About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Ans. Mch. 28.

Scott, Wm.

Canada.

March 25. 1895

Dear Sir.

I beg to acknowledge the receipt of Vol. I No. 9 of Contributions from the U.S. National Herbarium. Accept of my sincerest thanks for it.

Some years ago I received Vol II No. 1. containing an account of the Polypetalae of Western Texas. Have I been overlooked in the distribution or has nothing more been done on this vol.

An answer would greatly oblige me.

I remain,

Hon. J. Sterling Morton,
Secy of Agriculture

yours faithfully
Wm. Scott,
