The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized version of an item from our Archives.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

SANDBERG'S
Botanical Exchange Bureau.

501 CENTRAL AVENUE.

Minneapolis, Minn., Feb 15 1895

Trina Horn

Ernst Weisner
peak from the camp at Lake
Wabau on the Illinois river etc
It-539 is either *Spiraea Douglasii* or
S. pyramidalis (Gruenow & Speg.) it is
entirely diff from 249. (with *S. betulifolia*)
Rosa blanda of Head of Little Rock
river is undoubtedly *Rosa Woodsii*

The mosses were gathered as you suggested
in your letter you will find the ^{time} ~~month~~
when collected the same as the flowering
plants collected at those places
as those at Lemmon April - May
Farmington January July etc

Yours

W. S. S.

Carex Torreyi Tuck (det LHB)

Local *Hennepin Co Minn*

Habit *Shady hillside*

Date *June 1890* No.

Ex-Herb. J. H. SANDBERG.
