#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear Sir,

W. Smith Esq.  
113 Fleet Street

Signate of N. Loudon

I have sent in as much as will make a third sheet, but it contains so many cuts that I do not think it will be possible to get it printed in time. I should think much the best way would be to publish only the two sheets which would produce

Wm Smith Esq

no interruption in the  
appearance of the work.  
This however I leave  
entirely to you.

I remain

Dear Sir,

Yours sincerely  
J. C. Loudon
