Web site: [www.huntbotanical.org](http://www.huntbotanical.org)

The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *Statement on harmful and offensive content*

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Editor,

Park's Floral Magazine,

La Park, Pa.

Dear sir:

A news item relating to The National Horticultural Society of America is sent herewith and the fellowship would appreciate it very much should you kindly give this subject publicity in the next issue of "Park's Floral Magazine".

The first two quarterly issues of the journal of the Society published in August and November 1922 are entirely exhausted, but the January issue is now in press and a copy will be forwarded to you at the earliest possible moment.

Thanking you many times for this kind favor, I remain,  
respectfully yours,

Secretary

# National Horticultural Society

OFFICE OF THE SECRETARY

Mpls, Minn.,

Jan 5, 1923

Mrs. Fannie Mahood Heath,  
Grand Forks. N. D.

Dear Madam:

With regard to the seal and medal of the Society I beg to report as follows: The Board of Trustees acted upon the suggestion of Mr. Truax which was a very good one, and I also gave it my indorsement that the likeness of John Bartram be reproduced upon the medal of the Society, but a day's research brings out the fact that there is no authentic protrait of John Bartram known (W.J.Youmans' Pioneers of Science in America). We have a description of John Bartram by his son William which runs as follows: "His stature was above the middle size, and upright. His visage was long and his countenance expressive of a degree of dignity with a happy mixture of animation and sensibility."

In the case of John Harvard the founder of Harvard College, the same is true and the deficiency has been made up by reproducing a likeness of the sculptor's <sup>conception</sup> ~~likeness~~ of John Harvard. In this case this would also seem advisable but it will be some years before the Society will be in a position to commission a sculptor to chisel his conception of John Bartram in marble. In the meantime it would probably be best to reproduce only the name on the medal.

Will you kindly discuss the matter frankly and then send this letter with your observations to Mr. Truax and he can then send it along with his observations to Pres. Nelson, and I can then send it

# National Horticultural Society

OFFICE OF THE SECRETARY

to the other Trustees and the matter can be satisfactorily settled at the next meeting of the Board,

Respectfully yours,

*Hamilton Traub*

Dear Mr. Treax,

You Gentlemen have my full permission to chose any design you think best for our Medal. I am not versed on our Great Early American Horticulturists so will abide cheerfully by the decisions of those who are

Respectfully Yours

*Fannie Mahood Heath.*

Dear Mr. Traub:-

We could either use John Bartram's name or revert to the original idea of a Washington Medal or even have a Linnæan one. Any one of these would satisfy me and the only objection to a Washingtonian design is that his name is identified with so many things that the horticultural significance is lost.

Respectfully yours,

*A. L. Treax.*

## Post Office Department

THIRD ASSISTANT POSTMASTER GENERAL

Washington

October 21, 1922.

Mr. Hamilton Traub,  
Webster, South Dakota.

My dear Sir:

In accordance with your request of the 14th instant, which the Postmaster General has referred to me, there is inclosed a copy of Form 3526 on which is printed that part of the Act of Congress of August 24, 1912, requiring the submission of semi-annual statements of ownership, management, etc., by publications entered as second-class matter.

Sincerely yours,

*W. W. Geary*  
Third Assistant Postmaster General, *WGH*

Inc. *d*  
GHH-6

Post Office Department  
THIRD ASSISTANT POSTMASTER GENERAL  
DIVISION OF CLASSIFICATION  
Washington

EXTRACTS FROM THE POSTAL LAWS AND REGULATIONS.

SEC. 443. It shall be the duty of the editor, publisher, business manager, or owner of every newspaper, magazine, periodical, or other publication to file with the Postmaster General and the postmaster at the office at which said publication is entered, not later than the first day of April and the first day of October of each year, on blanks furnished by the Post Office Department, a sworn statement setting forth the names and post-office addresses of the editor and managing editor, publisher, business managers, and owners, and, in addition, the stockholders, if the publication be owned by a corporation; and also the names of known bondholders, mortgagees, or other security holders; and also, in the case of daily newspapers, there shall be included in such statement the average of the number of copies of each issue of such publication sold or distributed to paid subscribers during the preceding six months: *Provided*, That the provisions of this paragraph shall not apply to religious, fraternal, temperance, and scientific, or other similar publications: *Provided further*, That it shall not be necessary to include in such statement the names of persons owning less than one per centum of the total amount of stock, bonds, mortgages, or other securities. A copy of such sworn statement shall be published in the second issue of such newspaper, magazine, or other publication printed next after the filing of such statement. Any such publication shall be denied the privileges of the mail if it shall fail to comply with the provisions of this paragraph within ten days after notice by registered letter of such failure. (Act of August 24, 1912.)

2. All editorial or other reading matter published in any such newspaper, magazine, or periodical for the publication of which money or other valuable consideration is paid, accepted, or promised shall be plainly marked "advertisement." Any editor or publisher printing editorial or other reading matter for which compensation is paid, accepted, or promised without so marking the same, shall upon conviction in any court having jurisdiction, be fined not less than fifty dollars (\$50) nor more than five hundred dollars (\$500). (Act of August 24, 1912.)

3. The statement required by this section shall be made in duplicate, on Form 3526, and both copies delivered to the postmaster at the office of entry of the publication. The postmaster shall forward one copy to the Third Assistant Postmaster General (Division of Classification), and retain the other in the files of the post office. To enable publishers to file such statement promptly, postmasters shall furnish them copies of Form 3526 at least ten days prior to the first day of April and of October of each year.

4. Postmasters shall obtain for the files of their offices a copy of the issue of each publication at their respective offices, in which the required sworn statement is published.

5. Postmasters shall give prompt and careful attention to the making and filing by publishers of the statements required by this section, and promptly report to the Third Assistant Postmaster General the failure of any publisher to file such statement, or to publish it in the second issue of the publication printed next after it has been filed, but in no case shall a publication be denied the privileges of the mail except upon departmental instructions.

6. Where exemption is claimed from compliance with the provisions of this section, the postmaster shall request from the publisher a statement showing the ground on which such exemption is claimed and forward it to the Third Assistant Postmaster General, Division of Classification, together with a copy of the publication.

SEC. 428. Whoever shall knowingly submit or cause to be submitted to any postmaster or to the Post Office Department or any officer of the postal service, any false evidence relative to any publication for the purpose of securing the admission thereof at the second-class rate, for transportation in the mails, shall be fined not more than five hundred dollars. (Act of March 4, 1909.)

INSTRUCTIONS TO POSTMASTERS.

Each statement should be examined carefully when submitted to see that it has been properly executed and contains all the information required by the law, and, if complete, one copy should be promptly forwarded to the Third Assistant Postmaster General, Division of Classification, and the other retained in the files of the post office. Incomplete statements should be returned to the publishers with the request that they be completed so as to give all of the required information under oath. The statement of each publication should show in full the names and addresses of the owners and all persons owning or holding 1 per cent or more of the total amount of bonds, mortgages, or other securities issued by the publication. If a publication is owned by individuals, their names and addresses should be given. If the ownership is vested in a corporation, the name of the corporation should be shown and, in addition, the name and address of each stockholder owning or holding 1 per cent or more of the total amount of its stock. In the event that there are no bondholders, mortgagees, or other security holders, that fact should be stated. In cases of stock, bonds, or other securities held in trust for others, the names of the beneficiaries should be given.

The information required of daily newspapers concerning the average number of copies of each issue sold or distributed, through the mails or otherwise, to paid subscribers during the preceding six months should be shown in the space provided therefor on Form 3526 without any change or alteration in the wording thereof. In the case of newspapers entered as daily, including Sunday, the statement should show the average number of copies of all of the daily issues, including the one on Sunday, sold or distributed to paid subscribers.

### *Apologies for an Error*

On page 255 of August Garden Magazine appeared an advertisement of our friend the Peony and Iris specialist, Mr. W. L. Gamm, of Remington, Indiana. In this ad there were made as follows:

Ten Fine, Named Peonies for \$2.50 or  
Twenty Fine, Named Peonies, for \$5.00

It should have read:

Eight Fine, Named Peonies, for \$2.50 or  
Fifteen Fine, Named Peonies, for \$5.00

Mail delays, beyond our control, made it impossible for us to make the changes before the issue went to press. We feel that in dealing with Mr. Gamm, Garden Magazine readers will make due allowances and we wish to apologize for any extra correspondence which may become necessary to both the advertiser and the subscriber due to this error.

*The Advertising Department.*

GROWER OF  
THE WORLD'S BEST  
PEONIES AND IRIS

**W. L. GUMM**  
**PEONY AND IRIS GROWER**

SEND FOR  
CATALOGUE

Remington, Ind., Aug 25-23

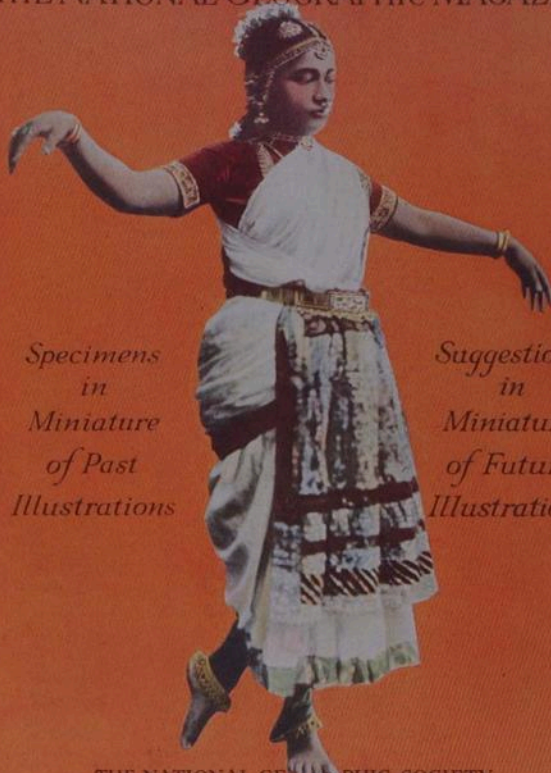

H. P. Traub

Muncapoli Ind.

Dear Sir - Under separate cover am  
sending you a copy of my peony cat,  
in which you will see my introductory  
collections are composed of 8 peonies  
for \$2.50 or 15 peonies for \$5.00 and a  
Geo Richardson fern. The Garden  
mag. made a mistake in my  
add this month which has caused me  
a lot of trouble. Have booked you  
for the 16 peonies and trust this  
is satisfactory, as you get very  
good value for your money.  
Thanks for the order.

Yours truly  
W. L. Gumm

THE NATIONAL GEOGRAPHIC SOCIETY  
WASHINGTON, D. C.

TO AID THE COPYRIGHT OFFICE  
TO EXPEDITE YOUR COPYRIGHT BUSINESS

1. Address plainly all mail or express matter REGISTER OF COPYRIGHTS, Library of Congress, WASHINGTON, D. C.
2. Add on outside of parcel the name and address of sender.  
(Please caution Postmaster not to cover this with his frank label.)
3. Mail the copies, application and fee all at the same time though not necessarily in the same package. These must all be at hand before action may be taken.

The copies of works sent to be registered for copyright may be mailed to the Copyright Office free (under sec. 14 of the copyright law) if directly delivered for that purpose to the postmaster. The Copyright Office cannot furnish any franking labels.

**SPECIAL CAUTION.** According to the ruling of the Post Office Department the money order (or other remittance) is not entitled to free postal transmission. This with the APPLICATION therefore should be forwarded separately by mail, under letter postage, addressed to the Register of Copyrights.

If this is done, and the application blanks carefully and properly filled out, prompt action can be taken and the delay resulting from the need for correspondence will be eliminated.

Do not send currency or coin or postage stamps for fee; but preferably a **MONEY ORDER**. Private checks not certified are not acceptable, and if sent will necessarily be returned.

## Library of Congress

Copyright Office

Washington, D. C.

## PERIODICALS AND PERIODICAL CONTRIBUTIONS

## INSTRUCTIONS FOR SECURING COPYRIGHT REGISTRATION

EACH SUCCEEDING ISSUE OR NUMBER OF THE PERIODICAL  
MUST BE REGISTERED

Under the Copyright Act now in force the following are the steps required to be taken to secure copyright registration for periodicals:

1. **Publish each number** (that is, place it on sale, sell or publicly distribute it), after printing therein the required copyright notice, and before making any application to the Copyright Office for registration. (As to the form and position of the notice see below.)

2. **Promptly after the publication** of each issue send two copies thereof to the Copyright Office, Washington, D. C., with a formal claim to copyright as required by law to protect the copyrightable contents. This may best be done by using application **Form B1**. Also send a remittance by money order for the statutory fee of \$1.00, which sum includes the cost of a certificate under seal. Such certificate the law expressly provides "shall be admitted in any court as prima facie evidence of the facts stated therein."

Application forms for registration will be forwarded by the Copyright Office on request.

Publishers who desire to do so may send in advance a sum to be placed to their credit against which the fees will be charged for each registration to be made thereafter upon the deposit in the Copyright Office of the copies of the successive issues promptly, from time to time, as they are published, accompanied by the required "claim of copyright" made upon **Form B2**. This must state the exact date of publication of the issue (i. e. "the earliest date when copies of the first authorized edition were placed on sale, sold, or publicly distributed by the proprietor of the copyright or under his authority").

## NOTICE OF COPYRIGHT

The law prescribes that the copyright notice shall consist either of the word "Copyright" or the abbreviation "Copr.", accompanied by the name of the copyright proprietor, and the year in which publication was made.

In the case of a periodical the law directs that the notice should be applied either upon the title-page, or upon the first page of text of each separate number, or under the title heading.

The law expressly provides that one notice of copyright in each number of a newspaper or periodical published shall suffice.

## TITLES

The general title of a newspaper, magazine, or other periodical can not be recorded under the copyright law to protect the title *per se*, or apart from any particular issue of the periodical. Copyright registration is not for the purpose of securing the exclusive right to use the title, but to protect the contents of each number.

#### TYPE-SETTING IN THE UNITED STATES

Section 15 of the law provides "That of the printed book or periodical \* \* \* the text of all copies accorded protection under this Act, \* \* \* shall be printed from type set within the limits of the United States, either by hand or by the aid of any kind of typesetting machine, or from plates made within the limits of the United States from type set therein, or, if the text be produced by lithographic process, or photo-engraving process, then by a process wholly performed within the limits of the United States."

#### FRANKING PRIVILEGE

The law requires that the postmaster to whom the articles to be deposited in the Copyright Office are delivered shall, if requested, give a receipt therefor and shall mail them to their destination without cost to the copyright claimant. According to the ruling of the Post Office Department the money order (or other remittance) is not entitled to free postal transmission. This, with the application, should therefore be forwarded separately by mail under letter postage addressed to the Register of Copyrights.

#### FEES

The statutory fee for the registration of any one issue of a periodical is one dollar, including a certificate under seal as explained above. Each issue of a copyright periodical requires the payment of its own registration fee of one dollar.

#### CONTRIBUTIONS TO PERIODICALS

Section 3 of the Copyright Act provides "That the copyright provided by this Act shall protect all the copyrightable component parts of the work copyrighted, and all matter therein in which copyright is already subsisting, but without extending the duration or scope of such copyright. The copyright upon composite works or periodicals shall give to the proprietor thereof all the rights in respect thereto which he would have if each part were individually copyrighted under this Act."

But copyright registration may be specially made for any particular contribution to a periodical if desired. The copyright notice should be printed upon such contribution in the periodical and a single copy of the periodical should be deposited for registration of the particular contribution, accompanied by a copyright claim, for which application **Form A5** should be used.

Remittances should be made by money order or bank draft, payable to the REGISTER OF COPYRIGHTS. No money (currency or coin) should be placed in any letter or other matter sent to the Copyright Office; all remitters are respectfully urged to send an identifiable remittance. Postage stamps should not be sent as fees. Checks can not be accepted. To avoid the trouble of their being returned, therefore, checks should not be sent for copyright fees, unless certified.

EXPLANATORY CIRCULAR No. 6

SUBJECT:

PERIODICALS

(June, 1922-2,000)

## THE NATIONAL HORTICULTURAL SOCIETY

The object of The National Horticultural Society of America is "the increase and diffusion of horticultural knowledge and the stimulation of universal interest in horticulture;" the Society is entirely altruistic and educational in nature, and its scope covers the entire field of horticulture: ornamental gardening, including landscape gardening; amateur flower gardening; professional flower gardening or floriculture; vegetable gardening with special emphasis on the kitchen garden; fruit raising with special emphasis on the home orchard, and all activities allied with horticulture. The Society co-operates in a helpful way with all other horticultural agencies in the field, and serves as a central clearing house for horticultural knowledge in America.

At present the Society is centering its energies on certain definite projects:

The officers are at present engaged in editing "The American National Horticultural Year Book or Annual" which serves as the national garden year book or annual. The first edition will be published during 1924. The subject matter will be treated both from the regional and the topical viewpoint. A comprehensive department will be devoted to each climatic region, the major horticultural interests are each placed in departments, and all the other miscellaneous information of interest to the horticulturist or gardener will be adequately treated. The price of the annual will be kept down to actual cost so as to make it available to all. This will be one of the chief contributions of the Society.

The Committee on Research is at present engaged in the task of providing at actual cost to the great American public a national color chart, practical texts ~~urgendennigth~~ ~~herceach~~ of the climatic regions of North America, and other worth while publications.

The official organ of the Society is The National Horticultural Magazine. Complimentary copies of which publication may be secured free of charge. Nos. 1 and 2, Vol. I, Aug. and Nov. 1922 are out of print, but thus far the officers have been able to secure copies from Fellows of the Society to fill the demand; a limited number of Nos. 1 and 2, Vol. II, Jan. and Apr. 1923, are still available.

The aim of the Society from the first has been to stimulate the founding of comprehensive horticultural societies in all American communities not already blessed with such organizations. The Grand Forks Horticultural Society of Grand Forks, N. D. was the first such unit to be organized, and other such units are at present in the organization stage.

A National Botanical Garden and trial grounds will be sponsored in each of the regional districts. The National Botanical Garden for the Northwest Midland has been authorized for Grand Forks, N.D. The National Botanical Gardens for the Northeast Midland, Southeast Midland, and the Southwest Midland have been authorized for Minneapolis, Minn., Chicago, Ill., and Kansas City, ~~Mo.~~ respectively.

The Society sponsors national chapters for the specialized study of single horticultural subjects. The Nature Study Chapter of the Society has been organized with Mary A. Dartt, Utica, N.Y. as Chairman? The Native Flora Chapter, The Window Garden Chapter, and other chapters are being organized.

The Society will stage national, regional and local horticultural exhibitions. The John Bartram Medal, dedicated to the memory of John Bartram, will be awarded at all chief horticultural exhibitions beginning in 1924.

School gardening will be encouraged, and The George Washington Medal will be awarded in all public school competitions.

The Society co-operates with all other organizations in an effort to standardize horticultural nomenclature.

The Society awards annually, beginning in 1923, its medal to the person making the greatest contribution to horticultural progress during the year. Nominations are received at any time.

The object of the officers from the first has been to render service, unselfish service, first last and always.

United States Department of Agriculture,  
MONTHLY LIST OF PUBLICATIONS.

[JULY, 1923.]

READ CAREFULLY BEFORE ORDERING.

<sup>28</sup>Send no remittances to the U. S. Department of Agriculture.

A copy of any of the publications listed herein, except those otherwise noted, may be obtained free upon application to the assistant in charge of Publications, United States Department of Agriculture, Washington, D. C., as long as the department's supply lasts.

After this department's supply is exhausted, publications can still be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., but by purchase only, and at the prices noted herein.

<sup>29</sup>Send all remittances to the Superintendent of Documents direct. His office is not a part of the Department of Agriculture.

FARMERS' BULLETINS—FOR FREE DISTRIBUTION.

<sup>28</sup>NOTE.—As long as the department's somewhat limited supply of the current numbers of Farmers' Bulletins lasts they may be obtained by all applicants free of charge. They are also for sale at 5 cents per copy unless otherwise noted.

**Distribution of Types of Farming in the United States.** By W. J. Spillman, Consulting Specialist, Bureau of Agricultural Economics. Pp. 30, figs. 5. May, 1923. (Farmers' Bulletin 1289.)

Attempts to analyze in a general way what farm enterprises are adapted to a region by studying the physical, biological, and economic conditions prevailing in the region.

**The Wheat Strawworm and Its Control.** By W. J. Phillips, Entomologist, and F. W. Poos, Assistant Entomologist, Cereal and Forage Insect Investigations, Bureau of Entomology. Pp. 10, figs. 12. May, 1923. (Farmers' Bulletin 1323.)

Describes economic importance of the wheat strawworm, its life history, and the damage it does, and suggests methods of control.

**Lamb and Mutton and Their Use in the Diet.** Prepared in the office of home economics, States Relations Service. Pp. 14, fig. 1. June, 1923. (Farmers' Bulletin 1324.)

Supersedes Farmers' Bulletin 526, "Mutton and Its Value in the Diet."

**Rural Planning—The Social Aspects.** By Wayne C. Nason, junior economist, Bureau of Agricultural Economics. Pp. 30, figs. 25. May, 1923. (Farmers' Bulletin 1325.)

Deals with the improvement and beautifying of various rural institutions, such as recreation places, public grounds, and trade and civic centers. Its purpose is not to tell how things should be done, but to show what has actually been done.

**The Boll-Weevil Problem.** By W. D. Hunter, Entomologist in Charge, and B. R. Cond, Entomologist, Southern Field-Crop Insect Investigations, Bureau of Entomology. Pp. 30, figs. 5. June, 1923. (Farmers' Bulletin 1329.)

Supersedes Farmers' Bulletin 1262 of the same title.

**Back-Yard Poultry Keeping.** By Rob R. Stocum, formerly of the Animal Husbandry Division, Bureau of Animal Industry. Pp. 23, figs. 15. May, 1923. (Farmers' Bulletin 1331.)

This bulletin is a revision of and supersedes Farmers' Bulletin 889, "Back-yard Poultry Keeping."

**Tomatoes as a Truck Crop.** By W. R. Beattie, Horticulturist, Office of Horticultural and Pomological Investigations, Bureau of Plant Industry. Pp. 34, figs. 21. June, 1923. (Farmers' Bulletin 1338.)

*Privileges and Duties  
of Members of the  
National Geographic Society*

**Y**OUR election to the National Geographic Society, attested in your Certificate of Membership, admits you to the largest scientific and educational organization in the world. The sole objects of The Society are to increase geographic knowledge and to diffuse it in popular form among the people.

The Society has a membership of intelligent, progressive men and women who with their families profit greatly from the delightful and valuable information it diffuses in text and picture.

Instead of an organization supported by a few philanthropically inclined millionaires, it is a matter of pride that its work is supported by the small annual dues of hundreds of thousands of people, eager to take part in such an educational project. It has no political or other entanglements, does not request donations, and is responsible solely to its membership.

The individual annual dues of its members, small sums in themselves but important in the aggregate, finance The Society's activities for the increase of geographic knowledge and its diffusion among the people. Each member therefore, has an equal share and pride in The Society's remarkable achievements.

To familiarize yourself with The Society's more important accomplishments you are requested to read carefully the resumé published on the inside cover of the Geographic Magazine.

*Origin of the Society* The National Geographic Society was formed in 1888 by a small group of technical geographers, who, to exchange their carefully compiled and scientifically valuable information, inaugurated a learned journal which was intended for the technician and consequently was unintelligible to laymen.

### Guiding Principles -

- 1- The first principle is absolute accuracy. Nothing must be printed which is not strictly according to fact. The Magazine can persist to many years in which not a single article has appeared which was ~~not~~ absolutely ~~true~~ accurate.
- 2- Abundance of beautiful, instructive, and artistic illustrations.
- 3- Everything printed in the Mag. must have permanent value, and be so planned that each magazine will be as valuable and pertinent one year or five years after publication as it is on the day of publication. The result of this principle is that tens of thousands of book numbers of the Magazine are continually used in school-rooms.
- 4- All personalities and notes of a tribal character are avoided.
- 5- Nothing of a partisan or controversial character is printed.
- 6- Only what is of a kindly nature is printed about any country or people, everything unpleasant or unkindly criticism being avoided.
- 7- The contents of each ~~volume~~ number is planned with a view of being timely. Whenever any part of the world becomes prominent in public interests by reason of war, earthquakes, volcanism, etc.

REPRODUCED BY THE HUNT INSTITUTE FOR BOTANICAL DOCUMENTATION  
MINNEAPOLIS, MINN.

THE NATIONAL HORTICULTURAL SOCIETY, entirely altruistic and educational in nature, was founded by a committee of amateur horticulturists for "the ~~#####~~ increase and diffusion of horticultural knowledge and the stimulation of universal interest in Horticulture", and as an economical and effective solution of the various problems confronting the home gardener in particular, including money outlay, specialization, regional and local activity in the horticultural field, the standardization of ~~#####~~ horticultural plant names and color values, ~~##~~ the evaluation of horticultural varieties of plants, and the building up of a native gardening tradition, or practical gardening science for each climatic region. Co-operation on a continental scale paves the way. For the ~~####~~ very small outlay of \$1. annually amateur and professional horticulturists may now acquire fellowship in THE NATIONAL HORTICULTURAL SOCIETY, which unites the gardening enthusiasts of North America in one great family creating in this way a community of interest. ~~#####~~ A beginning will be made at once to standardize plant nomenclature, and ~~##~~ evaluate the horticultural varieties of plants. ~~#####~~ All fellows receive twelve issues of THE NATIONAL HORTICULTURAL MAGAZINE each year, and other benefits will be provided as opportunity for service offers including THE HORTICULTURAL YEAR BOOK, a pronouncing dictionary of plant names, a national color chart, texts on practical gardening for each climatic region of North America, provision for the proper functioning of local horticultural societies, national horticultural exhibitions in the regional districts, and other worth while benefits.

# Report of the Organization Committee of The N. H. S.

The representative <sup>F</sup> Committee of American and Canadian horticulturists formed in June 1922, and charged with the difficult task of organizing "The N. H. S." has completed its work and with a sincere realization of the high public responsibility reposed in the task entrusted to it deems it proper to make a complete report of all its actions, ~~and giving also the reasons~~

## II

Horticulture, ~~is~~ the science and practice of gardening, ~~is~~ is concerned primarily with the beautification of the home grounds ~~and~~ the public property; the cultivation of the home garden and orchard. The development of American horticulture is of vital importance. No all ~~patronistic~~ encouragement for a proper understanding of the art of horticulture will enable all to possess ideally beautiful home surroundings thus enriching their lives through a daily contact with ~~with~~ the soothing influence the home beautiful. Deep down in the heart of all is the keen desire for a beautiful home, but up to present there has been no agency ~~for this~~ to stimulate universal interest in practical gardening, and it is for the purpose of making the ~~prize~~ of home beautification the common knowledge of all Americans that actuated the members of the org. conven. in the main. — The home is the greatest American institution and is common to all ~~most~~ <sup>most</sup> people spend the greater part of their lives in their homes — gardening has great possibilities as a recreational activity — Materials close at hand and easily obtainable — ~~The~~ Main need is a practical art of gardening for each climatic district — Some thing definite — actual plans and exact designation of species — for each individual local case.

Horticulture is a vital factor in the life of  
Man and has a very distinct lineage.  
Our hort. traditions were derived from Europe  
mainly and a brief sketch of European  
hort. will show the debt we owe to ~~the~~ the  
old world

## II - European hort. & imp. role played by N. H. S.

- 1 - Brief sketch of European hort. -
- 2 - Royal hort. Soc.
- 3 - N. H. S. de France!

## III - American hort.

1. 1842 - 1884 Beginnings of Am. hort.
2. 1884 - 1922 - Period of Specialization
3. 1922 - ~~1922~~ Period of Cooperation  
and Coordination.

~~It~~ We do not want stereotyped standardization,  
but principles to be applied to  
definite conditions

4. Now well into the mature stage of  
cooperation ~~and~~ on a national  
scale, and the coordination of all  
branches of horticulture to fit  
into the lives of the American  
people. - The organization of  
the N. H. S. is the result of the definite  
need of a central clearing house for  
horticultural knowledge in ~~the~~

U. S. - and as such becomes  
a permanent American institution whose  
influence exerted will increase year  
by year

~~1~~ Fellowship in the N.H.S. will not only bring immediate benefits to the individual but will identify him with an organization that exerts a great influence for good in the land. We do not expect a mushroom growth but ~~we~~ will be content with a gradual and permanent increase in fellowship -

These desirous to specialize may do so with profit to themselves and others -

> Local activity has also been provided for - Regional co-operation is also to be desired and everything possible will be done to stimulate the regional feeling -

Those making permanent contributions to hort. will be ~~thoroughly~~ honored by the bestowal of the Society's Medal of Honor -

~~The~~ <sup>present size</sup> ~~first issues~~ of THE NATIONAL HORTICULTURAL MAGAZINE

*100* only a promise of what the periodical will gradually grow to be.

The guiding principles governing the editorial policy of the Magazine as laid down by the Board of Trustees are illuminating:

1. Accuracy shall be at all times the main guiding principle in the make up of the Society's journal.
2. All matter printed shall be judged from the view point of its permanent value.
3. No matter having a partisan or controversial leaning, or dealing with personalities and trivial matters shall be published.
4. Appropriate illustrations shall be used whenever possible to reinforce the subject matter, and such illustrations ~~shall~~ be preferably in colors.
5. Whenever possible, the contents of the magazine shall be so planned that individual issues will thoroughly cover one subject, and the publication of such issues is to be governed by the seasonal timeliness of the subject matter.

#### MEMBERSHIP AND WHAT IT MEANS

**ANNUAL FEES**—Membership in the Society costs only one dollar.

**SUSTAINING MEMBERS**—You are invited to become a Sustaining Member by paying one dollar or more annually in addition to the regular fee.

The Sustaining Membership plan is designed to enable public-spirited members to contribute financially to meeting the cost of work carried on. The Society hopes in this way to increase the amount of money at its disposal without excluding any person from membership by an increase in the fee. A Sustaining Member has no advantage over the regular member, either as regards premium or voting power. It is a purely a voluntary contribution.

**BENEFITS**—Membership carries with it a premium equal in value to the regular membership fee. This the member selects from the extensive list of plants, bulbs and seeds of all descriptions published in the Premium List. The premiums are purchased at wholesale rates and members get the advantage of this fact. This year the list is an unusually good one, and members will find it a cheap and convenient way in which to obtain garden accessions.

Helpful lectures on horticultural subjects are held each year by the Society. They afford a splendid opportunity to obtain practical information on garden topics.

A number of "Outings" are provided each summer. They give members an opportunity to spend several enjoyable afternoons in viewing gardens and in meeting one another.

Members of the society have the privilege of competing without fee for the money prizes offered at the six Flower Shows and in the Special Garden competitions, with the possibility of capturing the Devonshire Cup and the "Civic Trophy."

W. H. COOPER, Secretary-Treasurer,  
Central Canada Exhibition Office,  
CITY HALL, OTTAWA

New York City, January 10, 1920

To All Persons Interested in Iris:

A meeting will be held in the Museum Building of the New York Botanical Garden, Bronx Park, New York City, at 11 A. M., January 29, 1920, for the purpose of organizing an Iris Society. You are cordially invited to be present at this meeting and to cooperate in the formation of the society.

Few plants offer such a reward to the gardener or such interesting possibilities to the experimenter as the Iris. Few plants are as easily cultivated or adapted to as wide a range of soil and climate. Still our knowledge of Iris is incomplete, scattered, and unorganized, and only united effort can put Iris cultivation on a par with that of roses, peonies, gladiolus, or dahlias. United effort will be available through an Iris Society.

Many worthy activities for the Society have been suggested and will be discussed at the organization meeting. Among these are:

1. Compilation of a list of horticultural varieties, with their parentage, synonyms, originators, and dates of introduction.
2. A study of the proper classification of Iris.
3. History of Iris cultivation and of prominent Iris breeders.
4. Compilation of cultural directions for various species and various climates.
5. Research on Iris pests and diseases.
6. Establishment of a Test Garden and of Exhibition Gardens in various sections of the country.
7. Promotion of Iris exhibitions, and of the display of Iris at flower shows.
8. Commending varieties of merit; encouraging the production of new varieties of real quality, and discouraging the introduction of inferior forms.
9. Promotion of popular interest in Iris, through published articles, bulletins, photographs, lantern slides, and lectures.

You will doubtless think of ways and means by which these purposes may be accomplished, or of other equally worthy things which the Society may do - bring your ideas to the organization meeting.

Extend this message to your friends. No formal invitation is necessary, but one will be sent to any address on request.

If you cannot be present in person, may we enroll you as a charter member?

All correspondence before the meeting may be addressed to H. A. Gleason, secretary pro tem., New York Botanical Garden, Bronx Park, New York City.

**St. Paul Dispatch**  
**St. Paul Pioneer Press**

**PROSPECTS IDEAL  
FOR BUMPER YIELD**

**Splendid Conditions Reported  
From All Districts as Threshing Starts.**

"The first threshing of the Minnesota small grain crop for 1922 was done Thursday, a short distance west of Fairfax, where I saw bundles of fine rye being rushed through the thresher," says Oscar H. Smitin, state commissioner of immigration, who returned Saturday from a personal inspection of crop conditions throughout Southern Minnesota.

"I found conditions ideal for all crops in Scott, Le Sueur, Blue Earth, Martin, Watonwan, Jackson, Cottonwood, Sibley, McLeod and Carver counties in all of which the cutting of rye is virtually completed. Some stacking of grain is in progress at Sleepy Eye and other parts of Brown county."

**Optimistic Reports.**

Optimistic telegraphic reports received at the Immigration Department Saturday, indicate that crop conditions in all parts of the state continue very good, and as the crucial period of development is shortened, it is hoped that any serious damage from black rust or any other ruinous drawbacks gradually are passing, and wheat will beat it. However, the Immigration Department correspondents at Crookston and Red Lake Falls report some rust in the red rust stage but not damaging the grain at present.

From Fairmont, Currie, Mankato, New Ulm, Sanborn, Shakopee and Kasota, Immigration Department telegraphic reports are that crops are in good condition and there is no rust yet, with the weather somewhat warmer. Rye is about all cut and is a good yield. Good crops of barley and winter wheat, as well as some oats, are being cut by farmers. Corn is the best ever in that territory and advancing nicely.

**Last Year Exceeded.**

Barring radical climatic reversals in the next ten days or two weeks, the Northwest will harvest a grain crop considerably in excess of last year's, and in many sections bidding fair to rank with bumper productions.

The most favorable outlook in recent years is disclosed in telegraphic dispatches received Saturday from representative sections throughout Minnesota, North and South Dakota and Montana, based on condition as of Friday, July 14.

Black rust is reported as "virulent" in only one section—in North Dakota in the Fargo territory—and the minor showings of the rust in other sections is declared likely to have no material effect on the grain.

The above article recently published in St. Paul Dispatch-Pioneer Press.

Are you going to secure your share of the FARM LAND business this Fall ---which our bumper yield and increased price of farm products is certain to stimulate?

We have talked with many real estate men the past few weeks---and practically all of them look for the most active FARM LAND business this fall, that we have had for two years.

Many Twin City FARM LAND dealers are already receiving splendid results from their FARM LAND advertising that is now appearing in the St. Paul Dispatch-Pioneer Press. Their inquiries are coming from all parts of the Northwest.

You, too, can secure your share of this long looked for LAND business by going after it NOW.

Dispatch-Pioneer Press Want Ads produce results because every day we turn down a large volume of questionable classified advertising to protect the interest of our thousands of readers.

Dispatch-Pioneer Press FARM LAND ADVERTISING produces results because we do not accept copy featuring oil land, leases or undeveloped mineral lands---just advertising featuring FARM LANDS that produce crops or will produce crops when cleared.

Dispatch-Pioneer Press Want Ads produce results because these papers have a daily circulation now in excess of 155,000---the largest daily circulation in the state. Sunday 129,000---and circulates in over 4,000 towns and cities throughout the Northwest.

A prominent leader in education says that he knows of no better measure of professional spirit than membership in the National Education Association. He also feels that such membership is a good estimate of professional spirit in the state. He considers that an enrollment of 25 per cent is highly commendable. Pick out the states in the above table that are already on the 25 per cent list. Is yours there? If 25 per cent shows commendable professional spirit, we might well give the WITH HONOR distinction to states having 50 per cent and above. Count the number which can claim this WITH HONOR rating. Should the number in this class not be increased? In no instance should a state be satisfied with less than 25 per cent of its teachers enrolled at the end of the school year. The 100 per cent enrollments in elementary and high schools are largely responsible for high enrollments in the state. All should join in congratulating Hawaii on her 88 per cent record.

This count of members was made January 1. Another count will be made in April. Keep

## SAVING OUR WILD FLOWERS

"Flowers are the sweetest things that God ever made and forgot to put a soul into."—BEECHER.

WILD flowers are smiles of beauty on the face of our Colorado landscape and they help the pleasant countryside tune the spirit to a serene harmony of mood. Cheerless and sad will we be when our beautiful flowers are all gone, as they will be unless we use care and wise management to preserve them.

During the summer months our mountains are overrun with tourists who are eager to see our blue Columbine which they have hitherto known only by reputation as Colorado's state flower. The Columbine is the friendly flower, for always, as soon as you see it on the hillside or among the trees, it is nodding a welcome to you. The visitors to our state are a problem, but we have a greater one in our own thoughtless people. We are careless through long familiarity with these gracefully nodding flowers of heaven's own blue.

Unless several steps are taken soon the sunlit heights will know them no more and their ephemeral but enchanting beauty will have expired forever. Even the wild winds will sob in their dismay.

Do not try to take up the Columbine for transplanting unless you are prepared to dig for it as the tap root is over a foot long in a large plant. As you can never keep the soil around the roots, mountain soil just won't stay, you should put the root in water for a couple of hours before setting it out in a shady place. A very good time to move the plants is in the fall just before the ground freezes and keep the root covered with snow until everything starts in the spring.

Save the seed from your Columbine and plant in a shady place that you will be in no hurry to use for something else, as the seed is slow about starting.

The Mariposa Lily is another flower that we must guard. These lilies seem fairly tethered to earth with their root bulbs so deep in the ground. These bell-shaped flowers of purity are also raised from seed although very few of the seed will grow.

The true Anemone, with its flowers of pink and white held daintily aloft and seed pods that are balls of cotton, are easily transplanted or raised from seed. The Blue Flax that reflects the blue of the sky in its swaying flowers, the Shooting Star with its cheery bright blossoms, the Pink Plumes with their white tipped, berry-shaped flowers and pink-plumed seed balls, are all rare enough to need our protection.

The Wand Lily with its stems of fairy white bells and the Red Lily will soon be gone from our mountains. The Sneezeweed and the Gaillardia with their gorgeously bright flowers, any one of the twenty-seven varieties of Asters, the Purple Bell Flower and the Harebell are all worth saving for their beauty and grace.

## NEAR EAST RELIEF

To the Women's Clubs.

Dear Friends:

We have all been saddened to learn that the distressing conditions among the women and children in lands made sacred by Bible history are still so bad that tens of thousands of women and children are suffering untold misery during these very winter months. Two American women physicians, Dr. Esther Lovejoy and Dr. Mabel Elliott, advise us that these unfortunate women in great numbers are suffering in most unbelievable ways. There are over a million and a quarter refugees at the present time, and there are a few girls between the ages of 15 and 25 among them. The Turks did not allow them to escape. One hundred thousand girls are just now beyond our reach, but the women and children can be helped and we shall hope for a day when we can get to those girls who are in enforced slavery.

It requires \$60 to save from death one of these women or children.

We write to you in the hope that your club may be willing to save the life of one or more of these unfortunate victims of Turkish wrath. We would be glad if you would bring the matter up before your club and let us know the result.

On behalf of these women and children who have suffered so much we make this appeal.

Very sincerely yours,  
WALTER S. HOPKINS,  
State Director,

413 Chamber of Commerce Bldg.  
FLORA S. MCHARG,  
Member Grain Committee.

The Alpine Forget-Me-Not, Calypso and Twin Flower are very rare and very delicate treasures and you will be fortunate, indeed, if you can get them to grow for you.

These flowers were given to us to enjoy while they teach us lessons of beauty and oftentimes as we wander over the hills we find the air is touched with the lazy fragrance of hidden flowers.

When you know that some of these little flower friends are in danger of their very existence, bring them into a safe place in your flower gardens and scatter their seed back on the mountainside to grow there and bloom.

When out on a trip to the haunts of these flowers, do not pick all of the blossoms from any one plant. Leave at least one to go to seed. Anyone wishing seed from the Blue Columbine, Mariposa, Anemone, Blue Flax, Gaillardia or Pink Plumes, and who will write to me for them, sending postage, I will send as well as my supply of seed will hold out. I can save seed from any that I have named this summer and fall and will gladly send to those who are interested.

ELLA JEAN ORMES,  
Cripple Creek, Colo.

## CONSERVATION WEEK

By Mrs. B. F. Stickley,  
Chairman of Division Conservation Natural Resources

THE first week of February has been designated as Conservation Week by the chairman of this division and she earnestly requests the clubs to have programs at that time concerning the subjects set forth in the November number of the CLUB WOMAN: Good Roads, Trees, Birds, Wild Flowers, Parks, City, State and National; Nature Study in the Public Schools, Home and School Gardens; Historic Ruins in southwestern Colorado.

Information in regard to wild flowers, especially the Blue Columbine, their transplanting and growth from the seed, may be obtained from Mrs. Lester C. Ormes, Cripple Creek; Nature Study is in charge of Mrs. L. X. Snyder-Greeley. Consult Mrs. Gilbert Weir, 1300 Oneida street, Denver, in regard to the Historic Ruins in the southwestern part of our state. Mr. J. A. Jeancon, State Museum, Denver, will talk upon this subject for clubs.

The members of the U. S. Forestry Service in various parts of the state will undoubtedly respond willingly to requests for talks upon Forestry. Mr. H. N. Wheeler, Federal building, Denver, has been secured for Denver and vicinity. Mr. Harold I. Borden for Leadville and the surrounding country.

Correspondence with the U. S. Bureau of Agriculture in relation to suggestions for control of the English sparrow, whose depredations upon gardens and other birds were the subject of complaints from various parts of the state at the last annual meeting, resulted in the statement of several methods of destruction of these pests by destroying the nests, by poison and by sparrow traps.

Of the latter, several firms are engaged in their manufacture. Bulletin 493 may be obtained from the Department of Agriculture, Washington, D. C., for five cents, describing a method of making traps, also of preparing poisoned wheat that will accomplish the desired result. The time to use poisoned wheat is in the winter or very early spring before other birds have arrived.

Further information upon this subject as well as those not already provided for may be obtained from the chairman of the Division of Conservation, Mrs. B. F. Stickley, Leadville, Colo.

## INVITATION

In behalf of the officers I take pleasure in extending you a special invitation to become an active member of the NATIONAL EDUCATION ASSOCIATION, and I trust you will be kind enough to accept. We are sending this card to many teachers who, because of their having the true professional spirit, would make worthy members of the Association.

The By-laws permit you to choose whether your membership will apply to the year 1922-23 or to the year 1923-24. Show by underscoring the year on the opposite side of this card. If you decide on membership for 1922-23, you will receive all of the JOURNALS for the present school year, and you will not need to pay dues again until during the next school year. If you wish your membership to be for the year 1923-24, you will begin receiving the JOURNAL with the May number of this year and your membership will cover next school year. We advise that you have your membership cover the present school year owing to the valuable articles in the JOURNAL for this year.

Our slogan for the year 1922-23 is "a membership of 250,000 and a 100 per cent service to the profession." The Association is proud of the service it has rendered for increased salaries and for more permanent tenure, but it hopes to render a much larger service with its increased enrolment.

Cordially yours,  
Professional spirit vouched for by

J. W. CRABTREE, *Secretary.*

MEMBERSHIP ON SPECIAL INVITATION  
OF THE  
**NATIONAL EDUCATION ASSOCIATION**  
1201 SIXTEENTH STREET N. W. WASHINGTON, D. C.

I hereby accept the invitation to become an active member of the National Education Association and inclose \$2 to cover membership dues for either the year 1922-23 or 1923-24. I am underscoring the year for which I wish my membership dues credited. I understand that I am to receive the JOURNAL monthly and that I will be entitled to all the advantages of active membership in the Association.

July 31, 1923

Dear Sir:

Are you not surprised to learn that Minnesota is only ninth among States in point of membership in your National Geographic Society?

By reason of her magnificent support of education and her interest in science, Minnesota should be first, yet she is surpassed in number of members by Michigan, Ohio, Illinois, and five others.

As yet, only one out of 134 people in Minnesota is enjoying and profiting from membership, whereas one out of 92 in Massachusetts and one out of 63 in California find The Magazine indispensable. The Trustees, therefore, deem an increase of membership among Minnesota's progressive and intelligent people both logical and desirable.

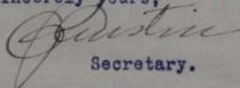

Minnesota's ninth place on the list, clearly, is due more to neglect of Minnesota's members to nominate their friends than to any lack of State interest in humanized geography.

Will you not review your wide list of friends? You should find many who would appreciate nomination and benefit greatly from contact with The Society. Very likely some long have desired membership but have been deterred by delicacy from requesting you to nominate them.

These friends, if nominated and elected promptly, will receive a copy of the magnificent Map of the United States which many members regard as well worth a full year's dues. They, also, will become members in time to receive the remarkable June special number devoted to "Washington, Capital of the Nation". The August issue, with 16 natural color full-page plates of Fish and 28 pages of camera studies of Birds by William L. Finley, they, too, will treasure for years among their outdoor books.

May we, therefore, bespeak your valuable co-operation in increasing Minnesota's representation by nominating your friends on the enclosed blank and by mentioning the work and benefits of The Society to those whom you meet? It will give me pleasure to see that your nominees are notified of your courtesy and that their applications are brought before the Membership Committee.

Sincerely yours,

Secretary.

Mr. Hamilton Traub,  
% National Hort. So.,  
Henning, Minn.

Dear Sir:-

In the August number of The GARDEN MAGAZINE an article will appear that is written especially for all lovers of Iris. It deals with the new varieties of this beautiful flower and the latest cultural methods.

As a member of the Iris Society, we know that this will be of the greatest interest to you and we take pleasure in sending you this advance notice of the publication of the article.

You may not know that there has recently been organized The National Garden Association, formed to coördinate all the various national garden and horticultural activities. The Iris Society is one of the coöperating societies. Because of your evident interest in beautifying our country, I shall be glad to propose your name for membership in the Association.

The yearly dues are \$3.00, this including one year's subscription to The GARDEN MAGAZINE which has been chosen as the official publication of the Association.

As a member, you will be entitled to receive all the booklets and pamphlets mentioned each month in the special department of The GARDEN MAGAZINE devoted to this work. We will also give you all possible aid with your garden problems.

We are enclosing an enrollment blank for your convenience in sending your membership fee.

Thanking you for your interest, we are

Faithfully yours,

THE NATIONAL GARDEN ASSOCIATION

SOCIAL AND CHARITABLE CORPORATIONS.  
GENERAL PROVISIONS.

(SECTIONS 6523-6533, CONDENSED.)

Any three or more persons may form a corporation for the promotion of religious, social, moral, educational, scientific, benevolent, fraternal or reformatory purposes. They shall sign a certificate containing:

1. The name, general purpose, plan of operation, and location of the proposed corporation.
2. The terms of admission to membership and the amount of the monthly, quarterly or yearly contributions required of its members.
3. If there be a capital stock, the number of shares and the amount of each share.
4. The officers of the corporation or society, with time and place of electing or appointing the same, the number of trustees, directors or managers, if any, who are to conduct the transactions of the society during the first year. Provided, however, societies for the promotion of temperance or social or moral reform may hold their annual meetings for election of officers and transaction of business at such time and at such place in the state as a majority of the members may decide.

The certificate above referred to shall be acknowledged and filed with the secretary of state and recorded with the register of deeds of the county where the corporation is located. Amendments may be made in the manner provided in case of ordinary corporations except that publication of an amendment is not necessary.

Such corporations may make by-laws, may sue and recover judgment

for not to exceed \$20 per share upon subscriptions to its stock where ten days' previous notice of assessment has been given. The certificate may provide for the election of a specified number of its directors, trustees or managers by another corporation. Dividends may be declared on its stock out of net annual receipts after payment of outstanding indebtedness, but its property otherwise may not be distributed among its members until dissolution of the corporation. It may acquire and convey or sell any real or personal property, and may lease, mortgage or use property acquired as its interests may require. It may not divert a gift, grant or bequest from the purpose specified by the donor without his consent. Where operating a hospital, it may preserve ten acres upon which the hospital is located free from a public street or alley. Trustees of an incorporated college or seminary may prescribe its course of study and discipline and may grant customary degrees and diplomas. Such college or seminary may be visited and examined by the superintendent of public instruction. Officers and agents thereof may be required to give bonds. Each year report shall be made to the superintendent of public instruction of the name of each trustee, officer and student, the amount of stock subscribed, donated and bequeathed, and the amount actually paid in. An existing institution, by complying with these provisions, may become a corporation, and may transfer to such corporation all its property subject to existing liens thereon. (Powers enlarged by C. 274, Laws '17.) (Filing with secretary of state in lieu of recording provided by C. 519, Laws '23.)

CORPORATIONS - EDUCATIONAL AND  
HORTICULTURAL - Manner of Incorporation.

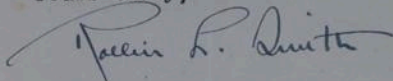

Hamilton Traub,  
Henning, Minn.

Dear Sir:-

Our laws expressly authorize the incorporation of social and charitable corporations. See Section 6522 - 6533 GS 13. It is possible that the organization you have in mind may be incorporated under the section cited.

A copy of our laws relating to corporations may be obtained from the Secretary of State upon application.

Yours truly,

Assistant Attorney General
