The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

#### *Usage guidelines*

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

#### *About the Institute*

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Report Conringia orientalis Aug 14, 1897

Disposal Weed Coll.

Mr. L. H. Dewey

Washington. D.C.

Dear Sir:—

I have received your Circular No 10 - on three new weeds of the Mustard Family. I send you to-day in another package a plant that seems to me to be Conringia orientalis (L.) Dudge. - It was brought in to me by a farmer friend in 1894 having been found in a wheat field in the northern part of this County; but I was unable to identify it.

I wonder why it is not in the new Britton & Brown Flora.

Please ask Prof Scribn. to place my name on the list of those receiving the publications of his department.

Respectfully

Lycurgus R. Moyer
