About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Francis Tuckett, Esq. }

Kensington, 19. Decr. 1826.

Sir,

I have to acknowledge the receipt of your letter, enclosing 4 pounds, and ordering the trees which I now send you, according to your instructions of yesterday.

I am not able to make up the order, as to the Maples and the Hornbeams, having very few of the former and none left of the latter. But, I have Black walnuts, which was not on my list when you wrote to me, and of these I send a number equal to that which you have ordered of the others of the same class. — I make up the deficiency with Strawberry plants, and have nothing to charge for packing.

Hoping that your plantation will prosper,

I am,

Sir,

Your most obedient Servant,

W. G. Cobbett.
