The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Mr. Coville.

The Dictionary of English names of plants gives "Scotch thistle (of artists) Carduus marianus, (of gardeners) Onopordon acanthium. Sowerby's English Botany gives Onopordon acanthium only. Both species are native in Continental Europe, especially in the Mediterranean region and are supposed to have been introduced into England and Scotland.

Reichenbach's Flora Germanica Vol. ~~15~~ xv. has good illustrations of both species. Sowerby's English Botany Vol. v

2

has colored illustrations
of both species. The Century
Dictionary has illustrations
of both.

In addition to these Britzel,
Iconum Bot. Index gives the
following citations.

Carduus nutans

Fl. Dan. 4, 675.

Schlk. Handb. 228.
