About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

MEDIA, PA.,

11/7-96.

Mr. F. V. Coville, Washington, D.C.

Dear Sir:- Through the kindness of Mr. B. H. Canby I had the privilege of examining an *Arctostaphylos* collected by you at Mt. Vernon, which, I wrote Mr. C. seemed I saccharata such as I had collected in Lassafras River, Md. I expressed a desire for more specimens, if they were obtainable, and today receive from Mr. C. a package containing those you have sent for me. I am obliged for these, and hope you will indicate what I shall send you in return. I can furnish you with the Elk River *Arctostaphylos*, the *A. riparia* (Delmar R) etc. You will find your plant described in *Botanical Gazette*, 1896 pp 221-222.

Yours very truly

T. Chalkley Palmer
