We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Engler, A.

Berlin W. Grunewaldstr. 6/7
Koen. botan. Museum.

26. 12. 93.

Dear Sir!

It will be me a great pleasure
to identify the plants of Kiliman-
jaro, which you will send. As
we have here the most of the origi-
nal plants of the Kilimanjaro, it
will not be a difficult work to me,
especially when you send good speci-
mens. As I and the officers of the
Museum are now occupied espe-
cially by the determination of East-

African plants, it should be agree-
able to have the collection as soon
as possible; therefore I believe,
it is the best, when You send the
collection directly ~~by post~~ and not
together with other things by the
Smithsonian Institution.

I beg You to address the collection
an das Kaiser botanische Museum
Berlin W.

Grünefeldstr 6/7

When You like, the list of the plants
may be published in the Smithsonian
Institution, but I wish to

Engler, A.

publish ~~also~~ the diagnoses of the
new species also in the Botanische
Jahrbücher.

Yours very sincerely

A Engler
