The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

NATIVE TREES, SHRUBS, PLANTS AND SEEDS OUR SPECIALTY.

Particular attention given to evergreen covering plants.

LEBANON SPRINGS, N. Y., U. S. A.

Sept. 21 1895

Prof. F. V. Coville
Washington, D. C.

Dear Sir — We gladly send
you by this mail the copies of our
last season's & present season's catalogs
as requested by you at the Springfield
meeting. Would have sent them sooner
but have not been in our office since
till now. Have just returned from
Nova Scotia whither we went on a botanical
"exploring" trip directly after the Association
meeting. Results — a pleasant trip — some sur-
prises — some "snags"! The latter are being
assorted gradually. (*Empetrum nigrum* among them.)

If you get in this region again be sure &
call if you can & try some Lacomie Mt. botany
— a fine field & collection, team & time &
guides all yours. Our little of mind & matter on
the region are at your service.

In the piece enclosed (from Yarmouth, N. S.) *Loiseleuria*
procumbens or what? ^(saw no buds) it grows in clumps 2 inches high on
the summit of Cape Forchu. Will send some fruit
from the latter kind to you and from my brother Arthur H. H.
Coville's ground Walter H. Harrison.
