We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

M.H. Gray 1896

Div No 1123.

Dear Mr. Coulle

I am sending a small parcel
by mail to-day which contains a few grasses for Prof.
Scudder, one Chrysopileum alternifolium for Mr. Rose and
all the Luzula I have for yourself. I thought I had
some Luzula specimens but these are the lot. I
have written Mr. Rose about Chrysopileum. Please have
the mounted sheets returned to my father when Mr.
Rose is through with them. I am taking some of the
specimens over to Kew with me for comparison with
northern specimens there

Yours very truly

J. M. Macoun

Will you please send my father the distribution of
Gumma Asiatum Hackii, Luzula arcuata Unalascensis, Luzula
confusa latifolia, and Luzula cuneata Indica so that
he may include it in my paper, please list.?

Yours,
