The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

The Case of the Uncertain Hand
 It happened shortly before
 Christmas and began with a
 telephone-call received
 from the criminal court in
 Dandepet, where I am just
 living. I was asked by the
 police to take part in the
 detection of a crime. My
 business should be the
 examination of a special
 handwriting specimen. The
 facts of the case were
 supposed to be so the simple:
 Alexander Norway was the
 only employee of a business
 who knew how to open his
 employer's safe. Shortly before
 Christmas - over a weekend -
 500 000 rupees were missing
 out of the safe. Alexander
 Norway was the first who was
 suspected of having stolen
 the money, because his
 finger prints were the only prints
 could be found on the safe.
 But that was not enough for
 a true evidence.

whole night the storm
blown, the last leaf
not fallen down.

(Joan) At first, "was astonished
at that fact, but then she
understood, that she should
live. " It is a sin to want
to die," she said " from now
on I'll try to do my best
to overcome the illness."
It was a calm morning,
the sun was shining and
some blue spots could be seen
in (heaven) the sky.

After the doctor had had his
examination this morning,
Joan asked him in
the hallway for Joan's
situation. " I think the

m₇

greatest danger is over. She
is on the right way. Now
she needs good food and
good mess. I just was grg
just at ~~the~~ old Dehmann's.
He got ~~the~~ flu in the house too, but spg
so heavily, that we had to take
him to the hospital. I think
there is no hope for him. This
morning we found him lying
on the floor, trembling with
great pain. He wore wet
clothes and bottom. v. 10
In the night, he must have gone
out in order to paint something.
We found a ladder and
some green and brown colour.
I can't imagine what he
had done in the night."

Two days later, ~~the~~ old
Dehmann died in the
hospital.

When she told Joan that news,
both were rather sad.

Joan said: "Dehmann was an
old man, and there was
really no hope for him. But can
you imagine what he had done
in the night? Didn't you notice,
that the last leaf did not

The Three Necklaces

"The English are a big nation," said the Cusi being on a steamboat between England and the Breton coast. "And they had a warm heart," he went on.

"Why they have a warm heart" asked a traveler who was standing near the priest. "I cannot explain you that here. But if you want to hear something more about it, I shall you invite to come to my parish on the Breton Ile Loran. There I shall tell you something more."

The traveler promised to come to him.

After a week or two he made drive himself through the canal to the ile by a ferry-boat. There he went to the Cusi.

Both, having had an excellent meal, (they) made their way to the church. It was a poor $\frac{1}{2}$ and bleak

house of which the pavement was uneven, looking like the waves of the sea.

*Jedam to
Soshkarke 3.11.1966*

October 15th, 1965

Dr Vitus Grummann,
1, Berlin-Steglitz, 41,
Lilientorenstrasse, 16.

Dear Dr Grummann,

Thank you for your card dated January 25th, 1965 on which you request information about our lichen herbarium. As we had no record of the specimens in this herbarium it was necessary to work right through it, and list each specimen. This work is now completed, and I enclose a list of the more important specimens and collectors represented here. This list will, I hope, be useful to you in your compilation of a 'Biographical Handbook of Lichenology'. Would you please let us know where this work is to be published.

Yours sincerely,

A. R. Perry,

Assistant Curator of the Herbaria.
