We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

G. V. Correll

Botanist

Washington.

My dear Sir:

Report of the
Botanist just received for which please
accept my thanks. If you find in
an Additional Assistant for the
work outlined on Page 172. I should
very much like to be considered as
an applicant for the position as
I wish to devote the rest of my
life, to Botany and in such a
position I could further my knowledge
on the distribution of the American
Flora, a work that is needed. As I
am not pecuniarily able to branch
out on my own, inclinations I am
at present so prevented from doing
work which after thirty years.

of botanical work & a personal
herb. of at least 4000 species
I feel that I should be competent
to engage in. Kindly let me
hear from you on the subject.

Please send me the "Flora of
Southwestern Kansas" as I have not
received it. Can you also send me
Bebb's report on the Willows of the
Sandberg ex. ^{to} Idaho in 1892 contained
in Vol. 3, no. 4. Contributions U. S. N. H.

Very truly yours.

Thomas F. Lucy M. D.
