepted by the Regents.

Contributions and letters should be sent to me. I will then prepare the necessary forms for reporting gifts and transmit them with checks and letters to President Sproul.

I am extremely grateful for your cooperation in this matter and feel confident that the continuation of our South American plant exploration, in which you and your friends are taking such a generous interest, will pay adequate dividends in both botanical and horticultural products.

With best wishes,

Sincerely,

THG:T

Professor T. H. Goodspeed,  
Director, Botanical Garden,  
University of California,  
Berkeley 4, California.

Dear Professor Goodspeed:

The figure of \$6800 I am afraid may be slightly optimistic, as to date Mr. Walter Haas has promised \$2,000, Colonel Charles Kendrick \$1,400, and The Madison Fund plans to contribute \$2,000, making a total of \$5,400. There are at present several letters outstanding which have not been answered and it is possible that I may receive a favorable response from some of them, but the fact that I have not heard indicates that in all but two cases the addressees do not appear to be interested. May I suggest, therefore, that you communicate directly with Mr. Haas (98 Battery Street, San Francisco) and Colonel Kendrick (Russ Building, San Francisco).

With respect to the contribution in which I am personally interested, you have my assurance that this contribution will be forthcoming when the total of \$14,000

is available, and I would prefer not to make a gift until the necessary pledges have been obtained. It may well be, and I would rather anticipate it, that both Walter Haas and Colonel Kendrick would feel the same.

I know that Colonel Kendrick is greatly interested in this work as he has spoken to one or two people about it in my presence, but unfortunately to date we have been unable to find any additional parties who share our interest. There is no question in my mind that the expedition under your direction will be a great success and I sincerely appreciate the opportunity of helping you raise the necessary funds.

With warm personal regards,

Sincerely yours,

Marshall P. Hadwin

2079 Life Sciences Bldg.

April 26, 1956

Mr. Marshall P. Madison  
225 Bush Street  
San Francisco, California

Dear Mr. Madison:

Thank you very much for your letter of the 19th indicating that a total of \$5,400 has been pledged toward the \$14,000 estimated budget of the proposed South American botanical expedition.

I will endeavor to secure the balance required and the assurance that over one-third of the budget has been pledged should be of considerable assistance in enlisting the interest of others in our proposal.

It is doubtful whether the necessary funds can be secured in time to take advantage of this year's collecting season in South America. I trust that this modification of my original proposal will be acceptable to you and Colonel Kendrick and Mr. Haas.

As you request I am writing to both gentlemen, copies of my letters enclosed.

Once more let me express my sincere appreciation of your generous cooperation and sustained interest in our botanical projects.

With all good wishes,

Sincerely,

THG:T

May 1, 1956.

Professor T. H. Goodspeed,  
Director, Botanical Garden,  
University of California,  
Berkeley 4, California.

Dear Professor Goodspeed:

I received two letters in answer to letters of mine, both of which indicate a sympathetic approach and a possible donation. Also, the name of Mr. Sam Mosher has been suggested as one who may well be interested.

Mr. Mosher is a Regent of the University of California, a successful oil operator, and very much interested in raising plants and flowers, particularly cymbidiums which I understand he raises on a commercial scale, and has a very large operation with very beautiful plants in Santa Barbara. With regard to Mr. Mosher, however, it would be my recommendation that you contact him directly.

Of the two letters mentioned above, one is from Richard Rheem (copy enclosed) and the other is from Ralph K. Davies, who states:

"I am not quite as strong for this as you are. But I would be willing to go half the distance suggested if the program you have in mind can be put together. Please let me know if it so materializes."

This would indicate that Davies can be counted on, I should think, for approximately \$700.

If you want me to do anything further with regard to any of these three gentlemen, I wish you would telephone to me rather than write.

I might also mention that in an earlier response I received from J. D. Zellerbach he intimated that while he was not particularly interested in this of venture and his budget for charitable giving was fairly well filled up, he might be able to spare a few hundred dollars if this would help. I am not quoting him literally, but later on you might wish to appeal to him for some small amount. Mr. Zellerbach is a very generous man and often makes very large gifts to charities in which he is interested. Possibly you may have some approach to him which would prove more effective than mine.

With best regards,

Sincerely yours,

*Marshall P. Madison*

For your convenience, following is list of names and addresses of the gentlemen mentioned.

Dear Marshall:

Your letter of April 12 strikes a sympathetic note with me, inasmuch as I am very interested in the type of exploration Dr. Goodspeed will be carrying out.

However, as of the present moment, what with Republican Party contributions plus the usual charitable donations, I do not feel up to the task of committing myself for any further contributions at this time.

I would be interested to know how the project progresses, and possibly at a later date I might want to take part.

Warm personal regards,

Sincerely,

DICK

PILLSBURY, MADISON & SUTRO  
STANDARD OIL BUILDING  
SAN FRANCISCO 4  
TELEPHONE GARFIELD 1-6133

WASHINGTON OFFICE  
COMMONWEALTH BUILDING  
WASHINGTON 6, D. C.

January 3, 1957.

Professor T. H. Goodspeed,  
Director, Botanical Garden,  
University of California,  
Berkeley 4, California.

Dear Professor Goodspeed:

It was so pleasant to hear the good news that your proposed trip to South America is now fully financed.

As you know, on April 19, 1956, I wrote you that Mr. Walter Haas and The Madison Foundation had each promised to contribute \$2,000, Colonel Charles Kendrick \$1,400, and that Ralph Davies had indicated,

"I am not quite as strong for this as you are. But I would be willing to go half the distance suggested if the program you have in mind can be put together. Please let me know if it so materializes."

The quotation is from his letter to me of April 20, 1956. On the same date Mr. Richard Rheem wrote me. I sent you a copy of his letter under date of April 30, 1956, in which he said,

"I would be interested to know how the project progresses, and possibly at a later date I might want to take part."

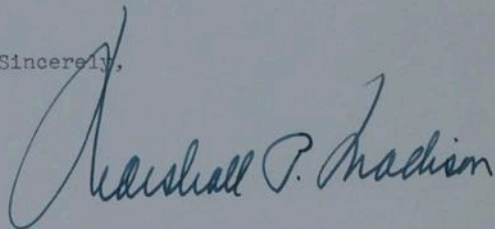

At the present time I can, of course, speak only for The Madison Fund, and this money will be available to

you when you need it, and if you let me know about when this will be I will see that you have the check at the proper time.

I would prefer that you contact the others directly, giving them the story so they will have it firsthand from you.

With all best wishes for a very successful adventure,

Sincerely,

A handwritten signature in cursive script that reads "Marshall P. Madison". The signature is written in dark ink and is positioned to the right of the word "Sincerely,".

2079 Life Sciences Bldg.  
University of California  
Berkeley 4, California  
January 11, 1957

Mr. Marshall P. Madison  
Standard Oil Building  
San Francisco 4, California

Dear Mr. Madison:

Thank you for your kind letter of January 3. As you suggest I have written to Mr. Haas and Col. Kendrick informing them that financially the success of the forthcoming continuation of my South American plant exploration is assured.

Although the expedition will not leave here until late summer it would be a convenience to have the donation of \$2000 from The Madison Fund paid on or before April 1 in order to secure transportation reservations and special items of collecting equipment.

When you wish to make this donation I would appreciate your sending it to me so that I may complete a "gifts" form which must accompany the report of a gift to the Regents of the University. Your check should be made in favor of the Regents and the covering letter to them should note that your gift is to be credited to the South American Expedition Fund to be used to continue my South American botanical exploration.

Since, as you indicate, there is a possibility that Mr. Davies and Mr. Rheem may still have some interest in supporting my project I am writing to them.

May I, once more, express my great appreciation of your sustained interest in and generous support of the research activities of this Botanical Garden.

With all good wishes,

Sincerely,

THG:T

March 7, 1957

Mr. Marshall P. Madison  
225 Bush Street  
San Francisco 4, California

Dear Mr. Madison:

This will acknowledge with many thanks Mrs. Madison's letter of February 26 enclosing check in amount of \$250 from the Madison Fund in favor of the Regents of this University, representing the continued support of the research on Cacti and Succulents being carried on in the Botanical Garden.

With renewed appreciation,

Sincerely,

THG:T

2079 Life Sciences Bldg.  
University of California  
Berkeley 4, California  
March 5, 1957

Mr. Marshall P. Madison  
Standard Oil Building  
San Francisco 4, California

Dear Mr. Madison:

Following your letter of January 3rd I wrote to Mr. Rheem and to Mr. Davies and enclose copy of the former's very courteous reply, just received.

Some time ago Mr. Davies generously contributed \$500 to the fund for continuation of my South American botanical research. Earlier Mr. Haas and Col. Kendrick had sent their agreed donations.

I believe that I told you earlier that the Guggenheim Foundation has given me a Fellowship and grant to cover the costs of my personal participation in the forthcoming South American research project and that the Chicago Natural History Museum has made a contribution of \$4500 toward its success.

The application for additional financial support which the University has made in my name to the National Science Foundation is being processed in Washington and I should have at least a preliminary decision this month.

With renewed appreciation of your interest and co-operation,

Sincerely,

THG:T

April 9, 1957.

Professor T. H. Goodspeed,  
Director, Botanical Garden,  
University of California,  
Berkeley 4, California.

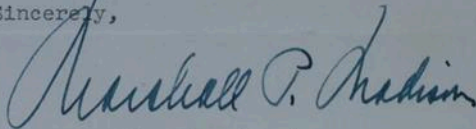

Dear Professor Goodspeed:

I am enclosing herewith The Madison Fund's check in the sum of \$2,000 payable to the order of the University of California for the Botanical Garden Expeditions to the Andes, upon the condition, of course, that if for any reason, unsettled world conditions or other causes, it becomes impossible for the expedition to get off this year, the money will be refunded to The Madison Fund. I am quite optimistic that none of these unforeseeable events will occur.

I wish you every success in this interesting venture.

With warm personal regards,

Sincerely,

Vice President

April 12, 1957

Mr. Marshall P. Madison  
225 Bush Street  
San Francisco 4 California

Dear Mr. Madison:

This will acknowledge your letter of April 9 and the contribution by the Madison Fund of \$2000 toward the financing of the forthcoming continuation of our South American botanical explorations. Please accept my most sincere thanks.

It goes without saying that should the proposal not eventuate for any reason this contribution would be returned and that if a balance remains after completion of the project it would, similarly, be refunded.

I would appreciate your sending me a brief covering letter addressed to the Board of Regents indicating, as other donors have, that the donation is being made to assist in continuation in South America of botanical research under the direction of T.H.Goodspeed. This covering letter will accompany the "report of a gift" form which I will forward to President Sproul.

With, once more, my sincere appreciation of your generosity and with all good wishes,

Cordially,

September 27, 1957

Mr. Marshall P. Madison  
225 Bush Street  
San Francisco 4, California

Dear Mr. Madison:

The South American botanical expedition which you have generously supported has been under way in Peru for some two months.

Paul C. Hutchison, Senior Botanical Garden Botanist, who has been assigned by the University to assist me in South America, with a collecting assistant-photographer, arrived in Lima late in July. Through the courtesy of the Grace Line, a 1-ton, 1957 Ford truck, purchased with Expedition funds, was carried gratis to Callao. It was especially equipped for high altitude transportation and plant collecting. Hutchison reports considerable success on a collecting trip in it over the Peruvian Andes into the Amazonian rain-forest where valuable collections of living orchids and a variety of dried plant specimens were obtained. He is now in areas in northern Peru previously unknown botanically.

I am leaving for Peru on September 29th to remain until late November. Thereafter I shall spend two months in Chile. Mr. Walter J. Eyerdam of Seattle, an experienced plant collector who was with me in South America on a previous Expedition, will assist me in Chile and, later, in Argentina.

Mr. Hutchison will return from Peru about January 1st. I will remain in South America some months longer. From time to time I shall take pleasure in reporting to you the progress of our South American botanical research.

With thanks again for your support and with best wishes,

Sincerely,

THG:T

April 11, 1957

Dr. Bassett Maguire  
Tropical Research  
The New York Botanical Garden  
Bronx Park  
New York 58, N.Y.

Dear Dr. Maguire:

Many thanks for your letter of March 13 enclosed in a reprint of your article on Venezuelan Compositae.

I plan to have a 6th botanical expedition from this University in the field for five to six months beginning perhaps in July and certainly in September of this year.

The Chicago Museum of Natural History has made a considerable contribution to the expedition fund primarily to permit a rather exhaustive survey of the Cactaceae of Peru. Certain of them are known from the montana and it appears that more, as yet unknown, species are there. As time permits general collecting will be done.

In a recent letter to Dr. Keck I mentioned my hope that additional financing could be obtained to permit some emphasis upon general collecting in the botanically unexplored area north of the headwaters of the Rio Madre de Dios. Phytogeographically it should be particularly significant as a region of contact between the flora of the eastern flank of the Cordillera Carabaya and that of the tropical rainforest at the ultimate sources of the Rio Puras.

Is it possible that you have a source of funds which would permit such an extension of our Peruvian collecting on the understanding that you would share in the products of our collecting in the more tropical portions of Peru? It could be done relatively inexpensively since the heavy costs of transporting North American collectors and their equipment to South America and return have been funded. I am, of course, anxious to pay the largest possible dividends on that investment.

Sincerely,

THG:T

Dr. T. H. Goodspeed, Director  
Botanical Garden  
2079 Life Sciences Bldg.  
University of California  
Berkeley 4, California

Dear Dr. Goodspeed:

Let me acknowledge your interesting letter of April 11. I've been away from New York for some three weeks but for this, reply should have been made more promptly. You are undoubtedly aware that I am also at this very time promoting an expedition to Guayanan-Venezuela, which is scheduled to leave New York on or about September 1st. We also are confronted with the same problems that you are, viz., raising money to finance the expedition. So, while we are much interested and should like to participate in your own expedition, circumstances will not permit us to do so in any large way. We do have, however, a small special fund from which we can draw only to purchase specimens. In consideration of the balance left in this fund, we can only offer you about \$400, and, in the furtherance of your work and our own interest in the area, we should be glad to send this amount to you at any time that you may wish it.

The regions which you are visiting in Peru are of much interest to us. We would wish for you all possible success in your undertaking and should look forward to receiving what duplicate specimens you may be able to send to us.

With best personal regards,

Sincerely,

Bassett Maguire, Curator  
Coordinator of Tropical Research

May 22, 1957

Dr. Bassett Maguire, Curator  
Coordinator of Tropical Research  
The New York Botanical Garden  
Bronx Park  
New York 58, New York

Dear Dr. Bassett:

Please forgive the delay which was unavoidable in acknowledging your kind letter of April 23 concerning support of our forthcoming botanical work in South America.

Your thoughtful suggestion that \$400 might be made available is much appreciated. With your experience in expedition budgets you will understand that I can visualize how such additional support will increase efficiency in a number of ways. In other words, I will certainly be grateful to receive your grant.

All herbarium material collected will be turned over to our Herbarium with the understanding that those institutions which have cooperated with me will share in distribution of duplicates.

When you wish to forward the \$400 please make the check payable to the Board of Regents, University of California, and attach a brief covering letter addressed to them and referring to your contribution as toward the "continuation of Professor T. H. Godspeed's South American botanical research." Both check and letter should be sent to me for transmittal to the Regents. From them you will receive acknowledgment.

With many thanks for your interest and cooperation and with all good wishes,

Cordially,

THG:T

CAMBRIDGE 38, MASSACHUSETTS  
March 27, 1947

Prof. T. H. Goodspeed  
Department of Botany  
University of California  
Berkeley, Calif.

My dear Dr. Goodspeed:

Thanks for your letter of March 17th. Here is a reply to some of the points raised by you:

1. I use the terms megaspore mother cell, megaspore, and embryo sac (female gametophyte), but macros pore, gynospore etc. are just as good. The term "embryo sac mother cell" has caused some confusion because some investigators have regarded it as synonymous with "megaspore mother cell", and others with any cell that gives rise to the embryo sac -- this may be the megaspore mother cell itself in tetrasporic embryo sac types, a dyad cell in bisporic types, and a megaspore in monosporic types.

2. In the correction of Ferguson (1927), Cooper (1946) was preceded by Levan (1937) to whose paper Cooper unfortunately does not refer.

I use the term "secondary nucleus" for the nucleus formed by the fusion of the polar nuclei (it may also be called the polar fusion nucleus) and "primary endosperm nucleus" for the product of fusion of the polar nuclei and the male gamete. After triple fusion, the central cell in the embryo sac becomes the endosperm mother cell.

3. The terms "acrogamy" etc. were coined by Longo and perpetuated by Schnarf. A better terminology would be:

PoRogamy - entry thru the micropyle or micropylar end of ovule when a micropyle is not yet formed.

Chalazogamy (basigamy) - entry thru chalaza.

Mesogamy - entry thru any intermediate route.

I am using this terms in my book and have also used them in a review article on THE MALE GAMETOPHYTE OF ANGIOSPERMS which is in course of publication in the Botanical Review.

Thanks very much. I have been receiving Battaglia's publications quite regularly.

I have taken considerable liberty with your Ms. Please feel free to reject any change which you consider to be inappropriate. With best regards:

I am  
very cordially yours

My dear Prof. Goodspeed:

Many thanks for your kind note of May 5th. I am leaving Cambridge on May 20th and flying from New York to Karachi (India) on May 23rd. I request therefore that if you are able to spare any reprints for me in future, they should be sent to me to the following address: Department of Biology, Dacca University, Ramna, DACCA, India.

I shall of course be glad to go through the manuscript again if you would send it to me to India.

Please accept my sincerest appreciation of the gift you made to me of those reprints. You may be sure that they will be put to good use. The second instalment has not yet arrived but they may still come within the next few days.

Best regards:

Yours sincerely

  
P. Maheshwari

P.S. I shall be obliged if you will kindly inform Mrs. Cave about my change of address after May 19th.

New York  
May 23, 1947

Dear Friend:

Another two or three hours and I shall be winging away to India. I am sorry to leave this country for I had begun to have a sincere liking for America and Americans, but the furlough had to end some day.

As a appreciation of the gifts I received from you, I am sending under separate cover a small token which might help you to remember me sometimes.

I expect to be with my family on the 28<sup>th</sup> and will rejoin at Dacca on June 3<sup>rd</sup>.

Best regards:

Yours sincerely  
Anakeshwar

AIR MAIL

Dr. P. Maheshwari  
Department of Biology  
Dacca University  
Ramna, Dacca, India

Dear Friend:

The enclosed, which arrived today, reminded me that your most thoughtful gift had not been acknowledged. It stands before me on my desk and recalls the days of your stay here which were so profitable for us and for you also I hope.

✓  
✓  
Since you were good enough to <sup>vide</sup> delay the manuscript on megasporogenesis, megagametogenesis and fertilization in Nicotiana, much more and better evidence was obtained. Dr. Bradley improved her squash technique and made many more preparations. It then appeared that I had misinterpreted a number of phenomena. The paper was then almost completely rewritten and will appear in the next number of MADRONO. Although I wished to do so, I did not acknowledge your kind assistance since you did not see the article in its final form.

I hope that all is well with you and your family. Your friends here join in warmest greetings and best wishes.

Cordially yours,

P.O. Box 133,  
ZANZIBAR.  
8th March 1955.

Dr. T. H. Goodspeed,  
Botanical Garden,  
Berkeley, California.

Dear Sir,

I venture to write you in the hope that you may be able to help me in my inquiry. I should be very grateful if you would kindly inform me whether it would be possible for me to come over to California and study horticulture as a student gardener in the Berkeley Botanical Garden.

I am an Arab young man of twenty nine years of age, and unmarried. I am a British subject. I have had a good education up to Matriculation standard. I passed the Senior Cambridge School Certificate Examination in 1946; and obtained "Credits" in (1) English Language (2) Geography (3) Mathematics (4) Physics with Chemistry (5) Swahili language, and a "Pass" in (6) History of the British Empire.

I am very much interested in horticulture. I went to England in 1952 and studied horticulture for one year at Monmouthshire Institute of Agriculture and Horticulture. I was awarded the Institute's Certificate. Then I worked in Cardiff Parks Department for six months; and in Torquay Department for eight months. I came back to Zanzibar

1954.

I would very much like to study this subject at I cannot afford to go into a university for a

full B. Sc. degree course as it has been my cherished desire.  
However, I should be very happy indeed to work and study  
as a student gardener in the Berkeley Botanical Garden.

Yours faithfully,  
N.S. Malik

Dear Mr. Malik:

Thank you for your letter of March 8. Unfortunately, there is no instruction in horticulture on the Berkeley campus of this University and in the Botanical Garden here there are only a few positions, none of which is open, and no student gardenerships such as are available in European and English botanical and agricultural institutions.

From what you say in your letter it seems to me that you already have a rather large amount of training and experience in horticulture which should adequately fit you for higher grades of employment in that field.

Sincerely,

Mar. 31, 1954

Dear Doctor Goodspeed:

As I was looking through old  
Better Homes and Gardens, I saw  
an article, May, 1946, you had  
introduced some new types of  
Aletroemarias. Will you please tell  
me where I may get them?

Respectfully yours  
Mabel C. Markham

May 5, 1954

Miss Mabel E. Markham  
1536 South Walnut Street  
San Gabriel, Calif.

Dear Miss Markham:

I have your recent letter concerning Alstroem<sup>e</sup>ria.

The new or little known species of this genus which we obtained in South America have not as yet gotten out into the nursery trade. Actually the majority of them are of more botanical than ornamental importance and are somewhat difficult to grow. I think that you would be most interested in the hybrid type which are offered in most nurserymen's catalogues.

Sincerely yours,

JARDIN BOTANIQUE

February 1956

Dear Sir.

A terrible disaster has fallen upon the French Riviera where my own garden is.

The minima temperature we usually had in uncovered places was 24°F and 27°F in covered ones.

One foot of snow has already fallen this year on the Riviera. The temperature went down to 18°F in uncovered places and we nearly had the same temperature in covered ones as the heavily fallen snow upon trees not used to carry such weights broke down the largest part of the cover.

My collection of tropical and even sub-tropical plants which amounted to about 10,000 varieties has been completely destroyed.

The cold is still on. It will stop the re-growing of many plants from the roots or trunks which will be frozen as well.

In the name of the solidarity between Botanical Gardens I am asking for your help if ever I have the courage to start my collection all over again.

I could give you in exchange seeds of cacti and succulent plants. They all were under glass and have not been damaged.

I mostly lost Araliaceae, all the Aroids, Palmtrees, 24 species of Chamaedorea in numerous exemplaries, 7 different species of Tree-Ferns in many exemplaries, also Bromeliads of which I do not have yet the exact list and many other plants.

I shall in due course of time take the opportunity to send you my list of desiderata. I hope you will be able to help me out in letting me have a few species of remainder of your collection in order to rebuild at least part of the garden I had.

Thanking you very much in anticipation for all you will do,

I am, dear Sir, very truly

Yours

  
Julien MARNIER-LAPOSTOLLE

Dear Mr. Marnier-Lapostolle:

I am very sorry to learn that your famous garden has  
suffered so severely.

Should you decide to rebuild your collections we would  
be glad to supply aroids and fern spores.

With best wishes,

Sincerely,

THG:T

Berkeley 4, California  
July 1, 1957

Dr. T. H. Goodspeed, Director  
Sixth University of California Botanical Garden Expedition

Dear Dr. Goodspeed:

I understand that under your direction Mr. Paul C. Hutchison, Senior Botanist, Botanical Garden, will carry on a vegetational survey in Peru, and possibly botanical collecting in Chile, during the period July-November 1957, as a member of the 6th South American Expedition.

As a volunteer collecting assistant and photographer I am willing to accompany Mr. Hutchison and I understand that under his direction my duties and responsibilities will be as follows:

- 1) To accompany Mr. Hutchison throughout the period above mentioned or as required
- 2) To assist in the preparation of the plant material to be collected
- 3) To secure negatives of plant and other subjects of botanical and other interest, using such of my own photographic supplies and equipment as will be required to obtain the desired results
- 4) To act as interpreter as required
- 5) To promote in general the success of Mr. Hutchison's undertaking

I understand that I shall be at liberty to secure additional photographs of particular interest to me provided that this will not interfere in any way with the carrying out of the above listed duties and responsibilities.

I understand that the cost of my round trip air coach transportation San Francisco-Lima, Peru, incidental expenses en route, costs of passport and visas and cost of my board and lodging and local transportation in Peru will be provided. In addition, I will receive the sum of \$500 representing rental of the photographic equipment which I will provide and which will be insured by me.

I understand that the cost of shipment of exposed film to the United States will be supplied and that following the return of Mr. Hutchison to Berkeley I will be employed for one month at a salary of \$325 to make prints of such negatives as may be selected from a complete set of proofs which I will supply, the cost of chemicals and paper to be provided.

I understand that a 6 months accident and health insurance policy in my name will be provided.

I understand that, in the event of my inability for any reason to carry on the above mentioned duties and responsibilities over the period above mentioned, or if upon Mr. Hutchison's recommendation, you feel that the best interests of the expedition will be served by my withdrawal from it, the advance of \$500 for rental of my equipment will be prorated and the balance refunded.

I understand that the Peruvian portion of the Expedition may be extended for approximately one month beyond the period above stated. If I desire to accompany Mr. Hutchison during such period of extension I understand that my duties and responsibilities will continue to be as above listed and that my board and lodging and local transportation will be provided. If I do not wish to accompany Mr. Hutchison during such period I will inform him sufficiently in advance so that a substitute can be obtained.

Yours truly,

W. Marshall

In the amount of: TWENTY THOUSAND DOLLARS

From the 19TH of JULY, 1957, at noon

to the 31ST of DECEMBER, 1957, at noon

On PERSONAL ACCIDENT (AS PER FORM ATTACHED)

1. It is expressly understood and agreed by the Assured by accepting this instrument that LANDIS, PELLETIER & PARRISH is not one of the Underwriters or Assurers hereunder and neither is nor shall be in any way or to any extent liable for any loss or claim whatever, but the Assurers hereunder are only those Underwriters whose names are on file as hereinbefore set forth.

2. If the Assured shall make any claim knowing the same to be false, or fraudulent, as regards amount or otherwise, this certificate shall become void, and all claims hereunder shall be forfeited.

3. This insurance is made and accepted subject to all the provisions, conditions and warranties set forth herein and in any forms or endorsements attached hereto, all of which are to be considered as incorporated herein, and any provisions or conditions appearing in any forms or endorsements attached hereto which alter the certificate provisions stated above shall supersede such certificate provisions in so far as they are inconsistent therewith.

4. This certificate of insurance shall not be assigned either in whole or part, without the written consent of LANDIS, PELLETIER & PARRISH endorsed hereon.

5. It is understood that "noon" refers to standard time at the place of location of risks assured.

This Certificate shall not be valid unless signed LANDIS, PELLETIER & PARRISH.

ENDORSEMENT NO. 1.

NAME OF ASSURED: WILLIAM HENRY MARSHALL

TYPE OF RISK: PERSONAL ACCIDENT

MEDICAL REIMBURSEMENT ENDORSEMENT - ACCIDENT, SICKNESS AND DISEASE

It is hereby understood and agreed that this insurance is extended to provide reimbursements for expense of Medical or Surgical treatment, Graduate Nurses' and Hospital Fees if the Assured shall sustain accidental bodily injury, or shall contract any sickness or disease, which shall within twenty-six (26) weeks from the date of the accident or contraction of sickness or disease, directly, solely, exclusively and independently of all other causes, necessitate medical or surgical treatment, hospital confinement or the employment of a graduate nurse. The Underwriters will pay, in the event of disability originating within the Certificate term, the actual expense of such treatment, hospital charges and graduate nurses' fees, up to an amount not exceeding ONE THOUSAND DOLLARS AND NO/100 (\$ 1000.00 ) for ACCIDENT and up to an amount not exceeding ONE THOUSAND AND NO/100 DOLLARS (\$ 1000.00 ) for SICKNESS AND DISEASE.

The amounts payable hereunder shall be subject to the following deductibles:

- (a) Each and every claim for Accidental Bodily Injury: NIL Deductible
- (b) Each and every claim for Sickness and Disease: \$25.00 Deductible

EXCLUSIONS:

1. This insurance does not cover claims for any dental charges incurred by the Assured, except as may be occasioned by accidental bodily injury to natural Teeth.
2. This insurance does not cover claims resulting from venereal diseases of any description.

It is further understood and agreed that for any claims hereunder which would be covered in full, or in part, by any Workmen's Compensation Plan or Act, the Assured will be reimbursed hereunder only for the amount by which said Claim exceeds the amount payable under any such Workmen's Compensation Plan or Act.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED

THIS ENDORSEMENT IS ATTACHED TO AND MADE A PART OF CERTIFICATE NO.

60913 OF THE UNDERWRITERS AT LLOYD'S, LONDON.

(CONTRACT X.865) LANDIS, PELLETIER & PARRISH

EFFECTIVE DATE OF THIS ENDORSEMENT:

JULY 19th, 19 57

BY:

R.A. Chapman

(U. of C.)

In consideration of the premium for which this Policy is issued, and subject to the terms and conditions herein contained, UNDERWRITERS AT LLOYD'S, LONDON, (hereinafter called "Underwriters") DO HEREBY AGREE WITH: WILLIAM HENRY MARSHALL

(hereinafter called "the Assured")

A. INSURING CLAUSE: If at any time during the currency of this Certificate the Assured shall sustain any accidental bodily injury which shall solely and independently of any other cause within six (6) calendar months from the date of the accident causing such bodily injury occasion the disablement of the Assured and a claim be substantiated under this Certificate, the Underwriters will pay to the Assured, his Executors, Administrators or Assigns (or in case such bodily injury shall occasion the death of the Assured, to the Beneficiary or Beneficiaries named herein) according to the Schedule of Compensation herein specified within thirty (30) days after satisfactory proof of death or disablement to the Underwriters not exceeding in all the Capital sum of:

B. SCHEDULE OF COMPENSATION:

- 1. Death . . . . . \$ 20,000.00
- 2. Permanent Total Loss of Sight of Both Eyes... \$ 20,000.00
- 3. Permanent Total Loss of Sight of One Eye... \$ 20,000.00
- 4. Loss of Two Limbs (2). . . . . \$ 20,000.00
- 5. Loss of One Limb . . . . . \$ 20,000.00
- 6. Permanent Total Loss of Sight of One Eye and Loss of One Limb . . . . . \$ 20,000.00
- 7. TOTAL DISABLEMENT due to accident which either permanently or temporarily necessarily and continuously disables the Assured from attending to business or occupation of any and every kind or, if the Assured has no business or occupation, necessarily confines the Assured immediately and continuously to the house and prevents the Assured from attending to any of the Assured's usual duties, if any. ~~\$100.00 per week~~ as long as the disablement continues, but not exceeding altogether 52 consecutive weeks for any single disablement. *This Clause Deleted*
- 8. TOTAL DISABLEMENT due to sickness which either permanently or temporarily necessarily and continuously disables the Assured from attending to business or occupation of any and every kind or, if the Assured has no business or occupation, necessarily confines the Assured immediately and continuously to the house and prevents the Assured from attending to any of the Assured's usual duties, (if any). ~~\$100.00 per week~~ (excluding the first week) if the disablement continues, but not exceeding altogether 26 consecutive weeks for any single disablement. *This Clause Deleted*

C. LOSS PAYABLE CLAUSE: Loss, if any, under Item No. 1 of the Schedule of Compensation payable to: CRISTINA WHITE, FIANCÉE OF THE ASSURED

D. TERRITORY: This Certificate is to cover the Assured whilst anywhere in the World.

THE PROVISIONS AND CONDITIONS ON THE BACK OF THIS FORM OR ON OTHER PAGES ATTACHED HERETO ARE HEREBY REFERRED TO AND MADE A PART HEREOF.

THIS FORM IS ATTACHED TO CERTIFICATE NO. 60913 OF THE UNDERWRITERS AT LLOYD'S, LONDON.

LANDIS, PELLETIER & PARRISH

BY: R.A. Chapman

DATE: JULY 19, 1957

.. DEFINITIONS: It is understood and agreed that

1. "LOSS OF LIMB" means loss by physical separation of a hand at or above the wrist, or a foot at or above the ankle;
2. "BODILY INJURY WHICH SHALL OCCASION DEATH" includes, in addition to the coverage herein provided, death by exposure to the elements or physical exhaustion or drowning resulting from an accident or mechanical or other failure of anything used as a means of conveyance or transportation;
3. "NOON" or any other reference to time shall be construed to mean Standard time at the address of the Assured given in this Certificate.
4. "MYSTERIOUS DISAPPEARANCE CLAUSE": It is agreed that if, after a reasonable period of time has elapsed and the Underwriters, having examined all evidence available, shall have no reason to suppose other than that an accident has occurred, the disappearance of the Assured shall be considered to constitute a claim under the Certificate.

It is further agreed that if at any time after payment has been made to the Beneficiary or Payee, their Executors, Administrators or Assigns, by Underwriters in settlement of the Claim, the Assured is found to be living, any sums paid by Underwriters in settlement of the Claim shall be refunded to them by the Beneficiary or Payee, their Executors, Administrators or Assigns, or in the case where such sums have been paid to any third party, by such third party.

F. CONDITIONS:

1. EXCLUSIONS: This Policy does not cover Death, Injury, Dismemberment or Disablement
  - (a) Directly or indirectly caused or contributed to by war or invasion;
  - (b) Directly or indirectly caused or contributed to by intentional self-injury, disease, or natural causes, suicide or attempted suicide (whether felonious or not) provoked assault, duelling, fighting (except in bona fide self-defense); or
  - (c) Directly or indirectly resulting from medical or surgical treatment (except where such treatment is rendered necessary by bodily injury caused by accident within the scope of this Certificate); or
  - (d) Resulting from deliberate exposure of the Assured to exceptional danger (except in an attempt to save a human life), or from the Insured Person's own criminal act); or
  - (e) While the Assured is riding in or on any aircraft being used for any purpose such as crop dusting, seeding, skywriting, racing, testing, exploration or any other purpose other than transportation, or while the Assured is operating, learning to operate, or serving as a member of a crew of an aircraft.
2. NOTICE OF LOSS: Notice in writing must be sent to the Underwriters of any accident or illness of the Assured as soon as reasonably practicable after the occurrence of the accident or illness and the Assured must as early as possible place himself under the care of a duly qualified Medical Practitioner. In the event of death, immediate notice must be sent to the Underwriters. In no case will the Underwriters be liable to make compensation to the Assured or to his representative unless the medical or other officer of the Underwriters appointed by them for the purpose shall be allowed to make any medical or surgical examination of the person of the Assured on the occasion of any alleged injury within the meaning of this Certificate, and so often as the same may be required on behalf of the Underwriters; and, in the event of death, to make any post mortem examination of the body of the Assured as the Underwriters are advised necessary for the purpose of ascertaining the extent of the alleged injuries and disablement or the true cause of death, and no surgical examination of the Assured shall be made at the instance of his representative without due notice having been first given to the Underwriters, so as to enable the Underwriters to have their medical officers present at the same time.

3. No further liability shall attach to the Underwriters under this Certificate after adjustment and settlement of a claim under Items 1 to 8 of the Schedule of Compensation. Provided also that the total sum payable under this Certificate in respect of any one or more accidents or illnesses occurring during the period of this Insurance shall not exceed in all the compensation payable under this Certificate in case of death.

4. SERVICE OF SUIT: It is agreed that in the event of the failure of the Underwriters hereon to pay any amount claimed to be due hereunder, Underwriters hereon at the request of the Assured will submit to the jurisdiction of any Court of competent jurisdiction within the United States and will comply with all requirements necessary to give such Court jurisdiction, and all matters arising hereunder shall be determined in accordance with the law and practice of such Court.

It is agreed that service of process in such suit may be made upon LANDIS, PELLETIER & PARRISH, 558 SACRAMENTO STREET, SAN FRANCISCO, CALIFORNIA, and that in any suit instituted against any one of them upon this contract, Underwriters will abide by the final decision of such Court or of any Appellate Court in the event of an appeal.

LANDIS, PELLETIER & PARRISH are authorized and directed to accept service of process on behalf of Underwriters in any suit and/or upon the Assured's request to give a written undertaking in writing to the Assured that they will enter a general appearance upon Underwriters' behalf in the event such a suit shall be instituted.

5. CANCELLATION CLAUSE: This Certificate may be cancelled on the customary short rate basis by the Assured at any time by written notice or by surrender of this Certificate to Underwriters.

This Certificate may also be cancelled by the Underwriters by delivering to the Assured by mail not less than thirty (30) days written notice stating when the cancellation shall be effective, and in such case the Underwriters shall refund the paid premium less the earned portion thereof on demand.

6. NOTIFICATION CLAUSE: Notice to LANDIS, PELLETIER & PARRISH, 558 Sacramento Street, San Francisco, California, shall be considered as notice to Underwriters hereon.

Mitchel -

I finally am writing you - after all these months.

As you know by now - Paul left last Tuesday by plane for Miami & the northeast. I am left with the truck & everything.

Unfortunately, the contents of the truck have had to be crated as nothing is allowed in it when it leaves Lima. We had not planned on the extra expense so I had to give the bank a personal check to get dollars right away. Money cannot be <sup>CABLED</sup> ~~sent~~ down and there would not have been time..

Will you please transfer \$200.00 to my bank account at the HONGKONG & SHANGHAI

San Francisco to cover my personal check  
of today. I will account when I get  
home on the 25th or later.

Paul said to get money from you if  
needed. I am sending him carbon of this  
letter. Having to have the stuff crated  
means that I may have to stay in Lima  
until Tuesday. I was hoping to leave  
on Sunday.

Am sending the bill of lading on the  
last plant shipment, partly here and copies  
in another envelope (just in case of loss).

When I see you, please transfer the  
money so my check will not ~~bounce~~

Dr. W. Taylor Marshall  
The Desert Botanical Garden of Arizona  
P.O.Box 647  
Tempe, Arizona

Dear Dr. Marshall:

This will acknowledge your letter of September 18 enclosing a list of seed from our recent South American expedition which you wish to receive. Forty-six packets are being sent you separately.

I appreciate your suggestion concerning the growing of additional material from this seed in favor of our research projects. Mr. Hutchison, who has these projects in hand, and I hope that you may find it possible to grow a considerable number of plants in addition to your own needs of each of the numbers being sent to you in order that Mr. Hutchison may see the extent of variation in each case under your conditions. Certain of these plants he might wish to preserve as herbarium specimens or perhaps may wish to ask you to do so and particularly to preserve flowers.

We anticipate somewhat later sending you and a few other institutions a supplementary list of Chilean cacti the seed of which was collected in too small amount for wide distribution.

With best wishes

Sincerely,

THG:T

Dr. T. Harper Goodspeed  
University of California  
Berkeley, California.

Dear Dr. Goodspeed:

We have just finished unpacking and planting the more than 300 cuttings, plants and propagation which you presented to us through Paul Hutchison. A very large proportion were plants not previously grown by us.

My Board of Directors have instructed me to offer to you and the University of California our very sincere thanks for your generosity.

Some propagation of material collected in Chili and Peru by Paul, which we have received, may prove to you the value of having a set of all such material here where we have been particularly successful in growing collected specimens.

In fact a number of new species that have been published in recent years were made possible by deposits of collected material with us which grew and flowered here when the material from the same collections grown at other points were lost.

We make descriptions, kodachromes and black and white photographs of such material as it flowers and fruits for use by the depositor of the material. This we will do on all of your material also and send the results to you as soon as completed.

With renewed thanks and best wishes

Very sincerely yours

*W. Taylor Marshall*  
Director

March  
29  
1954

Dear Harper

Just in case there may be some record of

Daniel Trembly MacDougal

W. A. Cannon

I believe he once lived in Berkeley

✓ B. E. Livingston

V. M. Spalding

✓ F. E. Lloyd

These were all connected with the Desert Laboratory at Tucson in 1905.

What I am seeking is the records of the investigation of the delta of the Colorado River.

Truly

A handwritten signature in blue ink, consisting of a large, loopy initial 'O' followed by a long, horizontal stroke that tapers to a point.

January 10, 1955

Mr. Otis Marston  
2333 Vine Street  
Berkeley 8, California

Dear Otis:

A year-end clean up of my desk at home revealed yours of March 29 along with a number of other letters which should long since have been acknowledged -- my sincere apologies.

Of those you list I recognize all except V. M. Spaulding. Lloyd and Livingston I know are dead. The 1954-55 Who's Who lists MacDougal and gives his address as RFD No.1, Box 170, Carmel. The 1949 American Men of Science lists Cannon as at Stanford, c/o Botany Dept. However, I think that both may have died in the interim although I cannot verify this impression.

With all good wishes for 1955,

Cordially,

THG:T
