We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Change of address noted January 25-95.

OK Ornithology -
OK Forestry.187 East Ferry St., Buffalo, N.Y.
Jan. 12, 1895.Sec. of Agriculture,
Washington, D.C.

Dear Sir: I have been on the mailing list of the department of botany for some time at Machus, N.Y. Will you kindly change my address to 187 East Ferry St., Buffalo, N.Y. The last publication received by me was No. 2 of Vol III of the Contributions from the U.S. National Herbarium. If there have been any other publications since that one, will you kindly send them to me. I do not wish to miss any part of our contributions.

I would thank you also for "North American Fauna No 7." Revision of nomenclature of N. A. forest-trees, and the monographs of timber trees.

Thanking you for the many favors received.
