The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

Statement on harmful and offensive content

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Grand Forks, N. D.
July 23-24

Mr. Hamilton Traub:
1712 Penn Ave. Mpls. Minn.
Dear Sir.

I have your unofficial letter
of July 19th. contents fully noted.

I was much surprised to learn that
I had not ans. all of your letters for I am
quite sure I have ans. most of them. and
am certain I wrote you a letter a couple of
three weeks ago that still remains un-
answered.

I regret that I cannot meet with
you and Mr. Truax but as I told you
in my unanswered letter that I have
infinite trust in Mr. Truax. as I know
him to be a gentleman of both honor
and ability and he will be in the Twin
Cities in a short time from now

and I know he will be very glad to meet with you and go over the grounds with you as to what is best to be done.

You say "you have learned thoroughly that the organization cannot be run by correspondence". Will you please write me an official letter and tell me your idea as to how this can best be remedied?

Since there is not sufficient funds to get out an 8 eight paged magazine (and no likelihood of there being any more funds for a long time to come) do you not think it advisable to get out about 250 or 300 copies of a four page magazine right away?

Will you kindly take this matter up with Mr. Tway at your conference with him in the near future.

You misunderstood me about the appointment of committees. I had reference to the appointing of the various National Comm. Believe that is a part of my duties, and ~~if so~~ therefore I think it time ^{for me} to get busy.

We intend to take in the Co Fair tomorrow and also the Old Settlers Association gathering. I also intend taking numerous exhibits.

Give my best regards to friend

Taux when you meet him and tell
him to write.

Sincerely

Fannie M. Heath.

P.S.

I would suggest that you leave
word at once at the last address you
gave Mr. Taux, telling him where he can
find you as I know he wants to meet you.

Mr. A. C. Hildreth,
Division of Botany,
University Farm,
St. Paul, Minn.

After 10 days, return to

April 20-26

NATIONAL GARDEN WEEK

Conducted by
THE GENERAL FEDERATION OF WOMEN'S CLUBS

Federal Departments Cooperating

Department of the Interior, Through the Bureau of Education
Department of Agriculture, Through the Extension Service
The Forest Service and the Bureau of Plant Industry

SLOGAN

"The U. S. A.—Garden Nation of the World in 1930"

President Coolidge writes:

"National Garden Week seems now to be well on the way to establishment as a fixed national affair."

"My dear Mrs. Winter:

"It is a pleasure to comply with your request for a word expressive of my attitude toward the National Garden Week Campaign which is to be undertaken this spring, through the cooperation of the General Federation of Women's Clubs and Better Homes in America. I have so many times noted with satisfaction the efforts of both these organizations that I feel certain any program upon which they unite is both desirable and assured of success. National Garden Week seems now to be well on the way to establishment as a fixed national affair, and I hope this year's observations of it will strengthen its position in the public interest and activities.

"Very truly yours,

"(Signed) CALVIN COOLIDGE."

Secretary of Commerce Herbert Hoover writes:

"Home gardening is an ennobling avocation. It builds self-respect in the individual and in the community.

"My dear Mrs. Sherman:

"The program for National Garden Week commands support from all those who would see more of our houses and our city blocks given that quality of charm and beauty that only growing things can add. Whether it be improvement of a park, or arrangement of shrubbery around a house, or planting of trees, the intelligent cultivation of plants around our homes is to be encouraged.

"It adds to our appreciation and understanding of life. It builds self-respect in the individual and in the community and it may become an ennobling avocation and form of public service.

"I am especially glad that National Garden Week is being sponsored by the General Federation of Women's Clubs in a definite relationship to Better Homes in America demonstration week which is to be held a little later in the year. The home cannot be considered apart from its setting in nature.

"Yours faithfully,

"(Signed) HERBERT HOOVER."

4229 Brooklyn Ave.,
Seattle, Washington.
At Space Rates

Preparations are rapidly nearing completion for the second annual Spring Flower Show which will be held May 8, 9, and 10 in the auditorium of the Women's University Club under the auspices of the Seattle Garden Club.

A novel feature of the show is an exhibit of miniature gardens with three groups --- one for landscape gardeners, one for amateurs and one for school children. Prizes will also be given for the most attractive luncheon table decorations, the most artistic corsage bouquets and boutonnières, and the most artistic arrangement of flowers for living room decoration.

The purpose of the show is to stimulate the knowledge and love of gardening and to assist in the beautifying of Seattle. The show will have classifications for cut spring flowers of all varieties, flowering plants, shrubs and garden plants. Amateur gardeners, professional growers and school children will all be allowed to enter in the various classes, with prizes for each group.

The Seattle Garden Club was recently admitted to membership in the National Garden Club of America, Pasadena and Santa Barbara, California, are the only other cities west of Colorado Springs to have garden clubs admitted to the national organization. Mrs. F.W.Brownell and Mrs. Carl Gould will represent the Seattle Garden Club at the national show and meeting this spring.

NATIONAL ADVERTISING COMMISSION
ASSOCIATED ADVERTISING CLUBS OF THE WORLD

POSTAL SERVICE COMMITTEE
HOMER J. BUCKLEY, Chairman
1300 W. Jackson Blvd., Chicago

April 28, 1924.

To Every Publisher
of Farm Papers
in the United States.

A matter of the gravest importance has been brought to our attention. It affects the buying power of all readers of your magazine.

There has been introduced to Congress, this session, a bill which proposes to increase Parcel Post rates as much as 200%.

This bill is introduced by Congressman Paige.

You recognize that a large part of the merchandise sold in rural districts comes to the farmer through Parcel Post and that he pays the Parcel Post rates. Consequently, a large part of the \$110,000,000 which this Bill proposes to raise in this way will come from the farmer buyer. Nearly every advertiser in your publication will be affected by loss of business resulting from this increased cost of distribution and an unjust and inequitable tax will be placed on the agricultural community which forms your constituency.

This Bill will most likely be passed because of the strong sentiment in favor of the object for which this money is being raised -- the increase of the salary of postal employees.

Unless sentiment is aroused to counteract the pressure being brought to bear on Congress, the Bill as proposed may go through.

The Postmaster General has asked that inasmuch as his department has already spent most of the appropriation of \$500,000 eighteen months ago to ascertain costs with a view to the revision of postal rates, that this entire matter be left until his department makes its report in July or August.

Will you, as an individual publisher, write your Congressman, Senators, and others concerned, protesting against the hasty passage of this legislation?

Will you also publish articles which will advise the farming community of the proposed menace to their interests?

A suggested news article is enclosed. Kindly advise us on the enclosed card what action you have taken?

Sincerely yours,

Homer J. Buckley, Chairman,

Postal Service Commission.

BILL NOW BEFORE CONGRESS WILL TAX FARMER BUYERS

\$110,000,000

PROMPT ACTION NEEDED TO PREVENT "HASTY,
HARMFUL LEGISLATION."

A direct menace to farmers is seen in the proposed legislation now before Congress, covered by two Bills -- the Kelly Bill and the Paige Bill -- introduced this session.

The Kelly Bill proposes an increase of salary to postal employees of \$150,000,000 and to meet this sum, the Paige Bill is introduced and proposes increases in the Parcel Post rates upon a very drastic basis -- the increases in some cases amounting to as much as 200%.

If passed, this Bill will mean that when a farmer buys an article of merchandise, which is sent to him through the Parcel Post, instead of paying 5¢ postage (in Zones 1 or 2) he will have to pay 15¢; if the package is five pounds he now pays 9¢ in Zone 2. The proposed Bill will make this 27¢ and similar increases all around.

Strong sentiment has been worked up in favor of the proposed increase to postal employees. Increases in their salaries are highly desirable. But if they are to be obtained by hasty and inequitable legislation which discriminates against the farmer, it is time to protest vigorously. Every farmer should write to his representative in Washington, protesting against this levy of \$110,000,000 on the farmer buyer.

It may be an easy way for Congress to get rid of the perplexing question of taking care of the increases in salary to postal employees -- just pass it on to the farmers -- but by vigorous action immediately, the farmer can counteract the proposal and show that he will not stand for any such hasty measure.

The folly of the proposed Bill is shown by the fact that it entirely ignores that the Post Office Department has spent \$500,000 to ascertain the cost with a view of revising rates on an equitable basis. The Bill also entirely ignores the fact that different living conditions in various parts of the country, which makes some postal jobs very easy and well paid, but saddle hard work and great responsibility on others who are very much underpaid. The Bill proposes to provide for a horizontal increase.

Your protest, supporting the stand of the Postmaster General, will support a sane and scientific method of adjusting both postal rates and salary increases.

Sample Page from Standardized Plant Names

The plan of the book includes in alphabetical sequence the approved and synonymous scientific and common names of plants in American commerce, together with approved variety names of fruits, and complete lists of variety names in important classes, such as rose, iris, etc.

STANDARDIZED PLANT NAMES

BOLD-face, whether capitals or small letters, indicates approved scientific names.
ITALIC, whether capitals or *small letters*, indicates synonyms or unapproved names.

SMALL CAPITALS indicate approved common names.
Abbreviations: Ag = Economic Herbarium of the United States Department of Agriculture; Ar = Arnold Arboretum, Harvard University; Cy = Bailey's Standard Cyclopedia of Horticulture.

A dagger (†) indicates a horticultural variety for which the Joint Committee recommends the use of the common name alone, although recognizing that the scientific name in *italics*, followed by the dagger, has good botanical standing according to the authority cited.

AEONSBEARD CACTUS

- Opuntia leucotricha*
ABELIA **ABELIA**

J. HORACE McFARLAND, Chairman
HARRISBURG, PA.

HARLAN P. KELSEY, Secretary
SALEM, MASS.

AMERICAN JOINT COMMITTEE ON HORTICULTURAL NOMENCLATURE

Constituted by Action of the

AMERICAN ASSOCIATION OF NURSERYMEN
ORNAMENTAL GROWERS' ASSOCIATION

AMERICAN SOCIETY OF LANDSCAPE ARCHITECTS
AMERICAN PHARMACEUTICAL ASSOCIATION

AMERICAN INSTITUTE OF PARK EXECUTIVES
SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

And in Working Cooperation with

AMERICAN DAHLIA SOCIETY
AMERICAN GLADIOLUS SOCIETY
AMERICAN IRIS SOCIETY

AMERICAN PEONY SOCIETY
AMERICAN POMOLOGICAL SOCIETY
AMERICAN ROSE SOCIETY

AMERICAN SEED TRADE ASSOCIATION
AMERICAN SWEET PEA SOCIETY

OFFICE OF THE SECRETARY
SALEM, MASS.

When the abominable mix-up in plant names bothered you, either in buying, selling, or using, you have doubtless wished that there might be just one settled name for each plant. To meet this need, to "make buying easy," a committee was formed, representing all the organizations above named. A subcommittee (Frederick Law Olmsted, Frederick V. Coville, Harlan P. Kelsey) has labored unremittingly (without pay) for five years in selecting and compiling one approved scientific name for each plant, and one common name where it could be obtained.

"STANDARDIZED PLANT NAMES" is the result--a book of 548 pages with over 45,000 entries, giving the synonyms as well as the approved names, all thoroughly cross-indexed, and in a type arrangement that makes use easy. There are official lists also of the plant groups--as Iris, Peonies, Roses, Dahlias, Fruits, Etc.

"STANDARDIZED PLANT NAMES" will be the name authority in the horticultural trade, in park, landscape and pharmaceutical work, in libraries, universities and government departments, in newspapers and literary work. You need it; you must have it.

"STANDARDIZED PLANT NAMES" is in convenient octavo size, 548 pages, and is published in two editions:

Library edition, on fine quality paper, is bound in dark blue cloth, and sells for \$5 per copy.

Thin India-paper with limp leather binding, in a size that just fits the pocket, sells for \$6.50.

Both editions are now ready for immediate shipment. Your order may be forwarded directly to the Committee, together with check for either edition. For your convenience an order blank is enclosed which should be returned to Harlan P. Kelsey, Secretary, Salem, Mass.

AMERICAN JOINT COMMITTEE ON
HORTICULTURAL NOMENCLATURE.

"STANDARDIZED PLANT NAMES" will not be sold by book stores. It can be obtained only from the Secretary of the Committee.

APPLICATION FOR FELLOWSHIP IN THE NATIONAL HORTICULTURAL SOCIETY

To the Secretary, National Horticultural Society, Henning, Minn.

Nov. 1, 1923. 19

I hereby apply for..... fellowship in The National Horticultural Society of America, and I enclose \$..... to cover dues.

Full name *Mrs. Maude Williams.*

Address *816 W. Washington St. Monroe, La.*

SIXTY-EIGHTH CONGRESS, FIRST SESSION

Encroachments of the Department of Commerce Upon the Field of the Department of Agriculture

SPEECH

HON. L. J. DICKINSON

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Saturday, April 5, 1924

Mr. DICKINSON of Iowa. Mr. Speaker, under the leave granted me I insert the following statement:

The Department of Agriculture has a great organization of 1,957 in the Bureau of Agricultural Economics working on every phase of agricultural production and the marketing of agricultural products. This organization is directed by 115 experts proficient in each commodity or phase of agricultural production and marketing. These experts are assisted by more than 900 specialists in these various lines. The organization disseminates directly or indirectly to the seven and a half million farmers of this country nearly a million statements yearly affecting the marketing of their products and guiding them in adjusting their production to meet world conditions. About one-third of these statements require accurate information from foreign countries to make them of practical value to the farmer and those handling his products.

The information obtained by the Department of Agriculture from foreign countries is received from the following sources:

	Per cent
(a) Attaché service of the Department of Commerce	9
(b) Consular Service of the Department of State	23
(c) International Institute of Agriculture, at Rome	30
(d) Department of Agriculture experts abroad	30
(e) Direct from foreign ministries of agriculture and other agencies	10

About 60 per cent of the 9 per cent of information originating with the commercial attachés of the Department of Commerce is of no use to the Department of Agriculture, because it has already been obtained from other sources and is stale by the time it reaches the Bureau of Agricultural Economics.

The Department of Commerce now seeks to force the Department of Agriculture out of the foreign field and to make itself supreme, as set forth in the following evidence:

[From hearings on Winslow bill (H. R. 4517), p. 108]

Mr. SHALLENBERGER. I would like to ask Doctor Klein if this section here does not convey to your department supreme authority over the State Department and the Agricultural Department?

Doctor KLEIN. And every other department, so far as economic and commercial investigations and reporting, and the trade promotion and commercial intelligence activities of all officers or employees of the United States are concerned.

Just the extent to which the Department of Commerce would go in its supremacy is indicated by Dr. Alfred P. Dennis, special representative in Europe of the foodstuffs division of the Bureau of Foreign and Domestic Commerce, in his testimony before the Interstate and Foreign Commerce Committee in the hearings on the Winslow bill (H. R. 4517), page 38:

Doctor DENNIS. This man from the Department of Agriculture ought to have been instructed by his chief in Washington that when he got to Berlin he should report to the commercial attaché * * * to find out where he stood.

The spirit of this statement by Doctor Dennis is the old and familiar spirit of those commercially minded toward agriculture. Secretary Wallace calls the attention of the Hon. Walter F. Brown to this same peculiar point of view when Secretary Hoover stated:

The Department of Agriculture should tell the farmer how he can best produce * * * the Department of Commerce should tell him how he can best dispose of it.

94634—539

Secretary Wallace said:

The same thought was expressed more crudely on a certain historic occasion when the farmers of North Dakota, who were seeking relief of certain marketing abuses, were told to "go home and stop your hogs." They went home and organized the Nonpartisan League.

This state of affairs is the culmination of a series of encroachments by the Department of Commerce upon the field of the Department of Agriculture beginning May 7, 1921. At this time the Bureau of Foreign and Domestic Commerce asked for \$250,000 for the establishment of industrial divisions. This amount was made available by the second deficiency appropriation act under the title "Export industries." At the hearings on this deficiency bill, when Secretary Hoover was asked if these agencies will have to do solely with manufactured products, he replied, "Yes; and products of agriculture." The chairman called his attention to the fact that there was already an agricultural appropriation for that purpose and asked, "It is not intended to duplicate any of the duties performed under that?" Secretary Hoover answered, "No."

For more than 18 years Congress had been watchful to segregate and to keep segregated the functions of the Department of Agriculture and the Department of Commerce. Because, as stated on the floor of the House by Mr. Mann on January 15, 1903, at the time the Department of Commerce was brought into being, this department was created to serve "the enormous interests of our country not engaged in agriculture." A few days later Senator Nelson strengthened this statement by saying upon the floor of the Senate on January 22, 1903, "The Secretary of Commerce will have nothing to do with agriculture."

On August 15, 1921, a foodstuffs division was organized in the Department of Commerce, and E. G. Montgomery, head of the foreign work of the Bureau of Markets of the Department of Agriculture, was taken over by the Department of Commerce and put in charge of the foodstuffs work. Another division that was established about this time was the textile division, which Mr. Hoover himself stated "goes directly into the agricultural field." At this time various phases of these lines of work were being conducted by the Department of Agriculture. Work in cotton and wool had been conducted for more than 10 years and the department's work with the raw materials of foodstuffs, meats, cereals, and other commodities was of still longer duration.

Just two months after the establishment of the foodstuffs division in the Department of Commerce—to be exact, on October 20, 1921—Secretary Hoover made his position clear as to what he proposed to do in the field of agriculture. In a memorandum to the Hon. Walter F. Brown, chairman of the reorganization committee, Secretary Hoover wrote:

Broadly speaking, the functions of the Department of Agriculture relating to soil production should and when the grain, fruit, or animal moves from the farm and the tree moves from the forest, and the Department of Commerce should take up its activities when manufacture, transportation, and distribution begin.

This statement was made on the strength of the act of Congress approved February 14, 1903, creating the Department of Commerce and Labor, which contains this provision:

It shall be the province and duty of said department to foster, promote, and develop the foreign and domestic commerce, the mining, manufacturing, shipping, and fishery industries, the labor interests, and the transportation facilities of the United States.

This statement was made in spite of the fact that Congress, in order to safeguard the interests of the farmer and to keep those interests from being merged into the combines of big business, of industry, and commerce, had by special act (U. S. Stat. L., vol. 19, p. 241) struck the word "Agriculture" out of the act under which the Bureau of Statistics was operating before it was merged into the Department of Commerce and Labor in 1903.

Since 1914, with the establishment of the Bureau of Markets, the will of Congress has been that the great industry of agriculture, occupying about a third of the population of these United States, should be served not only with regard to statistical information, but more than that, with regard to its market-

Crosby N.D. May 20 - 1924

Dear Mr. Paul:-

I received the copy of the proposed Constitution as submitted by the A.S.S. some days ago and also the Counter Constitution, as drafted by you, to day.

I would be willing to surrender the name as proposed provided the Magazine is continued. Also agree that the plan of voting as proposed in their tentative Constitution would be cumbersome and slow.

I will be giving both plans my careful consideration and upon receipt of your draft of Proposed By-Laws I will report.

Hastily yours,
A. J. Traut.

Whatever the Weather May Be!

*"Supposin' today was the winterest day,
Wud the weather be changin' 'cause you cried,
Or the snow be grass, were you crucified?
The best is to make your own summer, says he,
Whatever the weather may be!
Ye can bring the Spring, wid its green and gold,
An' the grass in the grove where the snow lies cold;
It's the songs ye sing, and the smile ye wear,
That's a-makin' the sun shine everywhere."*

I believe Riley had the gardener in mind when he composed these lines, and I do not think there has ever been a time when they were more applicable than now. We gardeners in this locality certainly need all the solace that literature, good fellowship, faith and hope can give us,—for the weather man has been most unkind.

Rain has been the order of the day for a major part of the spring, and it took real patience and concentrated effort to get the necessary work completed to put the garden in shape. But my force made the most of every opportunity and the latter part of last week saw everything in ship-shape for a splendid blooming season, and the plants in my European Iris Garden seemed to be vying with each other to throw promising bloom stalks, and as I watched the development I could not help but have the thrill of approaching the greatest Iris blooming season my garden has ever had.

But the weather man changed it all.

Thursday of last week, it began to get cooler, and the temperature fell to 30 degrees during the night. Friday showed no improvement as the thermometer registered a further drop to 26 degrees. The weather man seemed to have fallen into the habit of serving cold weather, for Saturday and Sunday followed with freezing

GARDEN CITY, N.Y.

July 21, 1924

My dear Mr. Truab:

Under separate cover we are sending you a marked copy of the July issue of the GARDEN MAGAZINE. On Page 343 you will find an article, - KEEPING CUT FLOWERS FRESH. We believe that this will be of interest to you and to each member of your organization.

We shall be glad to print this in an attractive small rider at our expense, sending enough to you for mailing to each member of your society. We feel sure that they will be glad to have this information in this concise form. On the back of the rider, we will also make to each member of your society a special offer of four months' subscription to the GARDEN MAGAZINE.

This magazine - beginning with the September issue - will be enlarged and its sphere broadened. We feel sure that your members will appreciate having this called to their attention.

Trusting that we may have your cooperation in this, we are

Very truly yours,
DOUBLEDAY, PAGE & COMPANY

(Mrs.) Ellen H. Dangner
