About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Ans. Nov. 26

New London, Conn., Nov. 23 1897

Mr. Frederick V. Coville,

Botanist, U. S. Dept. of Agriculture.

Dear Sir:—

I send you herewith under separate cover a specimen of *Juncus secundus* from this vicinity, which is beyond the range assigned to this species in the Illustrated Flora. I have found it at several points not far from this city.

With the *Juncus* I have included *Prunus Gravesii* Small, from the type locality.

Hoping these may be of some interest, I am

Very truly yours,

Charles B. Graves

Div. No. 1611.

Report *Juncus secundus* & *Prunus gravesii*

Disposal Herb.
