The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear Mr Safford,

Thank you for  
so kindly sending me  
your account of the  
classification of  
Ammonia.

It is most interesting &  
of very great service  
I have seen one or two

points that seem to  
me in looking over  
our Herbarium with  
revision.

Have you studied

A. Walker S. Moore

It is certainly exceedingly  
close to if not identical  
with A. nutans R. & S. Trevi

Mr Fawcett concurs  
with me in this view.

Do you know Annuaire  
angustifolia Huber?

I much regret we are unable to  
send these plants to you for your  
inspection but we should be  
extremely pleased to see you here  
again thanking you for your  
paper Yours very truly

Edmund Baker.
