The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear Dave:

Thanks very much for your letter of February 3, 1966 in which you request a loan from our Herbarium of all the specimens representing the genus Uvularia. As you probably know Dr. John H. Beaman, the Curator, is on leave but Dr. Warren P. Stoutamire is with us for the year so that I shall ask him to investigate and send you the material which you have requested.

With best wishes and good luck on your work, I am

Sincerely yours,

W. B. Drew
Chairman

Dear Dr. ROGERS:

In answer to your letter of february 4 th, we sent you a loan of 159 specimens of Manihot. Last week they came back. They apparently had a rather difficult trip and got burned somewhere en-route. The enclosure was found loose, without an addressed wrapper in the mail and was returned to us by the United States Post Office. 37 specimens were lost, but the others don't seem to have been damaged.

I would like to hear from you if you are still interested to receive this material, although now we cannot be sure of the correctness of the labels.

Sincerely yours

MARGARETE EMMERICH
Curator of Herbario

April 29, 1976

Dear Dr. Rogers:

In answer to your letter of April 26, 1976 and my inquiry of April 6, 1976
The specimens of Manihot invoice nos. B-7899, and B-8338 are here, and the loan has
been closed since Aug. 18, 1971.

The discrepancy lies in the fact that a duplicate invoice was made and
filed under Colorado State University. The original was marked transferred from
NYBG and filed under NYBG and that is the one that was closed and not the duplicate
from Colorado.

I'm very sorry for your concern and thank you for answering immediately.
I am doing the same to relieve your worry.

Sincerely,

Alfreida Rehling

Oct. 26, 1973

Dear Dr. Dudley:

It is too bad that you didn't write first before sending the *Manihot* specimens for identification. I have turned down several others who asked because of the severe pressure of work, which does not permit any time for identification of anything.

I am returning the package you sent.

Sincerely,

David J. Rogers
Professor of Biology

Dear Dr Rogers

We have just received a parcel from you containing 99 sheets of American specimens of Manihot from our Loan No.1641, originally made to the New York Botanical Garden, but transferred to Colorado in 1965. One sheet of this loan, Hassler 3466, is still outstanding. Could you please search for it and let us have it.

I should also like to point out that many of the sheets arrived here bent at the edges because of faulty packing.

Yours sincerely

R Ross

Att: Dr. David J. Rogers

LOAN CONDITIONS: Return of borrowed material is expected within six months. Extension of the loan may be granted on request to the Head Curator. Every returned sheet should bear an annotation slip showing the identifier's name. All material borrowed under one loan number should be returned at the same time. No material is to be removed from borrowed phanerogamic herbarium specimens without permission from the Head Curator.

The pink copy of the shipping notice should be mailed to the Head Curator at the time the borrowed specimens are returned. Cancellation of the loan will be recorded on this copy when the specimens have safely arrived. The pink copy will then be returned to the borrower as a permanent record of the loan.

Dr. William A. Weber
Curator - The Herbarium
University of Colorado Museum
BOULDER - COLORADO 80302 - U.S.A.

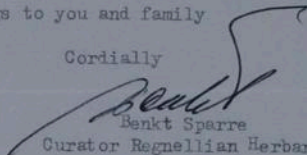

Dear Bill,

We have received in good order the sending of *Manihot* and we thank you and still more (of course) Dr. Rogers, for the careful determinations.

Just one question for Dr. Rogers. When he, some 10 years ago, asked for the material, I remember he did not want to see our *Manihot usitatissimum*. Can I take it for granted, that the specimens labelled with that binomial really is this species?

With all my best greetings to you and family

Cordially

Benkt Sparre
Curator Regnellian Herbarium

Dear Dave,

Thanks for returning our Manihot so carefully annotated. I am glad your studies are progressing. My son was here the other day and was pleased to learn that M. michaelis had stood up. We are very grateful also for the gift of 18 additional specimens.

This will cancel our loan 529, except for the two missing specimens. According to our records, the ones missing are Cardenas 1944, and Bang 1364. If you have a record of what species these are, I suppose they may very well have been returned to NY or some other institution with sets of these South American collections.

With best regards,

Sincerely,

Rogers McVaugh

Dr. Walter Lewis, Curator
The Missouri Botanical Garden
2315 Tower Grove Ave.
St. Louis, Missouri

Dear Dr. Lewis:

Dr. David J. Rogers will be transferring from The New York Botanical Garden to the Department of Botany, Colorado State University, Fort Collins, Colorado. I would appreciate it if you would authorize the transfer of your loans No ⁶²⁻¹⁰⁻⁻⁻⁻⁻¹⁵⁶62-20, consisting of 1 sheets of Manihot to that institution. The curator of the herbarium at Colorado State University is Professor C. D. Harrington, who will be responsible for the loan.

Your acquiescence to this request will enhance the opportunity to prepare a monograph of this difficult and important genus.

Sincerely yours,

Bassett Maguire
Head Curator
Coordinator of Tropical
Research

Dear Bill:

We have received our two loans Nos. 2755 and 2728 of Manihot in good condition and they are herewith canceled. Please thank Dr. Rogers for his annotations and for the nine gift sheets he included. We are very grateful.

We note that these specimens were returned by parcel post. Is this an indication that you have decided to take advantage of museum rates now in effect and that you no longer insist that material be returned to you by insured express? At one time we had trouble with insured packages disappearing. We stopped insuring them and have had no further problems with the mails.

Sincerely yours,

Please sign and return one copy of this blank. It will be sent back to you after the specimens have been returned and the loan cancelled. In the meantime you may retain the other copy as a record of the loan.

This copy is to be retained signed and returned to Pomona College until the loan is cancelled x. (Check one)

The undersigned acknowledges receipt, in good condition, of the following specimens:

8 sheets of *Manihot*, including isotype *M. Davisiae* Croizat.
as selected by Dr. David Rogers

Ordinarily loans are for a period of four months, but when longer periods are necessary, time extensions may be arranged by correspondence. Plants should be returned by either prepaid express or parcel post to:

Lyman Benson
Herbarium of Pomona College
Department of Botany
Claremont, California

Many thanks!

Signed Frank C. MacGeever
Custodian of the Herbarium
Date 10/22/62

Loan cancelled by Ruthie Wilder Date 8/17/1971

(This should be made out in triplicate. Two copies should be sent to the borrower, one retained at Pomona College.)

Dear Dr. Weber,

Thank you very much for returning our loan No. II/81-82 which was lent to Dr. D.J. ROGERS when he was still working at the N. Y. Bot. Garden. The parcel arrived in good order, and we are especially indebted to you and Dr. ROGERS for having added these well mounted Manihot specimens and photographs as a gift to our herbarium, they are highly appreciated.

According to your shipping note I have checked the loan personally and according to the enumeration of species and sheets in our "book of loans": 62 sheets have been sent out and 62 sheets have arrived now. Therefore: stop the search at once, it is wasting of time.

May we ask you for the kindness to inform Dr. ROGERS about this fact and to hand over our sincere thanks for the revision work which he has done as well as for the other annotations he made.

Yours sincerely,

Annelis Schreiber

Dear Sir

We have safely received the 10 specimens of Manihot which you recently sent us as a presentation. Please accept the thanks of the Trustees for this material which we are very glad to have to add to our collections.

Yours faithfully

R Ross
Keeper of Botany

UNIVERSITY OF COLORADO MUSEUM
BOULDER, COLORADO 80302

7 Sept. 1971

Dear Dave:

Yes, the returns are coming in. I am holding them all in one batch until they seem to be reasonably hefty and then if you like I'll send them on to you. You see, you didn't leave any record with me as to what was sent, so any checking will have to be done with the records that you are holding. Eventually these people are going to find specimens that don't belong to them and these will have to be returned to somebody. Do you think that they will send them to the herbarium to which they belong directly or what?

Here are some notes, however:

McVaugh received set except for the two missing.

University of Arizona likewise, one missing.

Missouri Bot. Gard counts 173 sheets. "Note: we arrived at a total count of 173 sheets returned, including 3 types; 153 specimens belonging to MO, plus 20 gift specimens. Our records indicate 157 specimens outstanding (loan 62-10 was 156 sheets including 4 types, and loan 62-20 was 1 sheet Manihot pringlei S. Wats.)". You possibly can figure that one out. They sent xeroxes of the correspondence.

Davis, Calif. acknowledged and closes their file on it.

Univ. of Texas received O.K.

Purdue Univ. received O.K.

Univ. of Cal., Berkeley received O.K.

A white shipping notice was returned without the addressee indicated (you must have slipped up. Anyhow, the lot was 459 Manihot on loan of which you reported 6 short. And 54 mounted specimens as a gift. The fellow signing the form was A.D.Rehling, and he gives their count as 461 loan returned and 55 gift. So I guess you record this as still 4 short. He says "I will close the loan, in the event you find the missing specimens send them on to us."

Pomona received O.K.

In any event, I'll see that you get the whole file when and if you ask for them. O.K.?

Nothing outstanding to report from here. Absolutely nothing.

As ever,

Oh, yes, evidently you forgot to write that letter of recommendation for Pat Nelson. Might be a good idea to get one in the file soon.

27 Sept 1971

Mr. David J. Rogers
Department of Biology
University of Colorado
Boulder, Colorado 80302

Dear Mr. Rogers:

I am sorry that I confused your gift of plant specimens of Manihot with that of Dr. Hunziker's. I have recounted the specimens and find 68 from you and 5 from Dr. Hunziker.

The accession memorandum has been corrected and all specimens accessioned by the Smithsonian Institution as a gift. We have no form to send donors of specimens.

A copy of a letter to Dr. Hunziker is enclosed.

Thank you again.

Sincerely,

James J. White

Dear Dr. Hunziker:

In our recent acknowledgement of your gift of plant specimens of *Manihot*, we erroneously listed the number as sixty instead of five. The sixty specimens, actually 68, were to be considered a gift from David Rogers.

Thank you again for the specimens which are being accessioned by the Smithsonian as a gift from the Universidad Nacional de Cordoba.

Sincerely,

James J. White
Acting Supervisor
U. S. National Herbarium

Dear Sir:

In addition to the specimens of Manihot, which I sent to you yesterday, I am sending a separate box of duplicate materials as a gift from Prof. Ing. Armando T. Hunziker, Universidad Nacional de Cordoba, Casilla de Correo 495, Cordoba, Argentina. Prof. Hunziker indicated that when I had finished my study of these specimens (all Manihot sp.), I should either keep them myself, or, alternatively, give them to the US Nat. I choose the second alternative, feeling that the specimens will be more useful in your collection than in mine.

I will appreciate it if you could acknowledge these specimens to Prof. Hunziker, with some sort of carbon to me.

Sincerely yours,

David J. Rogers,
Prof. of Biology

Mr. James J. White
Acting Supervisor
U.S. National Herbarium
Smithsonian Institution
Washington, D.C. 20560

Dear Mr. White:

I have just received the carbon copy of your letter to Prof. Hunziker, in Cordoba, Argentina. I fear that you have misunderstood the intent and message in my recent gift. The 60 specimens mentioned in my official notification of return of Manihot specimens were not the gift from Prof. Hunziker. The gift from Dr. Hunziker is a much smaller one, of only a few specimens, and was sent to you in a separate box.

Please be kind enough to write to Prof. Hunziker again, correcting the number, as I am certain that he will be confused by your letter.

I would also appreciate it if you could recognize my gift to the Smithsonian, on a regular form, since the 60 specimens which I gave to the US Nat. Herb. represent my own collections, made largely at my own expense, and mounted at my own expense.

Sincerely yours,

David J. Rogers

P.S. Please address your reply to me at the temporary address given above.

Dr. David J. Rogers
The Herbarium
University of Colorado Museum
Boulder, Colorado 80302

Dear Dave,

Thanks for returning our Manihot so carefully annotated. I am glad your studies are progressing. My son was here the other day and was pleased to learn that M. michaelis had stood up. We are very grateful also for the gift of 18 additional specimens.

This will cancel our loan 529, except for the two missing specimens. According to our records, the ones missing are Cardenas 1944, and Bang 1364. If you have a record of what species these are, I suppose they may very well have been returned to NY or some other institution with sets of these South American collections.

With best regards,

Sincerely,

Rogers McVaugh

DESCRIPTION OF SPECIMENS Manihot specimens on loan to David J. Rogers.
There is much confusion in my count of material borrowed from NY. I return all specimens, including all duplicates of Drs. Irwin and Maguire. All duplicates have been mounted (with a few exceptions) for safety. Some of Dr. Irwin's material was stamped NY, much not accessioned. Please check carefully and notify. There are some materials as a gift from me of specimens given by Rev. These are in better location in NY than here.
My count (for what it's worth) is ~~3~~ stamped NY specimens, and ~~103~~ mounted, unstamped NY materials. 584 incl 21 Types

In addition, I send my own personal first set of collected Manihot, ~~103~~ specimens, as a gift. 141
103 mounted

THE NEW YORK BOTANICAL GARDEN
BRONX • NEW YORK 10458  212/933-9400

September 1, 1971

Dr. David Rogers
Herbarium
University of Colorado
Boulder, Colorado 80302

Dear Dave:

We have now received the returned loans of Manihot. Our herbarium specialist has carefully checked our records and counted the material. He counts 581 NY sheets, 141 mounted, unstamped NY sheets, and 103 mounted gift sheets. He informs me that the loan might be 7 sheets short. If you happen to have seven more sheets, send them along. Otherwise, we will assume that the loan is cancelled.

The boxes were all broken open when they arrived in New York. Fortunately most of the sheets were not damaged.

Many thanks for your gift of Manihot specimens. We are glad to add this material to the herbarium.

Sincerely,

Patricia K. Holmgren
Herbarium Administrator

Library Material

NO. OF PACKAGES 1

LOAN CONDITIONS: Return of borrowed material is expected within six months. Extension of the loan may be granted on request to the Head Curator. Every returned sheet should bear an annotation slip showing the identifier's name. All material borrowed under one loan number should be returned at the same time. No material is to be removed from borrowed phanerogamic herbarium specimens without permission from the Head Curator.

The pink copy of the shipping notice should be mailed to the Head Curator at the time the borrowed specimens are returned. Cancellation of the loan will be recorded on this copy when the specimens have safely arrived. The pink copy will then be returned to the borrower as a permanent record of the loan.

DESCRIPTION OF SPECIMENS

6 unmounted specimen *Manihot*, 1 Root sample, to be retained.

2866 (3 sheets) probably Hence, not M.

Director
Herbarium Universitatis Florentine
Istituto Botanico
Via Lamarmora n. 4 -
Firenze, 1, Italy

Dear Sir:

I am pleased to receive all of the specimens which you sent to us on the genus Manihot. The information contained in them was of great use. These specimens are being returned to you under separate cover.

Upon completion of the monograph, I will send to you some additional specimens as well as the publication about Manihot.

Thank you for your attention.

Sincerely yours,

David J. Rogers
Professor of Botany

DJR/ch

DA TRATTENERE
 TO RETAIN

JAN. 1967

Alluvione del 4 Novembre 1966, Firenze

Si informa che i danni subiti dall' Herbarium Universitatis Florentinae in seguito all'alluvione del 4 novembre sono stati minimi. Le collezioni di piante ricevute in prestito da erbari italiani e stranieri sono tutte salve.

Si informa inoltre che l'attività dell' Erbario fiorentino subirà momentaneamente un leggero ritardo poiché il personale è attualmente adibito al salvataggio dei materiali dell'Istituto (particolarmente libri) danneggiati dall'alluvione.

Flood of Florence, 4th November, 1966

We beg to inform you that the Herbarium Universitatis Florentinae has suffered a very low damage on account of the flood of 4th November. Plants borrowed from Italian and foreign herbaria have not been damaged at all.

The present work in the Herbarium will probably undergo a little delay, because the entire staff is at present engaged in order to bring to safety the material of the Institute (books particularly) damaged by the flood.

Alluvione del 4 Novembre 1966, Firenze

Si informa che in seguito all'alluvione del 4 novembre gli arretrati della rivista "Webbia" (serie arretrate, manoscritti originali, clichés, ecc.) hanno subito danni gravissimi.

Per tale ragione attualmente non è possibile dare corso alle richieste di numeri arretrati fino a che non sarà stata stabilita esattamente l'entità dei danni e quante siano le copie rimaste.

Flood of Florence, 4th November, 1966

We beg to inform you that all the material concerning the back-numbers of "Webbia" (single copies, complete sets, original manuscripts, zincs, etc.) have been deeply damaged and sometimes completely destroyed by the flood of 4th November.

For this reason it is impossible at present to comply with the requests of back-numbers, until the amount of damage and the quantity of remaining copies will be exactly ascertained.

Guido Moggi
Keeper of the Herbarium
and Assistant Editor of "Webbia"

Following Manihot specimens returned on May 17, 1967: (insured \$50 parcel post)

Dear Jack:

After numerous counts, by several people independently, we have been unable to account but for 156 specimens of Uvularia. We have searched and sifted through the packing materials, but to no avail.

Could you send us a summary, by specimen, of the loan? If this is not available, would you accept our count? I am returning the blue copy of the shipping invoice, with our count of the loan, but will be willing to modify if the missing specimen can be accounted for.

Thanks for your trouble,

Sincerely,

David J. Rogers
Prof. of Botany

Dear Dave; - Of course we will take
your count on the Urosalpinx. After
all, they are counted here by
undergrad. assistants. Even I have
been known to miscount! How are
things going? Regards, Jack ^{Sharp}

Dear Dave:

I don't seem to find a previous letter but will take care of the matter immediately. I have counted out 50 specimens which were mounted and will have them in the attached package. I have looked through quite a bit of the unmounted material of the Palmer collection but as yet I haven't located a folder on *Uvularia*. He surely must have had a sizeable sample. Best wishes.

Sincerely,

D. B. Dunn
Curator of the Herbarium
