Web site: [www.huntbotanical.org](http://www.huntbotanical.org)

The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *Statement on harmful and offensive content*

The Hunt Institute Archives contains hundreds of thousands of pages of historical content, writing and images, created by thousands of individuals connected to the botanical sciences. Due to the wide range of time and social context in which these materials were created, some of the collections contain material that reflect outdated, biased, offensive and possibly violent views, opinions and actions. The Hunt Institute for Botanical Documentation does not endorse the views expressed in these materials, which are inconsistent with our dedication to creating an inclusive, accessible and anti-discriminatory research environment. Archival records are historical documents, and the Hunt Institute keeps such records unaltered to maintain their integrity and to foster accountability for the actions and views of the collections' creators.

Many of the historical collections in the Hunt Institute Archives contain personal correspondence, notes, recollections and opinions, which may contain language, ideas or stereotypes that are offensive or harmful to others. These collections are maintained as records of the individuals involved and do not reflect the views or values of the Hunt Institute for Botanical Documentation or those of Carnegie Mellon University.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

1124 West 51st Place,  
Los Angeles, California,  
August 28, 1928.

Mr. H. J. McKeever,  
Torrey Pines Experiment Station,  
LaJolla, California.

Dear Mr. McKeever:

Please let me know when you will be in the Yuma locality again and whether, at that time, it would be convenient for myself and Prof. Marcus E. Jones to go with you from there to the Arizona "Native Palms".

Also please advise me as to the route. Do you go in from Blythe or do we cross the river at Yuma? How near do we go by auto and when is the best time of the year to make the trip? I must soon make a trip to Blythe on date business and it might be that you could accompany us at that time and we could make the trip to the palms at the same time. I may have to make a short trip to Arizona (Sacaton and Sells) soon and in that event I would not want to make the Blythe trip until my return from there.

Sincerely yours,

Frank A. Trackery,  
Senior Agriculturist.

Aug 29, 1928

Dear Mr Jones:

I have your letter of August 27 and being forewarned is of course equivalent to being forearmed. So far nothing untoward has happened in reference to Mr Clabey's connections with the Los Angeles garden, but I will keep a careful watch on the situation in view of your statements. The only arrangement I have made with Mr Clabey was to receive his herbarium on deposit; the actual mounting, now practically finished, is being done at the expense of the garden. Matters are apparently progressing well.

I hope we shall see you again in Berkeley on your return from Mexico, and by that time I believe that the entire Mexia collection will have been distributed so that the specimens will be available for study

Very truly yours

Ed Merrill

Dear Sir:

I was called down to your house last night at 7:30 and found a fire going in back of your house. It burned the fence and in a half hour more would have got the garage and another fence. It is necessary that you clean out your back yard and also, start no fires after 8 A.M. without a fire permit. You are subject to heavy fine if this rule is not adhered to.

Fire Chief

Monday

Dear Mr. Jones,

This is indeed a busy world, and for the past month my correspondence has been sadly neglected.

We came down from camp on the seventeenth. I stayed home for a little over two weeks, and played. We went to the exposition, spent several days at the beach; I took care of my sis' family while she enjoyed a weekend at the cabin at Arrowhead - she + my brother-in-law, and some friends. I had a small family of five - ~~three~~ two nephews, one niece, and two other boys, son + brother to the friends who had gone along to Arrowhead. You would have loved to have seen me in the role of

Midge Hillard  
pm 18-17-28

mother + housekeeper, cook and all!

Went to the air meet and saw  
Williams plane crash to earth.

Took two girls, last years botany  
students to Mt Wilson + Lowe, walking  
forty miles in three days, - eighteen the  
third day. Met a woman lawyer from  
Sidney, Australia who was very interesting.  
She had been on a vacation, - went to  
England, Scotland, Norway, Canada, here.

Next she is going to New Zealand. She loves  
hiking - especially mountain climbing.

Saturday I went to a fancy Bridge  
Party at the home of Chas. C. Lummis, author &  
relic-collector. His home is surely interesting  
- more junk that he has collected - mostly

Indian and Spanish - everything from  
a skull-with-the-hair-still-attached, to  
Father Serra's old chair.

Registration is nearly over now. The  
Botany sections are not very full for some  
reason. I am to work with Dr Sponsler  
and Dr Scott again, so I'm happy.

I am reading a travel ~~to~~ book of  
Mexico, - "A Gingo in Mañana-Land," by  
Harry Foster. It is very interesting, mentions  
many of the places you mentioned in your  
letters from there. Also I'm studying Irish  
History. Am going to audit German, - so I'm  
becoming quite cosmopolitan.

Enough for now -  
Sincerely,  
Midge

Who's Who Among North American Authors

PUBLISHED BY  
GOLDEN SYNDICATE PUBLISHING COMPANY

EXECUTIVE OFFICES  
SUITE 523 PACIFIC MUTUAL BUILDING  
PUBLISHING PLANT: 122 WEST THIRD STREET

LOS ANGELES, CALIFORNIA

157

September 20, 1928

Dear Mr. Jones:

We are now compiling data for Volume IV of WHO'S WHO AMONG NORTH AMERICAN AUTHORS. This work is accepted as the standard in its class of subject and is very generally used in public libraries and educational institutions. The biographical sketches contained in each volume covers the United States and Canada.

We are desirous that your biographical sketch should appear in the forthcoming edition. To that end we are enclosing Questionnaire, and urge that you return same, fully filled out, as soon as convenient. It is very essential that you fill it out with all details yourself, or that you commission some one to do so for you, as the work is so extremely heavy at this end of the line, in connection with the issuance of each volume, that we can no longer be responsible for the accuracy of such sketch unless properly submitted. Please do not refer us to any other published record for data, as in such case it will necessitate our returning the Questionnaire to you for completeness unless filled out when you send it to us, since we do not copy from any other records.

There are two sections to WHO'S WHO AMONG NORTH AMERICAN AUTHORS. The first section has to do with only those men and women who have had their writings published in book form. This we call the Authors' Section. The second section has only to do with writers who have contributed to magazines, the press, published bulletins, or have done editorial or newspaper correspondent work. This we call the Writers' Section. In the Writers' Section all classes of writing are incorporated; which is also true, of course, of the Authors' Section.

It is only by invitation that authors and writers appear in this work, and there is no financial obligation of any nature. Neither is it essential that you purchase a copy of the book. The order blank placed at the end of the questionnaire is solely for your convenience, in case you desire a book when published.

May we not hear from you by return mail?

Cordially yours,

GOLDEN SYNDICATE PUBLISHING COMPANY

Professor Marcus E. Jones  
Department of Botany  
Pomona College  
Claremont, California

Dear Professor Jones:

I spoke to you last June when you were in Berkeley about letting me know which of your publications are still available, and I am writing now to let you know that I have returned to Berkeley and am anxious to obtain such of the publications as you have. I am particularly interested in your "Contributions to Western Botany."

As I recall it, your *Astragalus* paper is \$5.00, which is more than I have to spend at this time, and so you need not send that. I should be glad to receive your other papers and your bill for the same at any time.

I hope that you have had a pleasant and profitable summer and will have many interesting field trips during the coming year.

With personal best wishes, I am

Sincerely,

Your friend,

*David D. Keck*

W. W. CAMPBELL,  
PRESIDENT OF THE UNIVERSITY

UNIVERSITY OF CALIFORNIA AT LOS ANGELES

ERNEST C. MOORE,  
DIRECTOR

Dear Mr Jones,

Thank you for all of your advise - it is sound I'm sure - but I have reformed. I drink so much water I feel like an "Olla" or a canteen. But the cause of my dry skin is that it isn't nourished. In other words I have poor circulation. Be that as it may, I'm feeling fine & I do love to hike. The forty miles was fun.

We went skating Tuesday night and I skated better than last year. It surely is fun. There was a man there skating on stilts - about two or half feet above the floor. He crashed once - very hard.

For the love of mud bawl Hitchy out about not taking care of himself. He'll be where Tom is one of these days if he isn't careful. Tom seems quite cheerful and all, doesn't he?

only don't say  
I told you so.

Midy - Hillstead

W. W. CAMPBELL,  
PRESIDENT OF THE UNIVERSITY

UNIVERSITY OF CALIFORNIA AT LOS ANGELES

ERNEST C. MOORE,  
DIRECTOR

Saw a dandy play last night - Irving  
Pitchell in "The Devil's Disciple." Melodrama - it  
certainly was a scream - priceless sarcasm.

Sorry you weren't around last Saturday - I  
stopped by the lab. for a minute.

You asked about Beatty - I surely am  
as much in love with her as before - even  
more so. She is darling & I adore her, In fact  
I like the whole crowd as well as ever - Mr  
Sponsler is as nice as he can be & of course  
Carol & Beacie are perfect. I have my office in with  
Emily this year & like her a lot, too. And Dr Miller is  
perfect.

Tom Howell came to see us the other day  
and had lunch with us. He is at the Ranch this  
year.

Keep me posted on all the Pomona goe - &  
on how Tom is getting along.

Sincerely yours,

Midy

Bickleton, Wash.  
Oct. 5, 1928

Dear Prof. Jones:

Had you begun to think you were never going to get any more flower specimens?

I am sorry not to have gotten more of the late summer flowers but I have been pretty much under the weather this summer. We are expecting a new member in the family this winter. The past two or three weeks I have felt so much better and my! the many things that I must get done.

We had some very fine yielding grain and then some not so fine. But the price can't seem to get above a dollar. Just the same Albert is putting another crop into the ground. Has about a week's seeding yet to do. The first drilled is coming thru now. We need a good rain or I'm afraid the grain won't come up even.

Albert and Harriett are well.

How have you been this summer?

Fall swooped down upon us in good shape night before last. Our first frost was a freeze.

The Yakima valley had a good fruit crop this year. I didn't get as much fruit canned as usual. Only about 200 qts. this season.

I have several other letters long overdue that must be written.

Sincerely yours,  
Cora

JUNIUS B. SMITH

(ADDRESS MAIL P.O. 319)  
SALT LAKE CITY, UTAH

# 165

Oct. 12, 1928.

Dear Professor:

I got home okeh on the 1st of the month and finally got settled to work again. I had a wonderful trip and wish to thank you for the wonderful time you showed me while there.

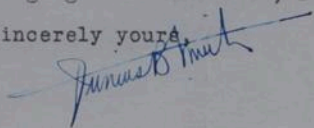

In going through some of my things I ran across the enclosed letter, which seems to have been in a checker book you returned several years ago, which you had borrowed. I suppose you were using it as a book marker.

I picked up a bad cold in California and still have it. The fog near the Coast was "unusual".

Well, I've got to get to work if I expect to continue to eat, so I'll ring off.

Wishing you a Merry Christmas and a Happy New Year in case I don't get around to writing again before then, I remain,

Sincerely yours

P. S. Checkers here seems to be defunct. It will only be a few years when the members of the club will pass on and as there are no new members and haven't been for years, the end is in sight. I've wrapped up all my checker books and put them away. I never expect to again take the game seriously.

J.B.S.

Virginia Gold Mining & Milling Co.

W. A. Byers, President - Office 1462 South 9th East

Salt Lake City, Utah

166

October 24, 1928.

Dear Professor Jones,

I have not replied to your letter of last March, because there were three propositions to be disposed of.

At the stock-holders' meeting, in March, a resolution was passed to sell the entire property for the best figure, and distribute the amount pro rata.

None of the propositions went thru, and now the season is over for this year, - as the property could not be examined.

I should like to sell the mine, rather than to "put it upon a paying basis".

To sell control would place present stockholders at the mercy of those holding it.

Mr Byers and myself have always had the interest of the stock-holders at heart, (altho none have offered any solution or help) and if the venture proved a success, all would be benefited; if it fails, then all would go down together.

I shall be glad to receive any suggestion you may have relative to the disposing of the property.

Sincerely yours  
Louise D. Byers.

Dear Mr Jones:

Your letter of December 24 was received yesterday and I immediately sent you the #56 Silver Anniversary Acousticon. The free trial period, Mr Jones, for ten days. If a longer test is desired it could only be under our rental plan, the fee for which is \$10.00 for thirty days, payable in advance. Rental dates from expiration of free trial period and amount of rental paid is applied on the purchase price of the Acousticon. The Acousticon will no doubt be in your possession over the ten day offer for two Sundays and I sincerely trust you will find that time ample in which to make your decision.

The #56 batteries are 65¢ each. Including postage to your city one is 73¢ or two \$1.44. They can be supplied from this office at any time.

I will be glad to have a report of your experiences with the new Acousticon so I can help you on any points in doubt.

Very cordially yours,

General Manager

ADDRESS REPLY TO SAN FRANCISCO OFFICE  
554 MONADNOCK BUILDING - 681 MARKET STREET

SAN FRANCISCO, CAL. Dec. 27, 1928

Dear Mr Jones:

I am delighted to inform you that your Silver Anniversary Model Acousticon has been shipped.

This is the first step toward better hearing for you.

Upon the arrival of the Acousticon, your next step, after admiring its beauty, is to quietly but carefully read the book of instructions from cover to cover.

The new Acousticon is wonderfully efficient...but much, very much, depends upon you.

The Silver Anniversary Model Acousticon is designed to meet all your hearing needs. It is literally "a complete set" of hearing aids. It is the most powerful, the most convenient and the least conspicuous of all hearing aids.

Your hearing needs vary under different conditions. Two earpieces are provided to meet different needs. The smaller earpiece is not intended to replace the larger one. Each has a different function and each should be used under the proper conditions and at the proper time. In the privacy of the home, and intimate friends, use the larger earpiece. The smaller earpiece may then be reserved for use in public.

The beginner should ALWAYS start with the larger earpiece. The very best thing for you to do would be to put the small earpiece out of sight until you have become somewhat familiar with the Acousticon. You will find it easier to learn how to use the Acousticon with the larger earpiece.

When you first use the Acousticon, you are going to hear many sounds and noises IN ADDITION to those you want to hear. This is perfectly natural and is a good sign. It is a sure indication that the Acousticon is bringing sounds, hitherto lacking, to your hearing organs. Remember that all normal hearing persons also hear these additional sounds; but they have trained their organs to automatically disregard all sounds EXCEPT THOSE THEY WISH TO HEAR. Because your hearing nerves have been long inactive, they have lost this power of excluding undesired sounds.

For a long period, your aural organs have not been exercised and stimulated by impulses of sound. They, therefore, do not know how to receive sound. The same thing applies to every muscle in the body. Put a man's legs in a plaster cast for several months and at the end of that period, he will have to relearn how to walk. So, you will have to learn again how to hear only the sounds you wish to hear. This is not as hard as it sounds. Babies learn to disregard noises without effort; adults learn almost as easily.

ACOUSTICON --- A SCIENTIFIC HEARING AID OF PROVEN MERIT

The larger earpiece will provide the electrical stimulation and exercise which your hearing organs require. Therefore, use it exclusively until you have acquired some familiarity with the Acousticon and have begun to enjoy its great benefits. You may then begin using the smaller earpiece; but, before doing so, be sure that all excess wax has been removed from the ear to prevent the opening from becoming clogged.

Don't try to wear the headband at first, but hold the larger earpiece in your hand. At the beginning, it will be better to rest the rim of the earpiece against the ear and tilt the opposite end outward so that it is about one-half inch from the ear, instead of holding the earpiece flat against the ear. Later, when you wear the headband, the earpiece is worn snugly pressed to the ear.

I want to congratulate you on having taken this first step toward better hearing. I shall try to help and encourage you during the all-important trial period. I cannot conclude this letter without the kindly advice: HASTEN SLOWLY.

Cordially yours,

General Manager  
Pacific Coast Division

Dear Mr Jones:

This will acknowledge receipt of your letter of December 31 in connection with #56 Silver Anniversary Acousticon sent you on December 27 for ten days free trial. We understood previously, Mr Jones, your desire was to have two Sundays test of the Acousticon and figured by your receiving it on the 29th that would give you the two Sundays test under the regular ten day free trial offer. While it is customary to charge rental for days over the ten day trial, I will be glad to make an exception in your case and grant the four days additional which you desire in order that you may convince yourself of the efficiency of the Acousticon.

The #56 batteries are 65¢ each. Including postage to your city one is 73¢ or two \$1.44. They can be supplied from this office at any time.

Best wishes for the New Year,

Very cordially yours,

L. L. COOKE  
Chief Instruction Engineer

# 170

# L.L. Cooke School of Electricity

2132-2158 LAWRENCE AVENUE  
Chicago

January 19, 1929.

Dear Mr. Jones:-

Another year has passed. A new year is just beginning.

I have lots of things to be thankful for about the year that is gone. Most of all, I am thankful for the work I am privileged to do.

My work is to help other people -- to bring happiness into other homes. During the year 1928 it was my good fortune to be able to help hundreds of men into better jobs -- into positions that pay them from \$20 to \$50 more, every week, than they were earning last year. And, by helping these men I have been able to make a good many wives and mothers more happy. Hundreds of little children had a better Christmas this year because of what I had been able to do for their fathers and brothers.

Do you wonder that I am happy, and that I say I have lots to be thankful for?

And then, there is another thing -- the friendship of "My Boys". There is nothing in the world like a true friend, and somehow, after every Christmas season, I can't help but think how extremely fortunate I am for the friendship and appreciation of so many men whom I have helped and am helping now. If you could just read some of the wonderful letters that come to me every Christmas, I am sure you would understand.

And, you are one of "My Boys" -- one of my friends. I'm trying to help you, just as I have so many others.

Now, a new year is just starting. During 1929, thousands of new Electrical positions will be open -- positions that pay from \$200 to \$500 a month. "My Boys" are going to get those positions. They are going to get them because they have been trained -- because they know Electricity.

But the fellows that do get them are going to be the ones that are ready. They will be the ones who have studied their Work-Sheets carefully and conscientiously, and who are "go-getters" -- taking advantage of every opportunity.

LLC-CL

I want you to be one of them. I want you to get into a big-pay job in 1929. I want 1929 to be your big year, and, it can be if you will dig in and make it so. I'm willing and anxious to do everything I can to help you, just like I have others. But, before I can do a thing for you, you must help yourself. You must learn Electricity -- right.

You see, I'm mighty proud of the L. L. Cooke School. I'm proud of its reputation, and of the fact that my graduates are getting so many of the big Electrical positions. And, the L. L. Cooke School is your school, too. It's just as much your school as any college would be to one of its students. I want you to be proud of your school -- I want you to be loyal to it. I want you to help make it the biggest and best in the world.

And you can help.

After all, you know, the reputation of any school depends upon the number of successful graduates it has. The more men who graduate from my Training, and make good in Electricity, the better will be the reputation of the school. So, the best way you can show your loyalty is by making good yourself.

You will be helping yourself, helping me, and helping your school. Then, if you will make up your mind that in 1929 you are going to make good -- that when 1930 comes, you, too, are going to be making at least \$250 a month.

How about it? Will you do it?

But there is one other way you can prove your loyalty to your school and your friendship for me -- and make some money for yourself at the same time.

Here it is.

I'm going to ask "My Boys" a personal favor this year. I'm going to ask them to help me on a very important matter.

Every school -- even a big college or university -- has to have a certain number of new students each year, or it cannot exist. Now, I can get a certain number of students by advertising, and of course I do that. But it's mighty expensive, and I would a whole lot rather spend that money on new lessons and services for my students.

So, this year I'm going to ask "My Boys" to help me get my students. I'm not going to ask them to do any work -- I'll do that

LLC-CLJ

myself. All I'm going to ask is that everyone of them give me the names of four men -- four men whom he really thinks would be interested in Electricity and my Training.

Just four names -- surely that isn't much to ask. Surely you'll do that for me and your school.

I'll do the rest. I'll write each one of those men, and for everyone who enrolls for my Training, I'll give you \$12.50.

That's fair enough, isn't it? Why, if you're at all careful in giving me names, at least two of them ought to enroll, and that would mean \$25 in your pocket. And if all four enrolled, it would be \$50!

And still I'll be saving money. Because it would cost me more than that to get new students through advertising.

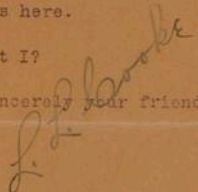

I'm writing everyone of my students and asking him to do the same thing for me. I know they all will, and I know you will want to do your share.

It's easy to put it off and forget about it, or to think that it doesn't mean very much. But it does -- it means a lot to me, and I know you and the rest of the "boys" won't fail me.

So fill out the little slip I have enclosed, and mail it to me right away -- to-day. Just stick in the special envelope I am enclosing and drop it in the mail-box. You don't have to put a stamp on it - I'll pay the postage when it gets here.

I can depend on you, can't I?

Sincerely your friend,

P. S. By the way, you know the old school has a new course in Engineering Drafting. So, if you should happen to know of anybody that would be more interested in Drafting than Electricity, put his name on the special slip I am enclosing for that purpose. Of course, I can offer you the same \$12.50 for new Drafting students, too.

BOTANY AND BACTERIOLOGY DEPARTMENT

Jan. 20, 1929.

Professor Marcus E. Jones  
Curator of Botany  
Pomona College  
Claremont, California.

My dear Professor Jones:

I am preparing a host index of fungi and diseases in Montana for the Plant Disease Survey, and received valuable assistance from your article: Jones, Marcus E., Montana Botany Notes. University of Montana Bulletin 61. 1910. On page 64, the name, Thecaspora, occurs. I am unfamiliar with this name, and suspect that it is misspelled, through some typographical error, to which printers are particularly susceptible when dealing with technical names. Is this name meant to be Thecospora, Thecopsora, or Thecaphora? I would like to add the record or your collection of the fungus on Rubus ideaus and Astragalus flexuosus to my card index, so would appreciate it if you would clarify my dilemma regarding this name, Thecaspora.

Hoping that you can conveniently aid me in this matter, I am,

Yours sincerely,  
*P. A. Young,*  
Dr. P. A. Young,  
Assistant Botanist.

Dr. Marcus E. Jones  
Pomona College  
Claremont, California

Dear Sir,

You will please find attached an official  
order for one copy of your

REVISION of North American species of Astragalus

5.00

I trust that this catches you in Claremont  
and that you will be able to ship the book. Please  
either forward at printed matter rate, or by mail,  
adding charge to bill. Direct shipment and billing  
to this Library will expedite payment.

I am an old Pomona student, but there are  
very few persons in Claremont who date back to my  
time.

Very truly yours,

Librarian

Goods ordered on this Requisition should be charged to University of Georgia

with letter of 25-I-1929

# University of Georgia

from ORDER BURNET

No one is authorized to make bills on the account of the University except on these orders, which must be signed by Purchasing Agent.

All invoices must be itemized and rendered in duplicate <sup>triplicate</sup> to E. L. GRIGGS, Purchasing Agent. This order number must be placed on invoices and on each package.

DEPARTMENT OF BOTANY

Prof. Marcus E. Jones,  
Claremont California.

Dear Prof. Jones:

Thanks very much for the determinations. It was a real shock to get such speedy determinations. I have been in the habit of waiting months and even years.

I am taking the liberty of mailing you to day a number of mounted specimens that I collected near the Dixie country two years ago. I am sorry that I sent off my duplicate specimens elsewhere shortly after collecting them and at this late date have no returns. I shall want these returned, and hope that I may repay you for this trouble by sending you promptly duplicate specimens of the material that I hope to collect next summer in the regions you suggested.

I am also sending in this same package the three new species that Pennell determined. The two Pentstemons are for you, but since I have no other specimens of the Synthyris, I shall only lend you this one. I am sorry that I have not a better specimen of *P. cottamii*. My own specimen here is much better than the one I am sending you, and should you like to study mine, I shall gladly send it to you.

Sincerely,

*Walter P. Cottam*

*was with him on Timpangoas climb about 1923 & was greatly stimulated by M.E.J. in study of Botany -*

Dear Sir:

I understand that you published a paper some time ago called "Willows of the Great Basin" Could you tell me how and where I can get a copy of this paper? I am pursuing a study which I hope some day will become a monograph of the North American Salices. Naturally, I desire to get all the literature I can upon the subject: at present I am especially anxious to have access to all literature pertaining to willows west of the Rocky Mountains.

Very truly yours

Lincoln Allison

Re: Sierra Club Trip  
Santa Cruz.

Dear Mr. Jones:

Have waited to answer your letter until we had more definite information. Eaton's have taken off the privilege of camping out. So reserve only for Eaton's camp furnishing lodgings and meals. Your letter had been opened before reaching me. Did you send any remittance? Will cancel seat fare as per your letter. Will hold your reservations for further confirmation.

Very truly yours,  
*E. H. Buck*
