The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

*Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

*About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

San Juan 5 Dec. 1899.

Dear Mr. Coville,

I should have stated that we have been unable to develop more than a small part of the plates exposed. Facilities are very limited, but the question of time has been the important one and the climate is such that it seemed entirely safe to repack the exposed plates for development at home.

Mr. Collins' methods are so generally effective that only a small percentage of

It will probably take Collins  
three weeks or more to develop  
and print the entire series,  
so that unless he is to have help  
or the work is to be let out  
he ought ~~to have~~ not to be  
expected to do much else for  
some time, if the desire is  
still to issue a report as  
soon as possible. He is  
working on them now whenever  
opportunity offers and may accomplish  
considerable before we leave.

Very respectfully  
O. P. Cook
