About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Uppsala d. 3/8 1910.

Kära Doktor!

Mycket tacksam för de öfversända svam-
parne, får jag meddela, att de till höra den
sällsynta variabel Sclerotium vulgare.

Jag begagnar tillfället att omtala, att Lek-
tor S. Almqvist meddelat mig, att han efter
riktigt förhårande af en anmärkning af denna
svamp blef sjuk i mycket oroande grad —
dels i motsats till hvad jag i min tryffel-
uppsats på grund af meddelade från flera per-
soner anförd. Men A. hade förut utän ringa-
re slagenhet ätit smärre portioner och funnit
anmärkningen saligt. Försigtighet vill den förhå-
rande synes därför vara af nöden.

Högaktningfullt

Th. M. Friess

[Till Dr. E. Lindell, som öfversände afvannämnda a
Hallands Väderö första svamp.]
