About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Box 464.

Sagam, Utah, Sept. 27/89

Honorable F. V. Coville.

Chief of Botany, Washington D.C.

Dear Sir:

My collection of western specimens has been sent you by mail using the frank as you directed.

Some are sent by number only. I have not yet received all the identifications from specialists and I am obliged to have more labels printed. I

will forward them as soon as possible. I wished to send everything away at once, as I expect to leave soon -

I enclose a specimen of alga which was omitted by an oversight, also the bill and some views of Logan Canon

I trust the plants will reach you safely and that you will find them satisfactory -

Very respectfully yours
A. Isabel Hurlford.

Compliments of
H. Laugel Maudslayi
